A brief view of the Indian debt will next be requisite. In the early period of British connexion with India, the territorial revenues of the country probably aided commerce, in the latter period commerce undoubtedly aided territory, and for 15 years the Presidencies of Madras and Bombay have had an

annual deficit of the sum requisite to meet political charges. The Indian Government was, therefore, obliged to have recourse to borrow a sufficiency to meet the deficit which the commercial profits of the tea trade failed to supply; and the territorial debt of India was at four different periods, thus—

* Principally composed of the loans and treasury notes.
 † Not bearing interest, and consisting for the greater part of arrears of salaries and allowances due to civil officers, of pay due to the military (who in Bengal are kept two months in arrear always), and of deposits.

Of the whole interest of the Indian debt, 927,000*l.*, is subject to the option of having the interest payable in England, and in 1830 the sum of 450,000*l.* was actually demanded: the average rate of interest was six per cent. in 1814, and five per cent. in 1828.

Of this Indian debt, that of Bengal is the principal, the fixed or registered debt of which, with the relative proportion held by Europeans and natives was, in 1830 and in 1833—

Of the first or six per cent. remittable loan, the principal, when repaid, was demandable in bills on England at the rate of 2*s.* 6*d.* the Sicca rupee, the interest being intermediately payable half-yearly, either in cash in India, or, if the proprietors resided in Europe, and demanded it in that form, by bills at the rate of 2*s.* 1*d.* This loan has been recently paid off. The other loans, both principal and interest, are demandable only in India; but to the holders of the second (five per cent. of 1823), an option was given of receiving their interest (which is payable half-yearly) in bills at the rate of 2*s.* 1*d.* (subsequently reduced to 1*s.* 11*d.*), during the pleasure of the home authorities. The third and fourth

loans have the interest thereon paid quarterly to all holders whosoever resident, either in cash or in bills, at the rate of 2*s.*, during the pleasure of the home authorities. The five per cent. loan of 1823 is repayable only by annual instalments of one and a half crore of rupees; the notes first entered in the register having the advantage of being least liable to discharge. The whole debt is now fully recognised by the Legislature, and the remittable loan paper bears a premium in the Indian market of from 30 to 40 per cent., and consists solely of the debt of 1822, viz. 7,47,38,700 rupees.

The following is a detailed comparative statement of the Indian debt in 1809 and in 1827:—

Debt, in Sicca Rupees, on the 30th of April, 1809.

	29,75,38,029	10,01,26,576	39,76,64,785

The debts of India in 1833 were as follows. Debts bearing interest: Bengal, about 32,000,000*l.*; Madras, 3,000,000*l.*; Bombay, 630,000*l.* Not bearing interest: Bengal, 8,000,000*l.*; Madras, 700,000*l.*; Bombay, 300,000*l.* The five per cent. loan is the principal debt: it amounts in Bengal to 18,000,000*l.*; and in Madras to 2,500,000*l.*; in Bombay, none. The Treasury notes issued by the Bengal Government amount to 700,000*l.*

The home bond debt of the E. I. Company, amounting to 3,469,000*l.*, is composed of securities issued by the Company under their common seal, Parliament having authorised their borrowing money to a certain extent, and limiting its subsequent reduction to 3,000,000*l.* The rate of interest paid in 1831 on this debt was two and a half per cent.

An Account of the Public Debts, bearing Interest, outstanding at the several Presidencies in the East Indies, on the 30th April, 1835; also of the Rates and Annual Amount of Interest payable thereon. (Commons Parliamentary Paper, 19th December, 1837, No. 51.)

} Accounts not made up.

By the new E. I. Charter the Company's trade is placed in abeyance, and their whole assets, amounting to upwards of 21,000,000*l.* sterling, appropriated to the India territory, excepting 2,000,000*l.* to be invested as a sinking fund for the redemption of the capital stock of the E. I. C. proprietors (6,000,000*l.*) on the termination of 40 years, at the rate of 5*l.* 5*s.* for every 100*l.* stock; the remainder of the assets, as soon as realised, is to be appropriated, after payment of pensions and other charges arising out of the new arrangement, towards the liquidation of the six per cent. remittable loan, which amounts to about 9,000,000*l.* sterling.

The additional charges on the revenue of India by the new E. I. Charter (3 and 4 William IV. c. 85.) are thus stated in a Parliamentary return, No. 72, ordered to be printed 23d March, 1835.

Salaries of the Governor-General and Council, formerly S. rupees 537,000 now (by the late Act) S. R. 624,000; increase R. 87,000; new Government at Agra, the chief there of S. R. 120,000; other expenses, 300,000; total, R. 420,000. Increase of salaries of the other Governors and members of Council, on a scale which will cause a net increase, of R. 12,000. Total of Government increase, S. R. 519,000. Increased expense of Ecclesiastical establishment, R. 10,000; ditto on account of law commissioners, established at R. 800,000; grand total of estimated new and increased charges, S. R. 829,900.

1837....	Accounts not made up for a later period than 1835-36.									

* In the above statement, from the year 1828, the allowances and assignments payable to Native Princes, and others under treaties, amounting to upwards of a million and a half per annum; and the charges of collecting the revenue, including the cost of the opium and salt, amounting to upwards of two millions and a half more, have been excluded in order to arrive at the real produce of the revenue.

In the tabular statement, down to the year 1827, the gross revenues are shewn; and the rate of converting the Indian money into sterling is 16 per cent. higher than the rate at present used.

These alterations in the system of drawing up the accounts of the Indian finances, were suggested by Mr. James Cosmo Melvill, the Company's Financial Secretary, in the late arrangements under the New Charter Act, and sanctioned by the Court of Directors and the Commissioners for Indian Affairs.

† Deficit of 852,217.

As considerable interest is felt in this country for what is called the "Pilgrim Tax" on idolatrous worship in India. The following statement, derived from official sources, is given in the *Gyannaneshum*, published at Calcutta.

By Reg. XII. of 1835, Government bound itself to continue the established donation for the support of the temple of Juggurnauth, and with a view to the exclusion of European interference, and the better management of the internal affairs of the temple, the superintendence of that edifice is, by Reg. IV. of 1809, vested in the Rajah of Khoordah. In 1808, during Lord Minto's administration, this donation was, after a review of the expenses incurred by the preceding Government, fixed at about Sa. Rs. 55,000, and as the priests of the temple represented their inability to procure the woollen cloths necessary for the *ruths*, Government, in conformity with the practice of the soubadar of Orissa, engaged at the same time to furnish that also, which was accordingly done, up to the abolition of the Company's warehouses in 1830, when a sum of about Rs. 1,000, was agreed to be paid in lieu. The lands granted by preceding Governments for the support of the temple, yield about Rs. 21,000 per annum; the balance, therefore, of Rs. 36,000, has to be made good from other sources. For the first two years after our acquisition of the Cuttack district, no tax on pilgrims was levied at Pooree. Since that period, the expenses of the temple have been defrayed by a tax on the pilgrims resorting to that shrine; and as it is a matter of curiosity to compare the sums collected by Government

at three celebrated places where a tax on pilgrims is imposed, we here subjoin a statement up to 1830, of the gross collections, expenses, and receipts of the tax at Juggurnauth, Gyah, and Allahabad.

Collections from 1810-11 to 1830-31 at Juggurnauth 21 years :		
Gross collection	Rs. 24,37,570	
Annual average	1,16,074	
Total charges	11,54,440	
Annual average	54,937	
Net receipts	12,87,790	
Collections at Allahabad of Meer Buhar duties, from 1810-12 to 1830-31, 24 years :		
Gross collections	Rs. 16,46,657	
Annual average	82,332	
Total charges	1,40,783	
Annual average	7,036	
Net receipts	15,05,869	
Annual average	75,293	

Statement of duties on pilgrims at Gyah, from 1803-4 to 1830-31, 24 years.		
Gross collections	Rs. 63,46,762	
Annual average	2,29,670	
Total charges	9,97,183	
Annual average	35,611	
Net receipts	53,49,573	
Annual average	2,19,056	

We regret that it is not in our power to continue the above statement up to the current year.

XII. The commerce of India being a subject of great importance, the fullest details have been collected from the India House, Custom House, Board of Trade, &c.

* Including Mauritius. † Of this, 516,077½ was Mauritius. ‡ Of this, 527,904½ was Mauritius; 524,017½ Mauritius sugar, 1833; 533,890½ ditto, 1834. § East Indies alone.

Notwithstanding the great efforts made, since 1814, to procure extensive supplies from the Eastern hemisphere, and although several new islands and stations have been made marts of commerce by British merchants, we perceive a stationary or declining trade in almost every article of Eastern production; whereas the supplies from the territories of British India alone ought to have shewn an immense increase. Had it not been for the supplies received from Singapore, Ceylon, Java, Australasia, and the whole Pacific and Indian Ocean, a vast decrease would have been seen in this table.

Total Value of the Imports into Great Britain from all Places Eastward of the Cape of Good Hope (except China), according to the Prices at the East India Company's Sales in the respective Years.

In the ensuing tables the interior trade of Bengal, Madras, and Bombay will be shewn. From 1812 to 1829, the returns were prepared for Parliament in 1832; the subsequent years were collated by myself and my assistant at the India House. Although the data are not as ample as could be wished, they present full scope for the reflecting mind of a philosophic or merely commercial statesman.

In few or none of the staples of Indian commerce of India

Quantity or Value of each Article of Indian Production or Manufacture at the Port of Calcutta, from the Interior of the Presidency of Bengal.

In few or none of the above articles do we perceive any indication of an augmenting supply of the staples of Indian produce. Cotton was larger in amount 20 years ago than at present. So also as regards indigo, lac, ghee, jagree, &c. If returns could be had for all articles a similar decline would be seen. The commerce of India was larger in amount and more valuable 40 years ago than it is at present.

HINDOSTAN.—INTERIOR COMMERCE OF BENGAL.

The statement given in this and in the preceding page is most important; it is an accurate list demonstrative of the stationary if not retrograding condition of the people of Bengal, during a period of a quarter of a century. The piece goods column deserves attention. The quantity of sugar received at Calcutta was larger 15 years ago than it is at present: so also with silk, saltpetre, tobacco, &c.

The Quantity, or Value of each Article of Foreign Production or Manufacture (including the Productions and Manufactures of the United Kingdom), sent to the Interior of the Presidency of Bengal, from the Port of Calcutta, in each year.

SPICES. Articles of which the value is only given.

METALS.

COTTON.

Notwithstanding increased territory and population (since 1812) there has been a diminished and stationary export to the interior of Bengal, naturally corresponding with the preceding tables. Cottons whereby we have supplanted the native manufactures have alone augmented: broad cloth on which no duty is levied has diminished.

The Quantity or Value of each Article in India Production or Manufacture received at the Port of Madras, from the Interior of the Presidency of Fort St. George.

I have not been able to find any returns at the India House further back than 1824-25; a decrease in almost every article is observable in this brief period. Later as well as earlier returns would shew a more marked difference.

There were no quantities of the Bom this return specify w the interior; the pie increase at the expen

There were no returns at the India House (for 1836 and 1837) which would enable me to give the quantities of the Bombay Trade, as has been done under the heads of Calcutta and Madras. Neither does this return specify what portion of the above mentioned articles were received by sea and what portion from the interior; the piece goods and cotton twist were evidently from England, and in these alone is there an increase at the expense of the native manufacturer.

Trade between India and the Eastern Islands.—In a work of this nature, it would be impossible to enter more fully than I have already done into the detail of Indian commerce, but before closing so important a section, it will be necessary to shew the large trade carried on between Bengal, Madras and Bombay, and the Eastern Islands; the articles in

traffic at present are British and India piece goods, opium, indigo, spices, grain, salt, hardware, oil, &c.; by the following return, which extends over 17 years, it will be observed that the quantity of treasure exported from the Eastern Islands is considerable.

Commerce between Bengal, Madras, and Bombay, and the Eastern Islands.

This table is from Mr. Phipps's book, with additions (in the number of seasons) from other sources. It may not be perfectly correct in all the details, but is, doubtless, very near to the truth. We have omitted to insert the fractions in the average cost of each year. The value of the sicca rupee varies; it is about 46-100ths of a dollar, or two shillings sterling.

1836-37									

On this and on the annexed page I have given a table prepared by my assistant, Mr. Frederick Medley, from the official documents at the East India House, which shows the whole trade,—imports and exports at the three Presidencies, and in the aggregate for 34 years. The work has been one of great labour, but it is also of much value.

1833-34	3,93,68,000	...	3,93,68,000	61,03,076	...	...	...	...	...
1834-35	3,93,68,000	...	3,93,68,000	61,03,076	...	...	...	...	...
1835-36	3,93,68,000	...	3,93,68,000	61,03,076	...	...	...	...	...

With every possible accuracy that the books of each Presidency afford, I have caused the above table to be prepared : it shows an increased export, but a nearly stationary import trade for all India. The treasure imported and exported is worth examining.

With every possible accuracy that the books of each Presidency afford, I have caused the above table to be prepared: it shows an increased export, but a nearly stationary import trade for all India.

GROSS COLLECTION OF GOVERNMENT CUSTOMS AND TOWN DUTIES.

[Derived from the Reports of Internal and External Trade at the E. I. House.]

It is now time to close this array of figures, which, however monotonous, is indispensable to shew the valuable commerce which British India carries on—a trade which, however vast at present, is not a tithe of what it may become by England adopting a just and generous system towards the intelligent and industrious myriads so mysteriously subjected to her sway; so long as the two countries are united their interests are identified, and a partial or temporary benefit snatched at by the one will be certainly succeeded by the punishment, which sooner or later overtakes injustice.

The produce of the United Kingdom is admitted into the ports of India at a very low rate of duty. The following are the rates of duty chargeable on goods the produce or manufacture of the United Kingdom, imported by sea into Calcutta:—

Rates of Duty on Commerce at Calcutta.

Enumeration of Goods.	British Bottom.	Foreign Bottom.
1. Bullion and Coin	free	free.
2. Horses	free	free.
3. Marine Stores	free	2½ per cent.
4. Metals, wrought and unwrought	free	2½ per cent.

Articles not included in the above 11 items	2½ per cent.	5 per cent.

XIII. BENGAL.—Weights.—5 siccas=1 chittuck—16=1 seer=40=1 maund.

Two maunds in use; the factory maund, 74 lbs. 10 oz. 10.666 drs. avoirdupois; the bazar maund, 82 lbs. 2 oz. 2.133 drs.

Liquid Measure.—5 siccas=1 chittuck, 4=1 pouah or pice, 4=1 seer, 40=1 maund, or 5 seers=1 pussaree or measure, 8 measures=1 maund.

Grain Measure.—4 khaouks=1 ralk (or 9 lbs. avoirdupois), 4=1 paille, 16=1 scallie, 16=1 kahoon (1 kahoon=40 B. maunds.)

Long Measure.—3 jows (or barley corns)=1 finger, 4=1 hand, 3=1 span, 2=1 cubit, 4=1 fathom, 1000=1 coss (1 coss=1 mile, 1 furlong, 3 poles and 3½ yards).

Square Measure.—5 cubits or haults=1 chittuck (45 English square feet), 16=1 cottah, 20=1 biggah (14,440 square feet), 3½=1 English acre.

Gold and Silver.—4 punkhos=1 dhan (a grain), 4=1 ratty, 6½=1 anna, 16=1 tolah,=224.588 grs. troy; or 8 rutties=1 massa, 13.28=1 mohur.

MADRAS—Commercial.—Candy=20 maunds. The candy of Madras 500 lbs. avoirdupois. The maund divided into 8 vis, 320 pollams or 3200 pagodas (the vis being divided into 5 seers), each pagoda weighing 2 oz. 3 grs. The Commercial Dictionary, from which this statement is taken, observes: the garce=20 baruays or candies—the baruay=20 maunds—the maund=8 visay or vis, 320 pallams or 3200 varahuns, the varahun weighing 52½ English grains; therefore, the vis is 3 lbs. 3 oz.; the maund, 24 lbs. 2 oz.; the baruay, 482 lbs.; and the garce, 9645 lbs. avoirdupois, or nearly 4 tons 6 cwt.

Measures of Capacity.—The garce corn measure contains—80 parahs=400 marcal, the marcal=8 puddies=64 ollucks. The marcal=750 cubic inches=27 lbs. 2 oz. 2 drs. avoirdupois of fresh spring water; hence 43 marcal=15 Winchester bushels, and the garce nearly 17½ English quarter. Grain, when sold by weight, 9256½ lbs.=1 garce=18 candies=12 4-5ths maunds.

BOMBAY—Commercial.—1 tank=2.488 drs., 72=1 seer, 40=1 maund=28 lbs. avoirdupois.

Grain.—2 tipprees=1 seer, 4=1 paille, 7=1 parah, 8=1 candy=156 lbs. 12 oz. 12 drs.

Salt.—10½ adowlies=1 parah, 100=1 anna, 16=1 rash=2,572,176 cubic inches (40 tons; the anna weighs 2½ tons).

Pearl Weight.—1 tucka=0.208 gr., 13½=1 ruttee, —24=1 tank=72 grains.

Gold and Silver.—1 wall, 4.475 grs., 40=1 tolah=179 grains.

Long Measure.—16 tussoos=1 hath=18 English inches; 24 tussoos=1 guz=27 English inches.

Liquor Measure.—The seer weighs 60 Bombay rupees=1 lb. 8 oz. and 8½ drs., and 50 seers=1 maund.

XIV. The products of Hindostan are as various as they are valuable. Mr. Forbes Royle, in his interesting and valuable botanical Indian work, justly observes, "In the peninsula of India and in the neighbouring island of Ceylon, we have a climate capable of producing cinnamon, cassia, pepper, and cardamoms. The coffee grown on the Malabar coast is of so superior a quality as to be taken to Arabia and re-exported as Mocha coffee. The Tinnivelly senna brings the highest price in the London market; and there is little doubt that many other valuable products of tropical countries may be acclimated, particularly as several are already in a flourishing condition in the botanic garden at Calcutta, such as the cocoa and nutmeg, as well as the camphor, pimento, cajuput,

and cashew nut trees. In the Neilgheries a favourite site might, without doubt, be found for the *cinchona* (Peruvian bark) as well as for the different kinds of *ipeacavanha*, and as the potatoe has been introduced into almost every part of India, equal success and considerable benefit would probably result from introducing the several kinds of *arracacha* so much prized for their roots as food by the natives of South America.

"Along the coast of the Bay of Bengal the cocoa and areca nut palms flourish and abound, and the continent every where produces indigo, cotton, tobacco, sugar, and opium. The first, hardly of any note as an Indian product 30 years ago, is now imported in the largest quantities into England. The cotton is indigenous to India; many provinces seem peculiarly adapted for its culture, particularly Malwa and those to the north-west. The tobacco brought home by Dr. Wallich from Martaban was pronounced by competent judges to be equal to the best from America: Patna opium is preferred in China, and that of Malwa bids fair to rival Turkey opium in the European market. The *sugar cane* is cultivated in every part of India, but very inferior sugar has hitherto been produced; lately, however, a manufactory has been established near Calna (Burdwan), a new mine opened in the Burdwan coal formation, and very superior specimens of sugar sent home. Here the occurrence of sugar at the surface of the soil, and coal only a few feet below it, in a country where labour is so cheap, ought to be attended with decidedly favourable results. If from these we turn our attention to other products, we shall still see that there are great capabilities every where; we should at least expect them, for though India is generally looked upon as a rice country, *wheat* is imported into and sold at a profit in England, from the northern provinces; and *flour* for making starch is now one of the annual exports from Calcutta. Of dyes, medicinal drugs, resins, gums, and oils, there are great varieties, and more might be successfully introduced.

"Timber of every kind is everywhere abundant, the coasts producing teak, ebony, and many others; the interior, saul, sissoo, bamboos, and rattans; while a great variety of plants yield excellent materials for cordage. The northern and hill provinces grow at one season European grains, and at another those which are peculiar to the tropics, and many perennials of both these climates succeed equally well in the north provinces. In the hill provinces the forests are formed of oaks and pines. The hill men make their strongest ropes for crossing rivers with *hemp*, which every where abounds, and is of the finest quality. Opium, rhubarb, and turpentine, form articles of commerce, as well as musk, Thibet wool, and borax, from the other kingdoms of nature. Somewhere in the valleys at the foot of these hills, or at moderate elevations, the more generally useful productions of European countries might be successfully introduced, as the *olive* and *hop*; the latter would be particularly beneficial, as a brewery has been established in the hills, where the climate is excellent. Here also there is considerable prospect of success in the cultivation of the *tea plant*."

"In the cold seasons," Mr. Royle continues, "there are cultivated (about Saharanpore) of *graminae*, wheat, barley, oats, and millet; of the *leguminae*, peas, beans, vetch, tares, chick, and pigeon-peas; of *cruciferae*, a species of *sinapis* (mustard) and allied genera cultivated for oil seeds, and of the *umbelliferae*, the carrot, coriander, cummin, a species of *ptychotis* and *fami-*

culum pannorum, as well as of other tribes, tobacco, flax, safflower, and succory. Almost all the esculent vegetables of Europe succeed remarkably well in the cold season in India. In the rainy season, a totally different set of plants engage the agriculturist's attention, as rice, cotton, indigo, maize; *holcus sorghum*, species of *panicum*, *paspalum*, and *clusina*, of *leguminar*, species of *phaseolus* and *dolichos*; many of the *cucurbitaceae*, as well as *sesamum* and the species of *solanum* for their esculent fruit." In another place, this scientific botanist observes, "As we have seen with perennials of other kinds, so is it with those yielding fruit of an edible nature. Many, both of tropical and temperate climes, succeed nearly equally well in the northern parts of India; so that taking Saharunpoor garden (lat. 30° N., long. 77.32, elevation above the sea 1,000 feet, and 1,000 miles N. W. of Calcutta) as an example, we have collected in one place and naturalized in the *open air* the various fruit trees of very different countries, as of India and China, Caubul, Europe, and America. Of those belonging to hot countries, we have the plantain, custard apple, shaddock, orange, lemon, guava, mango, tamarind, and others, which are common to every part of India. Of Chinese fruits, the *lechee*, *loquat*, *longaro*, *wampee*, flat peach and digitated citron, are perfectly naturalized. Of fruit trees from more northern countries, as Caubul and Cashmere, and from the hills of Europe, there are the almond, peach, nectarine, and apricot, plum, pomegranate, grapevine, apple, pear, quince, mulberry, fig, and walnut. Of useful trees of cold countries which thrive in what

is at some seasons so hot a climate, *pinus*, *oak*, *maple*, *dog-wood*, *service tree*, *holly*, *juniper*, and *box*. Of American trees, besides those first enumerated, the *logwood*, *mahogany*, *parkinsonia aculeata*, and *acer negundium*, may be instanced as perfectly naturalized. (See large edition of the "History of the Colonies" for a minute description of the principal forest trees of India.)

Indigo, from time immemorial, has been cultivated and manufactured in Hindostan, and in 1665 it was one of the exports from India to England. The E. I. Company's servants turned their attention to it about 40 years ago, and its successful prosecution has been principally owing (after the circumstance of the destruction of St. Domingo, which, previous to its revolution, supplied nearly the whole world) to the small duty levied on its importation into England, the duty at first being little more than nominal: in 1812, 1½d. per lb.; in 1814, 2½d.; and in 1832, 3d. per lb. Its importance to India may be judged of from the fact, that in the Bengal Presidency the cultivation of indigo is carried on from Dacca to Delhi, occupying upwards of 1,000,000 statute acres, yielding an annual produce worth from 2,000,000l. to 3,000,000l. sterling, whereof one-half, or perhaps more, is expended in India for rent, stock, wages, interest on capital, &c. There are from 300 to 400 factories in Bengal, chiefly in Jessore, Kishnagur, and Tirthoot. The factories are principally held by Europeans; but many natives have factories of their own, and in several instances produce indigo equal to any manufactured by Europeans.

Number of Indigo Factories in the several Districts under the Bengal Presidency; also, the Number of European Indigo Planters, Proprietors of Estates, and the Number of European Assistants resident in the several Districts under the Bengal Government.—1832.

The low price which indigo now brings in Europe is diminishing the quantity produced, the exportation some years being 9,000,000 lbs.; the recent failures in India will tend to bring the trade within more

profitable limits. The cultivation of Indigo in Madras is trifling. There is little or none prepared in the Bombay Presidency. The Indigo produced annually in the East Indies from 1811 was:—

Years.	Chests.	Years.	Chests.	Years.	Chests.	Years.	Chests.
1811	21000	1818	19100	1825	43500	1832	
1812	23500	1819	20700	1826	28000	1833	
1813	22800	1820	27200	1827	45300	1834	
1814	28500	1821	21100	1828	30900	1835	
1815	30500	1822	25700	1829	43200	1836	
1816	35000	1823	29800	1830	32100	1837	
1817	20500	1824	24100	1831	30000		

The quantity of Indigo imported, in 1834, was 4,155,296 lbs.; re-exported, 3,928,226 lbs.; home use, 2,447,827 lbs. 1835, imported, 4,168,395 lbs.; re-exported, 4,074,598 lbs.; home use, 2,590,606 lbs. 1836, imported, 7,710,544 lbs.; re-exported, 3,691,951 lbs.; home use, 2,840,398 lbs.

The price of indigo per chest in London was, in 1824, 1111s.; in 1825, 1404s.; and in 1831 but 451s.; the supply now exceeds the demand, at least in England; but the consumption of Bengal indigo is fast augmenting in France, Holland, Germany, &c.

Silk forms the next most important staple of India, and in conjunction with the former, its production in our own territories is of essential advantage to silk and tabinet manufacturers in England. The total quantity of raw silk imported into England for 1834 was 3,693,512 lbs.; and the quantity furnished by British India alone to England in the same year was 1,203,658 lbs.

Three species of mulberry trees are cultivated in India, and two species of silk-worm (the country worm, and the annular Italian, or Chinese worm); the latter feeds also on the castor oil plant leaf. The silk is produced in cocoons by the ryots or small cultivators, to whom the E. I. Company's agents make advances; and the Company have 11 or 12 filatures or large factories for reeling it with machinery on the simple Italian principle. The Gonnatea is the best, the Bauleah the worst. The price of silk has risen in India with the wages of labour, and some manufacturers say the quality has deteriorated; probably *quantity* has been more attended to than *quality*. The

silk districts of Bengal are, Radnagore, Hurripaul, Santipore, Cossimbuzar, Bauleah, Comercolly, Sardah, Jungypore, Mauldah, Rungpoor, Sunna-Meckhi, and Gonnatea, all between the parallels of lat. 22° and 26°, and long. 86° to 90°.

The superior quality of Italian silk does not demonstrate natural inferiority in that of India, for bales of E. I. to which attention has been paid have sold equally well with Italian silk. Efforts are now making in the Bombay Presidency to extend the production of raw silk, and the commencement promises success; we may therefore look forward to a period when we shall be totally independent of every other country for the raw staple of this essential and beautiful branch of our national manufactures.

Cotton, a staple of Indian Agriculture and of British manufactures, well deserves attention, were it only for the important circumstance that our chief branch of trade is almost totally dependent on a rival, (and with little provocation) perhaps a hostile state. The importation of American cotton into England is nearly 300,000,000 lbs. yearly, that of India not the *one-twentieth* part of British consumption. If we can be made independent of France and America for indigo and silk, so can we become also of cotton, India producing in itself every variety; the justly celebrated sea island cotton is actually in cultivation in several parts of India, but owing to neglect it degenerates into an annual, whereas in America it is carefully cultivated as a triennial plant. The Dacca muslins, so celebrated all over the globe, (and of which the manufacture is now lost, owing to the inundation of Manchester goods), were made from India cotton, and if the late duty had been kept on American raw cotton, sufficient encouragement would have been given to the Hindoos to attend to its cultivation, as it is we have not only ruined the Indian manufacturer, but in return we have offered no encouragement to the raw producer. The cotton grower in India ought to be stimulated to greater efforts on examining the consumption of cotton wool in England:—

As the surest means of inducing a more careful attention to India cotton, both in the cultivation, cleaning and packing, a removal of the entire duty on importation into England would be most effectual, coupled with an absence of all transit dues in the East.

That England has nothing to fear from admitting the cotton manufactures of the Hindoos to British markets, at a juster rate of reciprocity than is now practised—that is 30*l.* per cent. in England, against the Hindoo, and but 2*l.* per cent. in India, against the Englishman is evident, from Mr. Kennedy's statement before the Parliamentary Committee, viz. that one spinner by machinery, in Britain, will produce yarn at one-fourth the price that it costs for the same quantity of workmanship in India, supposing the wages of the former to be 1*s.* 8*d.* and of the latter 2*d.* per day.

Mr. Kennedy's statement was thus corroborated by figures, which shew that, in addition to onerous duties in England on the Hindoo weaver, the latter was less liable to contend with the former, by reason of the rapid fall of English prices.

Comparison of the cost of labour in producing yarns in Britain and India, for one pound weight, from No. 40 to 250, and likewise of the value of the labour and material combined.

Sugar may be cultivated and manufactured to an extent in India sufficient to supply the whole world; its production at present is immense, as it forms an ingredient in almost every article of food or drink used by the Hindoos, and where the manufacture is attended to as at Benares, the grain is large and sparkling and pure as the best Mauritius or Demerara sugar. The soil and climate of Bengal, Madras, and Bombay are peculiarly suited to the production of this essential nourishment to man; every village has its patch of cane, and a rough manufacture named *Jaghery* is extracted from the Palmyra and cocoa-nut tree. It is in evidence before Parliament, that the sugar cane of Bengal is as good as any of the West Indies, and some of a superior quality has been produced. In the Appendix, page 2, will be found the quantities of sugar exported from the E. I. possessions since 1816.

Coffee next deserves consideration as an Indian staple, and which like the last article only requires just treatment in England to become one of the most valuable exports. In Malabar, Coimbatore, &c. the cultivation is extensive, and the berry of the finest flavour when attended to in the drying. Upper Bengal and the territories acquired from the Burmese, are peculiarly adapted for the growth of coffee.

The following returns shew the quantity of coffee imported from the East Indies into Great Britain,—re-exported and retained for home use for 15 years; the return includes Ceylon, avg. 2,824,998 lbs. Singapore, 3,611,456 lbs. Mauritius, 26,646 lbs. &c. From Bengal, Madras and Bombay alone for 1831, 2,780,668 lbs.

East India Coffee (including Mauritius in 1835 and 1836) Imported into the United Kingdom.

It will be perceived by the foregoing, that of late years the importation of East India coffee is on the increase, still there is a great devaluation compared with 1815 and 1816, when the importation of coffee by the *private trade* amounted in two years to 43,381,478 lbs.

Quantity of Opium* annually exported from India to China for 18 years.

* The quantity of opium shipped from Calcutta in 1795-6, was 1,070 chests, and in 1829-30, 7,443 chests. The total quantity of opium exported from Calcutta during the former year was 5,183 chests, and during the latter, 9,678 chests; the grand total exported during the whole 35 years was 162,273 chests, which, at the average rate at which it sold, 1,200 dollars a chest, would give a trade in this stimulating drug of nearly two hundred million Spanish dollars!

Malwa opium is considered by the Chinese as having a higher touch, but not so mellow, nor so pleasant in flavour as the Patna opium. The smokeable extract which each quality of opium contains is thus intimated by the Chinese,—(who use opium as we do wine or spirits) Patna and Benares opium 45 to 50 touch; avg. 48; Malwa 70 to 75; avg. 72½; Turkey 53 to 57; avg. touch 55. The cultivation of opium in India, as explained under the chapter in revenue, is a monopoly as regards Patna and Benares in the hands of Government; and a revenue is derived from the Malwa opium by a system of passes on shipment from Bombay.

Estimate of Quantity and Total Value of Indian Opium consumed in China during the 6 Years ending in 1832-33.

Years.	Patna.	Benares	Malwa.	Total.

1832-33	6410	1880	15403	23693	15,352,429

Pepper is another valuable India staple, but its import from the East has considerably fallen off, the

importations of 1815 and 1816, being 17,863,847 lbs., and in 1827 and 1828, but 14,045,868 lbs. being a decrease of nearly 4,000,000 lbs. weight.

Saltpetre is yielded by the Indian soil in greater abundance than any other country, its importation into England by the East India Company in 1814, was 146,000 cwt., but the continuance of peace has much lessened both the price and consumption; both are now again on the rise, but the price is still so low that the saltpetre collected in the East is now being brought to fertilize the fields of Albion. The import of late years of saltpetre from Bengal has been about 100,000 bags, but the total quantity exported from Calcutta, has averaged 170,000 bags, while in the year 1795, it did not amount to more than 13,000 bags. The total quantity exported from Calcutta during the thirty-five years ending 1829-30, was 2,202,465 bags, of which the United Kingdom received 1,523,655 bags; North America, 278,895 bags; France, 101,237 bags; and China, 1,333,615 bags.

The Tobacco of Masulipatam, made into snuff, is much prized in England; the quantity of tobacco grown in India is enormous; every class, high and low, use it, and if the duty were reduced in England, the variety of soils in India would afford an infinite variety of that fascinating weed for the British market. Very rich lands produce about 160 lbs. per acre of green leaf; excellent Havannah tobacco is grown in Guzerat, Bogliipoor, Bundelcund, &c., and some from

the Irrawaddi brokers in L. The want of a great obstacle in England as like hay, mud and the slight left in the tobacco delicate flavourments are necessary. The duty to the revenue.

Grain is of quantity of grain beyond the thirty-five years for the latter year, increase, averaging quantity Mauritius for instance in has received, 1,730,998 bags increasing.

Tea of export brokers at 1s. Chinese Congo will doubtless of export.

the Irrawaddy territories has been reported by the brokers in London as equal to the best American. The want of proper attention in the curing has been a great obstacle to its arriving in a marketable state in England after a long East Indian voyage. Tobacco, like hay, must undergo a heating to be fit for use, and the slightest particle of green vegetable matter left in the tobacco heats on the voyage, destroys the delicate flavour of the leaf, and even rots it. Experiments are now making at Bombay in the curing process. The duty on E. I. tobacco might, without loss to the revenue, be reduced from 2s. 9d. to 2s. at least.

Grain is one of the staples of Bengal; the total quantity of grain exported from Calcutta to countries beyond the three Presidencies, amounted during the thirty-five years, ending 1829-30, to 12,366,571 bags; for the latter years the export has been on the increase, averaging 600,000 bags a year, and of this quantity Mauritius has of late taken nearly *one-half*, for instance in 1828-29, 332,756 bags. Great Britain has received, during the whole thirty-five years, 1,730,998 bags; and the export to France is yearly increasing.

Tea of excellent quality, rated by the London brokers at 1s. 10d. per lb., which is equal to the Chinese Congo, is now being prepared in Assam, and will doubtless ere long be a large and valuable article of export.

Silkworms are found in Bengal, and towards the north of Poonah in the Dekhan (see Dr. Roxburgh's paper on the silkworms of Bengal, in the seventh volume of the Transactions of the Linnean Society; and Colonel Sykes' account of the Kolisurra silkworms in the Dekhan, Transactions of the Royal Asiatic Society, vol. iii. p. 541, &c.)

Iron, copper, lead, antimony, plumbago, zinc, sulphur, silver and gold, together with inexhaustible supplies of coal, abound in various parts of the country. Boglipoor district is peculiarly rich in iron; and about Pointy and Siccary Gully, very large mines have been worked in former times: the ore is nodular, and yields from twenty to twenty-five per cent. iron. The Sylhet hills produce in the greatest abundance fine granular iron ore like sand. At a meeting of the Bengal Asiatic Society, 20th February 1833, specimens of copper ore from Nellore, were presented on the part of Mr. Kerr. The mines appear to lie to the northward of the Pennar river, 36 miles N. N. W. of Nellore, and thirty-seven west from the sea, near a village called Ganypenta in Arrowsmith's map. Coal (see Geology) is now raised in Burdwan in considerable quantities, and it is preferred for the steam vessels at Calcutta, to European or New South Wales coal, in consequence of its not so soon filling the flues, owing to the pureness of the bitumen and the superior quality of the gas.

A coal mine now working at Chirra Poonjee produces a mineral, which does not leave one-fourth as much ashes as the Burdwan coal; the strata are nearly horizontal, requiring no pumps or machinery for drainage; it is delivered at the Sanatorium at 400 lbs. weight for 1s. The coal now worked is of the slaty kind, specific gravity 1.447, containing volatile matter, 36; carbon, 41; and a copious white ash, 23=100; seams of a superior coal, from two to four feet thick, have been more recently discovered contiguous to abundance of excellent iron ore. Coal has been recently discovered at Fatephur (Nerbudda) which showed near the surface; water separated on a sand heat, 3.5; volatile matter not inflammable, 10.5; charcoal fixed, 22; earthy

residue red, 64=100. Specific gravity of coal worked at the mines on the Kosya or Coosyah hills, 1.75; composition volatile matter or gas, 38.5; carbon or coke, 60.7; earthy impurities, 0.8=100 (the ash is exceedingly small). The coal found near Hurdwar in the Himalaya mountains, has a specific gravity of 1.968, composition volatile matter, 35.4; carbon, 60; ferruginous ash, 14.6=100; coal found in Arracan, specific gravity, 1.308; gives out bitumen and gas on ignition; composition, volatile matter, much 66.4; carbon, 33; ash, 0.6=100.

The iron ore found in the south of India is excellent. Mr. Heath is now producing excellent iron near Madras. The Himalaya mines supply, chiefly, varieties of red iron ore, affording from thirty to sixty per cent of metal. Near Kalsi, on the Jumna, there is an extensive bed of specular iron ore; red hematite, associated with micaceous iron ore, occurs in a large bed in gneis at Dhaniakat. At Rhamghur, on the road from Bhamouri to Almorah, there are beds of the scaly red iron ore, also in gneis; compact red iron ore occurs in clay-slate, containing beds of limestone at Katsari, on the Rhamganga. In some places a brown ore of the hydadt species, containing manganese, and affording a superior steel, is found. Boglipoor district is peculiarly rich in iron, and about Pointy and Siccary Gully, very large iron mines have been worked in former times; the ore is nodular, and yields from twenty to twenty-five per cent. iron. The Sylhet hills produce in the greatest abundance fine granular iron ore like sand. Copper mines are worked at Dhanpur, Dhubri, Gangoli, Sira, Pokri, Khari, and Shor Gurang. The ore found in the Dhanpur mine is gray copper ore, which affords from thirty to fifty per cent. of copper; it is associated with malachite, or green carbonate of copper. The ores are contained in a compact red-coloured dolomite; hence mining operations can be carried on without the expense of wooden frame-work or masonry. The Pokri mine or mines, are situated in talc slate of a loose texture, and hence the working is more difficult. The ores are vitreous and purple copper, both of them rich in copper. The waters flowing from the mine are impregnated with sulphate of copper or blue vitriol. The Sira and Gangoli mines are situated in beds of indurated talc, which are enclosed in dolomite. Sometimes the ore, sometimes the other rock, form the walls of the mine. The iron is yellow copper or copper pyrites, mixed with iron pyrites and smaller portions of gray copper ore. The Khari and Shor Gurang mines are similarly situated, the ores are gray copper, yellow copper, or copper pyrites, and carbonate of copper. Mines exist to the northward of the Pennar river, thirty-six miles N. N. W. of Nellore, and thirty-seven west from the sea, near a village called Ganypenta, in Arrowsmith's map. The copper ore prevails over a considerable tract of country; it consists of malachite, and of black anhydrous oxide of copper, with red and yellow ochre imbedded in micaceous schist. The ore differs from the English coppers essentially, in being free from iron pyrites and other deteriorating ingredients, as lead, antimony, sulphur, &c., which make that ore difficult to purify, whereas the Nellore ore becomes quite pure by simple smelting. A specimen of reduced metal sent with the ores to the Asiatic Society is of a very fine colour and highly malleable. On analyzing the ore, it was found to contain carbonic acid, 16.8; black oxide copper, 60.75; red oxide iron, 19.4; silica and loss, 3.05=100. Four different varieties examined by the secretary, contained from

thirteen to forty-seven per cent. of red oxide of iron and silice. *Lead*.—The most productive of these mines are situated on the river Tonse, near Deyrah Doon; The ore (a fine granular galena) is found in clay-slate and clay-limestone. It would be tedious to particularize other productions; two have been recently discovered. A native sulphate of alumina obtained from the aluminous rocks of Nepal, used by the native doctors to cure green wounds or bruises, yielding, on analysis, sulphate of alumina, 95; peroxide of iron, 3; silice, 1; loss, 1—100; and a native sulphate of iron is procured from the hills of Behar, and used by the dyers of Patna, yielding sulphate of iron, 39; peroxide of iron, 36; magnesia, 23; loss, 2—100. These two minerals, the natural productions of Nepal and Behar, may be had in the largest quantities, and would be found extremely useful in the manufacture of Prussian blue, calico printing and dyeing. Common salt (muriate of soda).—Carbonate of soda and nitrate of potash occur in many districts forming the salt, soda, and nitre soils. A salt lake, twenty miles long by one and a half broad, is situate near Samber at Rajpoot Town, in latitude 26.53, and longitude 74.57; it supplies a great portion of the neighbouring country with salt on the drying up of the lake after the rains. In Berar there is a salt lake, called Loonar, lying in a sort of cauldron of rocks; it contains in the 100 parts, muriate of soda 20; muriate of lime, 10; muriate of magnesia, 6. Natron and soda lakes are said to occur in the Himalaya range. Towards the sources of the Indus salt lakes were observed by Mr. Gerard at 16,000 feet elevation above the sea, and there is an extensive salt mine in the Punjab.

The valuable diamonds and other precious stones found in Golconda, in Orissa, in Bundelcund, &c., require no detailed notice. Silver ore, of a rich quality, is obtained in different places. Gold is found in the beds of most rivers, particularly in Neilgherries; but it exists in abundance in the state of ore in Malabar. This precious metal has been discovered not only in Coimbatore, but throughout that tract of the country lying west and south of the Neilgherry mountains and Koondanad. It is found also in large quantities in various parts of India.

In Bengal land is now worth 67 years' purchase of the revenue. The increase of wealth throughout Bengal has been most rapid; notwithstanding the disadvantages under which the agriculturists labour, by the English markets being shut against their raw and manufactured produce, and the great number of artisans thrown out of employment by the introduction of piece goods, &c. from England; land purchased in Calcutta 30 years ago for 15 rupees is now worth and would readily sell for 300. Ten years ago a labourer in Calcutta received two rupees per month, now he is not satisfied with less than four or five rupees per month, and there is even a scarcity of workmen; 12 field labourers were formerly to be had for less than one rupee a day, now half that number could not be had at that rate of wages. Mr. Colebrook says, in 1804, in his Husbandry of Bengal, that "a cultivator entertains a labourer for every plough, and pays him wages, on an average, one rupee per mensem, and in some districts not half a rupee per mensem." A cabinet maker was glad to obtain eight rupees a month, for the exercise of his

skill, now he readily obtains 16 or 20 rupees for the same period. All handicraftsmen and labourers have risen in a like proportion; and as to the price of food it is sufficient to state one article as a criterion—rice, the staff of life in Bengal, was wont to be sold at eight annas (half a rupee) per maund (82 lbs.), its price has increased four fold, being now averaged at two rupees per maund. The wages of a Hindoo carpenter at Calcutta may be estimated at 6d., of a Chinese at 2s., and of the lowest European 6s. per day. This increase in the value of property may be mainly ascribed to the fixed settlement of the land revenue—to the security given to all species of industry—and thus inducing the surplus wealth derived from commerce to be invested in the soil: hence the rise in wages, and in the value of all commodities.

Comparison of the Wages of Artificers and other Public Servants, under the Peishwa's and British Governments in the Dukhain, in 1828 and 1814. [Col. Bykes' Report.]

Artificers, &c.	British rule in 1828.	Peishwa's in 1814.

* A seer is 3 lbs.

It would be extremely desirable to ascertain the rates of wages, the prices of provisions, and the rental of land in the various districts of British India, and in particular to compare the present with the past. Wherever political security has been established, property of all species will rise in value; but where social rights are secured—where the state has no longer the power of taxing at its will and pleasure every species of industry—and particularly that basis on which all social prosperity is based (the land);—there, indeed, with a fertile soil—a genial climate—an industrious and dense population—and great mineral and commercial resources—it would be difficult to fix the limit of social wealth, of political greatness, and of moral happiness.

CHAPTER II.—CEYLON.

SECTION I. Ceylon (*Singhala*, *Lanka*, *Serendib*, or *Taprobane*), situate between the parallels of 5.56 to 9.50 N. latitude, and from 80. to 82. E. longitude, is one of the most magnificent islands on the face of the globe; the extreme length is about 270 miles from north to south, with an extreme breadth of 145 miles (an average of 100), and a superficial area of about 24,664 square miles.

Favourably situate at the W. entrance of the Bay of Bengal, it is separated on the N. W. from the Coromandel coast, by the Gulf of Manaar, 150 miles distant from Cape Comorin; on the S. and E. its beautiful shores are laved by the Indian Ocean. The interior of the island is formed of ranges of high mountains, in general not approaching nearer to the sea than 40 miles, with a belt of rich alluvial earth, nearly surrounding the island, and well watered by numerous rivers and streams. A picturesque table land occupies the southern centre, and thence, towards the coast is a continuous range of low hills, and elevated flat land extending nearly to the seashore. To the west, the country is flat, and on the northern shore broken into verdant rocky islets, and a peninsula named Jafnapatam. The lofty central division of the island varies in elevation above the level of the sea, from 1,600 to 4,000 feet, but the range of table land may be estimated at from 2,000 to 3,000 feet, extending in length 64 miles by 50 miles wide. From this elevated region arise some conical mountains from 2,000 to 3,000 feet higher above the sea. The mountains run in general in continuous chains with the most lovely valleys the sun ever shone on between them; the hills clothed to the very summits with gigantic forests, from which issue magnificent cascades and foaming cataracts, that form in the valleys placid rivers and babbling brooks fringed with turfy banks, and all the beautiful verdure of the tropics. [See "*Colonial Library*,"

II. Of the early colonization of Ceylon, *Selan*, *Singhala*, *Lanka* or *Taprobane*, we know little certain. The original *Singhalese*, or *Ceyloneze*, are probably descended from a colony of *Singhs*, or *Rajpoots* (to whom, in appearance, even at the present day, they bear a striking resemblance) 500 years B. C. But the Malabars, it is stated, several times succeeded in invading the island 200 years B. C. At an early era the island seems to have attracted the attention of the western world; thus Dionysius, the geographer, mentions *Taprobane*, its ancient and classic name, as famous for its elephants; Ovid speaks of it as a place so far distant that it could be no advantage to have his fame extended thither; Pliny thought it the commencement of another continent, and extolled it for the purity of its gold and the size of its pearls. In the reign of Claudius, a Roman, who farmed (says the Rev. Mr. Fellows) the customs in the Red Sea, was driven in his bark by a gale of wind from the coast of Arabia to *Taprobane*, where he received a most favour-

able reception, and so extolled the glory of the imperial city, that the sovereign of *Taprobane* sent to Rome an embassy of four persons *via* the Red Sea. We have existing evidence that, in remote ages, Ceylon was an extensively peopled and civilized country (it has now only 58 mouths to the square mile). Near Mantotte are the ruins of a very large city, constructed of brick and mortar, and an immense artificial tank or reservoir for water, the basin of which is 16 or 18 miles in extent; an embankment about nine miles from the tank is formed of huge stones, eight feet long, four feet broad, and three feet thick (these are cemented together by lime); the length of the dam is 600 feet, the breadth about 60, and the height from 8 to 12 feet. This gigantic work is said to have been executed by the Hindoos, who made Mantotte the capital of a kingdom which they established over the northern parts of the island. Of an antiquity, however, more remote than the foregoing, are various buildings and works towards the interior, constructed of vast stones, elegantly cut and dovetailed-like into each other. No mortar has been used in some of the edifices, which still exist (as if in defiance of the ravaging hand of time), with visible inscriptions on them, which no existing human being can understand. Among the works of this remote age is the Lake of Kandely, near Trincomalee, which is 15 miles in circumference, formed by the artificial junction of two hills, which, in one part in particular, exhibits a parapet formed of huge blocks of stone, 12 to 14 feet long, and broad and thick in proportion. This parapet is at the base 150 feet broad, and at the summit 30 feet. By means of this wonderful structure, the adjoining high lands are connected.

It is also singular that arches are to be found in the parapet, and over them conduits, similar to those used by the Romans in Italy, and termed *condottori*.

Belonging also to this age is a gigantic pagoda, 40 miles S. of Batticaloa, the base of whose cone is a quarter of a mile in circumference, surrounded by an enclosure one mile in circumference, consisting of a broad wall of brick and mortar, with numerous cells in it, and an entering colonnade of stone pillars 10 feet high.

Mr. Brooke, in tracing the course of the Maha Villagunga, in 1825, came on the ruined tracks of several very extensive canals, one of which he estimated to have been from 5 to 15 feet deep, and from 40 to 100 feet wide. The natives told him that this canal was cut by people whose stature was *forty feet high*! The largest recorded bridge was one in the southern part of the island, stated to be 280 cubits (630 feet) long; the next in size was 193 feet long, across the Kaloo-Ganga, on the road from Adam's Peak to Bentotte. The remains of a stone bridge exist near the fort of Kalawo Oye, the stones of which are from 8 to 14 feet long, jointed into one another and laid in regular lines, the upright pillars being grooved into the rocks below; this bridge was built

15,000 years ago, and Captain Forbes demonstrates that the Singalese, at that remote period, used the wedge and chisel for splitting and shaping those huge blocks of stone, after the manner which has only been introduced into Great Britain in the nineteenth century.

It is recorded in ancient manuscripts, that Anorajhapoor, the ancient Cingalese capital, was surrounded by a wall 16 miles square; and indeed a list of streets of the city is still in existence. To the N. of the ruins of this place are six pagodas of immense magnitude, the form being half a sphere with a spire built on it; the two largest are each 270 feet high, of solid brick-work, once entirely covered with chunam (lime polished like marble); the solid contents of one of the largest is about 456,071 cubic yards, and with the materials of which it is composed, a wall of brick might be constructed 12 feet high, two feet wide, and 97 miles long; the roofs are composed of curiously carved rafters of wood, and the expense and labour employed in the whole of the structures must have been immense.

In the ancient histories of Trincomalee, it is stated by Sir Alexander Johnston, that two kings of *Solamandelum*, *Manumethy Candesolam*, and his son *Kalocarta Maharasa*, reigned over the greater part of Ceylon, and over the southern peninsula of India, about the 512th year of the *Cali Yug*, or 4400 years ago, who constructed the great buildings and tanks, the remains of which are yet extant.

But we must leave these remote ages, and come to some later period. In the sixth century Ceylon was the chief mart for eastern commerce. In the sixteenth year of the reign of Praakran, a Bahoo the 1st (A. D. 1153), the Singalese monarch sent a fleet of 500 ships, with an army on board, and provisioned for 12 months, to avenge the insults offered to the Singalese ambassador and to Singalese merchants by the King of Cambodiae and Arramanna. This vast fleet was equipped in six months. In the thirteenth century it was visited by Marco Polo, who pretty accurately narrated the particulars of the island, which he described as "the finest in the world." The central situation of Ceylon had led to its port being frequented by ships from China, India, Arabia, &c. by which means Galle and Colombo, from their favourable situation, became entrepôts for the general commerce of the East. When the Portuguese first visited the island, A. D. 1505, they found it had for a long period been declining, owing to intestine wars and invasions from Malabar and Arabia. The Cingalese King availed himself of the assistance of the Portuguese Admiral (Almeida) for the expulsion of the invaders, promising in return an annual tribute in cinnamon. In 1518, the Portuguese, under Alvarenga, began to fortify themselves in Colombo, Galle, &c., and soon after they obtained complete possession of the maritime provinces, and drove the King of Kandy to such extremities, that he was glad to retain even possession of the interior provinces.

For a century the Portuguese held their sway, when in 1603, the first Dutch fleet arrived at Trincomalee and Batticaloa, and offered to assist the King of Kandy against the Portuguese. In 1632, a strong Dutch armament, acting in conjunction with the King of Kandy's forces, commenced a series of contests with the Portuguese, and after a long and sanguinary struggle, which lasted until 1656-7, the latter were finally driven from an island, of the sea coast of which they had been masters for nearly 150 years.

The Cingalese, however, soon found that they had

exchanged masters to no advantage; for, from 1656 to 1796, when the British in their turn came to the aid of the Kandians, the Dutch were engaged in a series of perpetual hostilities with their mountain neighbours. Nor were we more fortunate than our predecessors; for, in 1798, on the elevation of a new king to the Kandian throne, we became involved in hostilities, which led to our capture of the Kandian capital in 1803.

We did not, however, long retain the capital, the Kandians attacked us with great violence, compelled our troops to a precipitate retreat, massacred 150 sick soldiers in the hospitals, and having surrounded the British force, required them to lay down their arms; the commanding officer, Major Davie, unfortunately did so, the Malay troops were picked aside, and the whole English force instantly massacred, except three European officers retained as prisoners, and one mutilated corporal, who made his escape to Colombo with the melancholy intelligence. Until 1815 we retained the maritime provinces, while the King of Kandy kept the interior, but in that year the monarch being deposed on account of his repeated acts of oppression and cruelty (one act was making the wife of his prime minister pound to death her own children in a rice mortar), General Brownrigg was invited by the Kandian chiefs to take possession of the interior, and excepting an expensive and troublesome insurrection, which lasted from 1817 to 1819, Ceylon has ever since had the British sway established over the whole island.

Captains-General and Governors of Ceylon, whilst in possession of the Portuguese.—Pedro Lopez de Souza, Jerome de Azevedo, Francois de Menezes, Manuel Mascarenhas Homen, Nanhã Alvares Pereira, Constantine de Say Noranha, D. George d'Almeida, George d'Albuquerque, Diego de Melho, Antoine Mascarenhas, Philippe Mascarenhas, Manuel Mascarenhas Homen, Francois de Mello Castro, Antoine de Sousa Coutinho, under whose administration Colombo was surrendered to the Dutch; A. D. Mezey Menezes, last Captain-General (in command of Jaffna and Manar.)

Governors, whilst in the possession of the Dutch.—At Galle: William Jacobszen Coster, Commander at the surrender of that place; administration commenced 13th March, 1640. Jan Thys, President and Governor, 1st August 1640. Joan Matsuyker, Ordinary Councillor and Governor, 24th May 1646. Jacob Van Kittenstein, Governor, 26 Feb. 1650. Adrian Van der Meyden, Governor, 11th Oct. 1653. Colombo: Adrian Van der Meyden, Governor, 12th May 1656. Ryklof Van Goens, Governor, 12th May 1660. Jacob Hustaar, Extraordinary Councillor of India, and Governor, 27th Dec. 1663. Ryklof Van Goens, Governor, from 19th Nov. 1664. Laurens Van Peil, Commander, President, Governor, and Extraordinary Councillor of India, 3rd Dec. 1680. Thomas Van Rhee, Governor, 19th June 1693. Paulus de Rhoo, appointed Governor and Director of Ceylon, 29th Jan. 1695. Gerrit de Heer, Governor, 22d Feb. 1697. The members of the Council, 26th Nov. 1702. Mr. Cornelis Johannes Simonsz, Governor, May 1763. Hendric Becker, Governor, 22 Dec. 1707. Mr. Isaak Augustin Rumph, Governor and Extraordinary Councillor of India, 7th Dec. 1716. Arnold Moll, Commander at Galle, 11th June 1723. Johannes Hertenberg, Governor, 12th January 1724. Jan Paulus Schagen, Commander at Galle, 19th Oct. 1725. Petrus Vuyst, Governor, and Extraordinary Councillor of India, 16 Sept. 1726. Stephanus Vers-

luys, Governor, administrative, 1796. Aug. 1732. Councillor of Diederick V. Jan Maccarr, Gustaff Willem May, 1740. Major-Gen. Sir J. Wilson, K.S.S. Lieut.-Gov. 13th Oct. 1831. The Right Hon. Sir Robert Wilmot Horton, G.C.B. 23d Oct. 1831.

III. *Colombo.*—Ceylon may not inaptly be termed the Malta of the Indian Ocean. Its commercial capital, Colombo, is situated on the S.W. coast, lat. 6.57. N., long. 80.0. E., defended by a strong fort (built on a peninsula projecting into the ocean) measuring *one mile and a quarter* in circumference, having seven principal bastions of different sizes, connected by intervening curtains, and defended by *three hundred* pieces of cannon. The fortress is nearly insulated, two-thirds of the works being almost laved by the sea, and, with the exception of two very narrow and strongly guarded causeways, the remainder protected by a fresh-water lake and a broad and deep ditch with a fine glacis. Four strong bastions are seaward, and three face the lake, and command the narrow approach from the Pettah, or native town outside the walls. The sea itself is additional strength for the fortress, for on the extensive southern side the surf runs so high on a rocky shore, that any attempt at landing troops would be attended with certain destruction; and on the west side, where the sea is smoother, the approach is completely commanded by the batteries; and a projecting rock, on which two compact batteries are placed, entirely protect the roadstead.

TRINCOMALEE.—Trincomalee, the maritime capital of the island (Colombo is the seat of Government), is, in a political point of view, of the most importance, not merely as regards Ceylon, but from being,

as Nelson justly described it from personal knowledge, "*the finest harbour in the world.*" Trincomalee is on the E. of Ceylon, lat. 8.32 N., long. 81.17 E., 150 miles N.E. from Colombo (to which a fine road has been opened), 128 miles travelling distance from Kandy, and within *two days'* sail of Madras. Its physical aspect is that of a narrow neck of land or isthmus, connecting the peninsula on which the fort of Trincomalee is built (which juts out a considerable distance into the sea) to the main land. Towards the W. this isthmus gradually expands itself into a plain of considerable extent, which is bounded on the S. E. by a ridge of lofty mountains, on the N. W. by low wooded hills, and on the W. at the distance of about a mile from the fort, by the inner harbour. As far as the eye can reach from the fort, excepting in the immediate neighbourhood of the bazaar, the country is covered with wood.

The scenery of the spot has been compared to Loch Katrine on a gigantic scale (the vast harbour appearing land-locked), the grandeur of which cannot be surpassed. The fortifications sweep along the rocky coast, upwards of a mile in length, encompassing the base of a steep hill on the sides connected with the adjacent land. The town and fort are placed at the bottom of a rock, and joined to a narrow neck of land running out towards the sea, and separating the inner harbours from two outside bays, which lie on either shore of a three-sided or corned promontory.

"Dutch" and "Back" bays are entirely commanded by the artillery on the S. and N. side of the fortified rock, and the mouth of the harbour is protected by Fort Ostenburg, situate on a mount three miles W. of Trincomalee. No communication can take place with the promontory (the part that projects into the sea being protected by steep rocky cliffs) except through the well-covered gates of the fortress; and the best engineers have pronounced their opinion of its impregnability if it be well garrisoned.

Fort Frederick, where the European troops (consisting generally of four companies of a European regiment, a company of royal engineers and artillery, and detachments of the Ceylon rifles) are stationed, is a fortified neck of land projecting into the sea, separating Back Bay from Dutch Bay. The ground rises gradually from the glacis to the flag-staff, a height of about 300 feet, and then slopes towards the sea, till abruptly terminated by a perpendicular cliff, from which a plummet may be dropped to the water, a distance of 240 feet. The depth at the base is so great, that a line-of-battle ship may pass close to it. None but military reside within the works. The prospect from the barracks towards the sea is only bounded by the horizon, whilst towards the land, the eye ranges over the splendid scenery of the inner harbour, fort Ostenberg, and a long extent of wooded country.

Fort Ostenberg is nearly three miles from Fort Frederick, and is built on the termination of a ridge of hills that partly form the boundary of the inner harbour. The fort commands the entrance, and its base is washed by the sea on three sides; it also protects the dock-yard, which is immediately below it. A detachment of Royal Artillery are quartered there, and a company of Europeans.

The vicinity of Trincomalee is a wild uncultivated country, abounding with game of all kinds, from a snipe to an elephant. Quail, jungle fowl, moose-deer, and monkeys, are found on the Fort Ostenberg ridge. The Mahavilla Ganga, which runs past Kandy, empties itself into the sea not far from Trincomalee.

It has lately been surveyed by Mr. Brooks, the master attendant, who reports favourably of its capabilities. It is navigable for some distance; and he is of opinion, that with a little expense, it might be made so to within 40 miles of Kandy, and thereby open a water communication, by which the coffee, timber, and other produce of the interior could be brought to the sea-coast.

The harbour, beautifully diversified with islands covered with a luxuriant vegetation, is spacious enough for holding all the ships in the world, accessible at all seasons; and the depth of water within the bay of Trincomalee is so great, that in many places, not far from the shore, it is unfathomable, and vessels may lie close alongside the rocks in perfect safety.

POINT DE GALLE is another strong fortress and excellent harbour, situate at the very southern extremity of the island, in lat. 6.1 N., long. 80.10 E., distant 78 miles along the sea shore, S. S. E. from Colombo. The fort is a mile and a quarter in circumference, on a low rocky promontory, commanding the narrow and intricate entrance leading to the inner harbour. The extensive and substantial works are, like those of Colombo, surrounded for the greater part by the ocean, and there is every convenience of water, &c. capable of enabling the fortress to stand an extended siege. The outer and inner harbours are spacious, and the inner secure at all seasons of the year.

But if the sea-coast be well defended, not less so is the interior; every hill is a redoubt, and the passes in the mountains might be defended by a resolute enemy by rolling the stones off the summits of the heights. Kandy, the capital of the interior (85 miles from Colombo) is situate in an amphitheatre commanded by forts on the surrounding hills; the vale has but two accessible entrances well guarded, and the city within four miles is nearly surrounded by a broad and rapid river (the Maha-Villa Gunga) filled with alligators.

The roads in the maritime country are through groves of cocoa-nut trees along the sea coast. Carriage roads extend from Colombo as far as Chilaw to the northward, and from Colombo through Galle as far as Matura to the southward. The main road from Colombo to Kandy (the Simplon of the East, on which there is now a "*mail coach and four*") is a work of stupendous magnitude; hills have been cut away, vallies filled up, and (near Kandy) a tunnel *five hundred feet long cut through the mountain*, while rapid and unfordable torrents and rivers have had elegant iron and wooden bridges thrown across them. A capital road has been opened between Trincomalee and Colombo, and, before a few more years have elapsed, every town in the island will be connected by roads passable at all seasons.

Paradeinia bridge, which has been thrown over the rapid and unfordable river Maha Villa Gunga, consists of a single arch with a span of 205 feet, principally composed of satin wood; its height above the river at low water-mark is 67 feet, and the roadway is 22 feet wide. The arch is composed of four treble ribs transversely, distant from each other five feet from centre to centre; the sum of the depths of these ribs is four feet, which, with two intervals of two feet each, makes the whole depth of the arch eight feet; the arch beams, with the exception of those next the abutments, are 16 to 17 feet long and 12 inches thick, abutting against each other with an unbroken section, secured at the joints by the notched pieces which support the road-way, the latter being held in their position by means of cross-ties below and above the arch, and immediately under the road-way; these cross-ties, with the aid of diagonal braces, which

are also locked into them, serve to give stability and firmness to the whole structure, which has no other material but timber in its construction.

IV. The north division of the island is sandy and calcareous, resting upon madrepora, as it is little elevated above the level of the sea; the surface of the elevated lands of Saffragam and Lower Ouva is much stronger and well adapted for tillage; the granite soil of the interior produces the most luxuriant crops wherever there are a sufficiency of hands to call forth the gifts of industry. The soil of the southern plains is sandy, resting on a strong red marl termed "*Cabook*," the base of which is granite, and in the neighbourhood of Colombo, the lands are low and subject to inundations from the Mutwal river.

The foundations of the island are evidently calcareous, yet the greater proportion of its soil is siliceous, in many places (as in the cinnamon gardens near Colombo) the surface being as white as snow, and formed of pure quartz sand. The soils of Ceylon are stated to be in general derived from the decomposition of gneis, granite, or clay, ironstone, the principal ingredient being quartz in the form of sand or gravel, decomposed felspar in the state of clay, combined with different proportions of the oxide of iron, quartz in most instances being the predominating substance, and in many places, forming nine-tenths of the whole, the natural soils seldom containing more than three per cent. vegetable matter. The most productive earths are a brown loam resulting from the decomposition of gneis or granite exceeding in felspar, or a reddish loam originating from the decomposition of clay ironstone: the worst soils are those where quartz predominates, proceeding from the disintegration of quartz rock, or of granite and gneis, containing a very large proportion of quartz. Regular granite is not of very common occurrence; well formed gneis is more abundant, but sienite is not common: pure hornblende, and primitive greenstone, are far from uncommon; and dolomite sometimes of a pure snow white, well adapted for the statuary occasionally constitutes low hills in the interior: limestone is principally confined to the northerly province of Jafnapatam, and the island appears to be surrounded by an interrupted chain or belt of sandstone, interspersed with coral.

The coral of the Pamban banks is not the zoophite of the Mediterranean and the South Seas, but a light, porous, crumbling substance, sometimes cut and shaped into bricks by the Dutch, and more frequently burnt into lime. Of this species of lime the late fort of Negapatam was built; and so great is the hardness which it acquires by long exposure to the weather, that when Major De Haviland, some years ago, requested a specimen of the masonry of the fort to be procured and sent up to him, the iron crows and other instruments used in detaching the blocks were blunted and bent in all directions by the solidity of the chunam, which is far more adhesive than that obtained from shells. A stone capable of being converted into so valuable a cement, would almost pay the expense of its excavation. The ridge called '*Adam's Bridge*,' consists of a mass of loose sand, with no firm foundation of rock or clay to support it. The sand appears to be transported in great quantities from one side to the other of the ridge, according to the direction of the monsoon; for, in addition to the action of the surf, which washes it over to the lee side, where it is narrow,—in other parts, where it is broad, streams of it, in a dry state, are carried across by the wind itself, and deposited there. The channels through the

strait are for the sea in the ridge that a Duke of Adam's them. It were the different dry, and where on

strait are very shallow, and not more than sufficient for the small country boats to pass; but it is stated, in the records of the Dutch government at Ceylon, that a Dutch fleet once passed through the channels of Adam's Bridge to avoid a Danish fleet in chase of them. It has been justly observed, that if such really were the case, the channels must have been in a very different state, as some parts of the 'bridge' are now dry, and a few feet of water is the greatest depth anywhere on it.

The metallic riches of Ceylon are yet almost unknown. The island is principally composed of granite, with veins of quartz, hornblende and dolomite; rock and shell-limestone are found near Kandy and Jaffnapatam, iron and plumbago (the latter now forms an article of considerable export) are abundant, and gold (some say also quicksilver) and silver are found in the hill-streams; amethyst, topazes, cats-eyes, garnet, cinnamon stone, sapphires, rock crystals, shorl, zircon, rubies, and diamonds, &c. the island has long been famed for. The celebrated pearl fishery in the Gulph of Manaar my limits forbid me here dwelling on. Nitre caves are numerous; alum is plentiful, and the coast from Chilaw to Manaar and Jaffna on the western side, and from Tangalle through the Mahagampatoo to the eastward, contains the most extensive and valuable salt formations which are to be met with in India. The Leways, or natural deposits, at Hambantotte, yield the largest supply of the finest salt.

The natural history of the pearl oyster is imperfectly known. The banks have been found suddenly to fail when a productive fishery had been anticipated. At certain seasons the young oysters are seen floating in masses, and are carried by the current round the coast; they afterwards settle and attach themselves by a fibre or beard to the coral rocks, and on sand they adhere together in clusters. When full grown, they are again separated, and become locomotive. The pearls enlarge during six years; and the oyster is supposed to die after seven years; they are fished at a depth of 36 to 40 feet in the calm season. The length of time which the divers remain under water is almost incredible by an European.

V. Ceylon is under the complete influence of the monsoons, the N. E. prevailing from November to February, and the S. W. from April to September; the intervening or equinoctial months having variable winds or calms. The eastern side of the island is hot and dry like the Coromandel coast, occasioned by the N. E. monsoon; the opposite division of the island is temperate and humid like the southern Malabar shore under the influence of the S. W. monsoon; the climate, however, of the southern coast is more congenial to Europeans than perhaps any part of the continent of India. On the whole the N. and N. E. may be said to be dry, and the S. W. moist. The S. W. wind is more general all over the island, as both at Colombo and Trincomalee it blows for five months in succession, whereas the N. E. blows at Colombo only in the months of December and January, seldom beyond them. Among the mountains of the interior, the winds are modified by local circumstances, according to their proximity to the E. or W. coast: and the highest and most central land have peculiarities of their own. Thus, at Badulla, in Upper Ouva (where there is an excellent hospital and military station), the wind for three-fourths of the year is from the N. E., and in June, July and August variable.

Owing to its intertropical position, the quantity of rain that falls in Ceylon is very great, probably, about

three times that of England. Being less frequent the showers are much heavier while they last, a fall of two or three inches being not uncommon in 24 hours; the average of the alpine region is about 84 inches; on an average however, less rain falls on the east than on the west side of the island; a lofty mountainous ridge often acting as a line of demarcation, one side of which is drenched with rain, while the other is broiling under an unclouded sun: Colonel Colebrook in his valuable report on this lovely island, justly remarks, that the climate and seasons of the north and south districts are strikingly contrasted. On one side of the island, and even on one side of a mountain, the rain may fall in torrents, while on the other, the earth is parched and the herbage withered; the inhabitants may be securing themselves from inundations, while in another they are carefully husbanding the little water of a former season which may be retained in their wells and tanks. Thus throughout the southern division where the rains are copious (owing, probably, to its exposure to the southern ocean) canals are not less useful in draining the lowlands, than in the conveyance of produce; and embankments are much required to secure the crops from destruction during the rainy season; while in the north division of the island, tanks and water-courses are in the greatest request, to secure the inhabitants against the frequent droughts to which those districts are liable. At Colombo the annual quantity of rain is about 100 inches, of which, 80 fall in April, May, October and November.

Owing also to its insular position, no climate is more favoured than Ceylon, its temperature being moderate when compared with the scorching plains of India. Along the sea-coast the mean annual temperature may be taken at 80° Fahrenheit; the extreme range line from 68° to 90°, and the medium from 75° to 85°. The climate of the mountains is of course cooler, but its vicissitudes greater. At Kandy, which is 1,467 feet above the sea, the mean annual temperature is 78°; at the top of Namini Cooli Kandia, 5,548 feet high, Dr. Dany found the temperature at eight A. M. 57°. At Colombo (the capital) the mean daily variation of the temperature does not exceed 3°, while the annual range of the thermometer is from 76° to 86½°, Fah. At Galle, the mean daily variation is 4°, and the annual range 71° to 87°. Jaffnapatam, mean daily variation 5°, annual range 70° to 90°. Trincomalee, greatest daily variation 17°, annual range 74° to 91°. At Kandy, (the capital of the mountain or table land in the interior) mean daily variation 6°, annual range 66° to 86°. At Newera Ellia, a military convalescent station, mean daily variations as high as 11°, and annual variation from 35° to 80°.

The climate of Ceylon, where the soil is not cleared, is undoubtedly subject to pernicious miasmata, arising from stagnant marshes, and dank and noisome jungles, and even when the jungles are cleared, it requires the sun to act on them for some time before the unhealthy miasmata are dissipated; at certain seasons, therefore, endemic fevers appear in situations favourable to their propagation, but the whole island is becoming more uniformly salubrious as it becomes cleared and cultivated. The environs of Trincomalee, which were formerly very unhealthy, have become much less so by clearing the jungles in the environs, and if the salt water lake ('Snake Island,' I think it is termed) to the northward of Colombo were cleared, the maritime capital of Cey-

lon, though within 8° of the equator, would be one of the healthiest and pleasantest residences in India.

It is true, that our troops have suffered much in Ceylon, but it should be recollected, that as compared with the Indian army, their wear and tear of duty is much severer than the latter, and they have not the

facilities of water communication which the Ganges and its tributaries afford; the one country is in many parts quite unpeopled, and the other comparatively civilized; add to which, a pernicious system prevails in Ceylon, of making the troops commence marches at night.

* The Rain Gauge, showing a total of 84.3 inches, is for Kandy (in 1810), in the interior, which shows the average of the mountain districts: on the sea shore, as at Colombo, the average annual fall of rain is from 75 to 80 inches.

† Badulla is situate on a plain, surrounded by hills from 1 to 3,000 feet, in a mountainous country, in the south extremity of Ceylon, having the sea at 40 to 50 miles distant on the east, south and west sides; the elevation above the ocean level of 2,107 feet.

A delightful station has been formed at Newera Ellia, S. W. from Kandy, 50 miles, 14 from Fort M'Donald, 15 from Maturatte, and 122 from Colombo. The road between Newera Ellia and Kandy leads through a wild and mountainous country, the scenery always picturesque, sometimes magnificent in the extreme; at one time, a traveller is surrounded by steep and inaccessible mountains, whose sides are clothed with dense forests; rocks of an enormous size, deep and precipitate ravines, and cataracts rushing with foaming velocity from the heights, diversify the scene. The height of Newera Ellia plain (four miles long, and one and a half broad) is 6,000 feet above the sea, and is surrounded by steep mountains of irregular height (covered with wood to the very summit) one in particular, rising 2,000 feet above the level of the Newera Ellia river, which meanders through lovely banks across the plain. The climate is delicious, never approaching tropical heat in summer, and yielding ice in winter; the mean temperature by day and night for the entire year 55°. The water is so pure as to form a transparent solution with nitrate of silver; several chalybeate springs have been met with. The daisy, buttercup, violet, ribwort, dandelion, barbery, briar, &c. flourish indigenously; the rose, pink, mignonette, and carnation, are as fragrant as in England; delicious strawberries are abundant, and potatoes, carrots, artichokes, peas, beans, salads, cabbages, turnips, parsnips, and in fact, every British culinary vegetable thrive luxuriantly. The soil is of a deep black mould, resting on a stratum of yellow clay and gravel, numerous varieties of beautiful quartz exist, and the frequenters of the climate within a few degrees of the equator, will learn with astonishment, that a fire is *always* enjoyed by night,

and frequently in the day. Limestone has been found.

VI. That Ceylon was formerly extensively peopled is evident from the works and structures before alluded to, but it would appear the number of the inhabitants had been declining for the last four or five centuries, and it is doubtful even now (although an increase has commenced in the maritime provinces, which had in 1814,—mouths, 475,883; and in 1824, 595,105— increase in ten years, 119,222) whether on an area of 24,000 square miles, there are 1,000,000 mouths. Colonel Colebrooke states in his report, that the population in 1824 was, in the southern or Cingalese provinces, 399,408; in the northern or Malabar districts, 195,697; and in the interior or Kandyan provinces, 256,835, total, 852,940. The returns from the maritime provinces are doubtless correct, as the village registers of marriages, and births, and deaths are kept as punctually there as in England, but having myself traversed the Kandyan provinces more extensively perhaps than any European, I should think the estimate of their population is under rather than over the mark; it is to be feared, however, that the decreasing of the semi-barbarous inhabitants of this splendid region has scarcely reached its acme, perhaps, it may now be considered stationary, as the comforts of the people are on the increase.

The following in some respects complete view of the population is highly interesting; it shews how thinly the island is peopled, there not being in some districts more than four, five, or six mouths to the square mile! Comparing the births with the deaths it would appear at least in the maritime provinces that the population is on the increase.

			263			

The population of the island, although comprising a variety of different nations, may be divided into four distinct classes:—first, the Singalese or Ceylonese (descended, as some say, from the Singa or Rajpoots of Hindoostan, and by others from the Siamese) proper, who occupy Kandy, and the S. and S. W. coasts of the island from Hambantotte to Chilaw. Second, the Malabars or Hindoos, who invaded Ceylon from the opposite coast, and are in possession of the north and east coasts, and of the peninsula of Jaffnapatam. Third, the Moors or descendants of the Arabs, or perhaps, from Mahomedans of Upper India, who are dispersed all over the island (as the Moslems are over Hindoostan) and in Pultam district form the

mass of population. Fourth, Veddas or Beddas, the aborigines of the island, who dwell in the most untamed state (having neither habitations nor clothing) in the great forests which extend from the S. to the E. and N., and also in the most inaccessible parts of the interior, wild fruits and beasts being their sole sustenance, and the branches of large trees their resting place. There are some Malays, Caffres, and Javanese, a few Chinese, and Parsee traders, and a good many descendants of the Portuguese and Dutch, and even of the English mixed with native blood, scattered over the island. *Caste*, as respects the Singalese and Malabars, is scrupulously preserved, and very widely ramified, almost every occupation having its distinct caste. There are for instance, the gold and silversmith's caste, the fisher's, the barber's, the washermen, the manufactures of jaghery (sugar), the toddy drawer's, the lime-maker's, &c. &c. &c.; but the highest and most esteemed caste, is that of Vellalabs or Goyas, whose occupations are purely agricultural, but as land is assigned for the performance of every description of service, the practice of agriculture is not confined to this class, but is exercised by persons of all castes for their subsistence. By the Kandyan laws the intermarriage of the high and low castes is prohibited, and many distinctions recognized and enforced, by which the latter are degraded and reduced to a servile state, now considered hereditary. While the Malabars professing the Hindu faith, maintain the *religious*, as well as the *civil* distinction of caste, the Singalese or Buddhists have abolished the former and retained the latter; hence, perhaps, the hostilities which prevailed between both sects, whose sacred dogmas are both apparently based on the creed, and doctrines of Menö, the great Hindoo lawgiver, an illustration for which will be found by contemplating

the parallel of the Romanists and Lutherans, the essentials of whose religion stripped of externals are the same. The distinctions of caste in Hindoostan as well as in Siam, Birmah, and Ceylon, had their origin in a superabundant population pressing too closely on the heels of subsistence, and it was perhaps thought that the introduction of a minute division of labour

would not only give more extended employment, but also enable each person to learn more carefully his business; probably, also, it was politically conjectured that the division of an immense population of so many millions into castes or sects, would render the task of government more easy, by keeping every individual in a fixed station in society.

} No returns have been kept.

At present I cannot say that the Singalese are superior, if indeed equal, to the Hindoos, in the domestic and fine arts; although many branches of manufactures, such as the weaving of cotton and silk, the smelting of and working in gold, silver, iron, copper, &c.; the cutting and setting of precious stones, the glazing of pottery, application of lacquer, preparation of gunpowder, casting of cannon, distillation of spirits, &c. &c. are carried on, it is by the most simple instruments, and with little aid from mechanics, and less from science. In the fine arts they are scarcely on a par with the Hindoos, and in their structures of a recent period certainly far behind the latter people, or even less advanced than the Burmese. They however possess great capabilities of instruction, and in the neighbourhood of the principal British stations are beginning to profit by the superior handicraft of the European artisan.

"The peasantry of India, as well as Ceylon, generally possess land, from which they derive part of their subsistence, and the wages of labour in the neighbouring provinces of the Continent are as low as in Ceylon, and in some instances lower; any considerable rise would therefore be checked by the competition of strangers. The wages of common labourers vary in different parts of the island from 6d. a day in Colombo to 3d. and 4½d. a day in the country. The government has interfered to fix these rates when requiring labourers; but higher demands are

made to private employers, according to circumstances. Those who possess small portions of land rarely derive their support from them exclusively, but employ themselves in the fisheries, in trades and manufactures, and in the petty traffic of the country, and from the small amount of their individual gains there is reason to conclude, that if they could obtain regular employment near their homes, or even at a distance, from 6d. to 1s. a day would be generally acceptable to them.

The wages of mechanics and artisans are proportionally higher than those of labourers, but still extremely moderate; and from the frugal habits of the natives, and the resource derived from their lands, a slight augmentation of these wages would add materially to their comforts.

The minute subdivision of lands has been accelerated in the maritime provinces by the Dutch law of inheritance. In fields, gardens, and plantations, which are farmed or held in joint ownership, the interest of an individual proprietor is often limited to such fractional portions as are valued at a few pence. For example, the inheritance of one person will consist, in land, of nine-tenths of a seer of rice; in trees, of five-twelfths of a cocoa-nut tree, and two-thirds of a jack tree.

The attachment of the natives to these possessions is evinced by the fact, that they are often the subject of protracted law suits.

There are district who under the law subdivided. land were granted eight grants thousand on granted by Book for 18 of the surface waste land) would be ver of the whole land cultivate session of ind land rent free the state of strongly advise moderate sum them under co vest capital in perpetuity at a the state woul of roads, the resources of C they require b vernment to re

There are a few native landholders in the Colombo district who possess about 1,000 acres each; but under the laws of inheritance these will in time be subdivided. Four thousand and sixty-seven acres of land were granted in 1836, in one hundred and eighty-eight grants on a pepper corn rent. Seventy-two thousand one hundred and nine acres have been granted by government. It is stated in the Blue Book for 1836, that "by far the largest proportion of the surface of the island is jungle, (uncultivated waste land) at the disposal of the Government." It would be very desirable to cause a survey to be made of the whole island, to ascertain the actual area, the land cultivated and waste, the proportion in the possession of individuals, of temples, &c., the quantity of land rent free, or paying a tax to government, and the state of cultivation and produce. It would then be strongly advisable to grant or sell the waste lands at a moderate sum, and thus give every facility for bringing them under cultivation and inducing Europeans to invest capital in the soil. If the land-tax were fixed in perpetuity at a moderate corn-rent all over the island, the state would derive a large revenue for the making of roads, the construction of tanks, bridges, &c. The resources of Ceylon are numerous and valuable, and they require but a slight attention on the part of government to render them available for the public good.

VII. The religion of the Singalese is Buddhism, the early history of which is little known. Many Hindoo writers agree, that *Budh* or *Booth*, is supposed to be the ninth avatar of *Vishnu* (the second person of the Hindoo Triad, and God of preservation;) having appeared for the purpose of reclaiming the Hindoos from many abominations into which they had fallen, and to teach them more benevolent forms of worship, than through the means of human and animal sacrifices which they then extensively (and with respect to animals *now*) practised. These doctrines, says Mr. Coleman, being too simple, and therefore interfering too strongly with the privileges of the Brahminical priests, a religious war ensued between the old and new sects, and the Buddhists were ultimately expelled from the peninsula of India. [Here we find a striking analogy to the incarnation of our Saviour.] But the Buddhists, in general, will not tolerate the idea of superior antiquity being vested in the Brahminical faith; they deny the identity of their deity with the ninth avatar of Vishnu, which they declare was a mere manifestation of his power. They do not acknowledge a *creation* of the universe, but assert that it has been destroyed many times and by some extraordinary operation as often reproduced. They enumerate twenty-two of these regenerated worlds, each of which was successively governed by Buddhas, and that the present universe has been ruled successively by four, of whom *Gautama* or *Gaudama* (whose doctrines now prevail in Ceylon, Ava, Siam, &c.) is the fourth; a fifth, Maitree Buddha, is yet to come, previous to which this world will be destroyed.

The commandments of Buddha, were originally five (necessary toward salvation) but five others were added, which were meritorious but not imperative. The first five are—1st. Not to kill a living creature of any kind; 2nd. Not to steal; 3rd. Not to commit adultery; 4th. Not to speak an untruth on any occasion; 5th. Not to use intoxicating liquors or drugs. The meritorious commands are—not to eat after mid-day; and not to sleep on costly, soft, or elevated beds, (but on clean mats) or indulge sensually. The others inculcate, generally, virtue and benevolence, and the practice of individual abstinence.

The heavens of the Buddhists are 26, placed one above another; which together with their hells are described by Mr. Coleman; and it will be seen that there is much need of the light of education and Christianity, to remove such ideas from the minds of an otherwise intelligent and fine looking race of human beings.—(See *History of the British Colonies*.)

PRIVATE SCHOOLS.

Western Province, 521 Private Schools. Of these, 59 are under the superintendence of the Vicar-General of the Roman Catholic Congregation.

Southern Province, 5 Ditto. Of these, 1 is under the above superintendence.

Eastern Province, 66 Ditto. Of these, 4 are under the above superintendence.

Northern Province, 227 ditto. Of these, 36 are under the above superintendence.

Remarks.—(a) The expenses include 100*l.* rent of premises, for the academy and the residence of the head-master. The academy consists of a high school and a low school; each boy in the high school pays 7*l.* 4*s.*, and each boy in the low school half that sum. All teachers except the chief assistant, are paid out of the income of the head master.

(b) The expenses include 9*l.* salary of the keeper of the school.

(c) Paid as Portuguese Colonial Chaplain of St. Paul's Church, 108*l.* yearly.

(d) Paid as Malabar Colonial Chaplain of St. Thomas' Church, 108*l.* yearly.

(e) The expenses include 4*l.* 10*s.* school rent; needlework is also taught.

(f) No school kept, the master enjoys his salary as clerk of the church at Morottoo.

(g) The trades of tailor and shoemaker are also taught. The asylum is under the superintendence of the King's Visitor.

(gg) This school is under the superintendence of the clergyman of the Dutch church.

(h) The expense includes 4*l.* 10*s.* school rent.

(i) The expenses include 12*l.* school rent.

(k) Geography is also taught.

(l) These schools were established lately, and no returns have been received from them.

(m) The expenses include 12*l.* school-rent.

(n) The 64 adults are non-commissioned officers and privates, who also receive instructions in the school at present. They furnish what is required for themselves.

(o) The boys are regularly taken on the strength of the regiment by authority from the Deputy Adjutant-General, as 1st, 2d, and 3d class boys; when of age they are taken as privates for life, without bounty. Besides the class boys (in number 146) there are 10 boys and 1 girl, children of soldiers of the regiment attending the school.

(p) The children of the Royal Artillery in number

12 boys and regiment.

(q) The C to give a sup youths select the office of sionaries. S Society in E Ceylon.

12 boys and 5 girls, attend the school of the 90th regiment.

(q) The Christian Institution at Cotta, is intended to give a superior education to a limited number of youths selected from out-schools, to prepare them for the office of teachers, catechists and assistant-missionaries. Supported by the Church Missionary Society in England, and voluntary contributions in Ceylon.

The books supplied by the Church Missionary Society are not included in the school expenses, as all those used in the Cingalese districts are printed at the Cotta press, and most of them are sent out from England by the Church Missionary Society. The teachers are paid according to the proficiency actually made by the scholars, which is ascertained by monthly examinations, so that their salaries vary from month to month. In the girls' school both at Cotta and Badegamma, reading in the native language and needlework are taught, and the girls daily repeat catechisms or lessons from the Holy Scriptures. The mode of instruction in the seminary is not according to any general system, but such as appears best to the resident missionary. English reading, writing, grammar, arithmetic and geography are taught, and particular care is taken to make the youths acquainted with the Holy Scriptures, and to impress on their mind Christian principles. The seminarians are boarded and clothed, and a liberal education given them.

(r) In the schools in which the English language is taught, the children are also instructed in the rudiments of grammar, arithmetic and geography; and at most of the stations there are a few youths whom the missionaries personally instruct in the higher branches of learning, without any remuneration. The masters are paid by a graduated scale, according to the attendance and improvement of the children. Each school is examined almost daily by a visitor, and the salaries of this class of men, exclusive of what the masters receive, amounted in 1836, to 207*l.* 4*s.* The Wesleyan Mission receives no pecuniary assistance from government. Associations have been formed at all the stations, to raise contributions towards defraying the expenses of the school department, but the sum total raised for this purpose in 1836, amounted only to about 80*l.* The deficiency is made up by the Wesleyan Missionary Society in England.

(s) Many of the boys and girls of this school pursue their studies in Tamil in the morning and afternoon. The intellectual system as pursued in the Highland School of Scotland, has been adopted on this station. The boys are making rapid advancement in various branches of learning. The extension of the system in different parts of Northern India, promises to do much for the advancement of native youth.

(t) There are 140 students arranged in five classes: 1st. Class; 20 students; Companion to the Bible, history, native astronomy, Tamil poetic, grammar, trigonometry, surveying, European astronomy, Watts' on the Mind. 2d. Class; 29 students; Companion to the Bible, English grammar, algebra, Negundoo, Tamil poetic, Grammar, Tamil scriptures. 3d Class: 28 students, Bible history, English grammar, abridgment of Tamil grammar, algebra, geography, Negundoo and English New Testament. 4th Class: 23 students; English New Testament, Child's Book on the Soul, abridgment of Tamil grammar, arithmetic, Negundoo, elements of English grammar. 5th. Class: 40 students; first lessons in arithmetic, Phrase Book, Negundoo, English instructor, abridgment of Tamil

3 D

grammar, Picture Defining and Reading Book, and Tamil Scriptures; the expense of food, clothing and instruction is 543*l.* This does not include the salaries of the principal and professors.

(u) Course of study: Reading, writing, common arithmetic and geography in Tamil, also sacred music and plain sewing; considerable attention is also paid to reading, writing, and speaking the English language. The whole expense for food, clothing and instruction is about 290*l.*

(x) These are designed not merely to supply youth for the seminary at Batticotta, but to raise the character of the native schools, by introducing more thoroughly the study of common arithmetic, geography, and the grammar of the Tamil language. These youths in time it is hoped, will be qualified for schoolmasters in their several villages.

In these the monitorial system is introduced as far as it can be applied, the first object is to teach the children to read and write their own language, and to become familiar with the printed character. Christian lessons, and portions of the Bible are studied daily in all the schools. All the children are required to attend at our churches with their teachers, at least once a week.

(y) The readers in each school are also assembled weekly at the stations to which the school belongs, for the purpose of reading the scriptures and tracts, and reciting catechisms and other Christian lessons. The masters are also formed into Bible classes, and meet as the children do weekly for instruction; they do not receive a stated salary, but are paid according to the progress of the scholars, which is ascertained by a monthly examination. The total mentioned as the expenses of the schools, includes not only the wages of the master, but the expenses of the school-room, the wages of the superintendents, and the small presents made to the children. The school-rooms are used to a considerable extent as places of preaching.

(z) This is as near to the annual expense of the different schools as can be calculated. Teachers are, some of them, paid according to the number of scholars, and the charges for books and other things vary according to circumstances. The expense of the schools is almost exclusively borne by the Missionary Society in England. Nothing has ever been received from government in aid of the schools.

The Government schools are in number about one hundred, of which the far greater part are in the Singalese or maritime districts. They were originally established by the Dutch; and, according to Colonel Colebrooke's report, the numbers educated have been as follows:—Protestants, 83,756; Roman Catholics, 38,155; total, 121,911. Mahomedans, 14,847; Boodhists, 78,602; total, 93,449. The expenditure amounts to about 3,600*l.* per annum; and it is to be hoped it will be extended to the Malabar and Kandyan districts. The schoolmasters receive a small stipend of 6*l.* 6*s.* per annum, and they derive further emolument from fees received for registering native marriages.

Abstract of Ceylon Missionary Schools.—Church Mission.—Schools 56, containing 1,554 boys, 254 girls, and 61 adults; total, 1,869. Employs 83 native teachers and assistants, and has printing and book-binding establishments at Cotta and Nellore. The number of boys in the Cotta institution is 16, of whom 11 are Singalese, and 5 Tamilians.

Wesleyan Mission, established in 1814, and occupying seven stations, has 65 schools in Singalese, or southern, and 21 in Tamil, or northern, districts, thus:—

The return for 1832 shews, in the S. Ceylon district an aggregate of 69 schools, with 2,896 boys, 427 girls, and 104 male and female teachers; in addition to which, the Wesleyans employ 15 salaried catechists, who assist in the superintendence of the schools, and

conduct public worship on the Sabbath days. The Mission has a printing establishment and two presses at Colombo since its formation.

American Mission, has five stations and a high school or college, at Batticaloa, containing 10 students in Christian theology, and 110 students in English and the elements of sciences; and 22 in Tamil; all on the charity foundation; besides six day scholars. A female central school at Oodoo-ville, with 52 girls on the foundation, and 76 native free schools, with 2,200 boys and 400 girls.

Baptist Mission, instituted in 1812, has two stations and 16 schools, containing about 800 children, instructed in English, Portuguese, Tamil, and Singalese, by 20 teachers; four are female schools. The annual expense of this mission (160*l.* per annum) is almost exclusively borne by the parent society in England.

Roman Catholic Mission, established in 1687, occupies 12 stations, presided over by 12 pastors.

X. *Civil Government of Ceylon.*—The legislative administration of the island is confided to the governor, aided by a council composed from among the oldest and most distinguished European civil servants, appointed by the governor or sometimes by the Secretary of State for the Colonies in England; the duty of the council is, however, only to advise and consult with the governor, (who is also commander-in-chief of the forces) when convoked by him. The governor may pass a law without the concurrence of his council, who, if dissentient, record their opinions. Regulations or laws of the government are published in the Official Gazette some time before their enactment, in order to give them public discussion, and when passed into law take immediate effect in the maritime districts on their publication, and in the Kandyan districts by the governor's proclamation, subject in both to the final approval of the King in council. There is a special board for the administration of the affairs of the Kandyan Provinces, whom the governor is in the habit of consulting previous to his extension of an enactment there, which may have been ordained for the lower or maritime provinces. In the maritime provinces the governor is restricted from authorizing contingent disbursements exceeding 75*l.*, without the concurrence of the council; but in the Kandyan provinces he orders expenditure on his own control. In his executive capacity the governor refers, or not to the council, as he wills, but his proceedings are recorded in the secretary for government's office or in the department charged with the execution of the measure. The regulations of the government are published with the translations, in the native languages, (Cingalese and Malabar), and widely disseminated.

Three classes of persons are employed in carrying on the business of government: first, the civil servants, who are sent out as "writers" from England, under the patronage of the Secretary of State for the Colonies; there are 25 principal appointments in the island to which these gentlemen are alone eligible, the seniors being exclusively employed as heads of departments, in the revenue, as government agents, chief secretary, paymaster, or auditor-general, &c. &c. as collectors of districts and provincial judges and

magistrates. The juniors as assistants to the collectors or magistrates, and in the chief secretary's department. On its present footing the effective civil service consists of 38 members: an acquirement of one or both of the native languages is indispensable previous to the holding of a responsible situation. The second class is formed of Europeans (*not of the civil service*), or their descendants, from among whom are appointed provincial magistrates, (of which rank there are 16,) and clerks in public offices. The third class comprises the natives, who hold the situations of modelars (or licuts.) of korles (or districts), interpreters to the courts of justice, and to the collectors' offices or *cutcheries*. The modelars are still recognized according to ancient custom as commanders of the lascorgns or district militia, although at present chiefly employed in the civil administration of the country, and in the execution of public works. There are, of course, gradations of native officers in authority under them; the assistants of all natives are still regulated in a great degree by their caste. Independent of the numerous *government* 'headmen' and the *titular* 'headmen' who receive no emoluments, there are, in conformity to ancient usage, headmen appointed to each caste or class, some of whom receive certain perquisites as the head of fishermen do of the fish caught, &c. Since 1828, no 'headmen' have been appointed who could not read and write the English language; and the headmen form a valuable connecting link in the social fabric, as well as an intelligent and respectable body of individuals, from among whom the government can select officers for the more immediate service of the state. The number of principal headmen in the Cingalese districts amount to 243, in the Malabar to 112, and in the Kandyan to 47; these numbers do not include the headmen of villages, who are, of course, very numerous.

The fourth class consists of officers selected from the regiments serving in Ceylon, for the fulfilment of the post of government agents or sitting magistrates in the Kandyan Provinces, the duties of which are performed efficiently and creditably upon small salaries in addition to their military allowances.

Patronage.—All appointments to the higher offices

Under Sentence without Labour. For Debt to the Crown.

dant results. the village adman" and stables, the

are provisionally made by the governor, who selects candidates from the civil service according to their seniority, when otherwise qualified, subject, however, to the confirmation of The Secretary of State in England.

The magistrates and clerks are also appointed by the government; the magistrates and principal headmen, hold their appointments under His Excellency's warrant, being recommended by the Commissioner of Revenue, the provincial headmen being recommended by the Collectors of Districts. In the Kandyan provinces appointments are similarly made by the Governor, on the recommendation of the Board of Commissioners (to whom the more immediate management of those provinces is committed) including the chiefs or principal headmen of provinces or departments, the chiefs of temples, and the priests in the colleges or *scholas*. In the Northern or Malabar provinces, the headmen of villages or castes are commonly appointed on the nomination of the inhabitants; a deputation of villagers making a return to the magistrate of the candidate approved of by them.

Justice.—Justice is administered first by a supreme court, with powers equivalent to the Court of King's Bench, and in a subordinate jurisdiction to the High Court of Chancery; it is presided over by three judges, appointed from England, aided by a King's Advocate (whose functions are similar to the Lord Advocate of Scotland), Master in Equity and Registrar, also appointed from home; and thanks to the enlightened patriotism of Sir Alexander Johnston, trial by jury (with reference to Europeans or natives), is established under its supremacy.

The island is divided into the district of Colombo, and three circuits, called the Northern, Southern and Eastern. The N. circuit comprises the district of Jaffna with the districts parcel of the maritime provinces of the island, which lie to the westward of the Kandyan provinces between the districts of Jaffna and Colombo; the S. the district of the Mahagam-pattow, and all the districts parcel of the maritime provinces lying to the W. and S. of the Kandyan provinces, between the districts of the Mahagam-pattow and Colombo; the E. all the Kandyan provinces and all the districts parcel of the maritime provinces lying to the eastward of the Kandyan provinces, between the districts of Jaffna and Mahagam-pattow. The circuits (exclusive of Colombo) are subdivided into districts.

Within each district, there is one court, called the District Court, holden before one judge and three assessors; the district judge is appointed by the crown and removable at pleasure; the assessors are selected from amongst the inhabitants of the island, whether natives or otherwise, 21 years of age, possessing certain qualifications. The right of appointing, in each district court, one person to act as permanent assessor, is reserved to the crown. The officers of the district courts are appointed in like manner as those of the Supreme Court.

The Supreme Court is held at Colombo (except on circuit), and the district courts is at a convenient place in each district.

Each district court is a court of civil and criminal jurisdiction, and has cognizance of and full power to hear and determine civil suits, in which the defendant is resident, or in which the subject of action shall have occurred; within the district where the judge is a party, the court adjoining takes cognizance of the cause; and to try all offences, short of such as are

punishable with death, transportation or banishment, imprisonment for more than a year, whipping exceeding 100 lashes, a fine exceeding 100*l.*, which shall have been committed within the district.

Each district court has the care and custody of the persons and estates of idiots and lunatics resident within the district, with power to appoint guardians and curators; and power to appoint administrators of intestates' effects within the district, and to determine the validity of wills and to record and grant probate thereof, and to take securities from executors and administrators, and to require accounts of such persons.

Offences against the revenue laws are cognizable before the district courts (saving the rights of the Vice Admiralty Courts), limited as in respect to criminal prosecutions.

The judgments and interlocutory and other orders of the district courts are pronounced in open court, the judge stating, in the hearing of the assessors, the questions of law and fact, with the grounds and reasons of his opinion; and the assessors debate, in open court, their respective opinions and votes on each and every question of law or fact: in case of a difference of opinion between the judge and the majority of the assessors, the opinion of the judge prevails and is taken as the sentence of the whole court, a record being made and preserved of the vote of each.

The Supreme Court is a court of sole appellate jurisdiction for the district courts, with original criminal jurisdiction throughout the island: civil and criminal sessions of the supreme court are held by one of the judges in each circuit, twice in each year; all the judges are required to be never absent at the same time from Colombo, and also to be resident at the same time at Colombo not less than one month, twice in each year.

At every civil sessions of the supreme court, on circuit, three assessors are associated with the judge, and every criminal sessions is held before the judge and a jury of 12 men. In all civil suits, the judge and assessors deliver their opinions and votes as in the district courts; in appeals from the district courts, in criminal prosecutions, the appeal has not the effect of staying the execution of the sentence, unless the judge of the district court see fit. All questions of fact, upon which issue shall be joined at any criminal sessions of the supreme court, on circuit, are decided by the jury, or major part of them; questions of law are decided by the judge in open court, with the grounds and reasons thereof.

Where a person is adjudged to die by the supreme court, at a criminal sessions, execution is reprieved till the case be reported by the presiding judge to the governor.

Judges on circuit holding criminal sessions, are required to direct all fiscal and keepers of prisons within the circuit to certify the persons committed and their offences, who may be required to be brought before the judge.

The judges of the supreme court, on circuit, examine the records of the district courts, and if it shall appear that contradictory or inconsistent decisions have been given by the same or different district courts, the judges report the same to the supreme court at Colombo, who prepare the draft of a declaratory law upon the subject, and transmit it to the governor, who submits such draft to the legislative council. The supreme court also make rules and orders for the removal of doubts.

The supreme sessions or on circuit *habeas corpus* and courts to transmit appealed, and in many way, with the establish rules and to the charter, w economy, and exp in plain and repetitions and of

Military.—The the island consists of infantry (the h at Colombo, Kand of the Royal Fou for the Governor, posed principally o one of the finest I have never seen of India to equal t in appearance or during the Kand to no light infantry Green, and their r

The supreme court, or any judge of the same at sessions or on circuit, may grant or refuse writs of *habeas corpus* and injunctions; it may require district courts to transmit to Colombo the records in any case appealed, and may hear and decide appeals, in a summary way, without argument, and may frame and establish rules and orders of the court, not repugnant to the charter, which promote the discovery of truth, economy, and expedition in business, to be drawn up in plain and succinct terms, avoiding unnecessary repetitions and obscurity.

Appeals are allowed to the King in Council, subject to the following rules and limitations:—1. The appeal must be brought, by way of review, before the judges of the supreme court collectively, holding a general sessions at Colombo, at which all the judges shall be present. 2. The matter in dispute must exceed the value of 500*l*. 3. Leave to appeal must be applied for within 14 days. 4. If the appellant be the party against whom sentence is given, the sentence shall be carried into execution, if the respondent shall give security for the immediate performance of any sentence pronounced by the Privy Council; until which, the sentence appended from shall be stayed. 5. If the appellant shall show that real justice requires the stay of execution, pending the appeal, the supreme court may stay execution, on security, as before. 6. In all cases, the appellant shall give security to prosecute the appeal and for costs. 7. The court appealed from shall determine the nature of the securities. 8. Where the subject of litigation is immovable property, and the judgement appealed from shall not affect the occupancy, security is not to be required; but if the judgement do affect the occupancy, then the security shall not be of greater amount than to restore the property, and the intermediate profit accruing from the occupancy, pending the appeal. 9. Where the subject of litigation consists of chattels or personal property, the security shall, in all cases, be a bond to the amount, or mortgage. 10. The security for prosecution of appeal and for costs shall in no case exceed 300*l*. 11. The security must be completed within three months from the date of the petition of leave to appeal. 12. Any person feeling aggrieved by any order respecting security or appeal, may petition the Privy Council.

The same laws are administered in the District Courts as in the Supreme Court, namely, the Dutch (or Roman law with certain exceptions).

A prisoner can only be tried in the Supreme Court, upon the prosecution of the king's advocate, he has the right of challenge to the jury before whom he is to be arraigned, he is entitled on his trial to the assistance of an eminent proctor or barrister, paid by the government (an admirable provision) and the witnesses on both sides, in criminal cases before the Supreme Court, are also paid by the government.

Military.—The regular armed force maintained in the island consists at present of four King's regiments of infantry (the head quarters of which are stationed at Colombo, Kandy and Trincomalee), two companies of the Royal Foot Artillery, a mounted body-guard for the Governor, and the 1st Ceylon regiment, composed principally of Malays, nearly 1,500 strong, and one of the finest regiments in His Majesty's service. I have never seen any native troops on the continent of India to equal the 1st Ceylon light infantry, either in appearance or manœuvring, and their conduct during the Kandian war proved them to be inferior to no light infantry in the world. Their dress is dark green, and their arms a compact rifle, with a short

strong sword attachable instead of a bayonet. They are native officered, as in the E. I. C.'s sepoy regiments, with European officers to each of the 16 companies, and their fidelity to their leaders has been evinced in every possible manner whenever an opportunity presented itself. I have seen many regiments of different nations under arms, but none ever offered to my view such a striking *coup d'œil* as H. M.'s 1st Ceylon rifle regiment.

The following local corps have been entertained and paid for by the Island during 1836:—

Corps.	Lieutenant.	Subedar.	Jemadars.	Sergeants.	Drummers.	Rank and File.	£. per annum.
Mounted Orderlies	1	1	1	1	1	11	119
Gun Bascars	1	1	2	5	2	156	2652
Total	1	1	2	6	2	167	2750

* The sergeant and rank and file draw the difference between their regimental pay, as privates in the Ceylon Rifle regiment, and the regulated pay of the corps.

The pecuniary allowances granted to the King's troops, consist of island allowances according to the following schedule. Some few officers occupy government quarters, the rent of which is recovered from them monthly, according to the scale subjoined. No other advantages are enjoyed.

Schedule of island allowances drawn by officers doing duty in the island.—Regimental: Colonel, 45*l*. 9*s*. per mensem; Lieut.-Colonel, 32*l*. 2*s*.; Major, 23*l*. 19*s*.; Captain, 13*l*. 16*s*.; Lieutenant, 8*l*. 5*s*.; 2nd Lieutenant or Ensign, 6*l*. 6*s*.; Paymaster, 13*l*. 16*s*.; Surgeon, 17*l*. 10*s*.; Assistant Surgeon, 12*l*. 10*s*.; Adjutant, 10*l*. 4*s*.; Quarter-Master, 10*l*. 4*s*.

Additional allowances to officers in command of corps.—Colonel, 5*l*. 4*s*. per mensem; Lieut.-Colonel, 5*l*. 4*s*.; Major, 8*l*. 3*s*.; Captain, 10*l*. 4*s*.; Lieutenant, 5*l*. 11*s*.

Additional allowances to officers in command of garrisons, with the exception of Colombo, Trincomalee, Kandy, and Galle.—Colonel, 29*l*. 11*s*. per mensem; Lieut. Colonel, 8*l*. 18*s*.; Major, 6*l*. 14*s*.; Captain, 3*l*. 19*s*. 6*d*.; Lieutenant, 2*l*. 14*s*.; Ensign, 2*l*. 0*s*. 6*d*. The allowance for the commandant at Trincomalee is fixed at 30*l*., and that for the commandant of Kandy at 25*l*. per month. The allowance attached to the command of Galle is 10*s*. per day. The fixed allowance of the commandant of Colombo, viz. 29*l*. 11*s*., ceased from 1st November, 1832, in consequence of the disunion of the offices of Governor and Commander of the Forces.

General and Medical Staff.—Major-General on the Staff, 275*l*. 13*s*. 4*d*. per mensem; Deputy Quarter-Master-General, being Lieut.-Colonel, 16*l*. 1*s*.; Deputy Assistant Quarter Master-General, being Captain, 6*l*. 18*s*.; Deputy Adjutant-General, being Lieut.-Colonel, 16*l*. 1*s*.; Deputy Assistant Adjutant-General, being Lieutenant, 4*l*. 2*s*. 6*d*.; Assistant Military Secretary, being Captain, 6*l*. 18*s*.; Aid de Camp to the Governor, 6*l*. 18*s*.; Aid de Camp to the General Officer, 6*l*. 18*s*. (whether Captains or Subalterns); Brevet Inspector-General of Hospitals, 68*l*. 3*s*. 6*d*.; Staff Surgeon, 23*l*. 19*s*.; Assistant Staff Surgeon,

12l. 10s.; Apothecary to the Forces, 13l. 5s. In addition to regimental allowances being regulated, where the rank of staff officers do not correspond with the table, by making the addition equal to one half of the regimental allowance to officers. To Aid de Camps, if Subalterns, the staff and island allowance of a Captain are granted.

When officers of the undermentioned ranks, holding staff appointments, or doing duty in Ceylon, are relieved or superseded, and have ceased to perform military duty, they are allowed the following reduced island allowances, from the date of their relief to that of their embarkation: Colonel, 22l. 14s. 6d. per mensem; Lieut.-Colonel, 16l. 1s.; Major, 15l. 19s. 4d.; Surgeon, 13l. 16s.; Inspector-General of Hospitals, 22l. 14s. 6d.; Deputy Inspector-General of Hospitals, 16l. 1s.; Assistant Deputy Inspector-General of Hospitals, 15l. 19s. 4d.; Staff Surgeon, 15l. 19s. 4d.

Besides the above allowance, the following are the rates of pay granted to officers on the staff paid by the colony:—1 Deputy Assistant Adjutant-General, 10s. per day; 1 Deputy Assistant Quarter Master-General, 10s. per day; 4 staff officers of garrisons, 10s. per day; 1 Aid de Camp to the Governor or Lieut.-Governor, 10s. per day.

Scale of stoppage made from officers occupying government quarters.—Major-General, Colonel and Inspector General of Hospitals, 2l. 0s. 6d. per month; Lieut.-Colonel, Major, Deputy Inspector-General of Hospitals, and Assistant Inspector of Hospitals, 1l. 14s. 6d.; Captain, Paymaster, and Surgeon, 1l. 0s. 3d.; Assistant Surgeon, Lieutenant, Ensign and Quarter Master, 13s. 6d.

Maritime districts, Land Revenue — [Ceylon BB.

for 1836.]—*Tax on Paddy*.—In the western and southern provinces the tax payable to government varies, being sometimes one-half, sometimes one-third, one-fourth, one-fifth, or one-tenth of the produce. In the northern and eastern provinces, it is invariably fixed at one tenth; the tax is levied on the authority of immemorial usage, and it is particularly recognized by a proclamation of the 22nd of April 1803. The commutation system originally put into practice in the Kandyan districts, has been introduced in all the divisions of the western, eastern, and northern provinces, but Manar, and in the Galle division of the southern province.

Tax on Fine Grain.—This is not levied in the Colombo, Caltura, and Negombo divisions of the western province. It is however recognized by the proclamation of the 22nd of April 1803, which imposes generally a tax of one-tenth on the produce of all high lands, which means lands not adapted to the production of Paddy. In those divisions where it is not levied, the exemption is in consequence of special causes represented to, and sanctioned by government.

Tax on Gardens.—This revenue is derived from two different sources, from gardens belonging to government, and the government share of Ratmahare, Nilapalla, Mallapalla, Muttetto, Divile Parveny, and Accommodessan Gardens.

Tithes Redeemed.—A measure adopted in November 1813 by Government, under the conviction that proprietors of Paddy lands, would cultivate them more carefully, and with greater advantage to the public, if subjected to one tenth only, instead of to the larger rates of tax, mentioned in the first paragraph. The redemption is effected by the owner paying the estimated value of the difference of Tax for eight or ten years, at one payment; under instructions from the Secretary of state, preparations are being made for the general redemption of the land tax, upon the same principle.

Duty on Paddy Fields.—An annual duty in money on government lands, cultivated by the inhabitants of the Batticaloa division of the eastern province, under authority from Government, established when the Dutch first gained possession of that district.

Land Customs.—Taxes levied at ferries, bridges, canals, and the lock and cart tolls established from time to time, under the authority of Government, according to the ancient Dutch laws. The regulations No. 17. of 1822, and No. 3. of 1831, protect this source of revenue.

Turnpike at Macoon.—Established in 1829, and levied on loaded Passengers at the rates fixed by a minute of Council under date 22nd December 1828, this tax was abolished from 1st January 1837.

Sea customs.—These duties are collected under, and agreeably to the directions, of the Regulation No. 9. of 1825, No. 1. of 1828, and No. 4. of 1830, and an ordinance passed by the Legislative Council No. 7. of 1836. The payment of Fees on Port Clearances and Pilotage under the 59 and 68 clauses of the regulation, No. 9. of 1825, is regulated from 1st January 1835, by advertisement of the 29th December, 1834.

Cinnamon.—The proceeds of cinnamon, the collection of the plantations, retained by Government, sold under the instructions of the Secretary of State, and the advertisement of the 9th March 1833, issued thereupon. The cinnamon is put up to sale monthly, in lots of five bales of one hundred pounds each bale, at the upset prices of 3s. 6d. for the first, 2s. for the second, and 9d. for the third sort, per lb.

Receipts for sorting and embalming Cinnamon.—

Under this head are brought to account, receipts for assorting and embalming private cinnamon lodged in the Government stores at Colombo and Galle, under the superintendence of the officers of government, at the rate of 2s. per bale of one hundred pounds; under the advertisement of the 14th August 1833.

Licenses.—Arrack and Toddy.—Tax on the consumption of Arrack and Toddy or the exclusive privilege of retailing Arrack, formed in the several provinces, protected by the ordinance No. 5. of 1834.

Stills.—This tax was first imposed in January 1821, but it was found expedient to lower the established duty, in the proportion of one-third in March 1826, and again to lower it to 2s. a gallon in May 1832, which is the rate now levied. The ordinance No. 5. of 1834, protects this branch of revenue.

Sifting Sand for Pearls.—A privilege of sifting sand for pearls, and is rented at Manar after the pearl fishery is over.

Weights and measures.—Annual payments to the Colombo cutcherry for stamping weights, and measures, and hire of dry measures established by government under the 3rd and 7th regulations of 1816, and which system has by the 19th regulation of 1822, been extended to liquid, and linear measures and weights.

Auction Duty—Government duty of 2 per cent. on moveable property, levied under the ordinance No. 5. of 1836.

Fish.—Government share of fish caught in the sea, rivers, lakes, &c. This duty is rented in the several provinces and was established under the Dutch government from an early period. The duty was generally reduced to one-sixth, from 1st January 1834, and has been further reduced to one-tenth from 1st January 1837.

Under instructions from the Secretary of State, an alteration in the mode of collecting this branch of the revenue, is under consideration.

Chank Fishery.—The exclusive privilege of fishing for Chanks, reserved by government from time immemorial, generally rented. The Dutch proclamation of the 28th May 1665, protects this branch of revenue established in June 1836.

Salt.—Recognized by regulation No. 2. of 1818, and was formerly conducted on the authority of custom and orders of the Dutch government. The Ordinance No. 3. of 1836, consolidates and amends the laws for the protection of this branch of revenue.

Stamps.—Amount of stamps sold at the several cutcherries, and by the commissioner of stamps, under the regulations No. 4. of 1827, and No. 2. of 1830, which have been revised by the ordinance No. 6. of 1836.

Judicial Receipts.—Amount of stamps sold in judicial process and paid into the Cutcherries, by the several district judges throughout the island, according to the tables of fees, established by the supreme court, under the charter dated the 18th February 1833.

Fines and Forfeitures.—Fines levied and sums obtained for articles, confiscated and sold for the benefit of the Crown, by the supreme court and district judges.

Postage.—Island postage on Letters &c. regulated by the ordinance, No. 8. of 1836.

Pearl Fishery.—Can only be considered as a casual and not a permanent revenue. The regulation for the protection of the banks and the Dutch proclamations of the 28th May 1665, and the 15th November 1745, and the regulation No. 3. of 1811.

Lands and Houses.—Under this head receipts of the following descriptions are brought to account. The monthly rent of Government houses and lands occupied by individuals; the amount of proceeds of houses, gardens, waste ground and cinnamon plantations, disposed of by government, and the collection made at the several government rest houses in the island, from travellers or passengers occupying the same.

Assessment on houses, &c.—This tax is levied from occupants of houses at Colombo and Galle, and was first imposed in the year 1820. This as well as the tax on bullock carts (both of which are brought to account under one head) are protected by the ordinance, No. 4 of 1834, as amended by No. 3. of 1835.

Government Gazettes, &c.—Under this head receipts accruing from the sale of, and from advertisements inserted in the "Government Gazette." Also from the sale of the Ceylon almanac; are brought to account by the government agent for the Western province.

Kandy Districts.—Land Revenue.—The receipts classed under this head, are derived from the tax of one-fifth, one-tenth, or one fourteenth, on the Paddy (Rice) lands of private proprietors, which is imposed by the 18th, 19th, and 20th clauses, of the Proclamation of the 21st November 1818, and from the royal lands still possessed, unalienated by the Crown, by a tax varying from twenty-five to fifty per cent. of the produce, which last mentioned lands are annually rented.

In the central province the tax on private property, had till 1826 been exclusively levied by an annual assessment of the crop of each harvest, and had chiefly been collected in kind. Within the last eight years in the districts adjacent to the town of Kandy, this annual assessment has been commuted, with the consent of the proprietors, for the annual payment of a given quantity of grain, without annual assessment till the end of the year 1830, and that system has been further improved within the last six years, by giving the proprietors the option of paying that commuted fixed assessment, either at a fixed money rate, or in kind. The stimulus given to industry in the aforesaid districts by the completion of the carriage road, between Colombo and Kandy, and other channels of communication have induced and enabled the proprietors to pay that commuted tax since 1831, almost exclusively in money. From the double advantage of an increase in the amount of the tax, and of the saving of the charges of annually assessing, transporting and storing the revenue grain, a nett increase of upwards of one hundred per cent. was derived under this head, in those commuted districts as compared with the revenue, obtained under the former system, and the proprietors have at the same time been protected from many disadvantages and grievances insuperable from the former system of annual assessment. The term of the first settlement having expired with the year 1832, the proprietors had the option of either renewing the settlement on the same conditions, for another term of three years, or of reverting to the former system of annual assessment. The renewal of the commutation assessment was accepted throughout the former commuted districts. At the end of 1835, the renewed commutation also expired, and a notice was issued, that the assessment may either be renewed, for a term of twenty-one years, or that the tax may be redeemed in perpetuity, by paying ten years purchase of the commuted annual

tax. The permission to redeem has been accepted to some extent, each of the proprietors as were not prepared to redeem, have accepted the commutation assessment for the term of twenty-one years. The commutation system of obtaining for a term of years, a fixed annual payment in grain or money, without assessment of crops, and of renewing the term as it expires, likewise prevails in the Kandyan portion of the western, southern, eastern, and northern provinces.

Land Customs.—The only receipts under this head are those derived from the ferry and bridge toll rents, which are levied under the regulation No. 3. of 1831.

Licenses.—Tax on the consumption of arrack, or the exclusive privilege of retailing arrack protected by the ordinance No. 5. of 1834.

Auction Duty.—This head requires no explanation beyond what is given above respecting the maritime districts.

Stamps.—*Judicial Receipt.*—*Fines and Forfeitures.*—*Postage.*—These heads too require no further explanation.

Expenditure.—From the time of our acquisition of this island, its revenue has been inadequate to meet the expenditure, whether wisely or unnecessarily incurred. Certainly much of the expenditure arose from causes which now cease to operate—namely, internal war with the Kandyans, and, in consequence of hostilities in Europe or British India; even at this moment, a larger military force is kept up in Ceylon than is required for the mere protection of the island, in consequence of its being the Malta or Gibraltar of our eastern possessions. The following abstract was laid before the finance committee of parliament in 1828.

Net Revenue and Expenditure of Ceylon, for Fourteen Years.

Years.	Net Revenue.	Expenditure.	Excess of Expenditure.

expected to meet the charges requisite for its maintenance and peace.

Yet the excess of expenditure in the latter years had considerably diminished; but a more agreeable prospect of the finances of the colony is presented to us in the Ceylon Almanac for 1833, which gives the revenue and expenditure from 1821 to 1831, thus—

Amount of Paper Currency in circulation. [B. B. 1836.] 40,715 notes of 1*l.* each, 40,715*l.*; 18,375 notes of 2*l.* each, 36,750*l.*; 1,274 notes of 5*l.* each, 6,370*l.*; 213 notes of 10*l.* each, 2,130*l.*; 38 notes of 20*l.* each, 760*l.*; 27 notes of 25*l.* each, 675*l.*; total, 87,400*l.* The value of the paper currency is the same as that of the precious metals in circulation, the same

being always exchanged on demand at the treasury. The guarantee of the Governor for the time being, under the sanction of his Majesty's ministers, is the security on which the paper depends.

On the 31st December, 1836, the amount of paper currency in the several Treasuries of Government was as follows, viz.: Pound notes, as per statement,

25,915*l*. The amount of precious metals in circulation has been estimated at 157,324*l*. The amount of paper currency is 87,400*l*. Probable excess of precious metals beyond paper currency, 69,724*l*.

Rate of Exchange.—Established by Government order of 7th July, 1825: With England @ 1*s*. 6*d*. per rix dollar; with Madras @ 1*s*. 11*d*. per rupee; with Bombay @ 1*s*. 11*d*. per rupee.

Established by Government order of 7th July, 1825, and 4th August, 1836: With Calcutta @ 2*s*. 1*d*. per sicca rupee, and 100 siccas per 106½ Company's rupees.

Established by Government order of 7th July, 1825: With the Mauritius and Penang @ 4*s*. 4*d*. per Spanish dollar.

The rates of exchange with Great Britain and foreign countries have been fixed according to the relative value of the Ceylon rix dollar to the British and foreign coins. The rate of exchange has been the same from January to December, 1836, as fixed by the above orders of 7th July, 1825, and 4th August, 1836.

Coins.—Gold coinage: Sovereigns; half ditto.—British silver coinage: Crowns; half ditto; shillings; six-penny pieces; rix dollars of English coinage, value 1*s*. 6*d*.—Foreign silver coinage: Spanish and American dollars, value 4*s*. 2*d*.; sicca rupees, value 2*s*.; Company's ditto, value 2*s*.; Bombay ditto, value 1*s*. 10*d*.; Madras ditto, value 1*s*. 10*d*.; Madras quarter ditto, value 5½*d*.—Copper coinage: Penny pieces; half ditto; farthings; half ditto; two pice pieces of English coinage, value ½*d*.; one pice ditto, value ¼*d*.; half pice ditto, ⅓*d*.; Dutch copper challies, taken as prizes in Kandy, value ⅓*d*.

The value of the British silver and the rix dollar must have been fixed by assay in England. None of these coins have been cut, pierced, or defaced. The Madras quarter rupees imported expressly for circulation in the island, have received the impression of a crown, but not otherwise altered.

Weights and Measures.—The *Singalese*, or dry measure is 4 cut chundroons=1 cut measure or seer; 4-5ths=1 coornie; 2 1-12ths=1 marcal; 2=1 parrah; 8=1 ammonam; 9 3-8ths=1 last.

The internal measure of a *standard parrah* is a perfect cube of 11 57-100th inches; the *seer* is a perfect cylinder—depth 4.35 inches, diameter 4.35 inches; the weight of the parrah measure, according to the custom-house account is, for coffee, from 50 to 35 lbs.; pepper, 27 to 30 lbs.; salt 52 to 55 lbs.; paddy (unhusked rice) 30 to 33 lbs.; rice 42 to 46 lbs.; the Candy or Bahar=500 lbs. avoirdupois, or 461 lbs. Dutch troy weight.

Kandyan Measure of Surface.—Eight lahas=1 coornie (10 15-16ths square perches), 10=1 peyla (2 square roods, 29½ square perches), 4=1 ammonam (2 acres, 2 square roods, 37½ square perches). But although the average extent of one *ammonam* is found to be 2 acres, 2 roods, and 2 perches, the measurement of land is not calculated for the specific area, but from the quantity of seed required to be sown on it, and consequently according to its fertility.

Weights of ozs., lbs., &c. are used also throughout the island, British standard. The bale of cinnamon consists of nearly 92½ lbs.

Liquid Measure.—Gallons and their multiples and sub-multiples: 150 gallons=1 *leagner* or *legger*.

Monetary System.—The circulation of late is £, *s*, and *d*. as in England, and accounts are becoming more generally kept in the same. The rix dollar is equal to 1*s*. 6*d*.; it is divided into 12 fanams (a thick

copper coin), and each fanam into 4 pice. There is a government bank at Colombo; but I can obtain no returns of its circulation or deposits. Notes are issued by government; but no annual returns are published of the amount, nor is there any information within the reach of the Colonial Office, in Downing Street, as to the real state of the paper and metallic circulation in the island. It is proposed to establish a private bank at Colombo. A savings bank is now in operation.

Measures.—Dry Measure.

Cut	Cut								
Chondoo.	Seers.	Coornies.	Marcal.	Parrah.	Ammonam.	Last.

7200 =	1800 =	375 =	150 =	75 =	9½ =	1			

The parrah measure is a perfect cube of internal dimensions, a table of which, with its sub-divisions, is herewith inserted:—

Internal dimensions of a Parrah and its sub-divisions.—Parrah, length, 11 57-100th inches; depth, ditto; breadth, ditto. Half parrah, length, 9 18-100th inches; depth, ditto; breadth, ditto. Quarter parrah, length, 7 28-100th inches; depth, ditto; breadth, ditto.

The seer is a perfect cylinder, of the depth and diameter described in the table underneath, in which is also stated its sub-divisions:—

Internal dimensions of a Seer and its sub-divisions.—Seer, depth, 4 35-100th inches; diameter, ditto. Half seer, depth, 3 45-100th inches; diameter, ditto. Quarter seer, depth, 2 74-100th inches; diameter, ditto.

Linear or Cloth Measure.

Those marked with an Asterisk are taken from the Exports in [B. B.]

From Tangalle to Chilaw, a distance of 135 miles, it is nearly one continued grove of cocoanut, bread-fruit, and jack fruit-trees (the latter being scarcely inferior in importance to the natives as an article of food &c. than the cocoanut). Cotton grows with the greatest facility, whether Nankin, Bourbon, or Brazil, the buds are ripe within four months after the seed is put in the ground, and the interior, particularly, about Talcaima contains immense supplies of the gigantic cotton trees, whose silky pods when bursting, cover the earth around their beautiful glossy filaments, which our manufacturers in Manchester would be so glad to obtain.

Every village or hut has its patch of sugar cane and tobacco, the latter in many parts of the island has a delicious aroma. Coffee grows luxuriantly, and even without care, of an excellent quality; when properly attended to it is considered by many superior to Mocha. The pepper vine grows nearly in a state of wild-

ness all over the equally plentiful is of the finest unequalled in any lon has a richness any other country lent masts and y where procurable sappan, iron, jack beautiful cabinet (vide Ceylon cabin and so justly a groves of the Pa in the northward palms in the south peasantry in season

ness all over the island. *Carda nom* plants are equally plentiful. The much sought after arecanut is of the finest species, and unsurpassed, nay, even unequalled in any part of the east. The rice of Ceylon has a richness of flavour I have never found in any other country. Teak forests abound and excellent masts and yards of the largest size are everywhere procurable. Calamander, ebony, satin, rose, sappan, iron, jack, &c., and every species of the most beautiful cabinet making woods, are in rich profusion (*vide* Ceylon cabinet desks, dressing-cases &c., so much and so justly admired in England). Enchanting groves of the Palmyra palms surround the villages in the northward of the island, and like the cocoa palms in the south, are of the greatest value to the peasantry in seasons of draught.

In 1831 it was calculated that there grew along the coast between Dondra Head and Calpentyn (184 miles) ten millions cocoanut trees. The value of these may be judged by an enumeration of some of the articles prepared from them.

1. *Arrack* (the spirit under this name, made from the cocoanut blossom, is far superior to the Batavian arrack, made from rice) which is distilled from the sweet juice of the incised flower-stock, termed—

2. '*Toddy*,' in itself a delicious wholesome beverage, when drank fresh drawn before the morning sun has caused fermentation to commence.

3. *Joghery*, a coarse, strong grained, but peculiar flavoured sugar (well adapted for crystallization, or refining in England), made in abundance from toddy.

4. *Vinegar* equal to any made from white wine, also prepared from the toddy, and used in making exquisite pickles from the young shoots.

5. *Coir*, or ropes, strong and elastic, and having the peculiar property of being best preserved for use in sea-water (hence their adaption for mooring, and other purposes to which they are now applied in Mauritius harbour and elsewhere, as also for running rigging in the India shipping).

6. Brushes and brooms, of various descriptions.

7. Matting of excellent quality.

8. Rafters for houses.

9. Oil of much value, and now used in England for candles as well as lamps.

10. Gutters or water-spouts, or conveyances, for which the hollow stem or trunk is so well adapted.

11. Thatching for the peasants' cottages, the shady broad leaf being admirably suited for the purpose.

12. Alkaline ashes for the burnt leaves, and used by washermen.

13. The roots are sometimes masticated in place of areca nut.

14. Baskets of the young shoots.

15. Drums of the crust of the trunk.

16. Reticulated cloth cradles or couches for infants.

17. The terminal buds, used instead of cabbage.

18. Translucent lanterns of the young leaves.

19. Tablets for writing upon with an iron stylus or pen (after the Roman manner), from the leaflets.

20. An *Æolian* harp of the stripes of the leaf.

21. Stuffing (*coir*), in place of hair, for couch cushions, mattresses, saddles, &c.

The list has been extended to 99 different articles.

It may also be mentioned that the natives of the Maldivé islands send an annual embassy to Ceylon, the boats conveying whom are entirely prepared from this tree, the persons composing the embassy, clothed and fed on its products; and the numerous presents for the Governor of Ceylon are all manufactured from this queen of palms.

The *laurus cinnamomum*, although cultivated in many tropical places, has its principal habitation at Ceylon, which is capable of yielding a sufficient supply for every country in Europe; the tree whence the cinnamon bark is derived grows to the height of from 15 to 20 feet, with an irregular and knotty stem, branchy and ligneous roots, fibrous and inodorous wood, *external* bark, rough, thick, scabrous, and of an ash colour, inner bark reddish, (the young shoots are often delicately speckled with dark green and light orange colours); branches umbrageous inclining horizontally and downwards; leaves oblong and in pairs, from six to nine inches in length, and three broad, petiolated, colour dark green; flowers clustered on one peduncle, white, wanting calyx, small resembling a mixture of rose and lilac; fruit an oval berry, larger than a black currant, receptacle thick, green and hexangular. The roots have the pungent smell of camphor, and the delicious odour of cinnamon, yielding camphor by distillation, the leaves have the pungent taste of cloves; the berries, by boiling, yield an unctuous substance like wax, emitting an agreeable odour, and formerly used as candles for the exclusive use of the Candian Court. Cattle of every kind eagerly feed on the luxuriant foliage, while pigeons, crows, and other birds, devour the berries with avidity. To the industry of man belongs the bark, the varieties of which are dependent on the nature of the soil, on the skill in cultivating and peeling, and on the age and healthiness of the plant. About 2,000 acres of land are laid out in regular cinnamon plantations in Ceylon, and about 30,000 persons employed thereon. The *peeling* of the bark begins with May and ends with October: the peelers (chalias a distinct caste in Ceylon) commence the process by striking a sharp bill-hook into a shoot which seems fit for peeling; if on opening the gash the bark separates gently, it is fit for decortication; if otherwise, the shoot is unhealthy, the gash is carefully closed, and the sucker left for future examination; shoots thus found fit (generally from three to five feet long, and three-quarters of an inch in diameter) are then cut down, conveyed to sheds, and there cleared of leaves and twigs; by means of two longitudinal slits the bark peels off in two semi-circular slips; when a sufficient number are collected, the sections are placed in close contact (as two quill-halves would be laid one within the other) and the whole bundle is firmly pressed and bound up together for 24 hours, until a degree of fermentation is produced, which facilitates the removal of the cuticle; subsequently the interior side of each section of bark is placed upon a convex piece of wood fitted to its size, and the epidermis, together with the green succulent matter carefully scraped off (if any of the outer pulpy substance be allowed to remain, the cinnamon has an unpleasant bitterness); a few hours after the removal of the cuticle, the pieces are again placed in each other, and the bark in drying gradually contracts and rolls itself into a quill-like form. During the first day it is placed under shelter on open platforms, subsequently it is finally dried in the sun, and made up into bundles about 30 pounds weight. A plantation requires seven or eight years' growth before yielding produce, the tree is least advantageously propagated by seeds,—layers and shoots, or transplanted stumps, are the best means of extending the growth.

* The duty on Importation is 6d. per lb.

The pearl banks, according to Dr. Ruschenberger, are formed by coral ridges from six to ten miles off shore: their general depth is from five to seven fathoms, but it is on the banks of Arippe, where the coral rising nearly to the surface of the water forms a shelter against the violence of the monsoons and currents, that the pearl oyster chiefly arrives at perfection. The young oysters, when they first escape from the egg, are seen floating about the sea in immense clusters; a little increase in size and solidity makes them sink to the bottom where they immediately attach themselves to the rocks by means of a beard and a glutinous matter secreted from it. There they remain in security until age has enfeebled the fibres of their beard, or deprived them of their adhesiveness, and then they drop from their coral supports and lie in heaps on the sandy bank beneath. The pearl-divers say that the oyster is about six years and a half old when it drops from the rock; it is supposed to arrive at perfection in seven years, and to die soon after. During their clinging period they accumulate on the rocks in heaps, sometimes 18 inches or two feet deep. The best pearls are generally found in the most fleshy part of the oyster, near the hinge of the shell, but they are not confined to any part of the fish. Instances have occurred of a single oyster containing above 60 pearls; yet the rarity of these treasures is manifest from the fact that oysters cost less at Arippe during the fishery than at Faversham or Colchester.

During the calms of November the banks are examined by experienced officers, and samples of the oysters are forwarded to the seat of government. If the result of the examination prove favourable, then the fishery is announced by an advertisement, stating when and on what bank it is to take place, how long it is to continue, and how many boats will be allowed to engage in it. These boats are of very rude construction, generally from eight to fifteen tons burden, and without decks. They leave the shore at midnight, favoured by the land winds, and anchor near the government guard-vessel and the fishing bank. A little after dawn in the morning a signal is given for the diving to begin, and a gun is fired at noon, on which it ceases. The following description of the mode of proceeding was procured by Dr. Ruschenberger, on the spot.

"The crew of a boat consists of a Tindal or master, ten divers, and 13 other men who manage the boat and attend the divers when fishing. Each boat has five diving stones (the ten divers relieving each other);

five divers are constantly at work during the hours of fishing. The weight of the diving stone varies from 15 to 25 lb., according to the size of the diver; some stout men find it necessary to have from 4 to 8 lb. of stone in a waist-belt, to enable them to keep at the bottom of the sea, to fill their net with oysters. The form of a diving stone resembles the cone of a pine; it is suspended by a double cord.

"The net is of coir-rope yarns, 18 inches deep, fastened to a hoop 18 inches wide, fairly slung to a single cord. On preparing to commence fishing, the diver divests himself of all his clothes, except a small piece of cloth; after offering up his devotions, he plunges into the sea and swims to his diving stone, which his attendants have slung over the side of the boat; he places his right foot or toes between the double cord on the diving stone—the bight of the cord being passed over a stick projecting from the side of the boat; by grasping all parts of the rope he is enabled to support himself and the stone, and raise or lower the latter for his own convenience while he remains at the surface; he then puts his left foot on the hoop of the net and presses it against the diving stone, retaining the cord in his hand. The attendants take care that the cords are clear for running out of the boat.

"The diver being thus prepared, he raises his body as much as he is able; drawing a full breath, he presses his nostrils between his thumb and finger, slips his hold of the bight of the diving stone, and descends as rapidly as the stone will sink him. On reaching the bottom, he abandons the stone, which is hauled up by the attendants ready to take him down again, clings to the ground, and commences filling his net. To accomplish this he will sometimes creep over a space of eight or ten fathoms, and remain under water a minute; when he wishes to ascend he checks the cord of the net, which is instantly felt by the attendants, who commence pulling up as fast as they are able. The diver remains with the net until it is so far clear of the bottom as to be in no danger of upsetting, and then begins to haul himself up by the cord hand over hand, which the attendants are likewise pulling. When by these means his body has acquired an impetus upwards he forsakes the cord, places his hands to his thighs, rapidly ascends to the surface, swims to his diving stone, and by the time the contents of his net have been emptied into the boat he is ready to go down again. One diver will take up in a day from 1,000 to 4,000 oysters. They seldom exceed a minute under water; the more common time is from 53 to 57 seconds, but when requested to remain as long as possible, they can prolong their stay to something more than 80 seconds. They are warned to ascend by a singing noise in the ears, and finally by a sensation similar to hiccup."

The divers have much faith in the powers of the shark charmer, and many of them will not descend unless he be present: he is therefore paid by government. One-fourth of the oysters taken up belong to the divers, the remainder are disposed of by public sale. The annual nett revenue derived from the pearl fishery is estimated at 14,000*l.*; but in 1835, when no less than 1,250 divers were employed, it amounted to more than 25,000*l.*

Manufactures

Number, name, site, description of manufactures, &c.

Western Province

332 looms. The domestic cloth manufacture consists of kerchiefs, table cloths, towels, sail cloths, coarse cloths, and for dress by the natives. 134 oil mills. The domestic oil expressed at Nut, Gingeley, and 2 steam engines. Ceylon oil.

Southern Province

544 looms. Handkerchiefs, towels, slacks, cloths used for dress by natives. 11 oil mills. Cocoa Nut oil.

Eastern Province

626 weavers looms. 11 oil mills. Cocoa Nut oil. Gingeley oils.

Northern Province

976 weavers looms. 3 oil mills. Cocoa Nut oil. Illepe and Margala oils.

There are no regular manufactures in Ceylon, those entered under the heading of exception of the two cantile houses at Colombo. There is also no cotton in the island, small quantities of cotton are occasionally built. The titles of each are not stated in the native names.

Military Defences of Colombo. The fortress of Colombo, situated on the island, is an irregularly shaped bastion; the lines of defence are insignificant ravelins. The fortress is surrounded by the sea, the extensive inundation, the various ways of approach. The fronts; the glacis, how the revetments are of masonry and lime mortar (in tolerable repair) wet ditch in front, is broad, well supplied with water, and when cleaned would be neither casemated by batteries within the fortification brackish water, but the of dry weather. There is within the fort, the whole state. The fortress commands the sea, none but vessels of small size can approach, not be aided to command the sea; it encloses the residence of the governor.

There are no regular manufactories, mills, &c., in Ceylon, those entered in this return being, with the exception of the two steam engines (set up by a mercantile house at Colombo) of a very inferior description. There is also no regular yard for ship building in the island, small sloops and schooners are however occasionally built. The description of fish and quantity of each are not stated, mostly all of them bearing native names.

Military Defences of Ceylon in 1836.—The fortress of Colombo, situate on the west side of the island, is an irregular octagon, defended by eight bastions; the lines of defence fichante, with three insignificant ravelins. One half of the fortress is surrounded by the sea, the other half or land side, by an extensive inundation, leaving only two narrow causeways of approach. There is a covert way to the land fronts; the glacis, however, was never finished. The revetments are of masonry generally composed of caubook and lime-mortar, and are (with some exceptions) in tolerable repair. The profile, from having a wet ditch in front, is respectable, the ditches are broad, well supplied with water from the inundation, and when cleaned would be sufficiently deep. There are neither casemated barracks, nor casemated store-houses within the fortress. The wells afford slightly brackish water, but the water fails on a continuance of dry weather. There are several powder magazines within the fort, the whole of which are in a serviceable state. The fortress commands the harbour, into which none but vessels of small burthen can enter; it cannot be said to command the roadstead, because vessels may anchor with safety from one to fifteen miles from the shore; it encloses within its lines of defence the residence of the governor, the head quarters of

the army, and the public offices, containing the official records of the island; it forms a strong hold in the island, and is most conveniently situated for trade. Although the trace of the body of the place does not conform to the science of more modern war, being of the days of Louis XIII., and according to the system of the Chevalier de Ville; still, if good out-works were added, and casemated cover for troop's stores constructed in the body of the place, and the ramparts &c. placed in an efficient state of repair, Colombo, from its situation, and the great difficulty of approaching it by land, ought, under an intelligent and intrepid governor, to make a protracted defence; with a naval superiority, the fortress could, under any land attack, receive succour from the sea. Trincomale, the principal British naval depot in the Indian seas:—Fort Frederick, Trincomale, is situated on the east side of the island, and on a peninsula, projecting into the Indian ocean. The works of defence consist of three irregular fronts, with the lines of defence fichante, a cavalier and a citadel, without either casemated barracks, or casemated store-houses; one front with an unfinished ravelin, occupies the narrow isthmus, the ditches of this front are dry, and have never been finished; the two other fronts follow the direction of the ground. The cavalier stands on elevated ground, in rear of one of the bastions of the land front, and is connected with the bastion by a curtain. The citadel is in rear of the cavalier, and on still more elevated ground. The profile has 20 feet of escarp, but the revetments are of good masonry. The fort is well supplied with water. There are also several powder magazines within, which are in a serviceable state.

Fort Osnaburg, Trincomale, situated at the mouth

of the inner harbour, is a small irregular work, and does not sufficiently protect the entrance; its profile is insignificant without casemated barracks or store-houses. The fort is supplied with rain water, collected in a tank, and has two powder magazines within it. The works of defence now in existence at Trincomalee, are far from adequate to the secure holding of a port of such great importance.

Galle.—The fortress of Galle situated on the south side of the island, and on a peninsula projecting into the sea, commands the only harbour on that side of the island, into which large ships can enter, but it is commanded by a range of hills about 700 yards distant. The lines of defence on the land side, or across the isthmus consist of one bastion with a cavalier, two half bastions with fausse brays, and two curtains containing each half bastion with the whole bastion, with a half finished ditch in front of the whole, but without casemated barracks or store-houses. The salient angles of the half bastions are appurtenant to the harbour and sea. The construction of this fort does not follow any regular system. The remaining defences consist of substantial lines built on the edge of the outline of the peninsula, the base of which is constantly washed by a heavy surf. The profile is irregular, in some parts bold, but from the small height of the faussebraye, requires a wet ditch in order to guard against escalade. The revetments are composed of rubble stone and coral laid in lime

mortar, and are in tolerable repair. The fort is also tolerably well supplied with water, and there are four powder magazines within it.

Jaffna.—The fort of Jaffna is situated on the N. W. side of the island, and on an inlet of the Gulf of Manar. The work is an irregular pentagon, with five bastions connected by curtains, the lines of defence fichante, and the flanks perpendicular to the curtains, it has four land and one sea front. The former have ravelins, a covertway throughout. With the exception of the ravelins, to which there is none, the communication passing by gallery under the flanks of the ravelins, also a glacis. The body of the place has a wet ditch, but the ravelins a dry one. The profile has 22 feet of escarp, above the level of the wet ditch the revetments are of masonry, and in a good state of repair. The fort contains 25 wells, two of which give good, and the remainder brackish water. This fort affords security to a small garrison, stationed in a remote part of the island, and surrounded by a dense native population. Independent of the above four principal posts, there are detached ones on the coast, generally with small garrisons, and a field work for their protection. In the interior of the island, the principal post is Kandy, an open town situated in a valley, with four unfinished redoubts on the surrounding heights. The military works are controuled by the colonial government, and scarcely any expense has been incurred by the colony during the year 1836

the year, and the little felt, the wine of land and sea birds.

IV. January and

CHAPTER III.—PENANG, OR PRINCE OF WALES'S ISLAND.

The possessions now about to be described, though small in comparison with those delineated in the preceding pages, are of considerable importance, whether viewed in connection with the Anglo-eastern empire, or separately as commercial stations or political maritime positions. Being under one government, their history is given in one chapter, but their distinct features, geographically and mercantilely, demand a separate consideration for each: to begin with the seat of government.

SECTION I. This picturesque island (so well adapted for a commercial entrepôt), is situated on the west coast of the Malayan peninsula, in latitude from 5. 15. to 5. 29. N. and longitude 100. E.; its greatest length is 16 statute miles from N. to S., and its greatest breadth 12 miles at the north, and decreasing to eight miles at the south, thus forming an irregular four sided shape, with a range of lofty hills in the centre, the whole computed to contain 160 square miles. Penang is so called from the Malay term for the *Areca* or betel nut, which the Malays think the isle bears some resemblance to in shape.

The valley of Penang, about three miles in breadth, is the level part of the island on its eastern side, extending from the hills to the sea, of a triangular shape, the ranges of mountains forming the base, and the apex, called *Tanjong*, jutting into the harbour, and having Georgetown (the capital) and the Fort of Penang built on it, on which, for three miles in every direction from the point, private houses extend. Almost the whole of the north of the island is mountainous, and through the centre of the island runs a range of hills, decreasing in height and magnitude as

they reach towards the south. On the west and south of the mountains there is a considerable quantity of level ground of good quality for every species of cultivation as is now demonstrated by the general culture thereof. Indeed six-thirds of Penang is of level or gentle inclination. The east, owing to its moistness, is covered with rice fields. The south and west valleys, though partly cultivated for the same purpose, are chiefly laid out in pepper gardens and spice plantations. Everywhere close to the coast, as in Ceylon, runs an extensive belt of cocoa nut trees, and scattered over the island in various groups, appear groves of the graceful *areca* palm (or Penang) from which the isle takes its Malay name. The hills and low grounds, where not cultivated, are thickly covered with wood. Vegetation is splendidly luxuriant and for miles and miles the eye rests on one dense mass of mountain forest. Besides Georgetown (the capital) above alluded to, there is only one large collection of houses entitled *Jamestown*, situated on the sea shore, four miles to the south of the capital, amidst a grove of the lovely palm tribe. The hill called the "*Highlands of Scotland*" is 1,428 feet above the sea (and like the other stations), the situation and climate of which are delightful. Numerous small villages and Malay topes are scattered over the island (especially on the south side), often beautifully and romantically situated on the coast, or amidst spice groves in the vales.

The harbour of George Town, the capital, is capacious with good anchorage and well defended; it is formed by a strait about two miles wide, that separates Penang from the opposite Quedah coast on the Malayan peninsula. The sea is placid throughout

the year, and the periodical effects of the monsoons little felt, the winds partaking more of the character of land and sea breezes.

II. When first known to Europeans the island appeared quite untenanted, covered with forests and considered as a part of the possessions of the king of Quedah on the contiguous coast. In 1785 Capt. Light, the commander of a 'country ship' in India, having married the King of Quedah's daughter, received a gift of the island as a marriage portion: Capt. Light transferred it to the E. I. Company, who having entered into a treaty with His Quedah Majesty (which was to last as long as the *sun* and *moon* gave light!) agreed to pay six thousand dollars annually to the King, which in 1800 was raised to ten thousand, in consideration of the Company receiving the Wellesley province on the main land opposite Penang, a territory extending thirty-five miles along the coast, four miles inland from the S. bank of the Qualla Mudda to the N. bank of the Krian river, Lat 5° 20' N.

III. The mountains are entirely composed of fine grey granite, and the smaller hills are of the same material, excepting some hills near the coast formed of *laterite* as is also Saddle Island on the S. W. angle of Penang. A tin mine was worked some years ago in the hills, and doubtless many valuable minerals exist in the mountains, which are probably equal in quality to those of the contiguous Malayan Peninsula.

The soil is generally a light black mould mixed with gravel and clay, and in some parts there is a rich vegetable ground formed by the decayed leaves of the forests with which the island had for ages been covered, the coast soil is sandy but fertile.

IV. January and February are the dry and hot

months, and November and December the rainy ones; but excepting the two former the island is seldom a week without refreshing showers. The thermometer on Flag-staff hill (two thousand two hundred and forty-eight feet high) never rises beyond 78° F. (seldom to 74°) and falls to 66°; on the plain it ranges from 76° to 90°. The island is considered remarkably healthy. The climate of the high land of Penang resembles that of Funchal at Madeira, possessing the advantage of a very limited range of thermometer, the greatest range in the twenty-four hours being 11°, and generally only three or four. The lightness and purity of the atmosphere elevate the spirits and render the step free and buoyant, while the splendid and varied scenery, the island itself with its hills and dales, the calm ocean around studded with verdant isles, and the opposite coast of Quedah with chains of mountains towering chain over chain, combined with the health inspiring breezes, render a residence among the gardens of Penang of much value to the invalid.

V. When the Company's Establishment was formed at Penang in 1786, the only inhabitants were a few miserable fishermen on the sea coast. In consequence of the disturbances in the Malayan principalities, and the encouragement given to settlers by the E. I. Company, a native population of various descriptions arose. The population of the Settlement according to all the returns before me has been as follows during the years

1821 number	38,057.	1826 number	55,116.
1822 -	51,207.	1827 -	57,986.
1824 -	53,669.	1828 -	60,153.

The following Official Return from the E. India House, shews the motley population of Penang:—

1826-27	121168	23058	4991	\$149217‡	\$55744	94745	37230

* Interest on debts, £844. † Ditto £253. ‡ Ditto £1272. § The accounts of Singapore and Malacca are included in these years; but for nine months only in the year 1826-27, and for the whole year in 1827-28.

The sale of opium is a monopoly in the hands of government, who derive a revenue from it of about 40,000 Spanish dollars a year; land, licenses, and customs, are the remaining chief sources of revenue. —The government of Penang, Malacca, and Singapore, is subordinate to the presidency of Bengal, and the civil establishment recently fixed as follows:—Chief resident at Singapore, rupees 36,000; first assistant, 24,000; second ditto, 7,200; deputy resident at Malacca, 24,000; assistant, 7,200; deputy resident, Prince of Wales's Island, 30,000; assistant, 7,200; assistant, Province Wellesley (exclusively of military pay), 3,600; one surgeon, 9,600, and three assistant surgeons at 4,800, 14,400, 24,000; two chaplains at 8,500 each, and one missionary 2,500, 20,000; office establishment, 12,000. Total sicca rupees 1,95,200.

VII. The trade of Penang is carried on with Calcutta, Madras, Bombay, England, China, Java, Ceylon, Siam, Tenasserim coast, Acheen, Delhi, Quedah, and a few petty native ports. In Mr. Fullarton's elaborate paper on the trade of our eastern islands, printed in the East India papers in 1833 (II. Trade, part 2, Commercial, page 878,) it appears that the total value of imports into Penang were—

In 1828-9	S. rupees 52,23,872
Exports from ditto	36,00,900
Excess	16,22,972

The imports and exports of specie for the same year were—

Imports	S. rupees 8,32,232
Exports	7,19,876

Excess . . . 1,12,356

The value of imports in sicca rupees from Calcutta was 10,94,986; from Madras, 16,95,850; Bombay, 2,65,290; England, 1,67,670; China, 2,18,440; Siam, 1,77,610; Tenasserim, 1,77,010; Acheen, 8,08,513; Delhi (a petty state on the Sumatra shore), 2,04,905; and Quedah, 2,21,200; the exports value to the same places in succession were 3,57,126; 2,38,765; 2,30,146; 50,668; 9,65,834; 96,093; 1,55,152; 10,75,842; 1,58,930; and to Quedah, 1,35,930.

Of the imports, opium alone consists of upwards of seven lac of rupees; the other items are comprised of the various produce of the Straits, or of India and British goods, the trade being one of transit. Birds' nests for Chinese soups is one of the most important articles.

From official statements of the Penang trade for the years 1834-35 and 1835-36, it appears that the value of the Imports for 1834-35, was Sa. Rs. 41,12,791; and that for 1835-36, Sa. Rs. 41,17,694, exhibiting an excess in favour of the latter year of Sa. Rs. 4,903; that the exports for 1834-35 were Sa. Rs. 41,61,464, and those of 1835-36 Sa. Rs. 42,06,758; an excess in favour of the latter year of Sa. Rs. 45,294. The imports under foreign flags for the

official years 1835-36 the Portuguese flag 21,062; American 7,658; making a total of 28,720. The flag were Sa. Rs. 6,000; French, Sa. Rs. 6,000; of Sa. Rs. 3,89,999; reported between the 30th April 1836, is the quantity exported 8,25,295.

VIII. The botany of the mountains of the red pool, dammerin, some superb species of caoutchouc or elastin in a spiral form. An exception of the *du* sugar cane and pepper (the quantity of pepper 2,025,000 avoirdupois (the former commits, the latter are from one plantation alone) square miles) coffee of pine apples of de

SECTION I.—Near the long Malayan peninsula with an average breadth of two degrees 14 minutes 12 minutes east, is situated Malacca, extending inland, and containing bounded on the north by the south Johore, by the Rumbou country, straits of Malacca.

II. The sea coast is a series of cavernous rocks, places of sepulture. (being a continuation of the range of the Brahmin) runs from the Brahmin extremity of the peninsula, the highest mountains, the highest mountain appears to be the elevation of 4,000 feet. The guhar was nearly six miles part of Mount Ophir, which does not exceed mountain appears to be there thinly covered. Stunted firs are found vegetation of the mountain that met with on the pal rivers are the Mus streams and rivulets numerous. The extreme cluster of small islands south-west monsoon 16 feet of water are seen of the fort. Colonel Lecca his study) ob-serv

official years 1835-36 are thus particularized. Under the Portuguese flag, Sa. Rs. 2,00,133; French, Sa. Rs. 21,062; American, Sa. Rs. 3,920; Danish, Sa. Rs. 7,658; making a total of Sa. Rs. 2,32,773. The exports during the same period under the Portuguese flag were Sa. Rs. 3,83,991; and under that of the French, Sa. Rs. 6,000; making an aggregate amount of Sa. Rs. 3,89,991. The quantity of specie imported between the 1st of May 1835 and the 30th April 1836, is valued at Sa. Rs. 9,64,500, and the quantity exported in the same time at Sa. Rs. 8,25,295.

VIII. The botany of the island is rich and varied: on the mountains grow the poon, bitanger, rangas, red poon, dammerlaut, wood oil tree, the cypress and some superb species of arborescent ferns. The caoutchouc or elastic gum winds round all the trees in a spiral form. All the Malacca fruits, with the exception of the *duku*, grow in great abundance, the sugar cane and pepper vine are extensively cultivated (the quantity of pepper annually produced averaged lbs. 2,025,000 *avoirdupois*) cloves and nutmegs thrive well (the former cover the tops of the cleared summits, the latter are found in every part of the valley, one plantation alone occupying a space of several square miles) coffee yields abundantly, extensive fields of pine apples of delicious gout are found at the foot

of the mountains; the tea plant grows wild; ginger, cinnamon, cotton, tobacco, and in fact every inter-tropical production is capable of being brought to the highest state of perfection.

Beef, mutton and pork are of excellent flavour, and the bazar furnishes a great variety of fish.

In 1818, the bearing nutmeg trees on the island were estimated to be 6900. Since that period spices have been more extensively cultivated. There are now upwards of thirty spice plantations at this settlement, including Province Wellesley, and these may be classed as follow:—

Five plantations containing from 4000 up to 20,000 trees.

Eight from 500 up to 10,000 trees.

Seventeen from 50 up to 2000, containing in the aggregate about 80,000 trees, of which number 45,000 are estimated to be in bearing. When Bencoolen was ceded to the Dutch, the plantations there were estimated to contain 25,000 bearing trees only.

The gross annual produce from the plantations may be roughly estimated at 130,000 lbs., but young trees are yearly coming into bearing to swell this quantity; should the cultivation meet with no serious interruption, it may perhaps in time supply the whole of the English market with spices.

CHAPTER IV.—MALACCA.

SECTION I.—Near the southern extremity of the long Malayan peninsula, which is in length 775 miles, with an average breadth of 125 miles; in latitude two degrees 14 minutes north latitude, 102 degrees 12 minutes east, is situated the British settlement of Malacca, extending about 40 miles along shore by 30 inland, and containing an area of 800 square miles: bounded on the north by Salengore at Cape Rochado, on the south Johore, at the river Muar, on the east, by the Rumbou country, and on the west, by the straits of Malacca.

II. The sea coast is rocky and barren, with detached islets of cavernous rocks, which the Chinese used as places of sepulture. The interior is mountainous (being a continuation of the Alpine chain, which runs from the Brahmaputra river in Assam to the extremity of the peninsula); with several picturesque vallies, the highest mountain (named by the natives Lealdang, by the Portuguese *Mount Ophir*) has an elevation of 4,000 feet above the sea. Colonel Farquhar was nearly six hours ascending to the highest part of Mount Ophir, the table surface on the top of which does not exceed 40 yards square; the whole mountain appears to be a solid block of granite, here and there thinly covered with decayed vegetable soil. Stunted firs are found near the summit, and the vegetation of the mountain was quite different from that met with on the plains and vallies. The principal rivers are the Muar and Lingtuh, and the small streams and rivulets from the mountains are very numerous. The extreme point of the peninsula is a cluster of small islands; the roadstead is safe, and in the south-west monsoon vessels not drawing more than 16 feet of water are secure in a harbour under the lee of the fort. Colonel Farquhar (who has made Malacca his study) observes that violent tempests never

occur at its excellent anchoring ground, that the Sumatra squalls, which are common to the straits, seldom last above an hour or two, and that for upwards of 25 years while the English had possession of the place no ship had been lost.

III. The Malayan peninsula, although the great majority of the inhabitants are Malays (whence it derives its name), is not the original country of that active, restless, courageous, vindictive, and ferocious people.

The present possessors (or Malayan princes and their subjects) emigrated in the 12th century, from Palembang in Sumatra (the original country of the Malays) about A. D. 1252, and founded the city of Malacca. As they extended their colonization, the aborigines of the country, who are oriental negroes with woolly hair, jet black skin (the Malays are copper coloured), thick lips, and flat nose, like the African, and of diminutive stature, were driven inland to the mountains, where some of their unfortunate posterity still exist.

The Malayan chiefs soon became involved in hostilities with their neighbours, partly, perhaps, because their sultan Mahommed Shah, adopted the Mahomedan religion from the Arabs, then the great traders in the east. Although the Malacca people were able to resist the attacks of the Siamese on their chief city, they were compelled to yield to the conquering Portuguese, who, in 1511, compelled Sultan Mohammed Shah, the 12th of his line, and the 7th of the city of Malacca, to fly, after an obstinate resistance, to the extremity of the peninsula, where he founded the principality of Johore, which still exists. The Portuguese held Malacca until 1640, though with great difficulty, against the repeated assaults of the Sultans of Achcen, when it was assailed by the Dutch, who

captured it after six months' siege. In 1795 it was seized by the British, but restored to the Dutch at the peace of Amiens in 1801. On the breaking out of the European war in 1807, it was again taken by the English, but again restored at the peace of 1815; however, in 1825, it was received by England, together with the Fort of Chinsurah on the river Hooghly, 20 miles from Calcutta, in exchange for the British settlements on the island of Sumatra.

IV. The climate is reckoned one of the healthiest in India, the temperature being uniform, the thermometer ranging from 72 to 85 the whole year round. The mornings and evenings are cool and refreshing, and the sultry nights of Hindostan rarely occur. There is no regular monsoon, but the rainiest months are September, October, and November. The fluctuation of the barometer throughout the year is trifling, the range being 30.3 to 29.83, giving an annual variation of only one-fifth of an inch. The average of casualties in the garrison for seven years was two in 100, a fact which attests the salubrity of the climate.

V. The population of the settlement of Malacca was in 1750, 1766, 1815, and 1817, thus,—

	1750.	1766.	1815.	1817.

* The inhabitants of Malacca, in 1830, came to a unanimous resolution to liberate every slave in the settlement 31st December, 1841.

VI. One of the most valuable British institutions in the east, is the Anglo-Chinese college at Malacca, established in 1818, by the joint efforts of the late Rev. Drs. Morrison and Milne. The object in view is the reciprocal cultivation of Chinese and European literature, and the instruction of native youths in the principles of Christianity. The native Chinese students in the college, generally average from 25 to 30, all of whom are on the foundation of the college, receiving each a monthly allowance. Several valuable and interesting translations have been made from Chinese books, and English standard works have been translated into Chinese; a foundry for types has been established, paper manufactured, and a periodical commenced. The college is indebted for existence to private contribution, and it is to be hoped that so useful an institution will not be allowed to languish for want of support. Attached to the college at Malacca are several schools, the whole of which are supported by the London Missionary Society; the Chinese schools alone contain nearly 300 boys, and the Tamil schools are increasing. The female schools at Malacca are doing well, and three schools have been established by the Malays for the instruction of their countrymen in the English language. Schools are also established at Tavoy, Moulmien and Rangoon. At the latter place, the head master is a Chinaman, who has been brought up in the Anglo-Chinese college at Malacca.

VII. When acquired by the British government, the whole revenue of the settlement was but 20,000 dollars; its revenue accounts are now incorporated with those of the other settlement (vide Penang).

VIII. Malacca, being situate between the two great emporiums of trade in the eastern archipelago, Penang and Singapore, the one at the north-west, and the other at the south-east of the straits, has necessarily a trade limited to its own consumption and produce. Before the establishment of the two latter named settlements, and during the monopolizing sway of the Dutch there, it was a place of considerable traffic.

Tin forms one of the principal items of export, and as the free trade captains may perhaps enter into the trade, it may be well to caution them of the adulterations practised by the Chinese and Malay miners. Lead is the metal usually alloyed with tin, and in order to detect adulterations, buyers may readily ascertain (with sufficient approximation to correctness) the extent of fraud endeavoured to be practised

by melting a standard muster of pure tin in a large sized bullet mould with a small orifice, and then compare a mould of the tin under examination, with that of the pure metal; if the former be heavier, the proportion of adulteration may readily be calculated. Antimony has the effect of hardening the admixture with lead, thereby increasing the difficulty of detection, as regards external appearances.

The total value of imports in 1828-29, was sicca rupees 10,81,782; of exports, sicca rupees 6,72,211. The imports of specie amounted to sicca rupees 4,19,717; and the exports amounted to sicca rupees 2,65,239. The value of imports from Calcutta, is sicca rupees 1,12,565; from Madras, 2,43,178; from England, 1,01,664; and from small native ports, 2,98,591.

The accounts, however, of this government, as stated by Mr. Fullerton, are extremely defective.

IX. Throughout the Straits of Malacca, the common weights are the pecul, catty, and tael. The Malay pecul, three of which make a bahar, is heavier than the common or Chinese pecul, which is=133½ lbs. Rice and salt are usually sold by the coyan of forty peculs nearly, and gold dust by the Bunkal=832 grs. troy. The gantang (by which grain, fruit and liquids are sold) =1½ English gallon, is divided into two bamboos. Twenty gantangs of rice make a bag, and forty bags a coyan. Cloth is measured by the astah or covid of eighteen inches nearly. Land, by the orlong of twenty jumbas = 1½ acre.

The currency of the straits is Spanish dollars divided into 100 cents. The Dutch rix dollar and guilder (divided into fanams and doits) are also used, chiefly at Malacca. One guilder=12 fanams=120 doits. The rix dollar is a nominal coin of about 20 fanams, 31 or 32 of which make a Spanish dollar. The silver coins comprise dollars of all descriptions, guilders and half-guilders. The copper, the cent, half and quarter-cent; there are also doits, stivers, and wangs, including a great variety of copper coins, of different countries.

X. *Natural Productions.*—The staple of the settlement is tin mines (which are all within a circuit of 25 miles round Malacca), which produce, generally 4,000 peculs (a pecul is 133 pounds avoirdupois) a year. In the vallies vegetation is extremely luxuriant: rice yields from 200 to 300 fold; the sugar cane is equal to any produced in any part of the globe; coffee, cotton, indigo, chocolate, pepper, and spices, have all

been tried, and thrive remarkably well. The spontaneous productions of the soil are very numerous, consisting of an almost endless variety of the richest and most delicious fruits and vegetables. The country is covered with very fine and durable timber for ships and house building; the *Murbon* tree, which is nearly equal to teak, is extremely abundant. Canes and rattans form a considerable branch of the exports; the forests yield gums, resins, and oils in great plenty; the camphor tree grows near the south-east extremity of the peninsula; a great variety of medicinal plants and drugs are common in the woods; the nutmeg grows wild. If the gold and tin mines in the vicinity of Malacca were scientifically worked, they would prove of great value; at present, the Malay and Chinese miners seldom dig below six or ten feet, and

as the veins become thin, remove from place to place. The gold from Hooilo Pahang, 100 miles inland from Malacca, is of the purest quality; and there are some small mines of gold at the foot of Mount Ophir, called Battang Moring, about 36 miles from Malacca.

Bird's nests, wax, cutch, dammer, fish maws, and sharks' fins (for Chinese soups) rattans, camphor, betelnuts, gold dust, sago, dragon's blood, ivory, hides, aguilla and sappan woods, &c., are among the principal productions. Captains of ships will be glad to hear that fruit and vegetables of every variety are abundant and low priced, and that poultry, hogs, buffaloes, and fish are plentiful and cheap. During the progress of the expedition against Java in 1811, 30,000 troops, with their followers were abundantly supplied with fresh provisions of every variety daily.

CHAPTER IV.—SINGAPORE (SINGHAPURA.)

I. This rapidly rising emporium of trade, is situated on the southern extremity of the peninsula of Malacca just described, in latitude 1. 17. 22. north; longitude, 103. 51. 45. east, (this is the position of the town); of an elliptical form, about from 25 to 27 miles in its greatest length from east to west; to 15 miles in its greatest breadth from north to south; and containing an estimated area of 270 square miles, with about 50 small desert isles within 10 miles around it, in the adjacent straits, whose area is about 60 miles; the whole settlement embracing a maritime and insular dominion of about 100 miles in circumference.

II. The Malay annals relate that in A. D. 1252, Sri Iscandar Shah, the last Malay prince of Singapore, being hard pressed by the king of Majopahit, in Java, returned to the main land, where he founded the city of Malacca. That the Dutch or Portuguese may have settled on the island is probable, from the remains of religious buildings and other structures, which indicate its having been once thickly inhabited. On the design of Sir Stamford Raffles, the settlement of Singapore was first formed in February 1818, and its sovereignty in its present extent was confirmed to Great Britain in 1825, by a convention with the King of Holland and the Malay Princes of Johore. There is, I believe, a pension of 24,000 Spanish dollars a year paid by the East India Company to this Rajah, as an equivalent for the cession.

III. The island is on the north separated from the main land of the Malayan peninsula, by a very small strait, which in its narrowest part is not more than one quarter of a mile wide. On the front, and distant about nine miles, is an extensive chain of almost desert isles, the channel between which and Singapore, is the grand route of commerce between east and west Asia. The aspect is low and level, with an extensive chain of saline and fresh water marshes, in several parts covered with lofty timber and luxuriant vegetation: here and there, low rounded sand hills interspersed with spots of level ground, formed of a ferruginous clay with a sandy substratum.

The town stands on the south coast, on a point of

land near the west end of a bay where there is a salt creek or river navigable for lighters nearly a mile from the sea; on the east side of the town is a deep inlet for the shelter of native boats. The town consists generally of stone houses of two story high, but in the suburbs called Campong-glam, Campong-Malacca, and Campong-China, bamboo huts are erected on posts, most of them standing in the stagnant water. On the east side of the harbour enterprising British merchants are erecting substantial and ornamental houses fronting the sea, presenting a strange contrast to the wretched tenements of the Malays. The ground is generally raised three feet, and the mansions have a superb entrance by an ascent of granite stairs, then an elegant portico supported by magnificent Grecian columns of every order of architecture: the rooms are lofty, with Venetian windows down to the floor, and furnished in a luxuriant manner; each tenement provided with its baths, billiard tables, &c., while the grounds are tastily laid out with shrubs of beautiful foliage, the *tout ensemble* affording a most picturesque prospect from the shipping in the roadstead.

IV. The principal rock is red sandstone, which changes in some parts to a breccia or conglomerate, containing large fragments and crystals of quartz. The whole contiguous group of isles, about 30 in number, as well as Singapore, are apparently of a submarine origin, and their evulsion probably of no very distant date.

V. Notwithstanding its lowness, marshiness, inter-tropical position and consequent high temperature, with a rapid and constant evaporation by a nearly vertical sun, from a rank and luxuriant vegetation, and a profusion of animal and vegetable matter in every stage of putrefaction, Singapore has hitherto proved exceedingly healthy, owing perhaps to its maritime position. Being so near the equator, there is of course little variety of seasons, neither summer nor winter: Fahrenheit ranges from 71 to 89 deg.; the periodical rains are brief, indistinctly marked, and extending over about 150 days of the year.

Total	746	590	1336	Grand Total	13432	1232	17664

When taken possession of by our establishment in 1820, it had been inhabited for eight years by about one hundred and fifty Malays, half fishermen and half pirates. Within the brief space of time from 1820 to 1832, its population has thus rapidly increased (we have no correct data previous to the end of 1823).

Classes.	1823.	1824.	1825.	1826.	1827.	1828.	1832.

Chinese	7650	867	8517
Caffres	23	14	37
Total	15186	5694	20880

To the foregoing must be added 553 convicts, and military and their followers 600, making a grand total of 22,000 mouths, where a few short years ago there was not 1191. The leading merchants, agents, shopkeepers, and auctioneers are Englishmen. There are several wealthy Chinese merchants, and the bulk of

the shopkeepers and most valuable part of the citizens are Chinese, nearly 5,000 of whom arrive annually from China by the yearly trading junks, about 1,000 of whom remain at Singapore, and the remainder disperse themselves over the neighbouring islands. The Malays are chiefly fishermen, and the natives of the Coromandel coast boat-men.

Society is divided as at the Presidencies, into four distinct castes—1st. The civilians of the Company. 2d. The military. 3d. First class merchants. 4th. Second class merchants, shopkeepers, &c.; and, as in all small communities, they are exclusive in their coteries.

VII. There is an American missionary and two Roman Catholic priests in the island, but as yet no house of worship. A Romish chapel is in progress, and near its completion. The humbler classes are uneducated, but honest and faithful to their employers.

VIII. No accounts of the trade of the island were kept prior to 1824; since then the value of the imports and exports have been as follows:

Year.	Imports.	Exports.	Both.
£.	£.	£.	
1824	1455509	1390268	2845777
1825	1323917	1228786	2552703
1826	1361978	1388306	2750284
1827	1488599	1387201	2875800
1828	1961120	1804660	3765780
1829	2121559	1876250	3997809
1830	1875350	1826634	3701984
1831	1780994	1565157	3346151

The account of its trade with different countries will be seen by the following return of the comparative statement of the trade of Singapore (imports and exports) with the different countries in 1830-31 and 1831-32, &c.

Comparative Statement of the Imports and Exports of Singapore for 1830-31 and 1831-2.

The number of vessels under each flag is thus shewn. In 1833–34—*Import Tonnage* 1833–34, by *square-rigged Vessels*; under what flags.—From Great Britain, 28 vessels under British flag; *Continental Europe*, 2 French, 2 Hamburgh, 2 Danish, 1 Portuguese; *Isle of France*, 2 British, 1 French; *China*, 42 British, 1 Hamburgh, 1 Danish, 4 Dutch, 9 Portuguese; *Manilla*, 15 British, 1 Danish, 4 Spanish; *Calcutta*, 38 British, 2 Portuguese; *Madras and Coast*, 9 British, 1 French; *Bombay and Coast*, 41 British, 1 French, 9 Portuguese; *Arabia*, 2 Arab; *Moulmein*, 1 British; *Ceylon*, 4 British; *Malacca*, 56 British, 8 Portuguese; *Penang*, 43 British, 1 Danish, 1 Portuguese, 1 Malay; *Java*, 3 British, 1 Hamburgh, 67 Dutch, 2 Cochin Chinese; *Sumatra*, 8 British, 1 Hamburgh, 1 Danish, 5 Dutch, 2 Malay; *Rhio*, 4 British, 1 French, 1 American; *Siam*, 5 British; *Borneo*, 5 British, 7 Dutch; *Cochin China*, 1 French, 2 Cochin Chinese; *Tringam*, 6 British, 1 Dutch; *New South Wales*, 15 British; *Bali and Eastern Islands*, 1 Portuguese; *Bourbon*, 2 French; *United States America*, 2 American. Totals—325 under British flag, 9 French, 5 Hamburgh, 6 Danish, 3 American, 92 Dutch, 23 Portuguese, 4 Spanish, 2 Arab, 4 Cochin Chinese, 3 Malay. Grand Total—475 vessels; tonnage, 137,298.

Native Craft.—Statement of the number and tonnage of native vessels, prahs, and junks, which have imported into and exported from Singapore during the official year 1833–34:—

Imports.—China, 27 vessels, 4,642 tons; Cochin China and Camboja, 49, 3,010; Siam, 24, 3,792;

East side of the Peninsula, 72, 1,689; Borneo, 138, 3,096; Celebes, 55, 1,345; Bally, 63, 1,666; Java, 72, 2,986; Sumatra, 514, 3,744; Penang, 8, 420; Malacca, 60, 2,608; West side of the Peninsula, 46, 341; Rhio, 251, 3,613; Neighbour Islands, 220, 2,075.

Exports.—China, 9 vessels, 1,447 tons; Cochin China and Camboja, 27, 1,966; Siam, 17, 2,537; East side of the Peninsula, 76, 1,565; Borneo, 148, 3,231; Celebes, 102, 2,041; Bally, 73, 2,043; Java, 44, 2,120; Sumatra, 397, 3,309; Penang, 5, 417; Malacca, 68, 3,003; West side of the Peninsula, 36, 250; Rhio, 264, 3,863; Neighbour Islands, 214, 2,055.

Gold forms one of the most valuable imports of Singapore. The principal portion is from Pahang on the coast of the peninsula, and it is considered superior to the metal brought from other places. The various places whence this important product is shipped from Singapore will be seen by the returns for 1831:—

From Ports on East coast of Peninsula: Pahang, 4,285 bunks; Calantan, 300. From Borneo: Lambas, 1,508; Pontiana, 633; Soongai Rayoe, 417; Papes, 58; Bintool, 20; Banjar, &c. 32. *Sumatra*: Jambie, 104; Campar, 169. *Celebes island*, 560; other islands, 31. Total, 8,102 bunks; or 405 cattie, 3 bunks (a cattie is 1 lb. and 1-3rd avoirdupois). The greater part of this immense quantity is sent to Calcutta for opium, &c.

As a commercial mart and key to the navigation of the seas in which it is situate, this settlement is of incalculable importance. We have seen by the foregoing that it has sprung up within the short space of ten or twelve years from a desert isle to a rich and flourishing settlement, exporting annually 3,000,000l. worth of goods. It has two periodical journals well conducted; its inhabitants are imbued with a cleanly and independent spirit, and its trade is as yet but in its infancy.

IX. *Natural Productions*.—From the foregoing description, it will be seen that the island can as yet have few indigenous productions; it is, in fact, a commercial emporium, and probably will never be much more. Its chief staple is the agaragar of the Malays (*fucus saccharinus*), a plant like fern, which abounds on the coral shoals around Singapore, and produces in China from six to eight dollars per pecul, in its dry bulky state. By the Chinese it is converted into glue, paint, &c. &c. for glazing their cottons, and sacrifice paper; the finest portion is made into a rich jelly, which makes a delicious sweetmeat when preserved in syrup. The harvest of this sea-weed is from 6,000 to 12,000 peculs annually.

There are about 10 sago manufactories at Singapore, giving employment to 200 Chinese manufacturers; the quantity of pearl sago exported from the island during 1834 was—to England, peculs 17,030; Calcutta, 1,700; Bombay, 970; China, 300; Cape, 150; Hamburgh, 1,870; America, 300; Madras, &c. 780;—total, 23,100 peculs. The sago is not grown in the island, but brought in its rough state from Borneo, &c.

BOOK V.—POSSESSIONS IN AUSTRAL-ASIA.

CHAPTER I—NEW SOUTH WALES.

SECTION. I. The vast island of New Holland, which was discovered in the fifteenth century (see "*Colonial Library*," vol. II.), may be said to extend between the parallels of 39. and 10. S. latitude, and the meridians of 112. and 153. E. longitude, with a width from E. to W. of 3,000 miles; a breadth from N. to S. of 2,000 miles, a superficial area of more than 3,000,000 square miles, and a coast line of 8,000 miles, connecting Terra Australis with the navigation of the vast Pacific and Indian Oceans. The proportions assigned by Capt. Du Freinet to the principal divisions of the globe are—

	French leagues.	Proportion.
Asia . . .	2,200,000	. . . 17
America . . .	2,100,000	. . . 17
Africa . . .	1,560,000	. . . 12
Europe . . .	501,875	. . . 4
Australia . . .	381,375	. . . 3

II. In shape it is an irregular oval, or it may be compared to a horse-shoe; and, so far as we know, appears bounded, for the most part, by a ridge of steep mountains, of greater or less elevation, which extend around the coast, varying in distance from the shore, sometimes approaching within 30 miles of the ocean, at other times extending back to double and perhaps treble that distance. The country behind this range is, with the exception of the New South Wales territory and a part of the S. E. coast, a perfect *terra incognita*; and, from what has been observed on the S. E. shore, it may be inferred that it is a vast level plain; it is more natural, however, to suppose that the country consists of extensive steppes or terraces as in South Africa. [The topography, so far as it has been ascertained, will be found in my "*Colonial Library*."]]

On the return of Captain Cook from his voyage in the S. hemisphere, and discovery of that part of the coast of New Holland named New South Wales, it was resolved to form a penal settlement at Botany Bay, with the following objects:—1st. To rid the mother country of the yearly increasing number of prisoners, who were accumulating in the gaols. 2nd. To afford a proper place for the safe custody and punishment of the criminals, as well as for their progressive and ultimate reformation; and, 3rd, to form a free colony out of the materials which the reformed prisoners would supply, in addition to families of free emigrants who might settle in the country from time to time. With these laudable objects in view, 11 sail of ships, consisting of a frigate (the *Sirius*), an armed tender, three store ships, and six transports, assembled at Portsmouth, in March, 1787, having on board 565 male, and 192 female convicts, with a guard consisting of a major-commandant, three captains, 12 subalterns, 24 non-commissioned officers, and 168 privates, all of the Royal Marines, together with 40 of the marines' wives and their children. Captain Arthur Philip, R. N., an experienced officer, was appointed Governor of the new colony. The small fleet,

with two years' provisions on board, sailed from the Mother-bank, on the 13th of May, 1787; touched for supplies and stock at Teneriffe, Rio de Janeiro, and the Cape of Good Hope; and arrived at their destination (Botany Bay) on the 18th, 19th, and 20th of January, 1788, after a voyage of upwards of eight months, of which four weeks were spent at the Cape. Captain Philip soon found that the descriptions which had been sent home of Botany Bay had been too flattering; in the first place, the bay was open to the full sweep of the E. winds, which rolled a tremendous sea on the beach; and, in the second, the land, though delightful for *botanizing*, was a series of swamps and sterile sand, without water. Little suspecting that one of the finest harbours in the world was within a few miles' distance to the northward, Captain Philip proceeded, with three boats and some of his officers, to examine what Captain Cook had termed Broken Bay, where the Hawkesbury disembogues; but while proceeding thither, he resolved to examine an inlet, which, in Cook's chart, was marked as a boat harbour, but apparently so small as not to be worth investigating; Cook had, therefore, passed to the northward, and given the inlet the name of Port Jackson, which was that of the seaman at the masthead, who first descried it while on the look out. Captain Philip entered between the lofty headlands to examine this "boat harbour," and his astonishment may be more easily conceived than described, when he found, not a boat creek, but one of the safest havens in the world, where the whole of the British navy might securely ride at anchor. It is navigable for vessels of any burthen, 15 miles from its entrance, and indented with numerous coves, sheltered from every wind, and with the finest anchorage. Thither the fleet was immediately removed; and the British ensign, on the 26th January, 1788, was hoisted on the shores of Sydney Cove, then thinly wooded, and abounding in kangaroos, but now the infant capital of an embryo empire. The silence and solitude of the forest were soon broken in upon by the resounding stroke of the woodman's axe; the ground was cleared, tents pitched, the live stock landed, stores deposited, and the little colony established, the number of individuals amounting to 1,030, which, within half a century, has been augmented to 100,000 souls. Great difficulties were experienced for several years, which nothing but the most extraordinary perseverance, aided by that moral and physical courage which Britons possess in so eminent a degree, could have surmounted. [The history of the settlement will be found in my "*Colonial Library*."]]

The progress of the colony may be thus summarily stated, in chronological order:—1789, one year after the establishment of the colony, first harvest reaped (at Paramatta); 1790, first settler (a convict) took possession of the land allotted him; 1791, first brick building finished; 1793, first purchase of colonial grain (1,200 bushels) by government; 1794, first

church built; 1796, first play performed; 1800, first copper coin circulated; 1803, first newspaper printed; 1804, Fort William built; 1805, first vessel built; 1810, first census, free school, toll-gates, police, naming of the streets, establishment of Sydney market, races and race ball; 1811, first pounds; 1813, first fair; 1815, first steam-engine; 1817, supreme court established and first bank; 1818, benevolent society formed; 1819, orphan institution founded; 1820, first spirits distilled, and first colonial tobacco sold; 1821, first Wesleyan and Roman Catholic chapels built; 1822, freedom of the press granted, and first agricultural and reading societies formed; 1824, charter of justice granted, legislative council appointed, and first court of quarter sessions held; 1825, first criminal jury impanelled, first archdeacon ordained, first coroner appointed, and first constitutional county meeting held; 1827, first daily newspaper established; 1829, first circuit court opened; 1830, first civil jury impanelled, and first college founded; 1831, first colonial steam-boat launched; 1832, first savings' bank instituted; 1833, mechanics' school of arts formed, and a monthly magazine established; 1834, land sold in Sydney at 20,000*l.* per acre!

List of Governors of the Colony of New South Wales since its foundation.—Capt. Arthur Phillip, R. N., from 26th January, 1788, to 10th December, 1792; Capt. Francis Grose (Lieut.-Gov.), 11th December, 1792, to 14th December, 1794; Capt. Paterson, N. S. W. C. (Lieut.-Gov.), 15th December, 1794, to 6th August, 1795; Capt. Hunter, R. N., 7th August, 1795, to 27th September, 1800; Capt. P. G. King, R. N., 28th September, 1800, to 12th August, 1806; Capt. William Bligh, R. N., 18th August, 1806, to his suspension on 26th January, 1808. During Gov. Bligh's suspension the government was successively administered by Lieut.-Col. Johnstone, Lieut.-Col. Foveaux, Col. William Patterson, N. S. W. Corps, 26th January, 1808, to 28th December, 1809. Major-Gen. Lachlan Macquarie, 1st January, 1810, to 1st December, 1821; Major-Gen. Sir T. Brisbane, K. C. B., 1st December, 1821, to 30th November, 1825; Col. Stewart, 3d regt. (Lieut.-Gov.), 1st December, 1825, to 18th December, 1825; Lieut.-Gen. Ralph Darling, 19th December, 1825, to 21st October, 1831; Col. Lindesay, C. B. (Lieut.-Gov.), 22d October, 1831, to 2d December, 1831; Major-Gen. Richard Bourke, C. B., 3rd December, 1831; Sir G. Gipps, 1837.

II. The general features of the New South Wales territory consists of alternate hills, vallies, mountains, and plains; the sea coast has a range of lofty and steep hills (elevation 3,000 to 4,000 feet) running nearly parallel with the coast, at a distance of from 40 to 50 miles, and called the *Blue Mountains*; the intervening space being an undulating plain, intersected by several rivers which have their rise in the elevations just mentioned; beyond which, a considerable extent of table land stretches in every direction, gradually sinking towards the interior.

The territory is divided into 19 counties, and the geography of each will be found in my *Colonial Library*.

The British settlement on the E. shore of New Holland, called New South Wales, has its boundary imperfectly defined: it may be said, however, to extend coastwise between the parallels of 36 and 28 S. lat., or about 500 miles along the sea shore; while the greatest distance yet settled inland can scarcely be said to extend more than 200 miles. The portion within which land may be selected, was fixed by a

Government order, dated Sydney, October, 1829, and comprised 34,505 square miles, or 22,083,200 acres; the boundaries being, on the east, the sea coast from the mouth of the Murrumbidgee (S. of Bateman's Bay), in 36 degrees to the mouth of the Manning River in 32 degrees; on the north, the river Manning from the sea coast westward to a range of mountains, including all streams, vallies, and ravines which descend to the rivers Goulbourn and Hunter; on the west, a line nearly along the meridian of 148 W. long.; and, on the south, from Mount Murray, in the latitude of Bateman's Bay, to the Murrumbidgee, in 36 S. latitude.

Sydney, the capital of New South Wales, is situated nearly equidistant from the extreme northern and southern extremities of the county of Cumberland: it is built partly in a narrow ravine or valley, and partly on the side of a gentle slope extending upwards from the shores of one of the coves of Port Jackson, and called Sydney Cove on the first founding of the colony. The streets are long (some one mile), wide, and quite English in their appearance; the houses are generally lofty and well constructed, interspersed with cottages fronted by small neat gardens, which in some quarters of the town are attached to every house.

The houses rise in successive terraces, giving variety to the scene, and conveying by their neatness and elegance the idea of a prosperous community. The shops are frequently laid out with great taste—they are not, as in America, 'stores' where every article may be bought under the same roof, but each trade or business has its own distinct warehouse. House rent is high at Sydney, as may be inferred from the fact that building land has been recently sold in George Street at 20,000*l.* per acre! and some ground is worth 50*l.* per foot! Several private establishments are of considerable size; auction rooms have been lately built by one individual at a cost of 5,000*l.*, and Mr. R. Cooper has expended nearly 20,000*l.* on his distillery. The firm of Messrs. Daniel Cooper and Levy have expended even large sums in erecting steam-engines, mills, &c.; and Mr. Barnett Levy has built an excellent Theatre on speculation. The hotels and inns are numerous and excellent.

The situation of Sydney adapts it for the capital of a commercial empire. Port Jackson is one of the finest harbours in the world; its entrance is three quarters of a mile wide, it afterwards expands into a capacious basin, 15 miles long, in some places three wide, and navigable for ships of any burthen at the distance of 15 miles from its entrance—i. e. seven miles above Sydney, up the Paramatta River, and which for 12 miles further can scarcely be considered more than an arm of the sea. Ships come up close to the wharfs and stores at Sydney, and the cargoes are hoisted from a ship's hold into the ware-rooms. The town is about three miles in length, with two-thirds of its circuit environed by the navigable coves of Port Jackson.

A fine lighthouse was erected on the lofty S. head of Port Jackson, by Gen. Macquarie; it is in Lat. 33.51. 40. S., Long. 151. 16. 50. E.; the tower is admirably built; the height of the light (a revolving one) from the base being 76 feet, and above the sea 277 feet,—total 353. The inner S. head bears from the lighthouse N. by W. $\frac{1}{4}$ W. distant a mile and a quarter. The outer N. head bears from it N. by E. two miles. The inner S. and outer N. heads lie N. E. $\frac{1}{4}$ E. and S. W. $\frac{1}{4}$, of each other distant a mile and one-tenth. The light can be seen from S. by E. to

N. by E., and from eight to ten leagues Bearings magnetic, degrees E.

N. B. The N. end of the inner S. head of Norfolk Island, contains about 11,000 brown mould. It is a fine tropical scenery. In 1791, it was colonized by the New South Wales, for the purpose of a penal colony. It is now a well-praised male convict colony. IV. The line of New South Wales, bold perpendicular to the horizontal strata. The sandy beaches, the flat, the high land, and the strata of sand upon the other in their original relative positions have undergone any change since this state it is generally soft and among the coal with thin beds of whetstone. In fact the Bass's Straits to 19. S.

N. B. The N. end of the 'Sow and Pigs' bears from the inner S. head S. W. by W. half a mile.

Norfolk Island, in lat. 29.1. S. long. 168.10. E., contains about 11,000 acres of land, generally a rich brown mould. It is extremely beautiful, affording a fine tropical scenery and a hill and dale country. In 1791, it was colonized by the Governor of New South Wales, for the purpose of growing supplies for the colony. It is now used as a prison for the most depraved male convicts, who are banished thither from New South Wales to work in chains for life.

IV. The line of coast throughout the territory of New South Wales, presents in general an aspect of bold perpendicular cliffs of sandstone, lying in horizontal strata. The cliffs are occasionally interrupted by sandy beaches, behind which the country is low and flat, the high land retiring to a considerable distance.

The strata of sandstone consists of beds lying one upon the other in the most regular manner, so that their original relative situation has evidently never undergone any change. This sandstone is principally siliceous; sometimes indeed it is argillaceous, and in this state it is generally found over coal, in which situation it is soft and very decomposable.

Among the coal measures, are occasionally met with thin beds of what may be called calcareous sandstone. In fact the E. coast of Australia, from Bass's Straits to 19. S. Lat., presents ranges of moun-

tains rising parallel with the coast, and consisting, with few exceptions, of vast conglomerations of sandstone. Mr. Berry asserts, that there is no granite to be found in masses near the coast, for an extent of 1,200 geographical miles. At the 19th parallel, a chain of lofty granitic or primitive mountains appears, of various elevations, forming the barrier towards the ocean for about 300 geographical miles, or to the parallel of 14 S. latitude. Here the sandstone again predominates, the land gradually dipping till it loses itself in the sea to the N. when coral reefs extend as far as the eye can reach. An unbroken reef of coral extends 350 miles in length on the E. coast of New Holland; and Captain King found the coral formations to extend through a distance of 700 miles, interrupted by no intervals exceeding 30 miles in length. [For further details see *Colonial Library*, Vol. II.]

V. The seasons of New South Wales are the opposite of those in England—January being the middle of Summer, and July of Winter. The Summer extends from the 1st of November to the 1st of March; the Spring and Autumn are brief, but well defined; the Winter of a bracing coolness, with occasional frosts at Sydney, and snow in the interior. The Spring months are September, October, and November; the Summer, December, January, and February; Autumn, March, April, and May; Winter, June, July, and August. March, April, and August are generally considered the rainy months. The average temperature of Spring is 65.5, of Summer 72., of Autumn 66., and of Winter 55. The barometrical pressure, is about 29.94319 inches, and the average of the thermometer 64 F.

The observations thus marked (*) were made in 1824, the others in 1832.

In Sydney, the thermometer is rarely below 40; in Paramatta, it is frequently down to 27. in winter. Of course, as the land rises above the level of the ocean, a difference of temperature is felt; the winter at Bathurst, where the luxury of snow is in its season enjoyed, being much colder than on the sea shore; while the difference of lat. between, for instance, Sydney in 34., and the parallel of Moreton Bay in that of 28., is considerable. In fact, every variety of climate may be obtained; that of Sydney may be in some measure judged of by the foregoing meteorological table.

During the summer months, a regular sea breeze sets in daily, and refreshes much the inhabitants along the coast, who besides are not so much exposed to the hot winds as those residing in the interior. These winds have never yet been satisfactorily accounted for. They blow from the N. W. three or four times every summer, like a strong current of air from a heated furnace, raising the thermometer to 100 F. in the shade, and 125 when exposed to their influence. They seldom last more than a few days, and are cleared off by a thunder storm.

The salubrity of New South Wales is proverbial; of a community of 1,200 persons, only five or six have been known to be sick at a time, and at some of the military stations, seven years have elapsed without the loss of a man.

Although New South Wales is not subject to the periodical showers of the tropics, a large quantity of rain falls throughout the year; hitherto the colony has been visited by a drought about every 12 years; the last one continuing from 1826 to 1829, during which period, little or no rain fell, in the county of Cumberland in particular. It is, however, more than probable, that as the country becomes cleared and cultivated, such lamentable visitations will be less frequent.

These enumerations are considered very inaccurate by those who know the colony well, especially that of 1828, when the settlers were apprehensive of the establishment of a poll tax; that of 1833, is thus given for each county, as also for the principal towns in the colony:—

The prevailing directions of the winds at Sydney are thus indicated:—

VI. The British colony, when established at Sydney Cove, on the shores of Port Jackson, 26th January 1788, consisted of only 1,030 individuals, of whom upwards of 700 were convicts. Emigration was for many years studiously discouraged by some of the authorities, notwithstanding which, owing to the number of convicts sent out, and the fineness of the climate, the population rapidly increased. Four censuses have been taken, and the augmentation since 1788, is thus shown:—1788, 1,030; 1810, 8,293; 1821, 29,783; 1828, 36,598; 1833, 71,070.

had been assigned 202,076l. per annum, 1,191 in the annual expense of were in bondage.

1836	168	4	—	—
1837				

On the 1st August, 1833, the punishment of death ceased for cattle stealing, and stealing in a dwelling-house above 5*l.*, and forgery, by Acts of Parliament 2 & 3, Gul. IV. caps. 63 and 123. A great portion of such offences thereafter, were tried by the Courts of Quarter Session. At the close of May sessions, 1836, 155 prisoners remained in gaol for trial.

Return of the number of civil cases fixed in the Supreme Court of New South Wales during 1836. [B. B.] Before Juries; Common, 5 Special, 14. Before two Magistrates assessors; and defended cases, 177, defended cases, 98, total, 298.

Return of the number of prisoners sentenced to transportation from the colony of New South Wales, by the Supreme Court, Courts of Quarter Sessions, and Police Courts.

Years.	Supreme Court.	Quarter Sessions.	Police Courts.	Total.
1831	140	30	245	415
1832	157	6	99	262
1833	149	38	—	187
1834	168	146	—	314
1835	168	266	—	434
1836	31	61	—	92
1837				

In October 1832, the power to transport was withdrawn from the Magistrates in summary jurisdiction, by the Act of Council, 3 Gul. IV. No. 3.

Many cases are now adjudged by the Petty Sessions, that heretofore were decided by the Superior Courts only.

This return includes prisoners whose sentence of death has been commuted by the Governor and Executive Council, to transportation. On 6th July, 1836, tenders were called for in the Official Gazette, for the conveyance of 120 persons to Norfolk Island.

As the state of crime in our penal settlements is deserving of the most serious attention, I have given every public document under this section which would convey information on the subject.

grounds of his disapprobation. If a majority of the members dissent from any bill, and enter the grounds of their dissent on the minutes of council, the bill cannot become law. Every bill passed by the council must be transmitted within seven days to the supreme court to be enrolled, and after 14 days from the date of such enrolment, it comes into operation. If the judges represent that such bill is repugnant to statutes or other public deeds before cited, it is again brought under the consideration of the council, and if again passed, proceeds into operation, until the pleasure of his Majesty be known, to whom are transmitted the opinions of the judges, &c. The votes and proceedings of the Legislative Council are officially published in the newspapers. The Governor and Council have the power to impose taxes for local purposes. By 3rd Geo. IV., c. 96, continued by 9th Geo. IV., c. 83, s. 26, the Governor is authorized to impose, on importation into the colony, duties not exceeding 19s. per gallon on British or West India spirits, and 15s. on all other spirits: not exceeding 4s. per lb. on tobacco, nor 15s. per cent. upon goods, wares, &c., not being the growth, produce, or manufacture of the United Kingdom; and, by 9th Geo. IV., c. 83, s. 26, the Governor is also empowered to levy a duty upon colonial spirits, not exceeding that levied on imported spirits.

Laws and Courts.—The statute laws of England are in force in the colony, aided by Acts of Parliament, and local enactments by the Governor and Legislative Council: and an Insolvent Debtor's Act is in operation, the benefit of which may be obtained by a defendant a second or third time, if he pay 15s. in the pound (any public officer taking advantage of the provisions of the Insolvent Act, is, by an order of the Secretary of State dismissed the service). The execution of the laws devolves upon a Supreme Court, presided over by a chief and two puisne judges, whose powers are as extensive as those of the Courts of King's Bench, Common Pleas, and Exchequer, at Westminster. The Supreme Court is a court of *oyer and terminer* and *gaol delivery*, it is also a court of *equity*, with all the power, within its jurisdiction, of the Lord High Chancellor of England; and it is a court of *admiralty* for criminal offences, within certain limits; it is empowered to grant letters of administration, and it is an insolvent debtor's court. From the Supreme Court an appeal lies in all actions, when the sum or matter at issue exceeds the value of 500l., to the Governor or Acting-Governor, who is directed to hold a court of appeals, from which a final appeal lies to the King in Council. The Supreme Court is provided with an Attorney and Solicitor-general. There are nine barristers, and 33 solicitors practising in the court. The sheriff exercises by his deputies the duties of his office over the whole territory. Circuit courts are held in different parts of the colony; they are courts of record, and stand in the same relation to the Supreme Court as courts of *oyer and terminer*, and of *assize* and *nisi prius*, in England do to the King's superior courts of record at Westminster.

Courts of General and Quarter Sessions, have the same powers as those of England, and also may take cognizance, in a summary way, of all crimes not punishable by death, committed by convicts whose sentences have not expired, or have not been remitted.

A Vice-Admiralty Court, presided over by the Chief Justice of the Supreme Court, takes cognizance of civil cases only, such as seamen's wages, &c.

There is an Archdeacon's Court for clerical matters; but this court has no jurisdiction in testamentary affairs, the charter of justice having empowered the Supreme Court to grant letters of administration, and direct the distribution of testator's effects. Courts of Requests have been established under authority 9 Geo. IV. c. 83, for summarily determining claims not exceeding 10l. sterling, except the matter in question relates to the title of any lands, tenements, or hereditaments, or to the taking or demanding of any duty payable to His Majesty, or to any fee of office, annual rents, or other such matter, where rights in future would be bound, or to a general right or duty, and to award costs. The decision of the court is final and summary, as in England. One Commissioner, appointed by the Crown, presides in all the Courts of Requests throughout the colony. Juries now sit in civil and criminal cases; until lately, military and naval officers formed the criminal jury; and civil causes were determined by a judge and two sworn assessors. Law suits are frequent in New South Wales, and large fortunes have been made by barristers and solicitors. In the year 1834, the number of the unpaid magistracy throughout the territory was 136.

Police.—This important branch of civil life is well managed in New South Wales. There are Benches of stipendiary as well as unpaid magistrates in Sydney, and at the principal towns throughout the colony, aided by head constables, and a civil and military police force at each station.

It should be observed, that a large part of the military force is required to guard the prisoners; and troops are seasoned in N. S. Wales for Indian service.

Military Posts and Works.—There are no military posts in any part of the colony of New South Wales; and there are only three military works, viz. Fort Macquarie, Dawes' Battery, and Fort Philip. The two former are situated on two points of land in the harbour of Port Jackson, forming the entrance to Sydney Cove, and were erected for the security of the shipping. The Battery and Fort Philip is situated on an eminence crowning the isthmus or neck of land, which is washed by the waters of Sydney Cove on the east, and of Darling harbour on the west side.

Fort Macquarie.—Fort Macquarie is a square, the length of each face being 130 feet. It is badly constructed with masonry, on a low site; the base of the rampart is washed by the sea at high tide. The work is pierced for 11 guns and 4 en barbette; 10 twenty-four-pounders and 5 six-pounders are mounted. At each of the angles is a small circular bastion, in which one of the twenty-four pounders is placed en barbette. There is a tower of two stories in the centre of the land face 99 feet in circumference, with a magazine beneath capable of containing 350 barrels. The tower is appropriated as a store and guard room, and through which the fort is entered by a permanent bridge over a dry ditch. At each extremity of the counterscarp, there is a smaller tower; but, in common with the large one, they are not intended for any military offensive purpose. The platform of the battery is at an elevation of 22 feet above the level of the sea.

Dawes' Battery.—Dawes Battery is a curved fleche, the length round the crest of the parapet being 120 feet. The interior slope is two feet high, and retained by a stone wall. The remainder of the parapet is formed of earth. It contains 15 guns, viz. 3 six-pounders and 12 twelve-pounders. The whole of them are en barbette. The platform of the battery is at an elevation of 111 feet above the level of the sea.

Fort Philip.—This fort is in an unfinished state, although commenced in 1804 by Governor King, the faces of the salient angle only being carried up in cut stone-work to the level of the platform, 11 feet 8 inches in height. It is in the form of a pentagon, the length of the sides being 100 feet, and appears to have been intended to mount four guns in each face. The thickness of the platform is 18 feet 6 inches, and the parapet (which is not raised) 13 feet 6 inches; in all, 32 feet. The situation commands the whole of the town of Sydney, its cove and Darling harbour; the north face looks into Dawes' battery, at about

400 yards distance; the east into Fort Macquarie, at about 800 yards. In its present unfinished state, it is of no use whatever as a military work, and is now only used as a telegraph station. There is a magazine, bomb proof, immediately under the wall, capable of containing 200 barrels of gunpowder. The elevation is 241 feet above the level of the sea. These works are under the controul of the Master-general and Board of Ordnance. There has been an ordnance establishment in New South Wales since 31st Jan. 1836, the expense of which is defrayed out of the military chest.

Return of the Troops* serving in New South Wales and its Dependencies on 31st Dec. 1836. [B. B.]

Return of Mounted Police on 31st December, 1836.
[B. B.]—Seven officers, 8 sergeants, 16 corporals, 96 troopers; total, 127.

Expenses of the above Corps in 1836.—Mounted orderlies to the 30th June, 327*l.* (the mounted orderlies were transferred to mounted police from 1st July 1836); mounted police to the 30th June, 13,002*l.* Total, 13,329*l.* Of this sum the principal items are—pay of men 1,842*l.*, and forage for horses 9,281*l.*

XI. Since the colony was established in 1788, a revenue has been derived from the importation of spirits, tobacco and manufactures, &c. as also from licenses; as the population and commerce of the settlement increased, so did the revenue. The increase which has taken place in the Custom duties at Sydney is remarkable; they now amount to 100,000*l.*; in 1822 they did not reach 10,000*l.*, the principal items being 5,081 gallons of spirits, at 12*s.* 6*d.* per gal.; 3,854 gallons of ditto, 11*s.* 10*d.* per ditto; and 2,438 ditto, at 10*s.*

The rate of duties levied is, on spirits distilled from grain the produce of the colony, 3*s.* per gallon imperial measure (until 1834 it was 2*s.* 6*d.*), ditto British, West India, or North American, if imported from the United Kingdom, 7*s.* 9*d.* 6-tenths (formerly 6*s.* 6*d.*); all other spirits, whether made within the colony or imported, 9*s.* 2*d.* 4-tenths (formerly 8*s.* 6*d.*);

tobacco, manufactured, 2*s.* 6*d.* per lb., unmanufactured, 1*s.* 6*d.* ditto; British manufactures *free*; all others goods 5 per cent. *ad val.* Register fees, if under 40 tons, 2*l.* each register; over 40 tons, 1*s.* per ton. Permits for the removal of spirits, 6*d.* each.

Licenses to distil spirituous liquors, 25*l.* per ann., to sell ditto, 25*l.* per annum. Goods sold by auction pay 1½ per cent. duty, and an auctioneer for his license, 2*l.* per annum. Butchers, carters and carts, boatmen and boats, and porters, are licensed: dogs are taxed at 1*s.* for one, 5*s.* for two, 15*s.* for three, and 10*s.* for every additional dog. The number of auctioneers in the colony is 18, of whom 10 are in Sydney.

Each head of cattle in Sydney, Paramatta and Liverpool must be examined by a public inspector before it be slaughtered, for which a charge of 3*d.* is paid. Quit rents are levied on land, at the following rate—if granted prior to 5th November 1823, 2*s.* per 100 acres; prior to 18th May 1825, 15*s.* per ditto; subsequent to 18th May 1825, 16*s.* 8*d.* per 100 acres. Town allotments in Sydney 6*d.* per perch; at sea-port towns, 5*d.*; in towns at the head of navigable waters, 4*d.*; and in inland towns, 2*d.* There are also a variety of fees legal, territorial and clerical.

Abstract of the Revenue of New South Wales, from 1st January, 1826.

						132396	

The progress of New South Wales in revenue is equally remarkable with the advance which the colony has made in other matters; the income derived from land in particular has been very large. Two years of revenue and expenditure are subjoined, in order that a comparative view may be obtained of the financial situation of the colony.

Revenue of New South Wales for 1835 and 1836. [B. B.]

The number of vessels in

town of Maitland, constructing 239*l*.; stone for new bridge, Parramatta, constructing —; repairs to bridge, Hunter's river, 7*l*.; stone drains and arches, constructing 404*l*.; stone kerbing to protect the footpaths, constructing —; conveying stone for streets, —; purchase of stone for ditto, 28*l*.; fencing crown lands 37*l*.

The following is an estimate of the sum that may be required in the year ending 31st March, 1839, to defray the charge of maintaining convicts at New South Wales and Van Diemen's Land, as printed in the parliamentary estimates of 1838:—Estimated amount of the bills which will be drawn from New South Wales and Van Diemen's Land, payable between 1st April, 1838, and 31st March, 1839, to defray the undermentioned charges for convict services at those settlements, viz.: Rations of provisions for 11,200 male convicts, and 1,100 female convicts and children, at prices averaging about 7*l*.4*s*. per ration in New South Wales, and 8*l*. per ration for men, and 5*l*. for women and children, at Van Diemen's Land, 143,580*l*.; hospital diet and medical comforts, 11,680*l*.; fuel and light, 3,480*l*.; forage and forage allowances, 4,720*l*.; transport and conveyance of provisions and stores for convicts, and contingent charges, including part of the expense of government vessels, 6,180*l*.; maintenance and repair of convict barracks and other buildings occupied for convict services, 15,000*l*.; salaries and allowances of persons employed in the superintendence of the convicts, 9,460*l*.; salaries and allowances of commandants and other persons employed in the superintendence and management of convicts at the penal stations, and expense of apprehending runaway convicts, 9,020*l*.; medical establishments, pay and allowances of medical officers and attendants at the general hospitals, medicines, and other hospital charges, 9,080*l*.; benevolent asylum and observatory, New South Wales, 2,800*l*.; clothing, bedding, and other stores and tools, for the convicts and convict establishments, 20,000*l*. Total, 235,000*l*.

It will afford an interesting view of the progress of

interior communications to examine the revenue derived from toll-gates, ferries, &c. The observing mind will be able to deduce just conclusions from such statements.

Leases of the various Tolls, Ferries and Market Dues put up for Rent by the Colonial Treasurer, and comparative Rents obtained for the years 1837 and 1838.

Parramatta Market rented for 1837 at 1*l*. 1*s*. was leased for the ensuing year at 14*l*. 10*s*.; increase 13*l*. 9*s*.

XII. The commerce of New South Wales is become an object of great consideration to the mother country. The maritime trade of the colony is now upwards of two million sterling *per annum*; whereas, ten years ago, it amounted to little more than half a million. The largest portion of the trade is carried on with Great Britain; the extent for consecutive years will be seen in the following table. The imports are spirits, wines and beer, tea, groceries and tobacco, salt provisions, cottons, linens, silks and woollens; the exports—wool, timber, flax, oil of all kinds, maize, hides, and ship stores.

XIII. Previous to 1817, the circulating medium of the colony consisted principally of the private notes of merchants, traders, shopkeepers and publicans, the amount being sometimes so low as 6*d.* To remedy the evils attendant on such a state of things, the—

Bank of New South Wales was in 1827 incorporated by a charter under the seal of the colony, with a capital stock of 20,000*l.* sterling, raised in shares of 100*l.* each. The amount of shares subscribed was 12,600*l.*, and notes were issued by the bank for 2*s.* 6*d.*, 5*s.*, 10*s.*, 1*l.*, and 5*l.* In the first year of its incorporation, the bills discounted by the bank amounted to only 12,193*l.*; in 1818 they rose to 81,672*l.*; in 1819 to 107,256*l.*, demonstrating fully the necessity that existed for such an establishment, and the advantages that result from it. Interest was not uncommon at the rate of 10 per cent. per annum. The dividends declared in 1818 were at the rate of 12 per cent.; for 1819, 21 per cent.; for 1820 and 1821, 12 per cent.; and for 1822, 15 per cent. The charter was granted for seven years, which was of course renewed. Each shareholder is responsible for the

whole of the proceedings of the bank, thus giving greater stability to the institution, and securing a more careful management of its transactions.

The Bank seldom advances money upon real securities of any description, nor does it grant cash credits, or allow any interest upon current accounts, or permanent lodgments of cash. The nominal capital of the Bank of New South Wales is about 150,000*l.*, divided into one thousand five hundred 100*l.* shares. The amount of capital paid up is about 35,000*l.*

The affairs of the institution are managed by a president and eleven directors, who are elected by the shareholders from their own number, on account of their influence and respectability. Every 50*l.* paid up gives a vote.

Almost from its first establishment, it has yielded the shareholders a dividend of from 15 to 20 per cent.; a rate of profit which, considering that its transactions are restricted to the discounting of three months' bills, must be highly satisfactory to its shareholders; and it is a remarkable fact, that the establishment has never sustained any actual losses through the non-payment of the paper which it has discounted. Up to the year 1824, the bank discounted at the rate of 8 per cent., after which the rate of discount was increased to 10 per cent., at which it has ever since continued. The colonial government pays and receives in specie only; and in consequence of its receipts, from the customs, duties, sales, and leases of land, and other sources of revenue, having considerably exceeded the amount of its disbursements, it has from time to time gradually withdrawn from circulation nearly all the specie in the colony. In consequence of this and the remittances occasionally made of specie to Canton and other places with which a trade is carried on by the colonists, the bank of New South Wales, though far more than solvent, has more than once been under the necessity of suspending the payment of specie on demand. It is a fact highly creditable to the bank and to the colonists in general, that owing to the last severe drought during the panic which occurred in 1826, and which continued for three years with little intermission, there were bills to the amount of 18,000*l.* over due to the bank,

while the whole capital 22,000*l.*; the confidence so great, that by prudence of the over due bills was to pay a dividend all the cent. Such, however, colonists in the stability of ment, that in no case sioned any run upon the inhabitants, with

A London company, established in 1825, has been incorporated by royal charter as the Bank of Australasia, with a capital of 1,000,000*l.* for the purpose of establishing banks in New South Wales, Van Diemen's Land, and other settlements in Australasia.

while the whole capital did not at that time exceed 22,000*l.*; the confidence of the public, however, was so great, that by prudent management, not a sixpence of the over due bills was lost, and the bank continued to pay a dividend all the time of from 15 to 20 per cent. Such, however, was the confidence of the colonists in the stability and integrity of the establishment, that in no case has such an occurrence occasioned any run upon the bank; but, on the contrary, the inhabitants, with one accord, poured into its

coffers all the specie they could collect, and by refraining from demanding it as much as possible, soon enabled the bank to resume cash payments, and to carry on its usual transactions.

The notes issued by this establishment amount to about 20,000*l.*, divided into 1*l.*, 2*l.*, 5*l.*, 10*l.*, 20*l.* and 30*l.*, the greater proportion being 1*l.* notes. Since the year 1826, when dollars and rupees were current, all the money business of New South Wales has been transacted in sterling, British coin only being used.

Statement of Affairs 30th June, 1836.

Dividend, 30th June 1836, 9 per cent.

The Bank of Australia was instituted in 1826, with a capital of 220,000*l.*, divided into several shares, of which 45,000*l.* is paid up. It is managed by a chairman, deputy-chairman, and eight directors, with the necessary assistants. Like the bank of New South Wales, it is one of issue and deposit; and its transactions are limited to discounting bills which have not more than three months to run. It affords no facilities for remittances to Europe or elsewhere, nor does it make any advances on real securities of any kind.

The bank of Australia discounts from 10,000*l.* to 12,000*l.* weekly, at 10 per cent., which is the current rate of interest in New South Wales.

The establishment has been highly prosperous ever since its commencement, and has hitherto paid the shareholders an annual dividend of 12 to 15 per cent. upon the capital paid up. The notes issued by this bank are for 1*l.*, 2*l.*, 5*l.*, 10*l.*, 20*l.* and 50*l.*; its circulation being about 25,000*l.*

In the year 1826, a gang of thieves, having obtained access to its strong room from a drain which passed beneath it, robbed the bank of nearly 5,000*l.* in cash and notes, but a portion of this was recovered, and the actual loss sustained was not more perhaps than 2,000*l.* One fifth of the nett profits of this bank is reserved for a sinking fund or "rest."

Statement of affairs, 30th June, 1836.

Dividend, 7½ per cent. for that half year. Interest at the rate of 4 per cent. per annum allowed on balances of current accounts.

A London company, established March, 1834, has been incorporated by royal charter, called the Bank of Australasia, with a capital of 200,000*l.*, for the purpose of establishing banks of issue and deposit in New South Wales, Van Diemen's Land, and other settlements in Australasia. One half of the com-

pany's capital paid up before the commencement of business, and the entire capital within two years. The stock is divided into 5,000 shares of 40*l.* each (500 of which were reserved for allotment in the colonies), to be paid up as follows:—10*l.* per share at the time of subscribing, 7*l.* at three months from

that date, 6*l.* at six months, 3*l.* at nine months, 4*l.* at twelve months, 5*l.* at fifteen months, and 5*l.* at eighteen months.

The management of the company's affairs is vested in the London Board of Directors, appointed by the proprietors, and the banks in the colonies are conducted by local directors and other persons duly qualified, appointed by the directors in London.

The proprietors are entitled to vote at the annual meeting, according to the number of shares held by

them respectively, in the following proportions—five shares and under 10, one vote; 10 shares and under 20, two votes; 20 shares and under 50, three votes; 50 and upwards, four votes, and not more. The following shews the progress and the prosperity of the establishment.

The bank of Australasia commenced business in the colony 14th December, 1835. Capital 200,000*l.*, paid up. Interest allowed on current accounts at the rate of 4 per cent. per annum.

Statement of affairs, 11th April, 1836.

Notes in circulation not bearing interest	£6,755
Bills in circulation not bearing interest	2,508

Coin and bullion in bank	£25,256
Landed property of the corporation	
Bills of other banks	
Balance due from other banks	429
Bills and debts due to the bank	60,486

Total assets within the colony £86,171

Realized profits to the 31st December, 1836, forming the "dividend or dividing fund," 14,724*l.* The profits of the year terminating the 31st December 1837, after deducting the whole of the annual expenses, both in the colonies and in London, for that year; and also a further sum in part liquidation of the preliminary expenses, according to the principle laid down in the previous reports, are 21,908*l.*; making a total of 36,632*l.* Out of which have been paid to the proprietors—Midsummer dividend for 1837, 8,000*l.*; Christmas ditto, 8,000*l.*; total 16,000*l.* Leaving the sum of 20,632*l.* 12*s.* 10*d.*, as the amount of divisible fund on the 31st December last. The directors have therefore the satisfaction of announcing their intention of declaring a dividend upon the original shares of 4 per cent. for the first half year of 1838, ending the 30th instant; being after the rate of 8 per cent. per annum.

In addition to the above assets, the average amount of the paid up capitals of the corporation in hands of the court of directors in London, for the use of the colonial establishment, was 98,630*l.*

Australian Marine Assurance Company, established January, 1831, capital 140,000*l.*, 14,000*l.* paid up; dividend, 30th July, 1836, 8½ per cent. for that half year.

Union Assurance Company of Sydney, established January, 1836, capital 250,000*l.*, in 5,000 shares, capital paid up, 2*l.* per share—12,500*l.* Profits not to be divided for three years. Capital increased to 16,599*l.* 30th June, 1836.

Coin in circulation. [B. B. 1836.] The whole amount of British coin in the colony is estimated at about 445,000*l.*, and of this sum there was, on the 31st December, 1836, in the Colonial treasury, 218,630*l.*; in the bank of New South Wales, 73,342*l.*; in the bank of Australia, 44,048*l.*; in the bank of Australasia, 50,005*l.*; in the Commercial bank, 39,234*l.*; total, 425,259*l.*

The amount of coin in the bank of Australasia is taken from the half yearly average of the weekly liabilities and assets of that bank in New South Wales, from 12th April to 10th October, 1836, published in conformity with the charter of the bank; the board of directors having refused to supply the local government with any other information than that which the charter prescribes.

Amount of paper currency in circulation. [B. B. 1836.] The paper currency in circulation consists of notes of the bank of New South Wales, bank of

Australia, bank of Australasia, and Commercial bank. The amount of these notes in circulation on 31st December, 1836, was notes of the bank of New South Wales, 25,665*l.*; bank of Australia, 29,245*l.*; bank of Australasia, 11,846*l.*; Commercial bank, 32,731*l.*; total, 99,487*l.* [The information respecting the notes in the bank of Australasia has been derived from the same source as that relating to coin, explained in the note under that head.]

The bank of New South Wales, the bank of Australia, and the Commercial bank are Joint Stock companies, the shares in which are transferable. The bank of Australasia is a chartered bank. The notes are all of sterling denomination, and are convertible into British money on demand.

The great portion of the circulation in this colony is carried on by drafts or cheques on one of the four banks; the mass of pecuniary transactions centering in Sydney, and almost every individual of property having an account with one or other of the banks, in which for security a large portion of their cash is lodged.

Course of exchange. [B. B. 1836.] Bills on the Lord's Commissioners of His Majesty's treasury are drawn at par, under a notice issued by the Deputy Commissary General, dated 28th February, 1835. Bills of private individuals are negotiated at a discount varying from 2½ to 5 per cent. Few if any bills are negotiated on foreign countries, and no rate of exchange on such bills can therefore be quoted.

Rate of interest. [B. B. 1836.] Eight per cent. per annum is allowed in cases before the courts of law or equity when no rate has previously been agreed upon, under authority of the act of council, 5 W. IV, sec. 10. The bank of New South Wales, bank of Australia, bank of Australasia, Commercial bank, and Saving's bank charge discount upon bills at the rate of 10 per cent. per annum. The Saving's bank allows, for money deposited therein, interest at the rate of 5 per cent. per annum. The other banks allow 4 per cent. per annum on all current accounts.

Rates of Insurance at Sydney, N. S. W., March 17, 1838.—London and Liverpool, 2½ to 3 per cent.; Hobart Town, 1 per cent.; Launceston, 1½ per cent.; Swan River, 4 per cent.; New Zealand, 1 per cent.; South Sea Islands, 2 per cent.

The value of property annually created in New South Wales is estimated at 2,366,664*l.*; moveable, 3,703,000*l.*; immovable, 19,150,000*l.*

wool. The introduction of this article into the colony was owing to the late John M'Arthur Esq. So long back as 1793, that enterprising gentleman became convinced that the grasses and climate of New South Wales were adapted to Merino sheep, and about two years after, he obtained a ram and two ewes from Captain Kent, R. N., who had brought them, with some other stock for the supply of the settlement, from the Cape of Good Hope, to which place some of the pure breed had been sent by the Dutch Government. Mr. M'Arthur immediately began to cross his coarse fleeced sheep with the Merino, and in ten years his flock, which consisted originally of 70 Bengal animals, was increased to 4,000, although the weathers were slaughtered as they became fit for food. In 1803, Mr. M'Arthur revisited England, exhibited samples of his wool to a committee of manufacturers,

who happened to be then in London, and it was so much approved that Mr. M'Arthur appeared before the Privy Council, and laid before them his plans for rendering England independent of foreign countries for a supply of the best wools. The Privy Council adopted Mr. M'Arthur's views, and with their encouragement, he purchased from the Merino flock of his Majesty George the Third, two ewes and three rams, with which he returned to New South Wales in 1806, appropriately calling the vessel in which his golden fleece was embarked the 'Argo.' Such was the origin of the rapidly increasing flocks of New South Wales, whose numbers are now upwards of a million, and whose wool has brought as high as 10s. 4d. per lb. in the London market! The following table was prepared by the Agricultural Association of Western Australia.

Origin and Progress of the Flocks, and Production of Wool, of New South Wales and Van Diemen's Land; the Data being collected from the several Publications referred to at the end of the Report.

* The weights previous to the year 1822 are taken from the English Custom House returns; there being no record in the colony from 1822 to 1835, they are derived from the books of the Sydney Custom House.

† Where the weight is greater in preceding than in subsequent years, it does not arise from a cessation of increase in the weight shorn, but from variation in the time of shipment.

The following data relative to the progress of the wool trade in Australasia are taken from a report of the committee appointed by the Agricultural Society of Western Australia to investigate the subject:—

All the publications on the Australian colonies, which embrace the topics of agriculture and general statistics, have noticed the ameliorating influence of the climate on the fleeces of the native or imported sheep, independently of the improvement effected by the system of crossing, generally adopted, of late years, by the flock-holders.

It was, in fact, this peculiarity of the climate or pasturage, or probably the influence of both combined, which, as early as the year 1797, attracted the attention of the late Capt. J. M'Arthur, and induced him to commence a series of experiments for the further refinement of the fleece, by the introduction of a few Spanish sheep. The rapid improvement which followed in the course of three or four years was no less gratifying than surprising; and, convinced by these successful experiments, he pursued the object until a late period of his life with unceasing perseverance, and with results at once beneficial to himself and to his adopted country.

In the statement presented by Captain M'Arthur to Lord Hobart in 1803, he adverts in strong terms to this point:—that his flock, then consisting of 4,000 sheep, was derived from 30 Indian sheep purchased in 1793 from a ship which arrived at Sydney from Calcutta, to which he had added about ten of the Spanish and Irish breeds, and subsequently the flock belonging to another officer, originating from the same number and from the same vessel.

The rapid improvement of the fleece in Australia by the influence of the climate only, is further confirmed by the evidence of several witnesses, wool-staplers, and others, examined before the "Select Committee of the House of Lords appointed to take into consideration the state of the British Wool Trade," in 1828. Mr. Henry Hughes, an eminent Blackwell Hall factor, gave his evidence in the following terms:—

"The quality of the wool was originally very bad, but the climate has a most extraordinary effect on the fleece;" and again, "the fleeces of sheep imported into those colonies have improved in a wonderful degree, which cannot be accounted for by the best judges, except from the climate." "I have from New South Wales some fleeces shorn off German sheep, after they had been in the colony about 16 months, and the improvement was so extraordinary, that I have had most of the German merchants now in London to see them; and, if I may use the phrase, they were astonished at the great improvement the climate had made in the fleece." Mr. S. Donaldson

and several other witnesses attest to the same effect. The committee constructed the table (p. 435), shewing, in separate columns, in every instance where they have been able to collect the required data, the date of arrival, the number of sheep imported, their annual accumulation, the quantity of wool exported, &c., commencing from the year 1791, when the foundation of the present flocks in the colony of New South Wales was laid, by the arrival of the *Gorgon*, in the month of September, from the Cape of Good Hope, having on board 68 sheep.

The previous efforts of the colonists for the purpose of obtaining live stock, and their total failure, may be first briefly stated.

The first expedition landed on the 20th January, 1788, and in the following month a census of the live stock, imported with it, was taken, consisting of four cows, one bull, one stallion, three mares, and one colt, besides some pigs and poultry. Between this date and the month of April it appears that some sheep had been introduced, it being remarked by Capt. Watkin Tench, that a great diminution in their number had taken place, by bad pasturage and other causes. In May there were 29 sheep; and in June the misfortune occurred of all the horned cattle, consisting of two bulls and five cows, straying away into the bush; where they remained, undiscovered, until the year 1795, when they, with their progeny, amounting in all to about 60 head, were found in the neighbourhood of the Nepean River. In June, 1790, H. M. S. *Guardian* arrived from the Cape of Good Hope, where had been embarked a quantity of live stock, including sheep, but the whole were destroyed during the voyage; and the disastrous history of this first stock of sheep and cattle is summed up, in the month of November, 1790, by the author before quoted with the remark, that "They have not, at this time, either horse, cow, or sheep here."

Such are the great improvements in navigation, that the expense of sending the fleece to London from Australia, a distance of 15,000 miles, is not more than 3½d. per lb. including freight, insurance, brokerage, commission, dock and landing charges, while the expense of transmitting German or Spanish wools to England is from 4d. to 4½d. per lb.

The rate of increase in Western Australia has been nearly 40 per cent. per annum; and the number of sheep in the colony, in 1837, about 12,000, of whom 10,000 were ewes or ewe lambs.

The progress of cultivation and of live stock in New South Wales since its settlement in 1788, will be seen by the following statement.

LAND.				LIVE STOCK.				
Years.	Total No. granted or sold.	Cleared or Pastured.	Cultivated.	Horses.	Horned Cattle.	Sheep.	Swine.	
1788				7	29	29

The prices of horses, cattle, and sheep, which a few years since had fallen considerably, are now on the increase; and as provisions are becoming a staple export, we may soon see flour one of the imports from Australia.

After wool, whale oil is the chief staple of the colony; this article of commerce is also of recent creation, and its progress is thus indicated:

Years.	Vessels employed in Fishing.	Sperm Whale Oil.	Sea Elephant's Oil.	Black Whale Oil.	Seal Skins.	Total value and Skins.

The black whale is found in abundance along the coast of New South Wales, but the mariners prefer cruising off New Zealand, and among the beautiful islands in the Pacific.

The sperm fishing is the most valuable, and the extent to which it is prosecuted, may be estimated from the number of vessels engaged in it, and which sailed out of the Port of Sydney in 1834:—namely, 40 vessels, 9655 tons, 1179 men.

Return of Fisheries, carried on in Vessels, belonging to, or sailing from the Colony of New South Wales in 1836. [B. B.]

As the land in New South Wales and in our other colonies is one of the most valuable sources of colonial and imperial wealth, the following details are given of the sales of land and timber cut off it. Not long since, an acre of land in Sydney was sold for 10,000*l*.

Exports of Timber from New South Wales.—[B. B.]

Total revenue from land sales in 1836, 105,163*l*.

The *Phormium Tenax*, or New Zealand flax, is another article of export yearly increasing in amount; it is similar in appearance to the English flax, and is chiefly dressed by the native women of New Zealand, who scrape off the outer part of the leaf with muscle shells: the inner fibres or filaments, resembling

dressed flax, are then exported to Sydney, where it is valued at from 15*l.* to 20*l.* per ton.

Timber, particularly cedar plank, has been for some time exported; coals also were proving a valuable staple of the colony.

Table of Distances to and from the several Post Towns in New South Wales.*

The figures signify the distance by land, and with the letter *w*, in addition to water carriage; *w*, alone, wholly by water. The distance is given by the route the mail travels.

* An examination of this table will shew the extent of surface over which the colonists are spread, and by a reference to the map, a more complete idea may thus be formed of the distance and direction of the different settlements or towns from the capital (Sydney). Other post towns have been added since the annexed return was received, owing to the rapid spread of population and industry.

There are two treadmills at Carter's barracks for the punishment of prisoners.

The whole of the preceding statements demonstrate the rapid progress which New South Wales has made in population, wealth, and civilization.

CHAPTER II.—VAN DIEMEN'S ISLAND, OR TASMANIA.

SECTION I. Van Diemen's Island is situate on the S.E. coast of New Holland, from which it is separated by Bass's Straits, between the parallels of 41. 20. and 43. 40. S., and the meridians of 144. 40. and 148. 20. E. It is of an irregular heart-shape: and its greatest extent from N. to S. is estimated at about 210 miles, and from E. to W. 150 miles (calculating the degrees of longitude in that parallel at the average of about 50 miles each), and covering an extent of surface of about 24,000 square miles, or 15,000,000 of acres; being nearly the size of Ireland.

II. It was in honour of the Governor-General of the Dutch East Indies, Anthony Van Diemen, that the island received its name; its occasional appellation of Tasmania, is a tribute to its first discoverer, Tasman, who in 1642 first visited the coast, in the course of an eastward voyage from Mauritius; but it was upwards of 120 years before the knowledge of its existence was followed by any event of the slightest importance to its annals. Captain Cook, as well as his companion Captain Furneaux, in the course of their voyage of circumnavigation in 1773, and again in 1777, visited the shores of Van Diemen's Land without discovering its insularity.

In 1803, it was formally taken possession of by the English; a small detachment under the command of Lieutenant Bowen, having arrived from Sydney, with a view of forming a penal settlement for convicts transported from that colony. Risdon or Rest-down, as it is sometimes called, on the eastern bank of the Derwent, a few miles up the river, was the spot selected for the settlement; but beyond this, little was effected at that time.

Early in 1804, Lieutenant-Governor Collins, who had recently left England with a considerable expedi-

tion, having in view the formation of a settlement at Port Philip, on the south east coast of New Holland, altered his destination after a short experience of the difficulties attending a settlement at that place, and arrived in the river Derwent, when the island was formally taken possession of in the name of His Britannic Majesty; and after various surveys of the Derwent, the present site of Hobart Town was decided upon for head-quarters (the name was bestowed in compliment to Lord Hobart, at that time secretary of state for the colonies). Lieutenant-governor Collins had about 400 prisoners under him, with about 50 marines to secure them.

The colony at times suffered great hardships; for the first three years the inhabitants being wholly dependent upon foreign supplies for the most common articles of food, were occasionally reduced to great straits; so much so, that we hear of eighteen-pence per pound having been given for kangaroo flesh, and that sea-weed, or any other vegetable substance fit for food, was purchased at an equally high rate.

After the island had been settled about three years, sheep and cattle were introduced. Until 1813, the island was a place of transportation from New South Wales, and all communication except with England or New South Wales interdicted. In 1821 emigration commenced, and the progressive civilization of the island will be seen by its statistics.

III. The general face of the interior is very diversified, but decidedly mountainous, not however in ranges, but rather in isolated peaks, varied by lofty table land, and extensive fertile valleys or plains.

Around the coast are numerous bays and harbours, that afford secure anchorage. The entrance from the

ocean to the Derwent, on the banks of which Hobart Town is built, presents two lines of continuous bays or anchorage of unrivalled excellence; the one most commonly used leads through Storm Bay, and the other through D'Entrecasteaux's Channel, which is one string of little bays or anchorages for nearly 40 miles.

Hobart Town, the capital of the island, and the seat of government, is an extensive, well laid out, and neatly built town on the River Derwent, about 20 miles from its mouth. The cove or bay, upon the banks of which Hobart Town is built, affords one of the best and most secure anchorages in the world, for any number of vessels, and of any burthen.

An amphitheatre of gently rising hills, beautifully clothed with trees, and having Mount Wellington (4000 feet elevation) as the highest, defends it from the westerly winds, and bounds the horizon on that quarter: while the magnificent estuary of the Derwent, (with its boats and shipping, and picturesque points of land along its winding banks, forming beautiful bays and lakes), skirts it on the E.

The town itself stands upon a gently rising ground, and covers rather more than one square mile. Its streets wide, long and intersecting each other at right angles.

The suburbs of Hobart Town have lately undergone considerable improvement; handsome villas and enclosures occupying ground in every direction, which in some places would have been supposed to bid defiance to the hand of art. A noble wharf has been constructed, so as to allow vessels of the largest burthen to lade or unlade close alongside the shore, without the assistance of boats.

Next in rank and commercial importance is Launceston, on the north side of the island, distant, by a good road, 121 miles from Hobart Town. It is the richest land in the island, backed by gently rising hills, at the confluence of the N. and S. Esk Rivers, which there form the Tamar, flowing about 45 miles, when it disembogues into the ocean at Bass's Straits. The town is thriving greatly, owing to its being the maritime key of a large and fertile country, and affording sufficient water for vessels upwards of 400 tons burthen, to load alongside the wharfs.

IV. The geology of the island is very varied; basalt is supposed to be the principal stratum; limestone is almost the only mineral that has yet been brought into general use; marble of a white mixed grey colour, susceptible of a good polish, has frequently been found, though never yet dug up or applied to use. Around Hobart Town, where, in the progress of improvement, the soil is frequently exposed to the depth of two or three yards, strata of soft clayey marl occur, which has been found very useful as a manure. Much of the common limestone is of a yellowish or reddish colour, no doubt derived from the quantity of oxide of iron with which it is mixed, and which is so generally scattered throughout the island. Iron ore is very frequent, both of a red, brown and black colour. In one or two instances it has been analysed, and found to contain eighty per cent. of the perfect mineral. It also occurs, though more rarely, and in smaller quantities, under the form of red chalk, with which, mixed with grease, the Aborigines besmear their heads and bodies. Indications of coal have been found across the island.

Excellent sandstone for building, is obtained in almost every part of the island, and most of the houses in Hobart Town are now built with it, instead of badly made bricks, as formerly; it is brought from different parts within half a mile or a mile of the

town. A quarry of that kind has recently been discovered at Port Arthur; where the manufacture of filtering stones, it is probable, will be found a profitable employment.

Of the *metallic ores*, besides *iron*, which is most abundant, specimens of *red and green copper ore*, *lead*, *zinc*, *manganese*, and, as some say, of *silver and gold*, have occasionally been met with.

The soil is very varied, in some places a rich black, alluvial mould, in others sandy or argillaceous; its fertility is shewn by the excellent crops produced, the land being cultivated for years without refreshment.

V. Allowing for the higher southern latitude, and the coldness and humidity attending on its insularity, the seasons and weather at Van Diemen's Land may be estimated from the data given in the preceding chapter respecting New South Wales.

September, October, and November are the spring months, when the weather is usually bright and clear, with occasional rain and high winds. The average of the thermometer for these months is from 50 to 60 degrees.

December, January, and February, constitute the summer. In general very little rain falls during these three months. The productions of the earth, such as grass, corn, and vegetables, arrive at maturity about one month earlier than the same kinds would in England; that is, in December, which answers to the June of the northern hemisphere, products are gathered which, in England, ripen in July.

March, April, and May are the autumn of Van Diemen's Land, and form by far its pleasantest season. The air is then clear and bright—the sky free from clouds and vapours—the medium heat of the day is about 65.—and the nights are cool and refreshing. It may be noticed here, that even in the height of summer, the evenings and nights are generally cool.

June, July, and August are the Winter. In the interior, particularly upon high and exposed situations, frosts are sometimes severe, and at times a good deal of snow falls; but it is seldom that the sun so wholly loses its power as to suffer an appearance of either frost or snow to last throughout the day; and the winter of Van Diemen's Land is rather contemplated by the inhabitants as a season of moderate and genial rain, sufficient to replenish the storehouses of the earth against the ensuing spring, and to facilitate the labours of the husbandman, than as the cold and dismal period of the higher latitudes. The average range of the thermometer is from 40. to 48.; now and then, however, for a day or two, some degrees lower. The longest day in Van Diemen's Land is 15 hours 12 minutes; the shortest, 8 hours 48 minutes.

VI. When first discovered, Van Diemen's Land was densely peopled by a dark race of inhabitants, differing somewhat from the aborigines of the adjacent coast of New Holland in the more negro-like caste of countenance, woolly hair, and darker colour. Shortly after our occupation, contests began between the white and black races, which continued with occasional interruptions until about four years since, when a general levy of the white colonists took place. The blacks were hemmed into one corner of the island, and finally removed, under the protection of government, to Flinder's Island, in the adjoining straits. Their numbers were, however, very much diminished; small pox, famine, and the retaliation of the colonists for the murders of their relations and friends, having thinned considerably the aborigines. The following shews the progress of the white population:—

The churches at Campbell Town and Ross, now building, will remedy the great inconvenience at present felt from the want of accommodation.

VIII. An Abstract of the Report of the State of the Government Schools in December, 1835.

1. *Back River*.—One daily school, attended by 7 males and 12 females. The number of children admitted from the commencement is 37. Of the daily scholars, 17 of both sexes also attend on Sundays. Government allows 25*l.* per annum towards the rent of a school-house. The mistress receives 25*l.* per annum, in addition to which 8 of the scholars pay 1*s.* a week each. The children are taught spelling, reading, writing, arithmetic, and English grammar; the girls also learn marking, netting, and plain needlework. System, Dr. Bell's.

2. *Brigdad*.—One daily school, 7 m. and 15 f. No. of children, 41. Of the daily scholars, 12 of both sexes also attend on Sundays. Gov. allows 25*l.* per an. towards the rent of a school-house. Master 50*l.*, mistress 25*l.* per an.; in addition to which 19 of the scholars pay 3*l.* 10*s.* 7*d.* a week. Reading, grammar, geography, writing, arithmetic, and the Latin rudiments; the girls likewise, needlework, &c.

3. *Bothwell*.—One daily school, 17 m. and 10 f. No. of children, 51. Of the daily scholars, 26 of both sexes also attend on Sundays. The school-house belongs to Gov. Master 25*l.* per an.; in addition to which 10 of the scholars pay 10*s.* a week. Spelling, reading, writing, and arithmetic.

4. *Brighton*.—One daily school, 5 m. and 6 f. No.

of children, 17. Gov. allows 20*l.* per an. towards the rent of a school-house. Master 25*l.* per an.; in addition to which 7 of the scholars pay 7*s.* a week. Spelling, reading, writing, and arithmetic.

5. *Campbell Town*.—One daily school, 5 m. and 13 f. No. of children, 37. Gov. allows 25*l.* per an. towards the rent of a school-house. Master 25*l.*, mistress 15*l.* per an.; in addition to which 8 of the scholars pay 8*s.* a week. Spelling, reading, writing, and arithmetic. System, Dr. Bell's.

6. *Carlton*.—One daily school, 7 m. and 9 f. No. of children, 37. Of the daily scholars, 13 of both sexes also attend on Sundays. Gov. allows 10*l.* per an. towards the rent of a school-house. Master 30*l.* per an.; in addition to which 9 of the scholars pay 9*s.* a week. Spelling, reading, writing, and arithmetic. System, Dr. Bell's.

7. *Clarence Plains*.—One daily school, 15 m. and 11 f. No. of children, 99. The school-house is Gov. property, but is in want of repair. Master 50*l.*, mistress 25*l.*; in addition to which 23 of the scholars pay 1*l.* 9*s.* 7*d.* a week. Spelling, reading, writing, history, geography, arithmetic, and the Latin language.

8. *Evandale*.—One daily school, 9 m. and 4 f. No. of children, 23. Of the daily scholars, 13 attend also on Sundays. Gov. allows 25*l.* per an. towards the rent of a school-house. Master 50*l.*, mistress 25*l.* per an.;

in addition to which 21 of the scholars pay 11s. 6d. a week. Spelling, reading, writing, arithmetic, and English grammar. System, Dr. Bell's.

9. *George Town*.—One daily school, 10 m. and 8 f. No. of children, 19. Of the daily scholars, 18 of both sexes also attend on Sundays. The school-house, which is much out of repair, belongs to Gov. Master 50*l.*, mistress 25*l.* per an.; in addition to which 13 of the children pay 13s. a week. Spelling, reading, writing, arithmetic, and geography; the girls likewise learn needlework. System, Dr. Bell's.

10. *Glenarchy*.—One daily school, 12 m. and 13 f. No. of children, 41. Of the daily scholars, 20 of both sexes also attend on Sundays. Gov. allows 25*l.* per an. for the rent of a school-house. Master 50*l.*, mistress 25*l.* per an.; in addition to which 9 of the children pay 9s. a week. Spelling, reading, writing, arithmetic, with needlework for the girls.

11. *Green Ponds*.—One daily school, 12 m. and 8 f. No. of children, 29. Of the daily scholars, 14 also attend on Sundays. Gov. allows 25*l.* per an. for the rent of a school-house. Master 50*l.*, mistress 25*l.* per an.; in addition to which 12 of the scholars pay 12s. a week. Spelling, reading, writing, geography, grammar, and arithmetic, with needlework for the girls. System, Dr. Bell's.

12. *Hamilton*.—One daily school, 8 m. and 7 f. No. of children, 29. Gov. allows 25*l.* per an. for the rent of a school-house. Master 25*l.*, mistress 15*l.* per an.; in addition to which 10 of the scholars pay 6s. a week. Of the daily scholars, 10 attend on Sundays. Spelling, reading, writing, geography, and arithmetic.

13. *Hobart and Suburbs*.—*St. David's Parish*.—Two daily schools, one of which, belonging to the Established Church, is attended by 31 m. and 19 f. No. of children, 1,332. Of the daily scholars, 24 attend also on Sundays. Gov. rents the school-house at 115*l.* 10s. per an. Master 88*l.*, mistress 25*l.* per an.; in addition to which 26 of the children pay 7s. 9d. a week. Spelling, reading, writing, and arithmetic. System, Dr. Bell's.

14.—From the other school, which belongs to Roman Catholics, no return has been received; but in December, 1835, it was attended by 45 m. and 12 f. Master 50*l.* per an. System, Dr. Bell's.

15. *Sandy Bay or Queenboro' Parish*.—One daily school, 9 m. and 10 f. No. of children, 57. Of the daily scholars, 12 attend also on Sundays. Master 30*l.*, mistress 30*l.* per an.; in addition to which 14 of the children pay 9s. 6d. a week. Spelling, reading, writing, and arithmetic. System, Dr. Bell's. It is feared that this school must be given up, as the owner of the school-house requires it for other purposes, and no other suitable building can be obtained.

16. *Trinity Parish*.—One daily school, 70 m. and 54 f. No. of children, 260. Of the daily scholars, 69 of both sexes attend also on Sundays. Gov. rents the school-house at 80*l.* per an., but it is too small for the number of children now attending it. Master 50*l.*, mistress 25*l.* per an.; in addition to which 124 of the scholars pay 3*l.* 12s. a week. Spelling, reading, writing, grammar, geography, and arithmetic. System, British and foreign school.

17. *Launceston*.—One daily school, 26 m. and 19 f. No. of children, 735. Of the daily scholars, 32 attend also on Sundays. The school-house belongs to Gov. Master 50*l.*, mistress 25*l.* per an.; in addition to which 8 of the scholars pay 4s. 9d. a week. Spelling, reading, writing, and arithmetic. System, Dr. Bell's.

18. *Longford*.—No return. In 1835 the daily

school contained 23 of both sexes, who were educated on Dr. Bell's system. Master 25*l.* per an., and 20*l.* per an. was allowed by Gov. for the rent of a school-house.

19. *New Norfolk*.—One daily school, 17 m. and 6 f. No. of children, 54. Of the daily scholars, 30 attend also on Sundays. Gov. rents a school-house at 25*l.* per an. Master 50*l.*, mistress 25*l.* per an.; in addition to which 9 of the scholars pay 4s. 6d. a week. Spelling, reading, writing, grammar, geography, and arithmetic, with needlework for the girls. System, Dr. Bell's.

20. *Norfolk Plains East*.—One daily school, 8 m. and 9 f. No. of children, 61. Of the daily scholars, 13 attend also on Sundays. The school-house is private property, for which no rent is charged. Master 25*l.* per an.; in addition to which 12 of the scholars pay 12s. a week. Spelling, reading, writing, arithmetic, and grammar. System, Dr. Bell's.

21. *Outlands*.—One daily school, 12 m. and 14 f. No. of children, 32. Of the daily scholars four attend also on Sundays. Gov. allows 25*l.* per ann. for the rent of a school-house. Master, 25*l.*; mistress, 15*l.* per ann.; in addition to which 18 of the scholars pay 13s. 6d. a week. Spelling, reading, writing, grammar, and arithmetic.

22. *Perth*.—One daily school, 6 m. and 8 f. No. of children, 36. Of the daily scholars nine attend also on Sundays. Master, 25*l.*; Mistress, 15*l.* per ann.; in addition to which ten of the scholars pay 7s. a week. Spelling, reading, writing, and arithmetic. System, Dr. Bell's.

23. *Port Arthur*.—One daily school, 10 m. and 6 f. No. of children . . . School-house is gov. property. Master, 25*l.* per ann. Spelling, reading, writing, and Arithmetic, and 16 of them also attend on Sundays.

24. *Richmond*.—One daily school, 8 m. and 8 f. No. of children, 27. School-house belongs to gov. Master, 50*l.*; mistress, 25*l.* per ann.; in addition to which nine of the children pay 14s. a week. Spelling, reading, writing, geography, and arithmetic, with needlework for the girls.

25. *Ross*.—No return. In 1835 this school was attended by 7 m. and 7 f. Gov. allowed 20*l.* per ann. for a school-house. The master received 25*l.* per ann. from the gov. and 4*l.* 14s. from the scholars. System, Dr. Bell's.

26. *Sorell*.—One daily school, 18 m. and 12 f. No. of children, 220. School-house is gov. property. Master, 50*l.*; mistress, 25*l.* per ann.; in addition to which 15 of the scholars pay 7s. a week. Spelling, reading, history, grammar, writing, and arithmetic. System, Dr. Bell's.

27. *Springs*.—One daily school, 8 m. and 7 f. No. of children, 38. Gov. rents the school-house at 25*l.* per ann. Master, 25*l.* per ann.; in addition to which 11 of the scholars pay 7s. a week. Spelling, reading, writing, and arithmetic. System, Dr. Bell's.

28. *Westbury*.—One daily school, 12 m. and 5 f. No. of children, 19. The whole of the daily scholars attend also on Sundays. School-house belongs to gov. Master, 50*l.*; mistress, 25*l.* per ann.; in addition to which six of the scholars pay 6s. a week. Spelling, reading, writing, and arithmetic. System, Dr. Bell's.

29. *York*.—One daily school, 12 m. and 1 f. No. of children, 20. Gov. allows 25*l.* per ann. for a school-house. Master, 25*l.* per ann.; in addition to which four of the children pay 2s. 6d. a week. Spelling, reading, writing, English grammar, and arithmetic.

made returns, 26. In these 26, the number of scholars are—males 361, females 294; total, 655. No. of Sunday schools, 18. No. of scholars, 343. No. of children who pay towards their education, 415. Amount of weekly payment, 18*l*. 1*s*. 2*d*. Spelling, reading, writing, and arithmetic are taught in 15; English grammar and geography in 12; Latin in 2. Of the 26 schools, 18 have both master and mistress, 8 have only a master, 18 are conducted on Dr. Bell's system, 1 on the British and Foreign school, and in 10 an anomalous system is pursued.

In addition to the schools mentioned above, there are the King's Orphan schools at Newtown, containing 216 males and 200 females; and the school at Point Puer, in which all the boys sent to that establishment are taught reading, a knowledge of the scriptures, &c. Of the 274 boys landed during the years 1834–1835, only 161 could read; the remaining 113 having been taught at Point Puer.

X. Van Diemen's Land is a Lieutenant Government of New South Wales, but in local matters since 1825, the Lieutenant Governor with the aid of an Executive and Legislative Council, administers the affairs of the island after the same manner as they are carried on in New South Wales, and independent of that government.

The Executive Council consists of the Lieut.-Governor, Chief Justice, Colonial Secretary, Colonial Treasurer, and the officer in command of the troops. The Legislative Council consists of not more than 15 members, nor less than 10, appointed by the King's warrant. Several members of the government, such as the Chief Justice, Colonial Secretary, Colonial Chaplain, Attorney General, Treasurer, &c., are *ex-officio* members of this council, on whom devolves the making of laws and the issuing of ordinances for the good government of the colony, subject to the approval of the King in Council. The Lieut.-Governor has the initiative in all laws brought before the council; drafts of such laws to be inserted in one or more of the colonial newspapers eight clear days before their enactment, unless in cases of special emergency. Two-thirds of the council must be present; if a majority dissent from the Governor, they may minute the grounds of their dissent, and then the law cannot be passed. Laws passing the Legislative Council, must within seven days be enrolled in the supreme court, and 14 days from such enrolment they come into operation, unless the judges of the supreme court declare them to be repugnant to the laws of England, or the charter or letters patent of the colony. The Lieut.-Governor and Council in such an event, reconsider the laws and the judge's objections; and if they see fit, may cause the laws to be put in force and transmit to England the whole of the proceedings connected therewith. The laws of England, so far as they can be applied, are recognized in the administration of justice. All laws made in the colony, and all orders by the Crown in pursuance of the 9th Geo. 4, c. 83, to be laid before Parliament within six weeks after the commencement of each session. Criminal offences are tried by seven naval or military officers as a jury, and civil cases by a judge and two assessors, magistrates of the colony, appointed by the Lieut.-Governor, open to challenge by the parties, but the challenge to be determined by the judge; if the assessors do not agree, the judge has a casting vote. The supreme court may, on the application of either a plaintiff or defendant, summon a jury to try an action. The supreme court may declare insolvencies, and distribute effects; it possesses also equitable and ecclesiastical jurisdiction, as in New South Wales, and in fact, in all respects the government and courts of Van Diemen's Island are on the same principle as those of the elder colony.

The Governor of New South Wales is *ex-officio* general of the district, which includes Van Diemen's Island; the Lieut.-Governor of the colony being only colonel, and in that capacity, commanding the troops stationed in the island.

Return of Troops serving in Van Diemen's Land, with the No. of Women and Children of each Corps, and Deaths during the year ending 31st December 1836.—Regts. 17th., 21st., 50th., 63d., foot; Officers present, 31; Non-com. Officers and Privates, 678; Ditto sick and absent, 41; total, 750. Women, 156;

Children, M. 141, F. 155. Deaths since last return, 10 men, 6 children.

XI. The revenue is derived from custom duties, excise, fees, sales of land, and quit rents, &c. Goods of British manufacture are importable, duty free, foreign ditto, five per cent. *ad valorem*. Spirits are charged with a duty of 10s. per gallon on brandy, hollands, or geneva, West India rum or British gin 7s. 6d.; tobacco, 1s. 6d. per lb.; a license to distil or sell spirits, costs 25l. per annum; to bake or sell bread, 5s.; to slaughter cattle or sheep, 5s.; to keep a dog on the chain, 5s.; off ditto, 10s.; and a bitch ditto, 1l.; to keep a cart for hire, 5s.; auctioneer's license, 3l. 3s.; marriage license, 4l. 4s. There are fees on grants of lands, &c. equivalent to stamp duties.

Number of Licenses granted to Publicans, and Licenses issued to Wholesale Dealers in Spirits.

The increasing trade of this colony may be judged of by the preceding table; with Great Britain it has increased sevenfold in 12 years, and the whole imports of the settlement have been augmented nearly tenfold. The exports have been augmented from 14,000*l.* to 420,000*l.* per annum, and the tonnage has been extended in the proportion of 5 to 1. The value of land and cattle has increased during the same period 400 per cent. The progress of the population and revenue will be seen under their respective heads. The principal exports of the colony are wool, whale and seal oil, whalebone and bark, to England; and provisions and live stock to the neighbouring colonies. The quantity of wool exported in 1827, was 192,075 lbs. in 1835, 1,942,800 lbs., price 1*s.* 6*d.* to 2*s.* 6*d.* per lb.

(Compiled from Official Records in the Colonial Secretary's Office, 10th October 1836.—John Montagu, Col. Sec.)

XIII. By an Act of the Legislative Council, No. 3, 7th Geo. IV., the Spanish dollar passes current in this colony at 4*s.* 4*d.*; the Spanish dollar having a piece out of its centre, called the "king dollar," at 3*s.* 3*d.*; and the piece so struck out, called a "dump," at 1*s.* 1*d.*

Lieutenant-Governor Arthur, by direction of the Secretary of State, issued a proclamation, bearing date 1st November, 1834, notifying, that from the 1st December of the said year, all dollars whatsoever of the South American States will be received and issued in this colony in the Departments of the Commissariat and Colonial Treasury, and shall otherwise pass current as money, at the sum of 4*s.* 4*d.* each (the current value of the old Spanish or pillared dollar), and the said several fractional parts thereof, at sums respectively in due proportion thereto.

By an Act of the Legislative Council, No. 5, 6th Wm. IV., the Calcutta or sicca rupee passes current in this colony at 2*s.*

VAN DIEMEN'S ISLAND.—AGRICULTURE, CROPS AND PRICES.

In 1824, there was but one bank in the colony with a capital of 20,000*l.*; in 1835, there were 6 banks, with a paid up capital of 200,000*l.*

The amount of specie in the colony cannot be accurately ascertained; it may, however, be estimated at about 130,000*l.*, which sum comprises British gold, silver, and copper money, and dollars of the South American States, as well as sicca rupees; which specie is distributed as follows:—In the military chest, 38,638*l.* 17*s.*; Colonial treasury, 328*l.* 7*s.*; Derwent bank, 13,276*l.* 2*s.*; Van Diemen's Land bank, 18,392*l.* 9*s.*; Commercial bank, 10,500*l.*; Australasian bank, 30,486*l.*; Tamar bank, 13,526*l.*; in cir-

ulation throughout the colony, 4,852*l.*; total, 130,000*l.* 5*s.*

Notes of the undermentioned banks of sterling denomination of 1*l.* and upwards are in circulation to the amount of 54,116*l.* The circulation of bills of exchange and promissory notes of less value than 1*l.* is prohibited, by an Act of Council, No. 3, passed the 22nd September, 1826. Derwent bank, 11,274*l.*; Van Diemen's Land bank, 11,232*l.*; Commercial bank, 7,021*l.*; Australasian bank, 15,643*l.*; Tamar bank, 8,946*l.* Total, 54,116*l.* The rate of bank interest is about 8 per cent.; premium on treasury bills 1½ per cent.

CHAPTER III.—WESTERN AUSTRALIA OR SWAN RIVER.

SECTION I. The establishment of this colony originated in a proposition, on the part of Thos. Peel, Esq., Sir Francis Vincent, E. W. Schenley, T. P. Macqueen, Esqrs., and other gentlemen, to further the views of Government in founding a settlement, at little or no expense to the mother country, on the western coasts of Australia. These gentlemen offered to provide shipping to carry 10,000 British subjects (within four years), from the United Kingdom to the Swan River, to find them in provisions and every other necessary,

and to have three small vessels running to and from Sydney as occasion might require. They estimated the cost of conveying these emigrants at 30*l.* per head, making a total of 300,000*l.*; and they required in return that an equivalent should be granted them in land equal to that amount, and at the rate of 1*s.* 6*d.* per acre, making 4,000,000 acres; out of which they engaged to provide every male emigrant with no less than 200 acres of land, free of all rent.

This arrangement was not carried into effect, and

a project for the formation of the new colony (without making it a penal settlement), was issued from the Colonial Office in 1829.

By this project his Majesty's Government did not intend to incur any expense in conveying settlers to the New colony on the Swan River; nor supply them with provisions, or other necessaries, after arrival there.

Such persons as were to arrive in the settlement, before the end of the year 1830, were to receive, in the order of their arrival, allotments of land, free of quit-rent, proportioned to the capital which they were prepared to invest in the improvement of land, and of which capital they were to produce satisfactory proofs to the Lieutenant Governor, at the rate of 40 acres for every sum of 3*l*. which they were prepared so to invest.

Those who incurred the expense of taking out labouring persons, were to be entitled to an allotment of land, at the rate of 15*l*., that is, of 200 acres of land, for the passage of every such labouring person, over and above any other investment of capital. In the class of 'labouring persons' were included women, and children above ten years old. With respect to the children of labouring people under that age, it was proposed to allow 40 acres for every such child, above three years old; 80 acres for every such child, above six years old; and 120 for every such child, above nine, and under ten years old.

The title to the land was not to be granted in fee simple, until the settler had proved, to the satisfaction of the Lieutenant Governor, that the sum required, (viz. 1*s*. 6*d*. per acre), had been actually expended in some investment, or in the cultivation of the land, or in solid improvements,—such as buildings, roads, or other works of that kind.

Any land, thus allotted, of which a fair proportion, at least one fourth, should not have been brought into cultivation, or otherwise improved, to the satisfaction of the local Government, within three years from the date of license of occupation, was to be liable to one further payment of 6*d*. per acre for all the land not so cultivated or improved, into the public chest of the settlement; and, at the expiration of seven years more, so much of the whole grant as should remain in an uncultivated or unimproved state was to revert absolutely to the Crown. And in every grant there was to be contained a condition, that, at any time within ten years from the date thereof, the Government might resume, without compensation, any land not then actually cultivated, or improved, as before-mentioned, which might be required for roads, canals, or quays, or for the site of public buildings. After the year 1830, land was to be disposed of to those settlers who might resort to the colony on such conditions as his Majesty's Government should determine.

Captain Stirling was appointed Lieutenant-Governor of the intended settlement, with a grant of 100,000 acres; and Mr. Peel was to receive 250,000 acres, on condition of taking out 400 emigrants, with liberty to extend the grant to 1,000,000 acres, previous to the year 1840, by receiving 40 acres for every child above three years, 80 for every child above six, up to ten years 120, and exceeding that age and upwards 200 acres for each person conveyed to the colony. The terms requisite to obtain 500,000 acres have been complied with. Under these circumstances, early in 1829, a number of settlers left England for Swan River, in Western Australia, where they began to arrive in August, and to locate themselves along the banks of the Swan and Canning Rivers, so that by the end of that year there were in the new colony residents 850; non-

residents 440; value of property, giving claims to grants of land, 41,550*l*.; lands actually allotted, 525,000 acres; locations actually effected, 39; No. of cattle, 204; of horses, 57; of sheep, 1,096; of hogs, 106; and 25 ships had arrived at the settlement between the months of June and December. Such was the commencement of our new colony on the shores of Western Australia. The settlers met at first, as must be expected in all new countries, with many difficulties, and great hardships had to be surmounted; the land near the coast, as is the case generally in New Holland, was found poor and sandy; but subsequently, on exploring the interior, fine pastoral and agricultural tracts have been discovered. A portion of the settlers have been located at King George's Sound (lat. 35.6.20. S., long. 118.1. E.) near the S. W. extremity of Australia.

After this introduction to explain the origin of the settlement, which is dated from the 1st June, 1829, and which through good report and evil report, has proceeded in the path of energy and industry, we may now examine the geographical features of the country.

II. Western Australia, lying between the parallels of 31. and 35., S. lat., and including all that part of New Holland situate to the westward of the 129° of longitude, is therefore 1,280 miles from N. to S., and 800 miles from E. to W. It comprises a fine extent of territory, of which the distinguishing features are three distinct parallel ranges of primitive mountains, bordering on the sea-coast, in a N. and S. direction. The highest and easternmost has its termination near *King George's Sound*, in 35 S. lat. and 118. E. long.—the second, denominated the *Darling Range*, passes behind the *Swan River*, and meets the sea at *Cape Chatham* in 34.40. S. lat., and 115.20. E. long.; the thin ridge, which is inferior in altitude and extent, has its southern boundary at *Cape Leuwin*, in 34.20. S. lat., and 115. E. long.; disappearing at *Cape Naturaliste*, in the same meridian in 33.30. S. lat.; and on shewing itself again at *Moresby's Flat-topped Range*, about half way between *Swan River* and *Shark's Bay*, or about 300 miles to the N. of *Cape Leuwin*.

These dividing ranges give off several rivers, which flow E. or W., according to the dip of the land at either side—the principal on the sea shore being the *Swan* and *Canning*, in 32. S. lat.; the *Murray*, in 32.30. S. lat.; the *Collie*, the *Preston*, and a smaller stream into *Port Leschenault*, in 33.12. S. lat.; the *Blackwood*, to the eastward of *Cape Leuwin*, and discharging into *Flinders' Bay*; the *Denmark*, *Kent*, *Hay*, and *Steeman*, on the S. coast, in 35. lat. and nearly 117. long.; and *King's River*, falling into *King George's Sound*, in 35.6.20. S. lat., 118.1. E. long. When the coast is further explored, other rivers will most probably be found.

On each of those rivers, locations have been formed by our hardy settlers; the town of *Freemantle* has been founded at the entrance of the *Swan River*; *Perth*, about nine miles inland, on its right or northern bank; and *Guildford*, about seven miles further E. at the junction of the stream; a town, called *Augusta*, was founded at *Blackwood's River*, near *Cape Leuwin*; and *King George's Sound*, which has been occupied by a detachment of troops and convicts from Sydney in 1826, has been given over by the New South Wales Government, and attached to the Swan River colony.

The following excerpts from the official report made by the Governor to the Colonial Office, 15th October 1837, together with the statistics derived from the Secretary of State, will give a fair view of the colony.

It appears from the colony, with tions, bays, straits, finest harbours, in some places a tunities thereby ships on shore, existence of an nected with some explored by King terminated.

The principal the colony are King George's Sound, a port, but its and it is not ac while there is no and beacons. The supply of w those districts whic be sufficient. In t has been found o finding water at fir

It appears from King's surveys, that the coast of the colony, within the tropic, is fronted by indentations, bays, straits, and islands, and abounds in the finest harbours imaginable. The rise and fall of tide in some places amounts to 35 feet, affording opportunities thereby for building docks, or for laying ships on shore, without considerable expense. The existence of an interior sea, or of great rivers, connected with some of the inlets which were not fully explored by King, remains a problem as yet undetermined.

The principal ports in the south-western parts of the colony are those in Cockburn Sound and in King George's Sound. The first of these is an excellent port, but its entrance is encumbered by rocks, and it is not accessible with safety to large vessels, while there is not an effective establishment of pilots and beacons. The open anchorage at the mouth of the Swan River is therefore in general use at present. King George's Sound possesses all the qualities which constitute a good harbour; its position being however to the eastward, and to leeward of Cape Leewin, in the vicinity of which strong westerly gales prevail, this circumstance detracts from the value of its other qualifications. Shark's Bay abounds in safe anchorages, and affords, as well as Doubtful Island Bay, secure access to the districts in their immediate vicinity. Harbours for boats and small coasting vessels exist near the entrance of Peel's Inlet, Port Lesheault, Augusta, Nornalup, Torbay, Collingwood Bay and Cape Riche.

One of the most remarkable peculiarities on the south-western coast of the settlement, is the frequent occurrence of estuaries or inlets of the sea, having narrow and shallow entrances. Between King George's Sound and Swan River, there are no less than 10 of these; they are usually from five to ten miles in length, and from two to three in breadth; they serve as the receptacles of the streams in their vicinity, and will afford hereafter water communication to the inhabitants. In the summer season, the water in them is salt, but becomes fresh after the return of the rains.

In the interior, no lakes of any extent have been as yet discovered, but salt marshes, and salt pools of small diameter, are not unfrequent.

The absence of considerable mountain ranges forbids the chance of finding any considerable rivers of a perennial character; and it is somewhat remarkable, that one of the largest rivers known, whose course is not less than 200 miles, disappears entirely as a stream, and ceases to run, long before the end of the dry season. In the country situated to the south of Swan River, there are, however, streams which continued to run throughout the year, as may be instanced in the cases of the Murray, Harvey, Brunswick, Preston, Capel and Donnelly; and on the south coast, where the country is more hilly, and the rains later, mill-streams exist in great numbers, and, fortunately, those districts contain an inexhaustible supply of the finest timber.

The chance of discovering a river of great magnitude on the north-west coast, appears to be strengthened by the non-occurrence of any considerable stream in those other parts which have been as yet explored.

The supply of water for domestic purposes, in all those districts which have been occupied, appears to be sufficient. In the district of York, inconvenience has been found on some farms, from the difficulty of finding water at first, but these inconveniences have

been usually overcome by the discovery of springs, on further inspection. The country at the distance of 100 miles from the western coast, does not appear to enjoy its share of the rain brought in by the westerly winds, and it is to be apprehended that a deficiency in the supply of water, during the dry season, will be found in that quarter when it comes to be settled.

IV. The whole of the occupied portion of the territory appears to rest upon a granitic base; rocks of that description having been found to exist in every district which has been as yet explored. In the neighbourhood of Doubtful Island Bay, the granite assumes the stratified form of gneiss, and as red sandstone is found on the north-west coast, and tertiary formations on the shore of the Australian Bight, it is probable that the general dip of the country is in a direction a little to the north of east. To the south of the 31st degree of latitude there are no mountain ranges of any great altitude; the highest as yet known being that of Koikyeunreuff, near King George's Sound, which attains to the height of 2,500 feet. On the primitive base of the country, none of the secondary formations have been found to exist; basaltic rocks are not however unfrequent in almost every district in the country; and in one position in Geographe Bay, there is a columnar formation resembling in its character that which exists on the north coast of Ireland. The principal range of hills extends in a northerly direction from the south coast, near Cape Chatham, for at least 300 miles. The only varieties of rock which have been found on this granite range, are occasional portions of roofing slate, and of indurated clay; but extending from the western base of these hills towards the sea, upon an average breadth of about 20 miles, there is a low and tolerably level plain of diluvial origin, which bears the marks of having been covered by the sea at some remote period. The portion of this plain nearest to the sea presents limestone hills, which have a slight covering of meagre sandy soil; the remainder varies from sand to clay, with exception of the lands in the immediate vicinity of rivers, which have been affected, and rendered rich, by the overflowing of the streams.

The mineral substances heretofore discovered, are lime, marl, selenite, slate, siliceous and calcareous petrifications, magnetic iron ore, peacock iron ore, chromate of lead, and crystals of quartz. The very small portion of the territory which has been inspected being almost entirely of a primitive description, a larger list of minerals could not be expected; but when time shall permit the further examination of the northern districts, of the red sand-stone formation, it is not unlikely that important mineralogical discoveries may be effected. The discovery of copper ore by Captain King in the vicinity of Camden Bay, corroborates this expectation.

The surface of the country generally is covered with those substances which are technically called earths, in contradistinction to soils. Of the latter, as far at least as relates to those of a vegetable origin, a very small portion exists, and that only on moist grounds. The extreme drought of the climate, and the summer conflagrations, appear to prevent the growth of succulent plants, as well as any great accumulation of soil from decayed vegetation. But although the country is not remarkable for richness of soil, it is favourable in other respects to farming purposes. In its natural state there is scarcely any part which does not produce some description of plant, and its defects appear to be of that class which

art, aided by climate, will be enabled hereafter to overcome.

V. The wet season commences with light showers in April, which continue to increase in number and force throughout May, June, and July, and from that period to decrease, until they cease altogether in the month of November, when the dry weather begins. These two seasons, with an intermediate spring following the conclusion of each, embrace the circle of the year. It is usual to call the wet season the winter, and the dry season the summer, but neither of them has the character of the corresponding season in Europe. The extreme drought and heat of an Australian summer renders it the least agreeable portion of the year, while the winter, with the exception of intervals of stormy weather, is only sufficiently cold to be pleasant.

The prevailing wind, in the seas adjacent to Cape Leewin, is from the westward throughout the year; on the coasts, however, land and sea breezes take place with great regularity in the summer. In the winter season gales of wind from the north-west and south-west are very frequent, and are usually accompanied by heavy falls of rain. At such periods the atmosphere is charged with moisture to a considerable degree, and the quantity of rain that has been ascertained to fall at King George's Sound, in the course of the six winter months, equals the quantity experienced in the western counties of England. The atmosphere in the summer season retains so little moisture that none but hardy and fibrous plants can withstand the drought. The air is so clear, and the reflection of solar heat so great, that the thermometer occasionally reaches, in the shade near the ground, 105°, but the effect at those times upon the European constitution is not injurious; this can only be accounted for, under so great a heat, by the peculiar dryness of the air, and the regular succession of cool nights after the warmest days. The experience of the last eight years has established in the minds of the colonists the full belief, that the climate of the settlement is, in a remarkable degree, conducive to health and to comfort: but it certainly is not equally suitable to the growth of those vegetable products which flourish to great advantage in moister climates. With reference to this point of difference between England and this new colony, it is perhaps fortunate for it that it does not resemble the former country, but may rather be considered in temperature as a supplement to the southern districts of the United Kingdom, and as affording every range of temperature between the Land's End and the equatorial regions for the production of commodities which cannot be raised in the colder atmosphere of the mother country.

The subjoined communications on Climate, Meteorology, rain, &c., have been drawn up by John Harris, Esq., Colonial Surgeon:—

In compliance with your desire, I give you such information as my experience in the colony has enabled me to collect, on the following subjects:

1st. On the climate, seasons, scale of thermometer, quantity of rain, &c. 2d. Diseases, endemic or imported, influence of the climate on the health of men and animals, and a general state of health of the inhabitants. 3d. Diseases incidental to cattle.

On the climate, I beg to remark, that the concurrent testimony of every individual who has spent a round of the seasons in this country, has given to it a celebrity, which increases as we become better acquainted with the steady and uniform changes

which those seasons bring. The hottest months are January, February and March; but, although the thermometer has stood in the shade at 90, and in one instance, in March of the present year, at 105, the mornings, evenings and nights are generally cool and pleasant, and the mid-day heats are tempered by a refreshing sea breeze from the south-west, which sets in with considerable regularity about noon. Through the whole summer, a land breeze from the east prevails in the morning; the sky is beautifully clear, and the air pure. Slight fogs occasionally hang along the course of the river, early in the morning; a refreshing dew falls during the night; but as there are no considerable marshes, the country is free from malaria or noxious vapours. The winter months are June, July and August; the two latter the most rainy. There are sometimes smart frosts, and now and then a little ice, all traces of which disappear on the rising of the sun. Snow is unknown. Hailstones of very large size, occasionally fall. A fire is agreeable during these winter months, mornings and evenings. The rains seldom continue more than three or four days, falling chiefly in heavy showers, with squalls, and sometimes storms of thunder and lightning, and now and then severe gales from the north-west. The intervals of fine weather are from five to ten days. During the other quarters of the year, nothing can be more delightful than the climate generally, and its invigorating influence on the human constitution, especially of the Europeans, renders it more fit for invalids than any other in the world. During the winter months, the greater part of which are remarkably temperate and fine, the changes of temperature are often sudden; but by ordinary care and avoiding unnecessary exposure, no ill consequences ensue to the invalid. Several persons arrived in the colony, suffering from pulmonary and bronchial affections, asthma, phthisis, hæmoptysis, or spitting of blood, hopeless of recovery in Europe, are now perfectly recovered, or living in comparative health.

The principal diseases met with in this colony, are rheumatism, dysentery, scurvy, and catarrh, during the winter months; and during the summer, and beginning of autumn, a kind of subacute purulent ophthalmia, which is endemic, and is the only disease that can strictly be so considered. Hooping cough was imported in 1833, but has disappeared since 1834. Gonorrhœa has been also introduced. Small-pox and measles are unknown. Vaccination has not hitherto succeeded. Cases of fever are seldom met with; and the diseases enumerated as most common, are never of obstinate character, if attended to promptly. Very few cases of ophthalmia have occurred during the past season, owing to the care taken when the first symptoms appeared. Scurvy has nearly disappeared; indeed, nine cases out of ten, reported of this, and most of the diseases named, occurred during the early days of the settlement, when the people, especially the labouring classes, were badly sheltered, and badly fed, without vegetables, suffering from fatigue, exposure in wet weather, or to a hot sun, alternately, privations of every kind, and consequent despondency. Intemperance was also a primary cause, in a great many cases, especially of dysentery. The higher classes, being better provided with food and shelter, were generally healthy. Many of the causes no longer operate. Few of the labouring classes are now without comfortable dwellings; food is plentiful, and vegetables of every kind are raised in great abundance, with a fine climate, therefore obnoxious to no parti-

cular diathesis: the from 60 to 64, the are as healthy a My range of pract 1,000 persons, and this moment I ha list.

Fogs are extremel lagoons and rivers, m

cular diathesis: the average mean temperature being from 60 to 64, the inhabitants of Western Australia are as healthy a community as any in the world. My range of practice includes a population of about 1,000 persons, and it may be well to observe, that at this moment I have not a single sick person on my list.

The experience of seven years has brought us to rely on a steady and uniform return of the seasons; the agriculturist is enabled to carry on his operations in the field, both in seed time and harvest, with less interruption from inconstancy of weather, than in any other part of the world yet known. No excess of rains, or long continued droughts, occur to mar the fair prospects which cheer his labour; he may safely calculate on the result. The stock owner sees, in the condition of his sheep, goats, cattle, and horses, in those districts suited for grazing, a reasonable expectation of profitable return. All descriptions of animals and domestic fowls thrive well. Sheep and cattle, however, have been attacked by a disease, the symptoms of which, in both, are very similar; and although considerable attention has been given to this disorder, the remote cause has not yet been

clearly ascertained; no particular diathesis is observable. It has chiefly appeared in flocks recently imported and in feeble condition, and in cattle engaged in long journeys in the bush, where the food is scrubby and coarse. Flocks kept on low damp ground near the coast, or in high scrubby ground, destitute of healthy grass, or in driving them across the Darling range of hills into the interior, through scrubby country, have, too, been principally affected, owing probably to a deficiency of a requisite bitter stimulative quality in this kind of food, of difficult digestion in stomachs so peculiarly formed as those of ruminating animals. Horses are fed on the same ground, without the least injury. The disorder seems the most frequent at the commencement of the wet season, the immediate cause being the condition of the stomachs, overloaded with hard indigestible food, in a state of fermentation, from food eaten after rain, and consequent pressure on the heart and lungs. The mode of treatment is urgently indicated, namely,—bleeding and stimulants, spirits of turpentine, and afterwards a little salt; but, as death ensues a few minutes after the attack, which affects many at the same time, the utmost activity is required.

September	78	42	30.36	29.95	E. S. S. W.	Cool, squally, sultry, gales; very variable; a few showers.
October . .	80	44	30.28	29.62	S. W.	Clear, fine, showery; on the 10th and 11th, rain, lightning, and thunder.
November	82	46	30.31	29.85	S. W.	Variable; four days' rain; sultry and oppressive towards the end.
December	95	70	30.32	29.69	S. W.	Generally cool; three days' rain, one day lightning and thunder.

Fogs are extremely rare; a haze overhanging the lagoons and rivers, not unfrequent in the summer

season, and speedily dispelled by the sun's rays at an early hour; malaria or noxious exhalations unknown.

The land and sea breezes veering round throughout the year with extreme regularity, and the rainy season remarkably certain. A slight affection of the eyelids is the only disease peculiar to the climate, generally appearing in the month of March. The cure is simple and effectual, except with the ignorant and obstinate.

VI. In this part of New Holland the food of the natives embraces a great variety of articles. In the estuaries and rivers, and on the coast, there is abundance of fish at certain periods of the year, and kangaroo of various sorts, together with opossums, dalgers, and other small animals, are obtained in considerable numbers; roots and gums of several kinds are also used by them, and birds' eggs, lizards, frogs, grubs, and cray-fish from the swamps, are resorted to as varieties, or used in cases of urgent want. They do not appear to be reduced at any time to very great difficulties in procuring subsistence, but their habits preclude the possibility of keeping any accumulated stock of the necessary articles, and therefore their time and attention are almost constantly occupied in the pursuit of their daily food. As they have no fixed habitation, and do not practice any art tending to increase the supply which nature has provided, it is probable that their numbers are strictly limited by this circumstance, and that they have been long stationary at their present amount.

The law which thus forbids any further increase, is the cause, moreover, of their dispersion throughout the territory, and prevents them from entering into any larger confederacies than those which are necessary for rendering most successful their hunting and fishing occupations. The tribes, as they are called, usually comprise about 120 persons, of all ages and both sexes; these are connected for the most part by relationship of blood, although it is by no means uncommon to procure wives or to adopt strangers from neighbouring tribes. The only species of control or government under which they live is founded on the influence of the strong over the weak, and the deference which is shown to the aged, and to the pretended powers of the magician or doctor. Certain usages established by custom are frequently appealed to as rules of conduct. Of these, the principal relate to the right of individuals to certain portions of hunting ground, derived by inheritance from their immediate ancestors; to the practice of boring the cartilage of the nose of the young men on their admission to the rights of manhood; and to retaliation for injuries received, which all are enjoined as well as entitled to seek, whether the offender belong to the same or to a neighbouring community. It has been found very difficult to ascertain the exact locality or tribe to which individuals belong, in consequence of alliances which are very frequent amongst individuals of different tribes; this species of brotherhood by adoption, carries with it the obligation of becoming parties to each other's quarrels, and although it appears to be followed by the advantage of mutual protection, as far as such individuals are concerned, it gives rise at the same time to many hostilities. The intercourse between tribes is seldom of a friendly character; but it is remarkable that their conflicts seldom extend to the loss of lives. Almost continually engaged as they are in feuds arising out of the invasion of each other's territory, or the abduction of each other's women, it might be expected, that when they met to fight, the weaker party would be exterminated, whereas these contests, after a great deal of clamour, and a few unimportant wounds, generally

end in the murder of a child or of a female, by mutual consent admitted as an atonement for the offence or ground of quarrel. Independent of these occasional warlike meetings of tribes, almost every native is under an engagement to avenge at a convenient opportunity, the death of some departed friend, or an insult previously offered to himself; this purpose, which he cannot forego without discredit, gives rise to acts of the greatest treachery, and not unfrequently ends in the surprise and sudden death of some individual belonging to the same tribe with the avenger, or of some of his neighbours. They rarely, therefore, sleep a second night in the same place; the spear seldom quits the hand of the man from boyhood till death; and they become accustomed to witness, endure, and practise the greatest outrages.

The personal qualities of some members of this peculiar race are superior to the condition in which they live; a few of them are remarkable for symmetry of form and countenance, and the natural intelligence of many appears to be in the highest degree acute. The greater part, however, are, from hardship of life, and bodily injuries, disgusting specimens of the human race; and the deformity of old age, whether in the men or women, is usually accompanied by a concentration of all the vicious propensities to which their usages give rise.

In their intercourse with the whites, they accommodate themselves with astonishing readiness to the language, the habits, and even the weaknesses of their new friends. They are remarkably cheerful, and make themselves very useful in many employments; but they are not to be relied upon, for in a great many instances it has been found, that after living for months in the house of a settler, they have been all along employed by the rest of the tribe as spies, for the purpose of conveying intelligence as to the best point of attack on life or property. Living in a constant state of warfare, they are bold, crafty, and persevering, and lay their plans with judgment, equal to the vigour with which they put them into execution. With such qualities as these, they would be too powerful as a nation for the present number of colonists, if it were not for their mistrust of each other. They cannot combine their efforts, nor act on a concerted plan; for if they were to do so, there are many of them who would readily betray the rest, and voluntarily lead the whites to their retreat for the sake of a few pounds of flour.

It is impossible to give any accurate account of their numbers; 750 have been known to visit Perth from the districts surrounding it to the extent of 40 miles each way. The nearest estimate of the population appears to be that which assigns one native to each portion of ground of two square miles.

From the following return, as compared with a similar document drawn up in 1832, it appears that the population has increased since the latter period from 1,510 to 2,032. The increase has been principally owing to the excess of births over deaths; the number of persons who have settled in the colony, since that period, having exceeded only by a few those who have quitted it.

On examining the return, it will be perceived, that the male adult population is limited to 788, a number by far too few to accomplish, in a short time, the establishment of a new colony; and scarcely sufficient, with the aid of the small military force employed, to protect themselves, and their property, from the depredations of the natives. It is satisfactory, however, to observe so large a proportion of females, and of

births, and that months did not the whole population deaths, 9; and m

Total	552	272	109	87	140

Note.—During the two first months of the present year, 1836, several persons and families have removed from the Towns of Perth and Fremantle to York and the "Murray" districts, with agricultural views.

The proportion of the sexes is, adults, male and female, 1 to 0.97; Between 14 and 21, 1 to 0.820; Under 14 years, 4 to 0.902; Total, 5 to 3, or 1 to 0.605.

This list is exclusive of the military stationed in the above districts, consisting of—

Officers and privates, 86; Women, 18; Children, 29; Total, 133.

There were born, during the year 1835, in the above district, 64; Marriages, 4; Burials, 6; Population of King George's Sound, exclusive of military, 1st Jan. 1836, 160; Ditto of Augusta (no returns) estimated at, 40; Total, 200.

VII. [B. B. 1837.] The parochial divisions of the Colony cannot be ascertained.

There are no churches, but divine service is performed every Sunday in the Court House Perth, and will contain about 200 persons; the general attendance is about 150. The Colonial Chaplain who preaches here has a salary of £250 per annum and an allowance of £50 per annum in lieu of a parsonage house; of dissenting places of worship there is one at Perth belonging to the Wesleyan methodists, lately enlarged and will contain about 100 persons, and one at Guildford, under the patronage of the Western Australian Missionary Society capable of containing about 100 persons.

In the year 1835 an association was formed in London for promoting religion according to the rites of the Church of England, under the designation of the "Western Australian Missionary Society." An Italian gentleman of the name of Giustiniani was selected as their first minister; he arrived here in July last year, and has erected a chapel and schoolhouse at Guildford, and has commenced the formation of a farm on the Swan River, at which it is understood to be the intention of the society to collect natives, with a view to their instruction and future civilization.

VIII. [B. B. 1837.] There are two public schools, one at Perth containing 20 male, and 12 female scholars; and one at Freemantle containing 22 male and 11 female scholars. The master of each school is allowed 50*l.* per annum by government.

At "Albany Plantagenet" there is also one private school.

There are published in the colony at present, two weekly newspapers, independent of the Government Gazette. The oldest of these has existed under the name of the "Perth Gazette" for six or seven years; the other, under the title of the "Swan River Guardian," commenced its publication in last year, as the friend of the people and the corrector of abuses.

If we return from the colony down to a later period, its progress in population, civilization, &c. would be more fully shewn: the Secretary of State for the Colonies, has expressed himself perfectly satisfied with the improvement that has of late taken place, and looks forward confidently to the ultimate flourishing state of the settlement, which has now surmounted its primary difficulties.

IX. Few subjects deserve more serious consideration, than the moral condition of a population. The following Synopsis of the State of Crime, and System of Criminal Jurisprudence, has been prepared by W. H. Mackie, Esq., Chairman of the Quarter Session, and may, probably, indicate the state of morals in this community, in a more satisfactory manner than any commentary on the subject.

Number of persons, charged with crime, convicted, acquitted, and discharged for want of prosecution, and against whom no bills were found, from the first Quarter Sessions of the Peace, held in the Colony, (July, 1830, inclusive,) to the termination of the January Sessions, 1836, inclusive:—

It cannot be denied that the foregoing exhibit a large proportion of crime; and from the quantity of spirits consumed, such a result might necessarily be expected. It is to be hoped that as industry extends, the proportion of criminals to the rest of the population will be considerably diminished.

It is deserving of record in this place, that since the foundation of the settlement in 1829, to the present date, the law has not found occasion to impose sentence of death upon any individual.

* This includes commitments for a few hours.

X. The local administration is provided for by the Royal Commission, and instructions, and by Act of Parliament, and an Order in Council dated 1st November, 1830.

The legislative power conferred on the Governor and the members of the Legislative Council has been hitherto exercised only in the adoption of certain recent Acts of Parliament of a general tendency, and in the passing of a few ordinances connected with matters of local interest.

The state of the law in this colony is therefore as yet in strict accordance with the letter and spirit of the law of England, as far as it is applicable to the circumstances of this country. In the absence of every institution foreign to the practice of the mother country, as well as the non-existence of foreign customs, language, and blood, in this settlement, it possesses an attraction for free emigrants in a great degree peculiar to itself.

XI. Comparative yearly statement of the revenue of Swan River. [B. B.] Separate tax or duty, regular revenue, 1835, 3,308*l.*, casual revenue, 946*l.*, total, 4,254*l.*; 1836, regular revenue, 3,062*l.*, casual revenue, 799*l.*, total, 3,861*l.*; 1837, regular revenue 3,131*l.*, casual revenue, 1,271*l.* total, 4,586*l.*

Comparative yearly statement of the expenditure of Swan River. Separate head of expenditure, 1835, salaries of public officers, 1,063*l.*, contingencies, 3,779*l.*, total, 4,841*l.*; 1836, salaries of public officers, 842*l.*, contingencies, 3,614*l.*, total, 4,456*l.*; 1837, salaries of public officers, 869*l.*, contingencies, 3,043*l.*, total, 3,912*l.*

Estimate of the charge of defraying the expenses of the settlement of Western Australia, from the 1st April 1838 to the 31st March 1839. Salaries to the governor, 800*l.*; ditto colonial secretary and clerk of the councils, 400*l.*; do. first clerk of do. 150*l.*; second clerk to do. 75*l.*; do. messengers to councils and secretary, 50*l.*; do. surveyor-general, 400*l.*; do. drafts-men and office-keeper, 150*l.*; do. clerk to surveyor-general, 50*l.*; do. colonial chaplain, 250*l.*; do. colonial surgeon, 273*l.*; do. commissioner of civil court, and chairman of quarter sessions acting as civil and criminal judge, 300*l.*; do. advocate-general, 300*l.*; do. clerk of the peace and registrar of civil court (in lieu of fees in Crown cases), 100*l.*; do. sheriff (in lieu of fees in Crown cases), 100*l.*; do. six residents, or resident magistrates, at 100*l.* each, 600*l.*; allowance to officer commanding the troops, 182*l.*; total salaries, 4,181*l.*

Contingencies, &c. House-rent for colonial chaplain, 50*l.*; stationary for public departments, 150*l.*; maintenance of government vessel, 708*l.*; hire of surveyor-general's office, 70*l.*; sum required towards the erection of public offices, 989*l.*; total contingencies, 1,967*l.*; total charges, 6,149*l.*

Remarks.—In the estimate for the proceeding year the grant towards the erection of public buildings was omitted, it being proposed that such charge should in future be defrayed from the revenues of the colony.

Shortly after the estimate had been submitted to Parliament, a report was received from governor Sir James Stirling, stating that on principles of economy as well as public convenience, he had been induced to contract for the construction of buildings for the offices of the colonial secretary, the registrar of deeds, &c., the collector of revenue, the survey department, the colonial treasurer, and the commissariat. To complete these buildings, the sum of 989*l.* 15*s.* 6*d.* has been included in the present estimate, under the head of contingencies. An increase of 25*l.* is made in each of the salaries of the first and second clerks in the office of the colonial secretary, it having been found impracticable to procure or retain the services of competent persons at a lower rate. The sum of 200*l.*, which appeared under the same head in the last estimate for arrears of salary to two additional government agents, has been omitted. There is an increase on the last year's estimate of 840*l.* 15*s.* 6*d.*; but it is less by 1,229*l.* 14*s.* 6*d.* than the estimate for the year 1836-7.

Commissariat.—Pay of the troops, provisions, &c. Amount paid for supplies, 2,761*l.*; ditto on account of allowances for fuel and light, 131*l.*; do. for miscellaneous purchases, 8*l.*; do. for land and water transport, 435*l.*; do. for extra staff of commissariat department, 196*l.*; do. for military allowances, 506*l.*; do. for special services, 1,041*l.*; do. for contingencies, 787*l.*; do. for military pay, 2,869*l.*; pay of commissariat officers, 552*l.*; Greenwich pensions, 92*l.*; consignment of specie and bills, 1,498*l.*; special disbursements, 166*l.*; total, 11,021*l.*

The funds for the support of the above-mentioned services were drawn from the following sources:—

From the commissariat chest, 11,021*l.*; do. colonial, 3,912*l.*; do. parliamentary grant, 6,840*l.*

The annual cost, up to March 1837, of the civil, judicial, ecclesiastical, and military departments, was in the following proportions:—

Recapitulation of the Establishment, Civil Establishment, 3,525*l.*; contingent expenditure, 1,449*l.*; judicial establishment, 1,005*l.*; contingent expenditure, 441*l.*; ecclesiastical establishment, 250*l.*; contingent expenditure, 100*l.*; miscellaneous expenditure, 3,981*l.*; pensions, 0; grand total, 10,752*l.*

With regard to the public establishments, it is necessary to observe, that the population is scattered over a very wide extent of country. The causes of this dispersion were, in the first place, the annexation of the settlement at King George's Sound, and, in the second place, the mode in which lands were granted to the colonists. Having the power to select large

grants in districts suitable to their views, the settlers naturally availed themselves of their freedom of choice; and lands being subject to forfeiture if not improved within a certain number of years, they have been impelled by the fear of losing them to locate themselves upon their grounds, however remote their position. This dispersion has been further increased by the nature of the country, in respect of its general inferiority of soil, or the absence of water in certain localities.

As all had equal reason to expect protection, and the assistance of the government, it became necessary to form stations at many different points, by which the expenditure has been much increased; and establishments, which would have been sufficient for the wants of a much larger population if confined within reasonable limits, have not sufficed for the wants of this colony, embracing as it does so many separate and distant stations.

In this department, a considerable increase of military force is requisite for the protection of the colonists. Whatever may have been the views of the Government on the earlier formation of this settlement, the settlers consider themselves by its declarations entitled to be protected, and secured in the quiet enjoyment of the lands assigned to them, or bought by their outlay. Without this they cannot fulfil the location duties, nor can they make any progress in the extension of the settlement. This protection of the white population is moreover necessary to the security of the aboriginal race; if not given, a constant state of warfare and violence between the two must follow, and while the former is hindered in his progress towards the establishment of the country, the latter will be rendered vindictive and cruel in proportion to the injury which he receives from, and inflicts upon, the settler.

1829, 1 wrecked; 1830, 4 ditto.

* During the year 1835, there arrived at King George's Sound, 24 vessels, several of which had previously touched at Swan River; the total amount of tonnage of these vessels, was 4,048 tons.

Exports, 1834, 37 bales of wool; 1835, 50 ditto.

Occupations of the Colonists.—The following shews the number of men employed in the several occupations therein stated: In the civil, clerical, and judicial departments, 37; military, 123; total, 160. Employments of a public description unconnected with government, 34; agriculture and grazing, 449; arts and handicrafts, 92; fisheries, boating, &c., 65; trade, 47; miscellaneous, 67.

Agricultural and pastoral pursuits are the leading occupations in this country. The following table contains an accurate return of the cultivation and stock, at the close of last year. The rate of increase which was found to exist between December 1835 and December 1836, has been taken as the guide in estimating the increase up to the date of this report, as shown in the last column.

A statement of the stock, crops, &c., in the York, Canning, Murray, and Swan River Districts, taken 12th November, 1836:—Wheat (number of acres), 1,363; barley, 209½; oats, 128½; rye, 7½; potatoes, 32; green crop, 35; gardens, 112; artificial and oat hay (tons), 185; fallow (number of acres not esti-

Statement of the stock and crops at King George's Sound, the Vasse, and Port Augusta, taken December, 1836: Wheat, barley, and oats (acres), 18½; gardens and potatoe crop, 32½; sheep (head), 409; goats, 55; horned cattle, 101; horses, 25; swine, 55.

The further extension of tillage is impeded by the want of labourers; and the very high wages demanded, compel those who principally depend on hired workmen, in rural occupations, to seek the means of employing their capital in pursuits less dependent on the whims and caprices of the labouring class. In consequence of this, the raising of wheat will be confined to those families the members of which are sufficient for the work of the farm on which they live; and the higher class of settlers will endeavour to invest their means in the rearing of live stock. The adaptation of this country to the purposes of wheat growing may be, however, considered as proved beyond all doubt; but this article cannot be profitably cultivated for exportation until there is a greater command of labour. The culture of the vine, fig, peach, and melon tribe, has been carried thus early to a considerable extent; and if ever it should be desirable for the mother country to possess a wine-growing colony, the soils and seasons of this country afford reasonable ground for anticipating a successful issue to such a speculation. The return of profit on sheep-keeping may be estimated in the gross at 75 per cent. per annum. The rate is undoubtedly higher here, where the price of meat is high, and the value of land low, than it can be in New South Wales and Van Diemen's Land. After deducting the expenses of shepherding, and allowing a reasonable rent for the land on which the flock is maintained, a net profit remains to the owner of about 50 per cent. per annum. Such a profit as this, combined with the means of extending indefinitely the number of sheep farms, must attract to this branch of investment, in the course of a few years, a large amount of capital. At present the absence of funds within the colony applicable to such purposes, and the prejudices which unjustly exist in respect of its capabilities, together with the mishaps attendant on the importation of sheep from other places, impose obstacles on its extension, apart from natural increase.

Horses and cattle may be expected to multiply rapidly from this time forward. In addition to the number of the latter, stated in the preceding return, there are known to exist four or five wild herds in different parts of the colony, which have maintained themselves without protection against the natives for several years, and are rapidly increasing their number.

Looking to the small number of colonists, and to the few years they have been established in this country, the extent of land in cultivation, and the quantity of useful animals in their possession, are highly satisfactory. The settlement is now enabled to feel, that in less than eight years from its foundation, it has arrived at the point of producing its own subsistence, and is entirely independent of other places for the support of its inhabitants.

The arts connected with building and agricultural implement making, employ a considerable portion of the workmen of the settlement; and it is, in consequence, better provided with the products of the first named of those arts, than is usual in countries so recently occupied. Many convenient and substantial houses have been erected in the towns, and by the

employment thereby given to artificers, a large number have been induced to remain, who would otherwise have quitted the settlement; carpenters, masons, plasterers, blacksmiths, painters, and other artisans, have hitherto received high wages; but some of them are beginning to turn their thoughts to rural occupations, in consequence of an anticipated diminution of employment in their proper pursuits. Being usually superior in education, and in steadiness of conduct, to labourers in general, the class to which they belong is one of the most valuable in colonies, and therefore it is not to be regretted that a very large sum has been invested in buildings, by the outlay of which they have been induced to settle in this country.

Since the earliest discovery of this coast, it has been known to abound in various descriptions of fish. The Malays have carried on, for at least 200 years, an extensive and profitable tripang and tortoiseshell fishery, on the north-west coast. Dampier, Baudin, and King, at different periods, have reported the existence of astonishing numbers of whales in the adjacent seas; and our own experience since the establishment of the colony, and still more recently since whale fishing commenced in its bays, about 12 months ago, confirms the reports of the earlier navigators. This abundance of fish is probably connected with the existence of a bank, which adjoins the shore from the northern to the southern extremity of the colony. On this shoal, which extends for 30 to 40 miles from the land, and which is composed, for the most part, of calcareous or coralline substances, there exist several varieties of edible fish, which admit of being cured for exportation.

The various descriptions of fishery which may be carried on under such circumstances must eventually employ a large amount of capital, and a great number of seamen; markets for their produce are open in China, as well as in Europe.

At present there are only four whaling establishments or associations; these are not as yet upon an efficient footing, but their success has been great enough to ensure their future improvement and extension. The catching of fish for the purposes of food gives profitable employment to a few boatmen; and the convenience afforded in the estuaries for learning in smooth water the art of managing boats, seems likely to attract to maritime pursuits a large number of young men.

Boat building is carried on with much success by two establishments, and some of the native woods are found to be well suited to those purposes.

The operations of the miller, baker, and brewer, tanner, shoemaker, and clothier, are in course of improvement and extension; and the community, although limited to a very small number of persons, suffers no serious inconvenience from the absence of any of the arts and trades which administer to the primary wants of man.

The number of persons exclusively engaged in the civil, judicial, clerical and military branches of the public service, amounts to 160.

In other public offices, independent of the government, such as printers, innkeepers, &c. there are employed about 34: as this description of persons, however necessary their labours may be to the general welfare, do not contribute directly to the produce of commodities, their number, together with that of their families, must be deducted from the gross population, in comparing the productive classes with the products of labour.

complain of the want of business in general. The traffic in tea, sugar, spirits, clothing, harness, earthenware, glass, and ammunition, has been carried on at very high prices, and with great profit. Traders being a class of persons whose capital is always available for any speculation which may offer, and colonial farmers being always in need of advances, the mercantile men in this community, possessed of means, have frequent opportunities of laying them out to advantage, either by monopolizing particular commodities, or by giving credits at high interest; they have therefore had their full share of the general prosperity, even in the absence of any considerable demand for merchandize. They are at this time looking forward to an increase in the exports of the colony, as the probable cause of an extension of business; in the meantime, money, in proportion to the reasonable demand for it, is abundant. A joint-stock bank has been recently established, and facilitates the transaction of business. The principles on which it is founded are such as to render it an institution of a most beneficial character, while the names of the subscribers, as well as the cautious system of management adopted, ensure to the public the most judicious and equitable employment of its means. Its discount on bills are done at the rate of 12½ per cent. per annum, and it allows depositors, under the usual regulations of savings' banks, an interest at the rate of five per cent.

XIII. Amount of coins in circulation, about 15,000*l*. Amount of paper currency in circulation, about 400,000*l*., consisting of 1*l*. notes issued by the Commissariat on account of Government, and not yet brought in to be exchanged for British silver money. —[B. B.]

Coins.—British gold and silver, dollars at 4*s*. 4*d*. each, and rupees at 2*s*. each —[B. B.]

Exchange.—The bills of the Commissariat upon the treasury have been hitherto negotiated at the rate of 1½ per cent. premium, but the demand for them is gradually decreasing, and will cease entirely when the value of colonial exports is equal to the value of goods imported, unless an increase of population from without extend the demand for imported commodities. Private bills on England are usually subjected to a discount of five per cent., and this appears to be a reasonable charge where there are no considerable remittances to be effected.

The establishment of a bank had been long an object of desire in the colony. The want of such an institution occasioned the greatest inconveniences on the transfer of property, as well as in the safe custody of balances in hand. The funds applicable to such purposes could not, however, be obtained in the colony until this year. On the 1st of June, however, a joint-stock bank commenced business, and is now in effective operation, with the fairest prospect of success. Being supported by 80 individuals of respectability, its credit is undoubted; and as it proposes to limit its discounts to actual transactions in the course of business, and to issue notes to a very small amount, it will yield a safe and sufficient profit to the proprietors, and promote materially the general interests of the settlement.

Its ostensible capital is 10,000*l*., but its credit is so good that it has not been found necessary to call for

much to create habits of frugality and temperance amongst the labouring people.

Weights and Measures are British Imperial.

Manufactories, Mines and Fisheries.—Brewery at Perth. Two boat builders; 1 at Perth and 1 at Fremantle. Three lime burners; 2 at Perth and 1 at Fremantle. Three brick makers at Perth. Three Flourmills by water; 2 at Perth and 1 at Upper Swan River. Two windmills at Perth; and 4 horse-mills at Perth, used for various purposes. Two boats employed at seal fishing; 10 ditto recently established for whaling.

There are at present four establishments of this description; the first at Fremantle, consisting of 30 subscribers, at the rate of 50*l*. each; the second, called the "Perth Fishing Company," is divided into 60 shares at 15*l*. each. The fishing ground of these two companies is near the entrance of the Swan River. The two other establishments occupy stations in Doubtful Island Bay, on the south coast; one of these is the property of a gentleman named Cheyne, the other belongs to a Mr. Sherratt; the latter was established last year, and found abundance of employment. It is supposed that the aggregate produce of the fisheries in the present season will amount to 4,200*l*. in oil, whalebone, and seal skins.

The following statements will afford information as to the actual population, and to the value of buildings and improvements effected in the Towns.

Estimated valuation of improvements in Perth:—Number of allotments granted, 422; ditto suburban ditto, 15; ditto miles of fencing, about 35, value about 5,600*l*.; ditto houses about 350, value about 30,000*l*.; Value of suburban improvements, about 4,000*l*.; ditto gardens ditto, 2,000*l*.; mills, 3,000*l*.; ditto public works, 15,000*l*. Total value, say about 50,000*l*.

In Fremantle:—Number of allotments granted, 430; ditto miles of fencing, about 20, value about 3,200*l*.; ditto houses, about 300, value about 25,000*l*.; gardens, 500*l*.; private works of public utility, 500*l*.; works undertaken by companies, 800*l*.; public works, 2,300*l*. Total value, say about, 28,000*l*.

Perth, 50,000*l*.; Fremantle, 28,000*l*.; Guildford, 5,000*l*.; Albany, 5,000*l*.; Augusta, 2,000*l*.; Kilmacott, York, Peel Town, 1,750*l*.; Busselton, 800*l*.; King's Town, 500*l*. Total value of improvements in all the towns, say about, 93,050*l*.

Agricultural Society.—This institution had its beginning in the first year of the settlement; it comprises almost all the owners of land; its members are admitted by ballot; the regular meetings take place on a fixed day in each quarter of the year, and are usually well attended. The society has promoted good conduct amongst farm servants by giving distinctions and prizes to the best conducted and most efficient labourers, and in other respects it has tended, in a very considerable degree, to promote the customary objects of such institutions.

Condition of the Colonists.—In regard to the condition of the colonists, the most important consideration is the aggregate wealth of the community. The following Table exhibits an accurate statement in column A. of the amount of the several descriptions of property within the colony at the present time, and in column B, the proportionate or average

The aggregate value of property appertaining to the colonists in land granted at 1s. per acre, and on rural improvements, buildings in towns, implements, clothes and furniture, value of crop and live stock, and in boats, vessels and fishing gear, may be estimated in the gross at 360,000*l.*, producing, with the labour of the community, after deducting its subsistence, a clear annual accumulation of capital to the extent of 72,000*l.*

On an inspection of the preceding table, it will be seen that each colonist, on an average, possesses a considerable amount of property in land, buildings, and cultivation; that he realizes in grain, and the products of live stock, a large return for his labour; that, after providing for his own subsistence, he exports in wool and oil to the amount of 8*l.* 19*s.* 2½*d.*, and contributes to the local revenue the sum of 6*l.* 2*s.* 3*d.* per annum; that the comparative mortality is very small, while the births and marriages are unusually numerous. In recapitulating these facts, it is not out of place to advert to certain rumours

asked, with reference to the table above, in what other colony are the colonists, on an average, in a more prosperous condition than in this, or in possession of larger means for future welfare?

After these remarks, it is unnecessary to go into any detailed account of the condition of the settlers at large, as to food, lodging, clothing and general comfort; even those who have the smallest share in the aggregate wealth, or indeed no share at all, may attain to comparative affluence by their own labour, at the present rate of wages, &c., and it is undoubtedly in the power of the poorest individual, who is free from bodily infirmity, and from vicious propensities, to procure for himself in this country, by industry, not only the necessaries of life, but future independence of labour.

The annexed interesting information was collected in the colony in 1836, every thing now wears a still brighter aspect.

The following vegetables thrive in this colony most abundantly; turnips, cabbages, cauliflowers, radishes, lettuce, carrots, onions, potatoes, peas, kidney beans, beet, &c. These vegetables are highly productive, equal in size, and generally superior in flavour, to those grown in England. Long-pod and Windsor beans, are not productive. The various kinds of pot-herbs, such as thyme, parsley, &c. thrive extremely well. The various kinds of melons, such as the rock, cantelupe, romana, and water, bear fruit abundantly, and are of the finest quality, as to size and flavour. Cucumbers grow remarkably fine and good; and pumpkins and gourds are of large size, and very productive.

As regards fruit trees, they are not at present very numerous; those that were introduced at the first of the settlement, were, for the most part, lost to the colony through want of care, and ignorance of the nature of the country, and want of confidence on the part of individuals possessing them, as to the capabilities of the colony for producing the requisites for the support and comfort of man. These prejudices, experience has happily removed; no one here, now doubts the capabilities of the colony: he is well aware that it can produce whatever is requisite for the welfare of the human race. The fruits most plentiful, at present, are peaches, figs, and grapes; it is not possible for any fruits to be doing better than these are, as regards their productiveness, quality of fruit, and healthy growth. The almond, hitherto, has not done well; the walnut tree thrives well. Within the last year or two, a considerable number of apple, pear, plum, orange, lemon, guava and other trees, have been introduced; these are in a healthy and thriving state. The banana is also introduced, and, where sheltered from boisterous winds, promises to do well, particularly those planted under the protection of Mount Eliza, and the high shelving land of Perth, several of which are now bearing fruit. The hop plant is also doing well in several places.

The price of vegetables, at the time of their first production, after the settlement of the colony, was very high. The first cabbages were sold at 2*s.* 6*d.* each; they are now worth one penny or one penny halfpenny each, of large size, full hearted, and of excellent quality. Potatoes were first sold at 1*s.* 8*d.* per lb.; the price is now one penny halfpenny. Peas were sold 2*s.* per quart (unshelled); they were sold, during the present season, at 1*s.* 6*d.* per peck.

Onions, three years ago, were worth 1s. 6d. per lb.; they are now, one penny. The first water melons sold as high as 10s. 6d. each; they may now be purchased for 2d. or 3d. each. Rock melons were 5s. each; their present price is 6d. Cucumbers, that at one time produced 9d., are now sold at one penny each. Two years ago, the grapes were sold at 2s. 6d. each lb.; their present price is 9d. Peaches, two years ago, (the first offered for sale,) were one shilling each; they are now sold for twopence each. Figs were four for a shilling; they are now sixpence per dozen.

Perth is now, at all times, abundantly supplied with vegetables, and it will not be any great length of time, before it is equally well supplied with fruit, as a great number of fruit trees have recently been introduced, and they are so easily propagated by cuttings in the colony. Cuttings, in many instances, bear fruit the second year after planting; and abundantly, the third year of their growth. The large vine, in the government garden, was introduced into the colony, by Mr. Macfaull; it has been planted in its present situation, about four years. Two years ago, it made shoots, upwards of 30 feet in length, in different directions, so as to cover an area of more than 60 feet in one year; it has borne as much as 100 weight of grapes in a season; but not having hitherto been cultivated, with a view of producing fruit, but of cuttings for propagation, it has been cut down very close every year. Had it have been trained, with a view of producing fruit, it is supposed it would have yielded upwards of three hundred weight yearly. A great variety of grape vines are now introduced into the colony; those introduced by Mr. L. Leake, and planted under Mount Eliza, are of very superior quality, both as regards the size and flavour of the fruit. There can be no doubt, but this will prove a fine country for the growth of the vine, soil and climate being both in its favour. Fruit trees, of most kinds, are of much more rapid growth in the colony than in England. The peach trees in Government Garden, began to bear fruit when they were little more than two years old, (they were raised from the stone,) and have attained a height of from eight to ten feet; and other trees grow with equal rapidity.

With respect to animal food the following information has been collected; in the latter part of the year 1829, 1830, and 1831, a great number of sheep and cattle were imported from Van Diemen's Land. Not less than 3,500 of the former; but in consequence of the general opinion, then entertained, that there was little land capable of grazing stock, (the land to the east of the Darling Range not having then been explored,) nearly the whole of them were killed, to supply the ships of war, during those years moored in Cockburn Sound, viz. the Sulphur, Cruiser, and Success, at 9d. per lb., the price to private individuals being at the same time one shilling.

At the same time, Mr. Lord, and Mr. Bryant, imported a number of horned cattle, about 60 head, a great part of which strayed away into the Bush, where they still continue, many about the unsettled upper country of the Murray River; the rest were killed for the men of war, at one shilling per lb. The Government, at this time, had a herd of cattle, which they occasionally killed, and sold at the same price. The quality of the meat was very indifferent, the sheep being nearly all ewes, and in lamb, and in a poor weakly condition, from scab, and effects of the voyage; average weight, about 30lbs. each. The horned cattle were all poor, having been recently

landed. In the year 1833, a few good wether sheep were landed from the "Dart," from Sydney, and were sold for thirty shillings each, the meat being sold at one shilling per lb.

At this period, a few settlers were enabled to supply an increase of sheep and goats, for which the butcher would give 1s. 3d. per lb., for retailing it against 1s. 6d. The contract for the supply to the troops, was taken at 1s. 4d. The colonial bred stock good. In 1834, a considerable number of horned cattle were imported by Captain Taylor, and sold at £15. per head. In 1835, the retail price continued to be from 1s. 4d. to 1s. 6d. per lb., the market being now principally supplied with colonial stock. The contract price, for the last quarter of this year, for the troops, was 1s. 2d. per lb. The colonial bred meat is of excellent quality and flavour. The average weight of lambs, 30lbs., and wethers, 45lbs. each. The supply of mutton, up to the present period, has been tolerably abundant; beef is abundant, but the demand too small to enable the butcher to kill, with a certainty of sale.

In addition to the above information, it may be observed, that, at several periods, during the first three or four years of the colony, it was almost impossible to obtain fresh meat at any price. The supply of fish is generally good, as well at Perth as at Fremantle, a shilling or eighteenpence being sufficient for the purchase of a large fish.

The supply of bread, or flour, has been equally precarious and fluctuating, with that of other descriptions of provisions; at times the market overstocked with imported flour, selling at twopence; at other times difficult to be bought at one shilling per lb. At one period, a substitute for bread was sold at one shilling per lb., composed of a small quantity of bad flour, rice, and potatoes. For the last fifteen months, however, the supply has been abundant, and the price steady, generally from three-pence to four-pence per lb.

The following table has been prepared at Swan River in conformity as stated with the plan laid down in my first colonial work.

A.—*Movable property existing*.—Sheep, 5,300, at 50s. each, 13,250l; Horses, 170, at 35l. each, 6,950l; Horned cattle, 540, at 12l. each, 6,480l; Goats, 500, at 30s. each, 750l; Swine, 550, at 20s. each, 550l; Dogs, 500l; Crafts, boats, and gear, 3,000l; Furniture in houses, 10,000l; Clothing for 1683 persons, at 5l. each, 8,415l; Farming implements, machinery, &c., 5,000l; Merchandise on hand, 15,000l; Bullion, coin, &c., 5,000l.

B.—Houses, 375 in Perth and Fremantle, 30,000l; Land cultivated, 1579 acres, at 15l. per acre, including farm, 23,685l; Land granted, and wholly or in part occupied, as sheep or stock runs, 160,000 acres, at 5s. per acre, 40,000l; Land granted, remaining unoccupied, 1,379,616 acres, at 2s. per acre 137,961l; Public buildings, jails, &c., 13,000l; Roads, bridges, and wharfs, 2,000l; Grand Total, 321,541l.

[These tables are exclusive of a considerable property existing at King George's Sound, in four vessels of considerable tonnage, houses, &c. &c.]

Estimate of value of property created or consumed, whether of colonial production, or imported during the year 1835. Animal food for 1,892 persons, at 100lbs. per annum each, 189,200lbs., at 1s. per lb., 9,460l; salted meat, imported beef, pork, and tongues, for 1,892 persons, at 150lbs. per annum each, 283,800lbs., at 5d., 5,912l; fish for 1,000 persons, 100lbs. each per annum, 100,000lbs., at 1½d. per lb.,

625l; bread each per annum, for the year 3,547l; corn at 0½d. per bush, 283l; estimated butter, egg tea, sugar, &c. per day each swine, &c.,

Another point has been recently established in South Australia, which was established abstract of the form for the colony.

'The colony the name of 132nd to the south coast towards the east.'

'The whole to be open to'

'Not to be parts of Australia for this colony.'

'The colony of confinement'

'No waste property, save at a fixed price as the termine.'

'Subject to necessity of providing in the acquire property without limit.'

'The whole public land to natives of the'

'The emigrant purchase more in equal number of persons for a married person given outlay may obtain the to cultivate the value.'

'Commissioners manage the disposal of the purchase and to discharge the colony.'

CHAPTER IV.—SOUTH AUSTRALIA.

Another portion of the vast island of New Holland has been recently erected into a British colony termed *South Australia*. The conditions under which it was established, will be best seen by the following abstract of the Act of Parliament framed and passed for the formation of the new settlement.

'The colony to be erected into a province under the name of South Australia, extending from the 132nd to the 141st degree of east longitude, and from the south coast, including the adjacent islands, northwards to the tropic of Capricorn.

'The whole of this territory within the above limits to be open to settlement by British subjects.

'Not to be governed by laws applying to other parts of Australia, but by those only expressly enacted for this colony.

'The colony in no case to be employed as the place of confinement of transported convicts.

'No waste or public lands to become private property, save by one means only; viz. by purchase at a fixed minimum price, or as much above that price as the competition of public auction may determine.

'Subject to the above restriction, and to the necessity of previous surveys, all persons, whether residing in the colony or Great Britain, to be free to acquire property in waste or public land, in fee, and without limit, either as to quantity or situation.

'The whole of the purchase money of waste or public land to be employed in conveying labourers, natives of the British isles, to the colony.

'The emigrants conveyed to the colony with the purchase money of waste land, to be of the two sexes in equal numbers; a preference amongst the applicants for a passage cost-free being given to young married persons not having children; so that for any given outlay of their money, the purchasers of land may obtain the greatest amount of labour wherewith to cultivate the land, and of population to enhance its value.

'Commissioners to be appointed by his Majesty to manage the disposal of public lands, the expenditure of the purchase-money thereof as an emigration fund, and to discharge some other duties relative to the colony.

'Until the colony be settled, and the sales of waste or public lands shall have produced a fund adequate to the want of labour in the colony, the commis-

sioners to have authority to raise money on loan, by the issue of bonds or otherwise, bearing colonial interest, for the purpose of conveying selected labourers to the colony: so that the first body of emigrating capitalists going out to buy land, may from the first be supplied with labour. The commissioners being empowered, until such loan or loans be repaid, with interest, to apply all the proceeds of the sales of land in repayment of such loans.

'For defraying (provisionally) the necessary expenses of the commission and of the colonial government, the commissioners to have authority to raise money on loan, by the issue of bonds or otherwise, and provided such expenditure do not exceed 200,000*l.* in the whole, the amount thereof to be deemed a colonial debt, and secured upon the entire revenue of the colony.

'The authority of the commissioners to continue until the colony having attained a certain population, shall, through the means of a representative assembly, to be called by his Majesty, undertake to discharge the colonial debt, and to defray the cost of future government; when the colony is to receive such a constitution of local government as his Majesty, with the advice of his Privy Council, and with the authority of Parliament, may deem most desirable. The population of the province must amount to at least 50,000 before it be lawful for the Crown to frame a constitution of local government for the colony.'

The province contains an area of nearly 300,000 square miles, or 192,000,000 acres. It was taken possession of and an accession made by Captain Hindmarsh R. N., as governor, and the following proclamation fixed the site of the capital:—

PORT ADELAIDE.

"Proclamation by his Excellency John Hindmarsh, Knight of the Royal Hanoverian Guelphic Order, Captain in the Royal Navy, Governor and Commander-in-Chief of her Majesty's Province of South Australia.

"I do hereby direct that the two points at the entrance of the estuary on the eastern shore of the Gulf of St. Vincent, in lat. 34 deg. 46 min. leading from said gulf shall be called as follows, viz.:—The northern point shall be called Point Gray; the southern point shall be called Point Malcolm; that the

entrance between these points into the port hereafter proclaimed shall be called Light's Passage; that the peninsula bounded on the eastern side by the port hereinafter proclaimed, and on the western side by the sea, shall be called Lefcard's Peninsula; that the island forming the north eastern boundary of the port hereinafter proclaimed shall be called Torrens Island; that the inlet forming the southern boundary of Torrens Island, and running to the eastward, shall be called Angus Inlet; and that the land lying to the southward of the said inlet, and extending from such inlet to the southern extremity of the port hereinafter proclaimed, and inland to a distance of three statute miles, and forming part of the eastern and south-eastern boundary of the said port, shall be called Fife Angus.

"That the estuary leading out of Gulf St. Vincent from a right line across the same from Point Grey to Point Malcolm, and from such right line up the said estuary to a right line drawn across the same, at the distance of one statute mile above the present landing place in Fife Angus, shall be the port of the town of Adelaide; and I do hereby proclaim the same within the boundaries hereinbefore described to be a legal port, and direct that from henceforth it shall be called and known by the name of Port Adelaide.

"Given under my hand and the seal of the province, this 25th day of May, 1837,

"JOHN HINDMARSH."

A full description of the country generally, so far as it is known, will be found in my "*Colonial Library*." The following topographical account has been furnished by the South Australian Commissioners:—

The capital of the province of South Australia is situated on the eastern side of Gulf St. Vincent, in latitude 34. 57. south, and longitude 138. 43. east. All the accounts which have been received from the colony concur in extolling the salubrity of the climate and the fertility of the soil, and go to confirm the opinion expressed by Captain Sturt in the report of his survey of this district of country, that between the eastern coast of Gulf St. Vincent and Lake Alexandrina, from Cape Jervis to the head of the Gulf, there are several millions of acres of highly fertile and beautiful land. The following statement respecting the climate, the soil, and the capabilities of the settlement, is extracted from a letter from Mr. John Morphett, addressed to several gentlemen in this country who had entrusted him with the management of their land in the colony.

Gulf St. Vincent is without island, rock, reef, or sandbank, and navigable by a stranger in the darkest night by means of the lead. I have heard it stated by competent authorities that gales from the southward and westward do not blow home here; and I

know that some nautical men, besides the Surveyor-general, consider almost any part of it perfectly safe anchorage all the year round; in addition to which there is a safe and commodious harbour, adapted to admit, at all times, ships of 300 tons burthen, and, Colonel Light states, capable of being made practicable for vessels of double that tonnage.

The country from Cape Jervis upwards is very picturesque, and generally well timbered, but in the disposition of the trees more like an English park than what we could have imagined to be the character of untroubled wilds; it is, therefore, well suited for depasturing sheep, and in many places, under present circumstances, quite open enough for the plough.

A range of hills, with valleys opening through to the back, runs down it at an average distance of 10 or 12 miles. Most of these hills are good soil to the top, and all would furnish excellent feed during the winter. The country between there and the sea is very diversified, in some places undulating, in others level, with plains both open and elegantly wooded. There are many streams running into the sea, with very deep channels. These in summer are low, and a few of them dry; but the entire range of hills in which these have their sources abounds in gullies and ravines, affording the greatest facilities for damming, whereby an immense quantity of water might be retained from the winter rains. This is important, as a system of irrigation might be applied here with great advantage. The soil is generally excellent; a fine rich mould, with a substratum of clay.

The site fixed on by the Surveyor-general for the capital of the colony is in about 34. 57. south. It is situated on gently rising ground on both banks of a pretty stream, commanding a view of an extensive plain, reaching down to the sea, over which the S. W. breezes blow nine months out of the twelve, with invigorating freshness. As the back is a beautifully wooded country, which extends for about six miles to the base of the first range of hills, which are capped by a high wooded one, called, by Sturt, Mount Lofty, 2,400 feet above the level of the sea. To the left the hills gently curve round, and trend down to the coast at about nine miles from the town, enclosing a plain country, in some places open, in others wooded, having a few small streams and fresh water lakes. To the right the hills run in a northerly and easterly direction, continuing for 30 or 40 miles, where they appear to sink into a plain. The country along their base is well timbered: nearer the coast it is open and level.

At the distance of six miles from the town is the head of a creek, from 300 to 400 yards wide, communicating with the sea, in which vessels not drawing more than 18 feet water may be moored as easily and safely as in the London Docks.

The creek has two mouths or openings to the gulf, the most southerly of which, in latitude 35. 47., communicates with a channel formed by the coast, and sand-spits dry (at low water) about three miles long, with three and a half, four, and five fathoms water, in which vessels may be moored commodiously and securely, having an entrance to the sea more than three fathoms deep at high-water spring-tides.

The course of the creek is almost due north and south, running parallel to the coast for the first four miles from the entrance; there is three and three and a half fathoms in the middle, and two fathoms close to the banks; afterwards for a mile it deepens to four, and then for a mile and a half it becomes five fathoms deep, and at the point, about seven miles from the

mouth, where communication only a distance.

In the winter, but, does itself. Nothing will this point, country bet level, it will from one to

mouth, where it would be most convenient to form a communication between it and the capital, there is only a distance of one mile from the sea shore.

In the winter the creek receives the waters of the river, but, during the height of the summer, the river loses itself in a marsh before it reaches the creek. Nothing will be easier than to dam the river above this point, and thus always keep it full; and, as the country between Adelaide and the harbour is a dead level, it will not be an expensive work to cut a canal from one to the other.

The climate is decidedly fine; the heat latterly has been very great, but tempered by a pleasant sea breeze, which blows regularly through the summer, setting in about nine o'clock in the morning, and continuing till sunset.

As a proof of the healthiness of the climate, I may remark that there has been scarcely a case of illness since we landed, notwithstanding the privations and hardships attendant upon the first settlement of a country, and we think nothing of sleeping in the open air.

The anticipations we formed in England respecting the fall of rain on this coast, have been, I am happy to say, realized; whilst at Sydney they have been very nearly without a drop of rain for the last five or six months, we have had an abundance.

The grass grows at present in tufts, which I believe to be the case in all natural pastures; consequently the country would not now support half the number of sheep that it would be able to do a year or two years after the lands have been cropped close, and the roots more spread. It is gratifying to find that the country and climate are admirably adapted to sheep breeding, since wool is the staple commodity of Australia. In Van Diemen's Land, this branch of farming is calculated to yield an average annual profit of 80 per cent. But I should conceive the returns would be still more satisfactory here, as in the older settlements pasturage is scarce, and most of the sheep-runs are obliged to be rented at a high rate; whereas in this colony a purchaser of land may obtain a square mile (or 640 acres) of pasturage at 40s. per annum.

I have before alluded to the advantages to be expected from a communication with the Murray, and I now refer to it again as being a point of great importance. There are extensive and rich plains to the westward of the Warangony Mountains, in which several hundred thousand sheep are depastured. The produce of these flocks is obliged to be carried over these mountains at an immense expense, in order to be shipped at Sydney. The yearly increasing flocks of the settlers of New South Wales will compel fresh explorations to the westward, and the formation of stock settlements still further from the point of embarkation. In addition to which, we may confidently expect the occupancy of that extensive and beautiful tract of country still nearer to us, discovered by Major Mitchell, and called Australia Felix. [South Australian Commissioners Report for 1837. House of Commons, January 26, 1838.]

The annexed report is by Captain Martin, of the *John Pirie*, in August, 1836.

"I landed in a fine bay round Cape Jarvis, about eight miles up St. Vincent's Gulf, in one of the loveliest spots I ever beheld, with a fine stream of water running through the middle of a level plain, and Colonel Light at once pronounced it to be one of the

best situations possible for a town. This bay is well sheltered from all winds except those from down the gulf and from the W. and N.W., but it does not appear that the winds blow home, and, from the appearance of the beach and the shore, I should say there is never any sea running. The anchorage is good holding ground, and I should not hesitate to ride all the year round in from ten to three fathoms water. Colonel Light pitched his tents on shore, made a garden, and put in his seeds and plants. He set to work surveying the bay.

"The country all about is delightful and well watered. I proceeded up St. Vincent's Gulf, on the east side, about 75 or 80 miles, till I got into a river sufficient for the *John Pirie* to enter at high water, and when in there is plenty of water. I went about 12 miles up this river, it runs close up to Mount Lofty. The banks are low, composed of small islets, with low mangrove trees growing in the water; but a little way inland we came to a beautiful open country, fine plains as far as the eye can reach, very moderately wooded, as are also the hills all fine rich dark brown soil, with a yellow clay of from two to four feet under it, runs of fine water in all directions. All from this part to the Cape is a continuation of fine land, plenty of grass for food for cattle and sheep; fine shady hill, moderately timbered. The principal wood is the oak and mimosa. There are abundance of kangaroos and emus. There is one large plain of fine land between this river and the Cape, with three rivers running through. From this to the lake Alexandrina is about 22 miles across the finest country that ever eyes beheld."

All accounts agree in the eligibility of the situation for a colony, and confirm the impression which I entertained when coasting along the southern shore of Australia in 1828.

Although half the land in the colony should turn out to be waste and irreclaimable, and the remainder not even exceed the price which has already been actually realized (from 12s. to 20s. per acre), there will still be 50,000,000l. worth of land to provide for the expenses of the government, and to plant labourers on the soil. An excellent public spirited association has been formed, termed the "South Australian Company," with a subscribed capital of 300,000l., who have already invested about 100,000l. in the purchase of land from the government commissioners, in the conveyance of labourers and stock to the colony, and in the establishment of whale fishing vessels, &c.

We have no accurate census as yet of the colony; it probably numbers upwards of 3,000 European inhabitants, of whom the females are in proportion to the males larger than is usually the case with infant settlements. The commissioners in their last report state that the total of the sums received for the sale of land up to the present time (December 22, 1837) has amounted to 43,221l. Of this sum, 36,427l. were received before the date of the first annual report, and subsequently to that report 3,200l. have been paid for land in this country, and 3,594l. have been paid in the colony on account of the 563 town sections sold by auction, after the first 437 town sections had been appropriated to the original purchasers of land orders in this country. The whole of the sales of land hitherto effected is stated in the following tabular form:—

Return of the Sales of Lands from the commencement, on the 15th July, 1835, to the 7th December, 1837.

Sales of Lands.	Number of Acres.	Receipts.
		£.
437 land orders included in the preliminary sales, each order being for 135 acres . . .	58995	35397
One deposit forfeited . . .	..	20
Land orders, exclusive of the preliminary sales, each for 80 acres, at 12s. per acre . . .	1600	960
Ditto, at 20s. per acre . . .	3200	3200
Investment for the purchase of land in the colony . . .	..	50
Amount received by the Commissioner in the colony for sale of the town sections, not included in the 437 preliminary orders	..	3594
Total . . .	63795	43221

No expense has been defrayed from the revenues of this country on account of the colony of South Australia, except the sum of 4,801*l.*, paid by the naval departments on account of Her Majesty's ship 'Buffalo,' employed in the formation of the settlement. Of this, 1,843*l.* has been repaid from the funds chargeable with the cost of conveying emigrants, and the remainder is to be repaid by the commissioners.

A return of all monies received by the sale of Public Lands in Southern Australia, in each year, from the 1st of April 1835, to the latest period for which it can be prepared.—From 1 April 1835 to 31 March 1836, both inclusive, 36,377*l.* (including the preliminary sales, amounting to 35,000*l.*, required by the Act 4 & 5 Will. IV., c. 95). 1 April 1836 to 31 March 1837, both inclusive, 4,092*l.* (including 3,594*l.* 4*s.*, received in the colony from the sale of town sections; a return of subsequent sales there has not been received in England). 1 April 1837 to 31 March 1838, both inclusive, 4,820*l.* 1 April 1838 to 27 July 1838, both inclusive, 12,640*l.* Total, 57,929*l.*

A return of the number of Ships, and amount of their Tonnage, which have cleared out for South Australia from any Port of Great Britain and Ireland, in each year respectively, since 5 April 1835.—Year ended 5 April 1836, 3 ships, 535 tons; 1837, 11 ships, 3,139 tons; 1838, 14 ships, 5,171 tons.

Copy of a letter from Robert Torrens, Esq., to James Stephens, Esq.

South Australian Colonization Office,
Adelphi Terrace, 16 June 1838.

Sir,
The Colonization Commissioners for South Australia, have the honour to acknowledge the receipt of your letter of the 6th instant, and, in obedience to the directions of Lord Glenelg therein contained, to

enclose a "Return of the annual charge to be provided for by the Local Government of South Australia, under the several heads of Interest on Debts contracted on the Credit of the Colonial Revenue; of Expenses of the Local Establishment, and Contingencies; and of Expenses of the Establishment of the Colonization Commissioners in this Country, and Contingencies."

With respect to the debts contracted on the credit of the colonial securities, the Commissioners beg to remark that the amount has been very considerably enhanced by the necessity imposed upon them, by the provisions of the South Australian Act, of borrowing the sum of 20,000*l.* as a security fund, before any step could be taken towards the establishment of the colony. Another cause of the large amount of the colonial debt has been the necessity the Commissioners were under of borrowing, for the purpose of fitting out a surveying expedition for the purpose of exploring the almost unknown coasts and harbours of South Australia, and for selecting the site of the first settlement.

Though these incidental and preliminary expenses have swelled the colonial debt to twice the amount to which it might otherwise have risen, yet the progress of the colony is such as to give to the Commissioners a confident assurance that the resources of the colony will be equal to the discharge of all its obligations.

By the 20th section of the South Australian Act, the public lands, and the monies arising from the sale thereof, are made available for the payment of the principal and interest of the colonial debt; and at the actual rate at which, even at this early stage of its progress, the public lands of the colony have been selling during the present month, the amount of the land revenue for a single year would exceed the whole amount of the colonial debt, including all interest thereon.—I have, &c. Robert Torrens, Chairman.

A Return of the Annual Charge to be provided for by the Local Government of South Australia; viz.—Interest on debts contracted on the credit of the Colonial Revenue, viz. Bonds for security fund, 20,000*l.*, interest, 2,000*l.*; Other bonds to this date, 35,000*l.*, interest, 3,540*l.* Total, 5,540*l.*—Expenses of the Local Establishment and Contingencies from January to December 1838; viz. Salaries, 8,250*l.*; Contingencies, 1,750*l.* Total, 10,000*l.*—Expenses, of the Establishment of the Colonization Commissions in this Country, and Contingencies, from January to Dec. 1838; viz. Salaries, 1,600*l.*; Contingencies, 1,000*l.* Total, 2,600*l.* Grand total, 18,140*l.*

The wages of labour are from 5*s.* to 6*s.* per day. Every account brings more and more valuable intelligence as to the quality of the soil, the extent of navigable waters, and the salubrity of the climate. I trust that in a future edition I shall be enabled to place before the British public a full statistical account of this new section of the empire.

BOOK VI.—SOUTHERN AFRICA.

CHAPTER I.—THE CAPE OF GOOD HOPE.

SECTION I. The Cape of Good Hope, situated at the southern extremity of Africa, is bounded by the vast southern ocean on the S., on the W. by the Atlantic, on the E. by the Indian ocean, and on the N. by the Gariep or Orange River, and by unexplored territories.

It is difficult to state the exact area of South Africa, extending from Cape Point, in S. latitude 34.23 to Delagoa Bay, a Portuguese settlement, on the E. coast in lat. 26. In order, however, to explain the nature of the country, it will be necessary to consider the British located territory, which after its conquest from the Dutch was thus defined (by Mr. Barrow, in his valuable view of the Cape, published in 1801); length of the colony, from W. to E. Cape Point to Kafferland, 580 miles; from River Koussie to Zureberg, 520; breadth from S. to N. river Koussie to Cape Point, 315 miles; Nieuwveld mountains to Plettenburg's Bay, 160; mouth of the Tush River to Plettenburg's baaken, 225 miles; which gives a parallelogram, whose mean length is 550, and mean breadth 233 English miles, comprising an area of 128,150 square miles. The present boundaries may be considered as the Keiskamma River on the E., and the Gariep or Orange River on the N., estimated at 600 miles from E. to W., and 330 miles from N. to S., comprising an area of about 200,000 square miles, with a sea coast of upwards of 1,200 miles, from the Gariep on the western or Atlantic shore to the Keiskamma, on the eastern or Indian Ocean coast.

II. The lofty promontory of southern Africa was discovered by Bartholomew Diaz, in 1487, and called by him *Cabo dos Tormentos*, in consequence of the tempestuous weather experienced. The mutinous state of his crews, and the shattered condition of his ships, prevented Diaz from touching at the Cape; and on his return to Portugal, John II. directed the Promontory to be called *Cabo da boa Esperança* (Cape of Good Hope), in expectation of future beneficial results. In the confident expectation of discovering the long desired passage to India, another fleet was fitted out by John, and the command given to the celebrated Vasco de Gama, who, after contending with the fury of the elements, and the despairing, almost mutinous, conduct of his companions, doubled the Cape of Good Hope (ten years after its discovery), on the 20th November 1497.

The Cape of Good Hope continued thus to be resorted to as a temporary rendezvous by European mariners for more than a century, and dispatches for the Directors of the Dutch and English East India Companies were buried by the commanders of the outward-bound ships, with instructions cut on stone or wood, indicating where letters and the ship and cargo registers were to be found by the homeward-bound vessels. In 1620, two of the English East India Company's commanders (Humphrey Fitzher-

bert and Andrew Shillinge, their proclamation is dated "Bay of Saldanha, 3d July 1620,"), took formal possession of the Cape, in the name of King James, thirty years prior to the establishment of the Dutch colony. No settlement was, however, formed; and the English, Portuguese, and Dutch continued indiscriminately to resort thither for shelter and refreshment; but in 1650, the Dutch government, at the suggestion of a surgeon of one of their East India ships (Van Riebeck) who viewed the station as an admirable rendezvous, and also with a desire to form a barrier to their Indian dominions, resolved to colonize the Cape; a determination which was shortly after put in execution by sending out 100 males, to whom were subsequently added 100 females, from the houses of industry in Amsterdam. From this period, for 180 years, the Cape of Good Hope remained in the possession of Holland.

The British government in 1795 took possession of the colony for the Prince of Orange, and it remained in our occupation for seven years, until the peace of Amiens, when, after various improvements, &c., and contrary to the profound views of that profound statesman the Marquess of Wellesley, then Earl of Mornington, (see his Lordship's Despatches, vol. i., published in 1836) it was most injudiciously restored to the Dutch nominally, but in reality to the French, who made use of the Hollanders as suited their convenience. On the renewal of the war with France, and its dependencies, it was wisely determined by our Government to recapture the Cape of Good Hope: and with this view, a well appointed force of 5,000 men, under Sir David Baird and Sir Home Popham, appeared off the Cape in January 1806. The colony has ever since remained in our possession. [For further details, see *Colonial Library*, vol. iii.]

The following is a list of the governors of the colony since its establishment in 1652, under the Dutch government—Joan Anthony van Riebeck, 8th April 1652; Zacharias Wagenaar, 9th May 1662; Cornelius van Gualberg, 24th October 1666; Jacob Borghorst, 18th June 1668; Pieter Hackins, 2d June 1670; Coenraad van Breitenback, 1st December 1671; Albert Van Breugel, 23d March 1672; Ysbrand Goske, 2d October 1672; Johan Bat (van Herentals), 2d January 1676; Henebrik Crudat, 29th June 1678; Simon van der Stell, 14th October 1679; Willem Adriaan van der Stell, 11th February 1699; Johan Cornelis d'Ableing, 3d June 1707; Louis van Assenburg, 1st February 1708; Maurits Posques de Chavornnes, 28th March 1714; Jan de la Fontaine (Acting) 8th September 1724; Pieter Gisbert Nood, 25th February 1727; Jan de la Fontaine (Acting), 24th April 1729; Ditto (Effective), 8th March 1730; Adraan Van Rervel, 14th November 1736; Daniel van den Hengel, 20th September 1737; Hendrik Swellengrebel, 14th April 1739; Ryk Tulbagh, 30th March 1751; Joachim van Plet-

tenburg, 12th August 1771; Pieter van Reede van Oudtshoorn (died on his passage to the colony, on board the ship 'Asia'), 23d January 1773; Cornelis Jacob van de Graaff, 14th February 1785; Johannes Isaak Rhenius, 29th June 1791; Abr. J. Sluysken (Commissioner), 2d September 1793. *Under the British government*—J. H. Craig, 1st September 1795; Earl Macartney, 23d May 1797; Sir Francis Dundas (Lieutenant-governor) 22d November 1798; Sir George Yonge, 18th December 1798; Sir Francis Dundas (Lieutenant-governor), 20th April 1801; Jan. Willem Jassens (Batavian Governor), 1st March 1803; Sir David Baird, 10th January 1806; Hon. H. G. Grey (Lieutenant-governor), 17th January 1807; Du Pre, Earl of Caledon, 22d May 1807; Hon. H. G. Grey (Lieutenant-governor) 5th July 1811; Sir John Francis Cradock, 6th September 1811; Hon. R. Meade (Lieutenant-governor), 13th December 1813; Lord Charles Henry Somerset, 6th April 1814; Sir Rufane Shawe Donkin (acting during the absence of Lord C. Somerset), 13th January 1820; Lord Charles H. Somerset (Returned), 1st December 1821; Richard Bourke (Lieutenant-governor), 8th February 1828; Sir Galbraith Lowry Cole (Governor), G.C.B., 6th August 1828; Sir B. D'Urban (Governor), 1833; Major-general Napier, 1837.

III. Southern Africa is generally composed of chains of lofty mountains and intervening plains and valleys, extending east and west, excepting one range beginning at Table Bay, opposite to Cape Point, and stretching to the northward along the western coast about 200 miles, which is as far as Olifant's River.

The first great chain running east and west, has, along the southern coast, a belt of undulating land, varying from 10 to 30 miles in width, indented by several bays, and intersected by numerous streamlets; the soil is rich, the hills are well wooded, and the climate equable and mild, from its proximity to the ocean.

The next great chain is the Zwaarte Bergen or Black Mountains; more lofty and rugged than the coast chain, (in some places consisting of double and treble ranges) and divided from it by an interval of from 10 to 20 miles wide, the surface of which is very varied, in some places barren hills predominating, in others naked and arid plains of clay, termed by the colonists the *karroo*, while widely interspersed are patches of well watered, fertile and beautiful grounds.

The third range is the Nieuwveld's Bergen: between these mountains and the second range is the Great Karroo, or Desert, an elevated steppe or terrace, nearly 300 miles in length from E. to W. 80 in breadth, and 1,000 feet above the sea, exhibiting a clayey surface thinly sprinkled over with sand, studded with occasional isolated hills, with here and there a few stunted shrubs which seldom receive a friendly shower.

Along the western coast the country also ascends in successive terraces, the most elevated of which (the Roggeveldt) unites with the last mentioned chain of mountains, (the Nieuwveldt). Indeed the Roggeveldt Bergen range may be said to commence in nearly 30 S. latitude, running nearly south for two and a half degrees, when its course is bent to the E. and subsequently to the N. E. until the range reaches Delagoa Bay, that part of it forming the north boundary of the Great Karroo, being termed Nieuwveld's Bergen.

At the most southern extremity there are several

eminences, the heights and names of which are—Table Mountain, feet 3,582; Devil's Peak, 3,115; Lion's Head, 2,760; Lion's Rump, 1,113; Muzzenberg, about 2,000; Elsey Peak, 1,200; Simon's Berg, or signal hill, 2,500; Paulusberg, 1,200; Constantia, 3,200; Cape Peak, 1,000; Hanglip Cape, 1,800 feet.

Cape Town, built immediately at the foot of Table Mountain, along the shores of Table Bay, on a plain which rises with an easy ascent towards the mountain, is regularly constructed, with straight and parallel streets intersecting each other at right angles, and shaded with elm or oak trees; the houses chiefly of red brick or stone, of a good size, and generally with a *stoep*, or terrace, before the door, shaded with trees.

The population of the metropolis of South Africa is at present more than 20,000, of whom nearly 15,000 are white inhabitants—the majority being Dutch, or of Dutch descent. With the exception of Sydney, New South Wales, there is a more English appearance about Cape Town than any colonial station I have visited. The squares are well laid out, the streets extremely clean, the public edifices numerous and substantial.

The castle situate on the left of the town (entering from Table Bay), is a strong fortification commanding the anchorage, and, if well defended, capable of successful resistance against any force which may be brought against it. The fortress is pentagonal, with a broad fosse and regular outworks. It contains within its walls most of the public offices, and barracks for 1,000 men. There are other works defending Cape Town. Fort Knokke, on the east, is connected with the castle by a rampart called the sea-lines; and farther east as Craig's tower and battery. On the west side, and surrounding the Lion's Rump, are Rogge, Amsterdam, and Chavonne batteries, all bearing upon the anchorage. The entrance of the bay is commanded by a battery called the *Mouille*.

The colonists are indebted to the paternal sway of the Earl of Caledon for the laying down of hydraulic pipes, by means of which a plentiful supply of excellent water is furnished to every part of the town, and ships' boats are supplied at the landing place.

The colony is divided into districts; the topography &c. of each will be found in the 3rd vol. of my Colonial Library.

Port Natal, the *locale* which the colonists are so desirous that our government should occupy, was purchased in 1689, by order of the Dutch East India Company, for the sum of 20,000 guilders, who directed the Governor of the Cape of Good Hope, M. F. de Chavannes, by letter, dated Amsterdam, 23rd Dec. 1719, to form an establishment at Port Natal, and to hold it with the purchased territory in its vicinity, as a dependency of this colony. In 1814, the Cape of Good Hope and its dependencies were formally ceded by the Dutch to Great Britain. Since the year 1824, Port Natal has been almost constantly occupied by British subjects, who resided there with the express permission of the Governor of this colony.

The pastures of the country are of a character highly favourable. It is well wooded with large timber, and watered with upwards of 100 rivers and running streams, some of which are larger than the chief rivers of this colony. The soil is fertile, and has produced three crops of Kaffre and Indian Corn in the year. The rains are periodical, and the climate is cooler than that of the Cape, and highly salubrious. The Bay of

Port Natal is an exceedingly fine harbour, but the entrance is narrow, and has a bar of shifting sand. There are six feet of water on the bar, with a run of six feet, and at spring tides the depth is 14 feet. [From a memorial to the King in Council, praying that Natal may be assigned a small Government establishment.]

IV. Southern Africa is evidently of diluvian origin; the formation of the peninsula is sufficiently indicated by the structure of Table Mountain, which is composed of many strata, piled on each other in large tabular masses lying close together without any intermediate veins of earthy or other extraneous matter. The plain round the mountain is a blue *schistus*, running in parallel ridges N. W. and S. E., and interrupted by masses of a hard blue flinty rock.

The *schistus* rests on a stratum of strong iron-coloured clay, varying from a pale yellow to a deep red, abounding with brown foliated *mica*, and interspersed with immense blocks of *granite*, some of them crumbling into fragments, and others hollowed out as if by the hand of man, but really from the operation of time.

The experiment of boring in search of coal which took place under the government of Lord Macartney at Wynberg, a tongue of land projecting from the Table Mountain, gave the following insight into the strata of the country: *coal*, 2 feet; *blue soapy rock*, 5; *white soapy rock*, 22; *grey sandstone with clay*, 21; *chocolate-brown sandstone*, 14; *blueish soapy clay*, 31, and *stratified sand, red and white*, containing clay, 33; total 128 feet.

The stratum of coal found on the banks of a deep rivulet flowing out from the *Tigerberg* (a hill that terminates the isthmus to the eastward) was horizontal with a *super-stratum* of pipe-clay and white sandstone, and a *sub-stratum* of indurated clay. The coaly seam from ten inches to two feet in thickness, differed in quality at various places—sometimes it was in large ligneous blocks with visible traces of the bark, knots and grain of timber, and in the very middle of these, imbedded pieces of *iron pyrites* running through them in crooked veins, or lying in irregular lumps. Other parts of the stratum consisted of laminated coal of the nature of turf, burning with a clear flame, and leaving a light white ash; the more compact and heavy coal gave out a sulphurous smell, and left a slaty cask with an ochreous crust. A vein of coal has recently been discovered near the mouth of the *Kroom River*, which is accessible to small craft.

The most distinguishing feature of the mountains of Kaffreland, is a superincumbent stratum of sandstone; huge detached masses are found in many places standing some feet above the surface of the earth. The upper part of a mountain visited by the Rev S. Kay, presented to the eye immense precipices capped with large rhomboidal tables and projecting angles, forming a kind of cornice to the face. On the sides of the declivities, there was a description of prismatic *quartz crystals* in a corroded state, and evidently undergoing the process of decomposition a circumstance which is perceptible in almost all the mountains of South Africa, and presenting a fair prospect of a yearly increasing extent of fertile soil.

Iron stone is everywhere observable in Kaffraria, and likewise considerable quantities of *ochre* of different kinds, some specimens in a state of impalpable powder enclosed in crustaceous coverings of a reddish colour, of the hardness and consistence of baked earthenware; sometimes in single nodules of an inch

or two inches in diameter, but more frequently in clusters of two, three, or four nodules connected by necks which are also hollow; in these stones every shade of colour has been found except the greens, but the most common are those of a pale yellow and chocolate brown.

In the Graaff Reinet district some specimens of *tufo* and abundance of *limestone* are found; fossil remains have also been discovered (perfect fossil remains of the Mammoth species have been found a few years since in Beaufort); *common cornelian*, *topaz* and *bloodstone* have been met with in the Orange river, and in some of the N. field cornetries, *sulphure*. The infinite number of large blocks of isolated stones that are to be found in South Africa, to the very verge of the Cape promontory, are aggregates of *quartz* and *mica*, the first in large irregular masses, and the latter in black lumps, resembling shot; they also contain sometimes cubic pieces of *felspar*, and seem to be bound together by plates of a clayey ironstone; by the action of the air and weather, they fall to pieces in large concentric laminae, become disintegrated, and, finally form a soil, at first harsh and sterile, but meliorated and enriched by time.

The soil throughout the colony is very varied,—in some places a naked sand, in others a stiff clay, and in many parts a rich dark vegetable mould; frequently the surface appears a dry sand, but on removing it to the depth of a few inches, a black mould is found beneath; the stiff clayey soil, sometimes red, and sometimes met with of a yellowish colour, is very fertile when irrigated. The east coast border is generally an alluvial loam, as is the case with many vallies, particularly among the ravines and windings of the Fish River.

The surface of the Great Karroo is diversified; in many places it is a stiff brownish coloured clay; in some parts a bed of sandstone, crossed with veins of fat quartz, and a kind of ponderous ironstone; in others, a heavy sand, with here and there a blackish loam. Near the bed of the Buffalo River, the whole surface of the country is strewn over with small fragments of a deep purple-coloured slate, crumbling from strata of long parallel ridges, running E. and W.; scattered among these fragments are black tumefied stones, having the appearance of volcanic *slags* or the *scorie* of an iron furnace; several conical hills, some truncated near the top, stand detached from each other on the plain; and although at first appearing as if thrown up by volcanic explosion, yet on a nearer view of the alternate strata of earth and sandstone, regularly disposed, exhibiting the effects of water, and not of fire. Some flat sandy marshes of the Karroo are overgrown with rushes, and abound in springs strongly impregnated with salt, and a species of *salsola* (salt-wort), grows here in perfection; the surface around its roots being generally covered with a fine white nitrous powder. It is from this plant that the inhabitants make excellent soap, in conjunction with sheep's fat.

From the *Little Looreyfonteyn*, in the Great Karroo, to *De Beer* valley, there are nearly 30 miles of a continued bed of solid and arid clay, without a particle of herbage; when, suddenly, as by enchantment, the *De Beer* valley, a plain of several miles in diameter at the base of the Black Mountains, is entered on, clothed with the most luxuriant vegetation; the water, however, of one of the streams which flow through it, being as briny as that of the English channel. Beyond this valley the Karroo again expands in all its nakedness.

Of minerals few have yet been discovered,—indications of coal, as before observed, have been met with at the Kroom River and other places. Near the Bushman's River (Uitenhage district), an extensive vein of *alum* has been recently discovered, which is particularly beautiful in its structure; the colour is perfectly white, of a silky lustre, consisting of delicate fibres, of six or eight inches in length, which run parallel, sometimes perpendicular, and sometimes in an undulating direction; the vertical course of the filaments being directed by small fragments of greyish limestone, and minute particles of yellow ferruginous earth; these are found near the basis of the tender capillary crystals, which shoot from a thin stratum of concrete alum, the lower surface of which is encrusted with yellow clay and portions of blue limestone. The alum is very pure and valuable as an article of commerce.

At Camtoos Bay (20 miles W. of Algoa Bay) a rich lead ore of the species known by the name of *galena* (lead mineralized with sulphur), has been found in the steep sides of a deep glen; the masses seen by Mr. Barrow had no appearance of cubic crystallization, but were granular or amorphous in some species; the surfaces, in others, made up of small facets, called by miners *white silver ore*; the vein of the ore was three inches wide and one thick, increasing in size as it advanced under the stratum of rock with which it was covered. The *matrix*, is a *quartzose sandstone* of a yellowish tinge, cellular and fibrous, harsh to the touch and easily broken. This ore, when assayed by Major Van Dheui, an officer in the Dutch service, yielded from 200 lbs. weight, 100 lbs. of pure lead and 8 oz. of silver.

Mineral waters exist in different places; a few miles from Graff Reinet, there is a spring of cold water, strongly impregnated with sulphurated hydrogen. About five miles from Cradock, in Somerset, there is a hot mineral spring (thermometer 86 degrees), which issues from the ground close to the bank of the Great Fish River, which is here a small stream about 200 miles from the sea. The taste of the water much resembles that of the Harrowgate or Gilsland spa, and it is resorted to for bathing by invalids labouring under various complaints. The ground in the vicinity is impregnated with saltpetre, and considerable quantities of nitre in a pure state may be collected in the neighbouring mountains. At no great distance from Cradock, near the Bamboo Mountains, are three salt lakes, similar to those in the vicinity of Algoa Bay and other parts of the country, from which the neighbouring colonists supply themselves with salt. There are two warm springs at the village of Caledon, under the Kleine Swartberg, which contain muriate of soda; their heat is 92 degrees. These springs are used as baths, and the water is also taken internally; they are found beneficial in cases of chronic rheumatism, diseases of the skin, and scorbutic ulcers. One spring is private property, where there is good accommodation for invalids and others visiting the baths; the other belongs to Government, and is let on lease,—the tenant being bound to allow the free and gratuitous use of the bath and buildings to poor indigent persons, of whatever description, producing certificates of inability to pay. There are two other warm springs in the district; one at Cogman's Kloof, also containing a muriate of soda, the heat of which is 114 degrees; and one at Rodeberg, containing a small quantity of carbonate of lime, the heat of which is 94 degrees.

Several singular salt-pans exist; some of them 200 miles from the sea-coast, and 5,000 to 6,000 feet above the level of the sea, the salt being hard, and from five to six inches in thickness. The largest and finest salt-pan is near Zwartkops River, Algoa Bay. The soil on all sides of the great Zwartkops salt-pan is a deep vegetable earth, in some places red, in others black, resting on a bed of clay, and without a vestige of salt in its composition.

From the Cape of Good Hope along the S. coast to Algoa Bay, a bank, with various soundings, projects to a considerable distance from the land, called the bank of Lagullas. The S. extremity of this bank is nearly on the meridian of Cape Vaches, or in long. 22 E., and is said to extend to about 37½ S. lat. in this part; but a little to the S. of 36 S. it converges quickly, and becomes of a narrow conical form, with very deep water on its S. end. The soundings to the westward of Cape Lagullas (to the southward of 35.15 S.) are generally of mud; to the southward of the Cape, frequently green or other sand; and on the S.E. and eastern parts of the bank to the eastward of Cape Lagullas, mostly coral, or coarse sand, shells, and small stones. This bank is probably the deposit of the strong current which sets to the S. and W. according to the direction of the bank, and is generally strongest during the winter months, running with the greatest velocity along the verge of the bank, or a little outside of soundings. When opposed by adverse gales, a very high sea is thrown up, which sometimes lessens the strength of the current; the rapidity of the stream is, however, always less towards the shore, where the sea is smoother. By keeping on the edge of the bank, a ship will be carried 80 miles a day with an adverse wind round the Cape into the Atlantic; vessels, therefore, trusting to their reckoning should be mindful of this circumstance.

A more minute detail of the geological structure of this portion of the African continent will be found in my "Colonial Library," vol. iii.

V. The seasons at the Cape of Good Hope are the very opposite of those of England, for example:—

CAPE OF GOOD HOPE.	September	Spring.	March	ENGLAND.
	October		April	
	November		May	
	December	Summer.	June	
	January		July	
	February		August	
	March	Autumn.	September	
	April		October	
	May		November	
	June	Winter.	December	
	July		January	
	August		February	

The S. E. and N. W. winds are the most prevalent in this hemisphere; the former in summer and the latter in winter. The violent gales of wind which were formerly so fatal to European vessels appear to have been diminished in their force of late years, and large icebergs are now seen to the north of the Cape. In the Eastern districts the mountain tops are occasionally covered with snow, but of course, in such an extent of country, and at different elevations, the heat varies; taking *Hottentots Holland* in the Cape district as a fair criterion for the elevated country, the following meteorological register, from the Army Medical Board Office, indicates the state of the weather throughout the year, Cape Town of course being warmer.

The healthiness of the Cape district is evinced by the fact, that in 1830, out of a population of 1,500, at Hottentots Holland, the total number of deaths was only five; of which four were coloured persons, one an old Mozambiquer, another an old slave, both of whom died of chronic diseases; the third, a young child, died suddenly; the fourth, a Kaffre girl, was burnt; and the fifth, a European gentleman of 50, principally of a mental affection. The mean temperature of Cape Town (which is heated by its proximity to Table Mountain) inferred from a meteorological journal kept for several years, is 67½. The mean temperature of the coldest month is, perhaps, 57; hottest, 79; mean of three recent winters, 58; of three summer months, 77; least heat during summer, 63. The temperature of the district of Stellenbosch, deduced from the observations of a single twelvemonth, is 66½; extremes, 87, and 50.

In this colony, as in the S. of Europe, and most of the warm climates of a temperate zone, the wind

commonly blows cold in summer, at the same time that the sun shines powerfully. It is this circumstance which distinguishes a warm from a hot climate.—(See "Colonial Library.")

VI. South Africa, when first visited by the Portuguese, Dutch, and English, was, considering the country and barbarous state of the inhabitants, extensively peopled by a race of Hottentots, who, from being masters of the soil, became in a short time the servants of the Dutch settlers, and, as in the West Indies and North America, sank before the white race; their numbers, though still considerable (upwards of 30,000), being very much reduced.

The first authentic account of the state of the colony is furnished by the *Oppgaff* or tax lists for 1798, when the Cape was in our possession, and the returns were required to be made for the first time on oath.

According to the *Oppgaff* returns, the population from 1797 to 1807 had augmented upwards of 10,000. Its progress at intervals is thus shewn:—

Population of the Cape of Good Hope exclusive of Military.

* The resident strangers in these districts belong to tribes beyond the boundaries. Numbers of them are in the service of strangers.

The number of mouths to the square mile in the Cape District, including Cape Town, is but nine; in Stellenbosch, seven; in Worcester there are nearly three square miles to each individual; in Clan-William more than two; in Swellendam and George there are two mouths to each square mile; in Uitenhage, little more than one; in Albany, six; in Somerset, nearly two; in Graaff Reinet, not quite one; and in Beaufort there are nearly three square miles to each individual. The total proportion of population to area is about one person to each square mile. The proportion of births to deaths, in 1836, was more than two to one.

Number of Persons who have emigrated from the United Kingdom to the Cape of Good Hope, 1821, 404; 1822, 192; 1823, 184; 1824, 119; 1825, 114; 1826, 116; 1827, 114; 1828, 135; 1829, 197; 1830, 204; 1831, 114; 1832, 196.

Account of the number of Children introduced into this colony by the Children's Friend Society, since the year 1833; 1833, 69 males; 1834, 97 males, 29 females; 1835, 36 males, 31 females; 1836, 97 males; 1837, 120 males, 35 females; total, 419 males, 95 females; grand total, 514.

The Kaffre tribes of whom a detailed description will be found in Vol. III., Colonial Library, may now be considered as divided into six great division: viz. the Mambookies or Amapondas, under Faku; the Amatembu or Tembookies, lately under Voosani, (now deceased). The Amakosa, lately under—1st Hintza, 2d Gaika, 3d T'slambie, 4th Pato, Kama, and Cobus. From the best information that can be obtained, the total population, antecedent to the late war, was as follows:—Population of Kaffraria in 1834.—Nation, Amponda, men, 33,000; women and children, 132,000; total, 165,000. Ditto Amatembu, men, 12,000; women and children, 48,000; total, 60,000.

A statement of the number of Slaves for whom compensation has been claimed, and of the number of claims preferred for such compensation, and of the amount of compensation awarded in each of the classes of prædial attached, prædial-unattached, and non-prædial. (Parliamentary return to the House of Lords, March, 1838.)

Divisions.	Classes.	No. of Slaves in each class.	Compensation value of each class.	Total.

(a) The old church having been found insecure, and having in consequence been pulled down, divine service is performed in the Lutheran Church which will contain about 1600 persons. The dissenting places of worship are two belonging to the Independents, and one to the Wesleyans.

(b) Morning and evening service is performed in the English Episcopal Church (St. George's). The children of the English poor, free blacks, and apprentices are catechized in the government free school in Kerrom Street every Sunday.

(c) The senior minister of the Lutheran Church receives a stipend from the community of 150l. per annum, and enjoys other advantages, the second has also an annual allowance of 100l.

(d) The Rev. Mr. Moral who had acted as Catholic priest, during the absence on leave of the Rev. Mr. Fishton (since deceased) has left the colony. The living is therefore vacant. The Roman Catholic Chapel, situated in the Bintenkan, Cape Town, has during the late season been reduced to a heap of ruins, nor is there any immediate prospect of its being rebuilt. The arrival of a bishop and two priests who are shortly expected, will probably mature any plan, that may be in contemplation for the erection of a new place of worship.

(e) The dissenting place of worship belongs to the Wesleyans, it is situated near Wynberg and contains 200 persons.

(f) The minister is paid by the community.

(g) The chaplain, has an allowance of 52l. per annum from the navy. The service for the Episcopal community at Simon's Town is performed in the Wesleyan Chapel, for which Government pays an annual rent of 50l. It will contain 300 persons. The Episcopal Church, when finished will contain 400 persons.

(h) Three Missionaries officiate alternately.

(i) The dissenting place of worship is supported by individuals, for the religious instruction of apprentices and persons of colour. It will contain 400, and 150 usually attend, Mr. Luckof of the German Missionary Society gives instruction here.

(k) One of these dissenting places of worship, is situated at the Paarl, and another in Wagonmaker's valley; they were erected by private individuals for the instruction of slaves; each will contain 300 persons. Mr. Elliot of the London Missionary Society, officiates at the Paarl, and Mr. Bisseux of the Missionary Society of Paris, in the other. The third dissenting place of worship is situated at Flansche Hock, it will contain 100 persons, but there is no missionary.

(l) The Wesleyans have a chapel, which will contain 130 persons.

(m) A Missionary resides at Worcester and instructs the coloured population.

(n) Two missionaries reside at Tulbagh and give religious instruction to the heathen.

(o) There are four Missionary Institutions in the district of Clan-William, one at the Cederberque, one in the Kamisberg, one in Minaquoisland, and one at the mouth of the Oliphant River. They are conducted by persons sent out from the different societies in Europe.

(p) The dissenting place of worship is the chapel at the Caledon Institution, belonging to the London Missionary Society, at which 834 persons reside.

(q) The dissenting places of worship, are chapels at the Moravian Establishments at Guadenthal, where 1,454 persons reside, and at a branch of that Establishment at Elim, to which 310 persons are attached, and a chapel at the Leper Institution at Hemelen Aardes, where there are generally from 80 to 100

patients, at which a Missionary from Gnadenthal performs Divine Service.

(r) A church is now building and almost completed, which will contain about 1,200 persons. The Dissenting place of worship is at Pacalkdorp, a station of the London Missionary Society. The chapel there will contain 200 persons. The attendants at divine service are Hottentots.

(s) There is a London Missionary Institution at each of the following places, viz. Bethelsdorp, Port Elizabeth, Uitenhage and Hankey. The Moravians have a Missionary station at Enon. Each of these Missionary Institutions is frequented by Hottentots.

(t) Previous to the appointment of the present minister, the minister of Graaff Reinet officiated four times a year to administer the sacrament, when about 1,000 attended.

(u) The dissenting places of worship in this dis-

trict, are: 1 Independent, 1 Baptist, and 2 Wesleyan Chapels at Graham's Town; 1 Wesleyan at Kat River; 1 ditto at Salem; 1 ditto at Port Francis; 1 ditto at Wesley Mount; 1 ditto at Clumber; 1 ditto at Bathurst; 1 ditto at Manley's Flat; 1 ditto at Greenfontein, and the London Missionary Society at Theopolis. The Rev. Mr. Heavyside officiates as chaplain at Graham's Town, and receives for that duty a portion of the salary of the minister there.

(v) The minister of Somerset, performs Divine Service for the Dutch community at Albany once a quarter in the English Church at Graham's Town.

(w) Mr. Morgan acts as minister of the Dutch Reformed Community in Albany.

(x) The Dutch ministers, by occasional visits to the distant parts of their extensive parishes, remedy in some degree the inconvenience caused by the remoteness of the residences of the people from the church.

§ Vacant.

|| Undefined.

(a) The expenses are defrayed from the funds of the Bible and School Commission, and consist in various petty charges for chalk, brooms, cleaning, &c.

(b) These masters are engaged in the instruction of free persons of colour, who may be desirous of being baptized, either in the Dutch reformed or Lutheran faith: the schools are open every week day from four to five p. m.

(c) The want of a schoolmaster capable of giving instruction in the English language is much felt. This want might be supplied if funds could be found for the erection of a school-house.

(d) The expenses of these schools are defrayed by the Moravian Mission.

(e) The teacher receives 27*l.* per annum for house rent, which is included in the expenses.

(f) The school mentioned in the last column is a public school (not a free school) for instruction in the Dutch language: 12 scholars attend.

(g) The expenses are for house rent.

(h) The expenses are for house rent.

(i) The object of the foundation of these schools is to afford religious instruction to children living at a remote distance from any church, and to give elementary instruction in the English and Dutch languages. A few of the inhabitants have private schools.

(k) The annual expense for house rent has not been incurred. The master is the church clerk, and receives a salary of 30*l.* per annum on condition of keeping a school, which is held in the house occupied by him as church clerk.

(l) The expenses are for house rent. In addition to the charge for house rent, government furnishes these schools with forms, desks, &c. Reading and spelling lessons, slates, and other school materials have been supplied by the School Commission in Cape Town. There are Dutch private schools in the village of Swellendam and Caledon. There are private schools for Hottentots, viz.:—at Gnadenthal, two Sunday schools for persons above seven years of age, two

daily schools for girls and boys, and an infant school supported by the Moravian Missionaries; at Elim, one daily school and an infant school; at the Caledon Institution (Zuurbrak), one daily school for children, and an infant school supported by the London Missionary Society. Many persons engage private schoolmasters at their own houses, and the children of the neighbourhood generally attend there for instruction. The number of these private schoolmasters in the district is between 30 and 40, and about 250 children attend them.

(m) The 22*l.* 10*s.* is a charge for house rent. Government is also at an expense of 3*l.* 7*s.* 6*d.* per month for the hire of a school room. There is an infant school supported by voluntary contributions. The house and school rooms, being public property, are kept in repair by government. Desks, forms, &c. are supplied when required. There is a school at Pacaltsdorp, in the district of George; and one at Bethelsdorp, at Hankey, and at Enon, in the district of Uitenhage, for the children of the Hottentots belonging to those institutions which are supported by the respective missions. In the town of Uitenhage there is also a school for free persons of colour, kept in a building belonging to government. The teacher of it is also church clerk, for which he receives 25*l.* per annum from the church funds.

(n) The total number of scholars instructed in the private schools is 123 males and 122 females. There are several private schools in the several field cornetries of this district, but they are not permanent, a teacher being occasionally employed for short periods in a family. The appointment of teacher has been vacant since the resignation of the late master in November, 1835.

* The prison bears the name of the place where it is situated.

General scale of Prison Rations throughout the Colony.—[B. B.] To each female prisoner, per diem, $\frac{1}{2}$ lb.; to each child between 7 and 14 years, ditto, $\frac{1}{2}$ lb.; to each child under 7 years, $\frac{1}{4}$ lb.; to each male convict at hard

labour, or each person detained as a witness, per day, either meat $1\frac{1}{2}$ lb., bread 1 lb., or in lieu, meat $1\frac{1}{2}$ lb., bread $\frac{3}{4}$ lb.; to all other male, criminal or civil prisoners confined for debt, per day, meat 1 lb., bread 1 lb. All persons admitted for medical aid, or prisoners under medical treatment, receive such rations only as the surgeon may direct. The daily allowance of rice, vegetables, soup, &c. in addition to the above mentioned articles, remain as heretofore customary in the several districts, but when the full rations of bread and meat are issued, the allowance of rice does not exceed 2 oz. for each ration.

X. The affairs of the colony are administered by a governor (salary £,000l. per annum), nominated by the Crown, aided by an Executive Council, composed of the Commander of the Forces, the Chief Justice, the Auditor-general, Treasurer, and Accountant-general, the Secretary to the Government. There is a Legislative Council appointed by the government in England, at the recommendation of course of the Colonial Government. The members of this council (of whom five are official) after two years' sitting, hold their seats for life; their debates are carried on with open doors.

At present each district or *drostly*, has a Civil Commissioner, who acts also as a resident magistrate, aided by a relative number of unpaid justices of the peace: a district is divided into several smaller divisions, termed Veld Corneties, over which an officer with that title presides. The Veld Cornet is in fact a sort of petty magistrate, empowered to settle trifling disputes within a circuit of 15 or 20 miles, according to the extent of his authority, to punish evil-doers, to call out the burghers (over whom he presides) in the public service, and act as their officer on *commandoes*, (reprisals on the frontier tribes for incursions into our territory) to supply government with relays of horses or oxen, when wanted, &c. &c.; he receives no salary (except upon the Kaffre frontier), but is exempt from all *direct* taxes.

The municipal body at Cape Town consisted of a *Burgher Senate*, under the form of a President, four members, Secretary, and Town Treasurer: the President remaining in office two years, and receiving 3,500 rix-dollars per annum; he was succeeded by the senior member, and the election of a new member took place by the Board (not by the inhabitants or burghers, paying the taxes), three persons were returned by the majority of votes, and their names sent to the Governor, who selected one out of the three.

This Senate, if properly elected and managed, might have been productive of much good; it had the superintendence of the cleansing and lighting of the public streets, and of preventing encroachments on public lands, it regulated their sale, supervised weights and measures, and the reservoirs, water-pipes, and fire-engines; attended to the assize of bread, the slaughtering of healthy cattle by the butchers, levied and received the town taxes, and the commando tax, when that was necessary, and watched over the prices of various articles of prime necessity. Under proper regulation and management such a body, duly elected, would have been of considerable assistance to a government, by relieving it of all minor details of management, in the concerns of private life; it has recently, however, been dissolved, without any substitute being provided.

When the Cape became a British colony the Dutch criminal and civil laws were in operation; these, particularly the latter, have undergone some modification, torture has been abolished; the penalty of

death attaches on conviction to murder, rape, coining money, and high treason; transportation, for theft to a large amount, or crimes of a serious or violent nature, not liable by the Dutch law to death: for minor crimes, the punishment is banishment to Robben Island (at the entrance of Table Bay), with hard labour; imprisonment in the *Tronk* (prison), or flogging. Criminals are tried by a jury, of whom there must be at least seven members present, and when the offence is capital a majority must agree in the verdict, if seven only be present; if more than seven jurors attend, and opinions as to guilty or not guilty are equal, the prisoner is acquitted; by the new charter the English system has been brought into operation. A criminal is allowed, on his trial, to employ an advocate to examine and cross examine witnesses, and to argue for him on all points of law in his defence.

The civil law is modified by that of the Dutch code,—the 'Statutes of India,' collected by the Dutch towards the end of the seventeenth century, and declared to be applicable to the Cape by a Bataavian proclamation, dated February, 1715,—and by various colonial laws, or where these are found deficient by the *Corpus Juris Civilis*. The equal division of property on the demise of a parent, added to the absurd custom of measuring distances by a man's walk in an hour, or a horse's canter, render litigation frequent.

The laws are administered by a Supreme Court, presided over by a Chief Justice (salary 2,000l.), and two Puisne Judges (salary each 1,200l.), who hold four terms in the year—February, June, August, and December. Circuit Courts, civil and criminal, are also held after the English form (the colonists complain of a great want of uniformity in the law proceedings of the circuit courts; two of the judges being English, act according to that system—whilst the third being Scotch, follows his national customs, hence different procedures prevail, to the no small annoyance of suitors; it is indeed to be hoped that some more suitable qualification were requisite for our colonial judges than mere party influence, or aristocratic connexions); for the better execution of the law, the office of High Sheriff, with the appointment of Deputy Sheriffs for each district, was created in 1828. Small debts under 20l. in the Cape district, or 10l. in the country, are recoverable in the Court of the Resident Magistrate, from whose judgment there is an appeal; in Cape Town if the sum in dispute amount to, or exceed 5l., or in the country districts 40s. Debts exceeding 20l. sterling in the Cape district, and 10l. in other parts of the colony, are recoverable only in the Supreme Court, where, however, smaller sums may also be recovered (under the Charter of Justice of 2 William IV., the jurisdiction of the Court extends to sums not exceeding in amount 40l.); claims founded on a note, or bond already due, require no witnesses; book debts, and others, not founded on liquid (note of hand or other acknowledgment) documents, require to be proved by witnesses; and a person, suing *in forma pauperis*, is allowed an advocate by the Court, to inquire into his case.

A court of Vice-Admiralty sits for the trial of offences committed on the high seas, and for the adjudication of maritime disputes. The commissioners appointed by letters patent under the Great Seal, dated 13th March, 1832, are the Governor, or Lieutenant-Governor, Members of Council, the Chief and Puisne Judges, the Commander-in-Chief and flag-

officers of ship commanders or for the settlement granting of magistrates, who respective distr Pence and the

2. They must no

officers of ships of war, and also the captains and commanders of ships of war. Matrimonial courts, for the settlement of conjugal differences, and the granting of marriage licenses, are held by the Commissioners, who are also resident magistrates, in their respective districts, aided by the local Justices of the Peace and the Veld Cornet.

The tenures of land are various; the most ancient are those which are called "*loan farms*," which were granted to the early settlers, at an annual rent of 24 rix dollars, the lease being perpetual, so long as the rent be paid. Three such farms are calculated to contain nine square miles, and there are about 2,000 in the colony. Gratiuity lands are a customary copyhold, and pay about the same rent as "*loan farms*." They were grants by favour, and are chiefly situate in the neighbourhood of the Cape district. Freehold estates are grants made to the first settlers, of about 120 acres each, and are also situate chiefly around the first location made at Table Bay. The greater part of these tenures are held on account of a sum of money being paid down at once, on the primary occupation of the settlers. Quit rents were derived from the use of waste lands lying contiguous to an estate, the occupant of the latter consenting to pay at the rate of 1s an acre, under a lease granted for 15 years.

The last and most usual system in operation is perpetual quit-rents, the annual payment depending upon the quality and circumstances of the land; these estates vary upwards to 3,000 *morgen*, or 6,000 English acres. Transfers of land, or mortgages (except the bond called *Skygene*), are legal only when registered in the debt book, at the Colonial Office at

Cape Town, where Commissioners sit to superintend such matters; and no sale or transfer can be made till after a settlement of all bonds, either by the mortgager consenting to continue his loan on the securities of the new purchaser, or by repayment; a fresh transfer is then made, and the purchaser is placed in possession of a complete title, without the possibility of fraud, of claims withheld, or mortgages concealed, at an expense of a couple of sheets of paper, and a trifling payment—thus avoiding a ponderous mass of conveyance.

There are 12 barristers (L.L.D's), and 17 attorneys in Cape Town, and 5 in the country. Many of the attorneys are notaries, and some of them practise as barristers.

The Dutch language, formerly used in the courts of law, is now superseded by the English.

The establishment of king's troops in South Africa is three regiments of infantry—the head quarters of two being at Cape Town, and of the other at Graham's Town. There is a strong detachment of royal artillery, a party of the royal engineers, and a regiment of mounted riflemen, termed the Cape cavalry, the privates and non-commissioned officers of which are principally Hottentots.

The following was the strength of the corps on 1st January, 1837. One major, 3 captains, 4 lieutenants, 3 ensigns; staff—1 adjutant, 1 surgeon, 1 quartermaster; 25 sergeants, 12 buglers, 21 corporals, 334 privates, 366 horses.

The military stations along the Kaffre frontier, with the strength of each corps at the respective posts, was in 1831 as follows:—

Cape Town, as head-quarters, gives off detachments, similar to the above, to Simon's Town, and some outposts.

Our naval force is under the command of a Rear-Admiral, whose authority extends along the E. and W. coasts of Africa, and to Mauritius and St. Helena.

The Dutch established a system of subordinate magistrates at the Cape of Good Hope, which we have retained. The following are the instructions under which they act, dated 5th October 1837:—

Instructions for the Field-Cornets of the Colony of the Cape of Good Hope.—1. The field-cornets must, each in his respective ward, be considered as subordinate magistrates, and, as such, be respected accordingly.

2. They must not forget that, as magistrates, they

can only acquire the regard and respect of their fellow subjects by treating them with propriety, and according as they themselves set the example of what they require of others.

3. They must endeavour to obtain a perfect knowledge not only of the lands within their wards, but of the productions thereof, and their capability for other produce.

4. They must take particular notice of the conduct and deportment of the inhabitants of their wards, in order to be at all times prepared to report thereon to superior authority, when required.

5. They must endeavour to settle disputes among the inhabitants which might lead to animosities and litigation, and to reconcile the parties.

6. The field-cornets shall never suffer either friendship or enmity, pleasure or displeasure, fear or favour, to influence their official conduct. They would otherwise render themselves unworthy of their situation; they would themselves become culpable; and in cases where evil consequences did result therefrom, they might be found guilty of having violated their oath.

7. Should they find themselves placed within the fourth, or nearer degree of consanguinity with, or be brother-in-law to a person against whom they are called to act; should they be on terms of close intimacy, or, on the contrary, at enmity with the same, they shall in such cases acquaint the civil commissioner of the district therewith, in order that some other person may be appointed to perform the duty required.

8. The field-cornets are obliged particularly to watch for the maintenance of order and tranquillity in their district, and not to suffer it to be disturbed by any one.

9. All laws, proclamations, ordinances, or other instructions, expedited by, or on the part of, the Government, for the use of the country districts, shall be communicated to the respective field-cornets, in order, by each of them in their duty to see that they are punctually obeyed. The field-cornets must endeavour, by example and exhortation, to promote obedience to the same; and they shall, without delay, report any disobedience to the nearest magistrate or clerk of the peace.

10. In addition to the general laws, proclamations, ordinances, or other instructions from Government, they will receive and obey all orders given or addressed to them by the civil commissioners of the district.

11. Every field-cornet must keep an exact register of all the inhabitants of his district above 16 years. This register is, in the first instance, to be formed from personal examination; and after that, every youth on having attained the age of 16 years, shall be obliged immediately to report himself to the field-cornet, in order to be entered upon the register.

12. The male population in each district shall be divided into *three classes*—first, from *sixteen to thirty*; the second, from *thirty to forty-five*; the third, from *forty-five to sixty* years of age. This classification field-cornets must attend to in calling out the armed burgher forces of their wards, and observe in each class to call for personal service,—first, upon single men, in preference to those who are married, and on those who have no particular vocation or pursuit, in preference to those who have. Those persons who have attained the age of 60 years are exempt from personal service, except in case of extreme necessity.

13. From these registers they shall form and transmit to the civil commissioner of the district, in the month of October, a list of the young men who have, within the year ending in September, attained the age of 16, in order that they may be duly enrolled.

14. The field-cornets shall erase from their registers all such persons who have died—wherefore, all heads of families are obliged to report, or cause to be reported, in writing, to the field-cornet of their ward, within *forty-eight hours*, the death of any individual who shall have died in his family above the age of 16 years, on pain of being fined *twenty-five rix dollars*.

15. Should any inhabitant meet with an untimely death, either by his own violence or from accident, the body shall not be buried until the field-cornet of

the ward, after having held an inquest thereon, shall have permitted the burial to take place.

16. The field-cornets shall send all prisoners under sufficient guard to the field cornet next on the road, who is bound to receive them, and in like manner to forward them on, and so on in succession, until they arrive at the place of their destination.

17. And in case that on the road by which the prisoners are to be conducted no other field-cornet resides, then shall the field-cornet who has arrested the prisoners, or the one to whom they are delivered over, send the prisoners on to the next inhabitant, although not a field-cornet, who shall, as also the other inhabitant next in succession, be obliged to receive the prisoners and forward them on, until they reach the place of their destination, without any distinction, and whether such inhabitants residing along the road belong to such district and ward, or not. The officers of justice, or such other to whom the prisoners are finally to be delivered over, are to take particular notice that this regulation has been strictly obeyed.

18. No field-cornet shall summon the inhabitants to meet armed, without special orders from the civil commissioner; except, however, on information received by him, that the peace of his ward is endangered by gangs of vagabonds within it, or by hostile assemblages of such persons without. In such cases the field-cornet is enjoined to call out the necessary number of armed men from the ward, to protect the inhabitants and their property from violence and depredation.

19. In such cases the field-cornet shall immediately report to the civil commissioner of the district, and also acquaint the neighbouring field-cornets with the particulars, who shall be obliged, whenever required, to assist him with armed men of their own wards.

20. The field-cornets shall report all extraordinary occurrences in their wards, not herein mentioned, to the civil commissioner: And whereas every possible occurrence cannot be foreseen, it is recommended to the discretion of every field-cornet, in cases when the delay occasioned by the time required for making the report, and to receive orders, which might be attended with injurious consequences to the public or to individuals, in such cases immediately to check the evil, and, if necessary, to oppose it by force.

21. In case any vessel on the coast should send a boat on shore, the field-cornet shall make himself acquainted with the following particulars, viz. the names of the vessel and the commander; to what nation belonging; whence, and whither bound; number of the crew and passengers; cargo; how long from the last port; why put in; crew if healthy; and if not, what malady on board; and whatever additional information he can obtain.

22. In case the vessel be in want of provisions, the field-cornet shall provide a supply of such as may be requisite from day to day on payment being made; but he shall allow no communication between the vessel and the shore, further than is necessary, and prevent desertion of the seamen.

23. He shall prevent the landing of goods of any description from such vessel; and should he suspect the existence of any contagious disease on board, he shall suffer no one to land, but cause the supplies to be handed into the boat, with the utmost caution.

24. But when any vessel approaches the shore in such distress, that to await orders from the civil commissioner might endanger the ship or cargo, the cargo may then be landed; but the same must then remain

under the joint super-cargo, or postal be received.

25. Whenever of this colony, forthwith acquiesce shall also immigrate.

26. The field shall arrive at the endeavour as much and property be the field-cornet of men, and, if neighbouring field-cornets shall in places to remain one time by the river, or other event their proceed.

27. They are addressed to, or public authorities any of the inhabitants utmost speed.

28. The field-cornet moving people their families and in their wards, the civil commissioner and to order the field-cornets shall in places to remain one time by the river, or other event their proceed.

29. When the necessary to establish ready assemblage of field-cornet, when informed shall forthwith disperse signal post, to be repeated.

30. At the same such persons belong to other corps, and the ward, do forthwith and he shall give satisfaction of his such other service.

31. The field-cornet shall pay attention of the public roads to be obeyed, the them, or which prescribe to them power to induce means of forming

32. The field-cornet with each other in wards have a command to assist on promote the welfare

33. Whenever a of his ward, he must inhabitants of his obliged to do so due to conform himself these regulations, sible.

34. A field-cornet shall be obliged to whose district that another person. And the retiring case, shall give up

under the joint care of the field-cornet and the owner, super-cargo, or commander, until orders for its disposal be received from competent authority.

25. Whenever any vessel is cast on any of the shores of this colony, the person first discovering it shall forthwith acquaint the field-cornet therewith, who shall also immediately report it to the nearest magistrate.

26. The field-cornet shall, until some magistrate shall arrive at the place where the vessel is stranded, endeavour as much as possible to save the persons and property belonging thereto; and for this purpose the field-cornet shall order in time a sufficient number of men, and, if necessary, call in the assistance of the neighbouring field-cornets.

27. They are to take care that all letters or papers addressed to, or transmitted by Government, or other public authorities, which may come into the hands of any of the inhabitants, be forwarded by them with the utmost speed.

28. The field-cornets shall watch attentively, that no roving people keep themselves in their wards with their families and cattle. On discovering such people in their wards, they are immediately to report it to the civil commissioner and the nearest magistrate, and to order them forthwith to depart. The field-cornets shall in particular not suffer the *Uitspan* places to remain longer than *twenty-four hours* at any one time by the same persons, unless the swelling of a river, or other unforeseen circumstance, should prevent their proceeding.

29. When the state of the country may render it necessary to establish signal stations for the more ready assemblage of the means of defence, the field-cornet, when informed of the firing of an alarm gun, shall forthwith dispatch a trusty person to the nearest signal post, to watch that the signals be properly repeated.

30. At the same time he is to take care that all such persons belonging to the armed burghers, or any other corps, and who at that period are within his ward, do forthwith repair to their respective posts; and he shall give the necessary orders for the preservation of the peace, and, when required, render such other services as circumstances may demand.

31. The field-cornets, each in their respective wards, shall pay attention to the improvement and repairs of the public roads, and particularly obey, and cause to be obeyed, the orders they may receive respecting them, or which the proclamations and ordinances prescribe to them; and shall use all means in their power to induce the inhabitants to contribute the means of forming and keeping up the same.

32. The field-cornets shall mutually correspond with each other in all matters in which their several wards have a common interest; and they shall endeavour to assist one another in all things tending to promote the welfare of the colony.

33. Whenever a field-cornet goes beyond the limits of his ward, he must appoint one of the most able inhabitants of his ward to act for him, who shall be obliged to do so during his absence; and in all things to conform himself to whatsoever is contained in these regulations, for which he will be held responsible.

34. A field-cornet intending to remove to another ward, shall be obliged to acquaint the civil commissioner to whose district he belongs therewith, in order that another person may be appointed to succeed him. And the retiring field-cornet, in such or any other case, shall give up to his successor all books and

papers belonging to his situation, including these present instructions.

35. The field-cornets shall not, either themselves, or their wives, children, or inmates in their families, receive any presents or gifts from any one who, on account of the field-cornet's situation, has any thing to hope or fear of him.

All field-cornets holding office for 15 years in one district receive the advantages usually accorded to field-cornets after 25 years service. No field-cornet is obliged to serve more than five years, unless with his own concurrence, and with the approval of the civil commissioner of the district.

XI. It is difficult to convey a clear idea of the mode of managing the finances of the colony, owing partly to the variety of items, which enter into the Treasurer-General's budget at the Cape. The best mode of explaining the receipts and disbursements will be to give the following statement of the gross revenue of the colony of the Cape of Good Hope, from 1st January to 31st December, 1832:—

Gross Revenue.—Port dues, 1,269*l.*; stamp dues, 16,837*l.*; Lombard Bank, interest, &c. 15,633*l.*; Discount Bank, discounts, 4,616*l.* Customs: Duties, 3 per cent. on English and 10 on foreign, 13,385*l.*; store rent, 357*l.*; wharfage, 1,482*l.*;—total, 15,225*l.* Postage, 3,877*l.*; land rent, 7,310*l.*; fines, 954*l.*; advances recovered, 426*l.*; surcharges recovered, 100*l.* Assessed taxes: Capitation tax, 4,912*l.*; tax on servants, 177*l.*; tax on horses, 1,362*l.*; tax on carriages, 2,801*l.*; tax on stock and produce, 3,162*l.*; tax on income, 2 per cent. 2,561*l.*; water tax, 1,107*l.*; house tax, 920*l.*; tax for keeping in repair the Cradock-hill road, 122*l.*; arrear taxes, due prior to the 31st March 1829, 413*l.*;—total, 17,544*l.* Market duties, 3,727*l.*; auction duties, 12,508*l.*; rent of butchers' shambles, 840*l.*; rent of quarries, 26*l.* Tithes: On wine and brandy, 2,754*l.*; on grain, 1,619*l.*;—total, 4,374*l.* Transfer dues, 7,227*l.*; tolls and ferries, 3,131*l.*; fees of office, 6,345*l.*; pound fees, 182*l.*; Somerset Hospital, 535*l.*; miscellaneous, 8,113*l.* Total revenue, 130,808*l.*

The port dues are derived from a tax of 4*d.* per ton levied on all vessels entering Table or Simon's Bay (Algoa Bay is exempted), for the purposes of trade, and if for refreshments, or any purposes other than trade, 2*d.* per ton. This is independent of wharfage dues or permits, which are, however, light.

Stamp dues, with the exception of the assessed taxes, form the largest item in the budget; they are extremely numerous, but appear to be well graduated, and if not pressing on the lower classes of the community, they form an unexceptionable item of revenue. At the Cape, stamps are requisite on all transfers of property, on bills, on promissory notes, on bonds passed before notaries, on wills or codicils, on various law papers, and all deeds of contract, &c., on powers of attorney, civil or legal appointments or promotions, on licenses for the sale of wines, spirits or beer, for keeping an inn or eating-house, and for exercising the following trades—auctioneers, bakers, retail shopkeepers, pedlars and hawkers, game-killers, fire-wood carriers, brewers or distillers, for waggons and boats, clubs and societies, public billiard tables, marriage licenses, letters of burghership, adoptions, leave to go to the hot baths, and permission to quit the colony. The foregoing is a formidable list, and some petty items might well be excluded.

The *Lombard and Discount Banks*, which are government establishments (see *Monetary System*), yield a considerable item of the revenue, n the

shape of interest on loans made, profits on banking, &c.

The customs are derived from a duty of 3 per cent. levied on all British and British colonial goods, and of 10 per cent. on all foreign goods imported either in British bottoms or in vessels of certain nations in amity with Great Britain; 10 per cent. is also levied on all goods imported into the Cape from the East Indies. It has been proposed to increase the import duties, and thus augment the revenue, so as to admit the abolition of some of the vexatious items of taxation.

Postage is not very heavy, considering the slowness of communication throughout the colony. From Cape Town to Simon's Town, a distance of 25 miles, it is 3d. for a single letter; and from Cape Town to Graaff Reinet, 500 miles distant, it is 1s.; ship letters brought into the colony, single, 4d.; double, 8d.; one ounce, 1s. Newspapers sent inland, or from the colony, 1d. each. The mails are conveyed throughout the colony by post-riders on horseback; the riders are generally Hottentots, or slaves, in the service of the post-holders, who are boors, residing near the high roads. The post-holders receive an allowance, regulated by the number of hours' journey which they engage to carry the mails. The improvement of the roads in the colony, under the able superintendence of Major Mitchel, has tended much to facilitate the transfer of the mails; and, with increased knowledge and intercourse, the post-office ought to be a source of revenue, which it can scarcely be considered at present.

The assessed taxes are payable under the provisions of ordinance, No. 57, passed March 5, 1829. The capitation tax is levied on every free male above 16, and on every free female, widow or unmarried, at the rate of 6s. yearly.

Exceptions.—Free male servants taxed as servants at 10s. yearly; officers in the King's service on full pay, or employed as military men in the colony, and their families; field commandants, field cornets, and provisional ditto; all pensioners not receiving more than 1s. a day, and having no other means of livelihood; all persons of the border tribes, for two years after their first entering the colony; and all apprentices under ordinances 49 and 50.

On every free male servant, or slave above 16, employed as coachman or driver of carriage, taxed at 4l. 10s., or 2l.; and every groom or stable servant, porter, footman, house-servant, or cook, 10s.

Exception.—Military officers' servants.

Horses.—On each riding or draught horse used for pleasure carriages, 10s.; on each saddle horse used in trade or agriculture, 1s.

Exception.—Military men, according to the number allowed to their rank.

Carriages.—On all sorts of vehicles with four wheels, used or hired out for pleasure, 4l.; on all ditto, with two wheels, 2l.; on all four-wheeled vehicles used in trade or agriculture, 5s.; on all two-wheeled ditto, 2s. 6d. Coachmakers, agents, &c. not liable for carriages not used or lent out.

Income Tax.—Two pounds per cent. on all whose incomes exceed 30l., excepting from farming stock chargeable with Oppgaaf.

Exceptions.—Military officers, half-pay ditto, and their wives and children receiving colonial half-pay, for the amount of such half-pay only.

N.B. These taxes were imposed in lieu of former ones, known as the Kaffre Commando, taxes on cattle and grain, levied by the late Burgher Senate, and the extraordinary assessment on ordinary oppgaaf, autho-

rised by proclamation of 1st April, 1814, sec. 14. All these were of course abolished.

Direct Taxes, Ordinance 57.—Capitation, servants, &c. Do. 78. Houses and stores, and water rate.

On Produce and Stock.—Each head of black cattle, 3d.; each breeding horse, 3d.; 25 sheep or goats, 2d.; each muid of wheat, barley, rye, and oats, 3d.; each leaguer of wine, 6d.; ditto, brandy, 1s. 1½d.

The other items explain themselves by their names—the auction duties are large—most sales taking place in that manner. The tithes on wine, and brandy, and grain are derived from duties levied on these articles as they enter Cape Town, which it is now proposed to abolish.

Revenue of the Cape of Good Hope since the conquest by the English. [Found among Lord Wellesley's papers].—

From 1st October, 1795, to 30th September, 1796, R. Ds. 111,264. 22,522.

From 1st October, 1796, to 30th September, 1797, R. Ds. 201,893. 40,378l.

Three months from 1st October, 1797, to 31st December, 1797, R. Ds. 90,549. 18,109l.

XII. There are no early accounts obtainable of the commerce of the Cape. I begin with showing the quantity of shipping engaged in the trade of the colony.

The following is independent of numerous vessels of divers nations, touching at Table and Simon's Bays for refreshments. The colonists have, as yet, very little shipping of their own, and it is employed principally in the coasting trade. List and tonnage of colonial and coasting vessels in 1834: Mary, brig, 116; Conch, brigantine, 100; Mary, schooner, 72; Kate, ditto, 83; Ligonier, cutter, 55; Knysna, brig, 142; St. Helena, schooner, 175; Leda, bark, 188; Urania, brig, 132; Jane and Henry, brigantine, 146;—total number, 10, tons, 1209.

No steam vessel has yet been introduced into the colony, though the adaptation of such, for keeping up the intercourse between Cape Town and Algoa Bay, is indisputable; a diligent search should be made for good coals, for if these were discovered, a steam intercourse with India and Australasia, via the Cape of Good Hope, would speedily follow. The annual commerce of the colony may be estimated at nearly a million sterling in imports and exports.

A summary view of the Trade and Navigation of the Colony of the Cape of Good Hope in the year ending 5th January, 1836.—[B. B.]

An account of the weight of Cape hides imported into the United Kingdom in each of the seven years, ending with 1832; 1826, 7,520 cwt.; 1827, 12,207 cwt.; 1828, 12,963 cwt.; 1829, 15,844 cwt.; 1830, 19,957 cwt.; 1831, 16,900 cwt.; 1832, 13,193 cwt.

The imports at the Cape consist of every variety of articles of British manufacture, and the extent to which our trade can be carried, it is difficult to state, for an outlet has now been opened for calicoes, kerseys, ironmongery, gunpowder, &c., in exchange for ivory, hides, gums, horns, &c.

XIII. The Monetary System at the Cape has been very imperfect, and its fluctuations have caused great distress to private individuals, and much ruin to merchants and others, whose active pursuits require a frequent conversion of capital; a brief account of the past, will be, therefore, requisite, in order to form a correct idea of the present state of currency and banking transactions in the colony.

Holland, up to the period of 1780, had forwarded every sort of supply, with exact punctuality, to the Cape, but the war between England and America, and the part taken by the Dutch, left the colonists of the latter power in extreme distress. To provide for the exigencies of the occasion, Governor Van Plattenberg was compelled to create a paper currency, and from 1782 to 1784 (when he resigned the Cape government) 925,219 paper rix-dollars were thrown into circulation, on no other security than the good faith of the Dutch government, and a solemn promise of redemption when peace would permit the accustomed supplies to be sent from Holland. This stipulation was fulfilled by the annihilation between 1787 and 1789 of rix-dollars 825,904, by paying that amount in specie and bills on Holland, leaving only 99,326 rix-dollars afloat and in circulation.

A precedent was thus set for the creation of paper rix-dollars on any emergency. In 1793 the colony laboured under a very pressing inconvenience from want of a sufficient circulating medium, the amount not then exceeding 200,000 rix-dollars; with a view, therefore, to public relief, and for the purpose of checking those usurious transactions which naturally accompany a contracted currency, the Dutch Commissaries-General (Nederberg and Trikenneics) formed

the institution of a Lombard or loan bank; 1,000,000 rix-dollars were declared to be an adequate circulation for the colony, and 680,000 rix-dollars were advanced by various instalments to form the capital of the loan bank, under the direction of a president, two commissioners, a cashier, and book keeper, all appointed by government. The commissioners were authorised to lend money at 5 per cent. on mortgage of houses and lands, gold, silver, jewels, and merchandises, or other articles that could "lie still" for 18 months, but not longer; and on goods of a more perishable nature for a period not exceeding nine months.

In 1795, the circulation of Cape rix dollars (*exclusive* of the capital of the Lombard bank) had risen to 611,276, without resting on a shadow of real property, or even on a Government engagement, the rix dollar being merely a counter, passing current in all the various purchases and sales within the colony. On the British conquest of the Cape, in 1795, Governor Sleuskens obtained from the humanity of General Craig a stipulation, that the Government farms and public buildings should be a security to the holders of 611,276 rix dollars, leaving the loan of the Lombard bank protected by its own mortgages. Thus our capture of the colony gave the paper money-holders the first security they had; and on our evacuation, in 1803, this security was given over in an improved state to the Dutch Government. Even the additional sum of 300,000 rix dollars, created by General Craig, in consequence of his inability to procure bills on England at par, was accounted for and honourably discharged by the British government, whose conduct formed a striking contrast to the Batavian Government, which, in breach of its faith, received bills and specie for the 330,000 rix dollars, but without cancelling paper to a like amount of rix dollars.

On our evacuation of the colony, in 1803, the whole amount of paper in circulation was about 2,000,000 rix dollars, nearly half of it bottomed on a nominal security, for the Government lands and public buildings were by no means worth the sum they were pledged for. This security was, however, in a great measure, swept away by the Dutch Government, in a proclamation of 1804, calling in the *whole* of the old paper money, and issuing a new set of paper dollars, without any reference to priority, thus setting the question of a preference of security at rest, and gaining 32,000 rix dollars by the non-appearance of old paper on the re-issue.

From this period to 1806, there was an additional coinage of 300,000 rix dollars. The Batavian Government, under French auspices, seems not to have been at all scrupulous as to the means by which money was to be acquired. A part of the Government farms, which were pledged as a security for the paper rix dollars, were sold for 80,000 rix dollars, without the annihilation of the currency, for whose faith it was supposed to be a security; in fact, not a paper dollar was recalled or repaid by the Batavian Government after 1789. In this sad state, as regards the credit of Government, we again became masters of the Cape, when every mercantile transaction was lifeless, and the currency was withheld by the timorous in the apprehension of loss, and by the usurious in the hope and in the exaction of high interest. In order to relieve the public wants (says the *civil servant*, who wrote such an admirable account of the Cape, in 1823, and to whom I am indebted for many valuable suggestions and much information), "Lord

Caledon, in that unceasing endeavour to benefit the colony which marked his Lordship's conduct throughout his administration, established a bank of discount in 1808, and advanced as a capital, without interest, the sum of 100,000 rix dollars from the treasury. Six per cent. was the legal rate of interest at that time; but the bank was allowed to receive deposits, and to pay an interest of five per cent. on all sums left there for a year, or more, and the public offices were instructed to carry their daily receipts to the bank, thus making a considerable addition to its floating balances." In June, 1810, Lord Caledon authorised the creation of 1,000,000 rix dollars, half of which were to be appropriated to the use of the loan bank, and the remaining 500,000 for the purchase and repair of public buildings. This latter sum was not issued until 1814 by Lord Howden, and wholly expended before the close of his government.

Lord Charles Somerset, on his arrival in 1814, changed the wise system of deposits sanctioned by Lord Caledon. Notice was given that no more would be received, and that those in hand would be discharged at the end of the year. The withdrawal of the interest on deposits inflicted a severe blow on the progressive prosperity of the colony. The measure was adopted on the plea that, on any serious alarm, the whole amount of deposits (about 1,000,000 rix dollars) might be withdrawn, with no other penalty than a forfeiture of the interest, and the capital of the bank being only 100,000 rix dollars, its ruin would be certain. This was, however, a very problematical event; and to avoid a distant, remote, nay almost impossible contingency, a certain and immediate evil, fraught with distress to the whole colony, was madly incurred. Bank discounts were now procurable with great difficulty—mercantile speculation (the life and soul of a commercial people, like the English and Dutch) abated—a provision was held out to the renewal of usury, and an encouragement to hoarding, two of the most serious disadvantages that can take place among a small community. After enduring all the misfortunes which such an unstatesman-like step may be supposed to have created for seven or eight years, the Cape Government, desirous of remedying the distress which it had caused, notified in 1822 the issuing of 200,000 rix dollars in Government debentures, bearing four per cent. interest. Those who have the slightest knowledge of the bearing of financial measures on a mercantile community, will admit that so partial a measure could not restore freedom of discount and a rapid interchange of the representative of property, whether it be in paper or metallic money.

The progress of the paper circulating medium on these transactions was, from 1802 to 1822, as follows. In 1802, R. Ds. 1,200,000; in 1806, R. Ds. 2,083,000; in 1811, R. Ds. 2,580,000; in 1814, R. Ds. 3,100,000; in 1822, R. Ds. 3,005,276. The paper rix dollars thus created were issued at the rate of 4s. sterling, and for a long period maintained this value, being nearly on a par with the Spanish dollar; but, from various causes, a great depreciation took place in the value assigned to the rix dollar. Some ascribed this result to an over-issue beyond the wants of the colony; others to the circumstance of 500,000 being too suddenly thrown into circulation by Lord Howden, in addition to the 500,000 lent to the bank by Lord Caledon; several thought it was because paper money had no real value, not being hypothecated on land or a portion of the revenue. Perhaps each and all of these causes contributed to lessen the value of the 4s.

rix dollar; but to these must also be added the return to cash payments in England in 1819, which of course affected the rates of exchange between the Cape and Great Britain. The depreciation was rapid, and its effect on the colony may be seen from the fact, that 3,000,000 rix dollars at 4*s.*, yielding a nominal sterling of 600,000*l.*, was reduced in a few years to 3,000,000 rix dollars at 1*s.* 6*d.* (the rate now fixed by Government), yielding but a nominal sterling of 225,000*l.* The result of such a change to a small community may be imagined; many were ruined—the quiet transactions of commerce paralysed, and the colony has never since recovered from the shock.

There is no private bank in the colony, but a Lombard (or loan) and discount bank before referred to, under the control of Government, who derive profit from the discount of bills.

The capital of the Lombard was in 1830—In the Long Loan Fund, 80,952*l.*; Short ditto, 1,315*l.*; Agricultural ditto, 11,643*l.*; total, 93,910*l.*

The funds of the Discount Bank, consisting of deposits belonging to Government, and to those individuals who have opened accounts with the Bank amount to 125,000*l.*; its capital being about 30,000*l.*, and its average annual discounts 410,000*l.*

Amount of Paper Currency in Circulation.—[B. B. 1836.] The amount of red stamped rix dollar notes, created and issued in lieu of old cartoon notes, up to May 1832, as before reported, was—

	R. Ds.	£.
of which were destroyed to the end of 1834 (and replaced by sterling notes sent from England)	2,667,960	or 200,097
	760,000	= 57,000
	1,907,960	= 143,097
and during 1835 (and replaced as above)	1,566,000	= 117,450
	341,960	= 25,647
In 1836, notes of the same description (also replaced by sterling notes) have been destroyed to the amount of	356,200	= 26,715
Shewing an excess on Red stamped notes of	14,240	= 1,068
To which is added Cartoon notes destroyed in 1835, and replaced by sterling notes	6,440	= 483
Total excess	20,680	or 1,551

The notes which have formed this excess, have undergone the strictest scrutiny of the parties whose signatures they bore, and as there could be no doubt of their being genuine, they could not be rejected by the treasurer. Reports have at different times been made to H. M. government as to the causes of the excess in the colonial paper currency, and it may therefore be unnecessary to detail them here. As all rix dollar notes, however, of whatever description, have now been called in, to be replaced by sterling notes, which do not afford the same facilities for forgery as the former paper, and as the present mode of cancellation will totally preclude their fraudulent reissue under any circumstances, it may be expected that this species of currency will, before long be placed on a permanent footing, as well in regard to the exact amount in circulation, as to security against future excess. During 1835, a sum of R. Ds. 18,042

or 1,156*l.*, consisting of the last instalments of the Stellenbosch Fire Loan, and the balance of the Short Loan Fund of the Lombard Bank, in old Cartoon notes, also in excess, was destroyed, but as it was not replaced by other currency, it has been omitted in the foregoing return.

In lieu of the rix dollar notes destroyed to the end of 1836 (with the exception of those alluded to in the preceding paragraph) Government promissory notes (sent from England) have been issued as under: To the end of 1834, 57,000*l.*; in 1835, 117,933*l.*; in 1836, 26,715; total, 201,648. Of which have been withdrawn from circulation in 1836, and cancelled, 5,185*l.*; balance, 196,463*l.*; and replaced by new to the same value, 5,185*l.*; making the official amount of paper currency in circulation, as far as can be ascertained, 201,648*l.*

There are, however, without doubt, unobjectionable notes of each description of the former currency still outstanding; but as before stated, the amount must now be inconsiderable, although no estimate can be formed thereof with any prospect of accuracy.

The Government promissory notes in circulation on 31st December 1836, consisted in 93 notes of 100*l.* each, 9,300*l.*; 620 ditto of 50*l.*, 31,000*l.*; 3,027 ditto of 20*l.*, 60,540*l.*; 4,414 ditto of 10*l.*, 44,140*l.*; 3,393 of 5*l.*, 16,965*l.*; 14,703 of 1*l.*, 14,703*l.*; total, 201,648*l.*

Amount of Coin in circulation.—[B. B. 1836.] The British currency introduced into the colony from the year 1825 (when it became a legal tender) to 1829 inclusive, by the Commissariat, to meet the expenditure of the military establishment, amounted at the end of the latter mentioned year to 169,800*l.* in silver; 2,200*l.* in copper, and 80,000*l.* in specie, have been imported by the Commissariat, during the year ending 31st March 1836. A considerable diminution has, however, undoubtedly taken place in the amount, nearly 40,000*l.* having been shipped to Ceylon and Van Diemen's Land by the Commissariat; and it is known that remittances have at different periods, been made by merchants and others to England and elsewhere, in specie. About 16,000*l.* in gold has been imported into the colony by private individuals during 1836. The present circulating medium in metal, may therefore be computed at nearly 150,000*l.*, exclusive of such sums of gold coin as are also occasionally introduced by passengers of vessels and others, but which cannot be at all estimated, the whole being naturally liable to much fluctuation from a variety of causes, which must also prevent any exact or approximate calculation of the amount.

The coins in circulation are exclusively British, consisting in gold of sovereigns and half-sovereigns; in silver of a few crowns and half-crowns, shillings and sixpences; and in copper of pennies, halfpennies and farthings; there is no colonial coin, Her Majesty's government having established the British coin as the circulating medium of this colony, and having directed that British silver money should be a legal tender in discharge of all debts, due to individuals and the public, at the rate of 1*s.* 6*d.* sterling, for each paper rix dollar, and so in proportion for any greater or less sum; the value of the rix dollar, formerly the only currency in the colony, was accordingly fixed at that rate by ordinance of the Governor in Council, No. 2, bearing date the 5th day of June 1825. The coins in circulation have not been cut, pierced or otherwise defaced or altered; neither have their respective values been diminished or augmented.

Foreign Coins.—are in very small quantities, and are

not used as a currency. Spanish dollars depend almost entirely on the demand for them. The rix dollar is 1*l.* 3*s.* 11*d.*, and the rix shilling 1*s.* 8*d.* Other coins of about 1*s.* 6*d.* exceed 1*s.* 1*d.*

All public accounts have been rendered in private persons, and the use of the rix dollar, shillings and pence.

Thus 107 Dutch ter bushels, or four bushels, and 11 sch

Cloth Measure.—one yard = 34 17-2

The proportion t yards is generally t but the real one is 1

not used as a circulating medium. They are principally Spanish dollars and a few rupees. Their value depends almost entirely upon the occasional demand for them. The usual exchangeable value of the Spanish dollar is from 3s. 9d. to 3s. 10d., or at most to 3s. 11d., and that of the sicca rupee from 1s. 6d. to 1s. 8½d. Other rupees when in demand, are disposed of at about 1s. 6d. each, but the general price does not exceed 1s. 1½d. or six skillings.

All public accounts have since 1st January 1826, been rendered in British currency; although amongst private persons, the old mode of reckoning in rix dollars, skillings and stivers is in many instances still in use. The proportions are as follow:—

1 stiver is = 0s. 0½d.
6 stivers = 1 skilling = 0s. 2½d.
8 skillings = 1 rix dollar = 1s. 6d.

Course of Exchange.—[B. B. 1836.] Prior to the 6th June 1825, the exchange between this colony and Great Britain, was chiefly regulated by the average rate at which the Commissariat Department disposed of its bills on the Lords' Commissioners of His Majesty's Treasury. But as on the above-mentioned date, the value of the dollar was fixed by law at 1s. 6d. sterling, by order of the Governor-in-Council, No. 2; the exchange has also in a manner become settled at that rate, with slight variations, depending upon demand. By the instructions to the Commissariat, bills negotiated on the British Treasury, were issued at a payment of 101l. 10s. for every bill of 100l., being at a premium of one and a-half per cent. against the colony or remitter; which in some measure regulated the premium on private bills; although the latter were often sold at par, and sometimes even at a discount, according to the credit attached to the parties, whose bills or endorsements were in the market. But the great want of funds in the military chest, consequent upon the great increase of expenditure, caused by the late Kaffre war, has for some time past necessitated the sale of Bills on the British treasury at par; and even at this rate, few applications have been made for their purchase. Private bills therefore are at a higher rate of discount than formerly.

The standard measures of this colony are similar to those of Amsterdam.

Liquid Measure.—A legger = 152 old gallons, or about 126 7-11ths imperial; a half do. = 76 do., or about 63 7-22 do.; a pipe = 110 do. or about 91 7-11ths do.; a half do. = 55 do. or about 45 9-11ths do.; an aum = 38 do. or about 31 2-3rds do.; a half do. = 19 do. or about 15 5-6ths do.; an anker = 9½ do. or about 7 11-12ths do.; a half do. = 4¾ do. or about 3 23-24ths do.; a flask = 19-32 do. or about 4946 do.

There can be no fixed proportion between gallons and the bottles in use here, as the latter are of various sizes and descriptions, but generally a gallon is reckoned equal to 4½ bottles.

Corn Measure.—A schepel = 82-107 old Winchester bushel, or 743-1000 imperial; a muid is 4 schepels = 328-107 do. or 2972-1000 do.; a load is 10 muids = 3280-107 do. or 2972-100 do.

Thus 107 Dutch schepels are equal to 82 Winchester bushels, or four schepel are about three imperial bushels, and 11 schepels are about one quarter.

Cloth Measure.—One ell = 27 Rhyndland inches; one yard = 34 17-20ths do.

The proportion between Dutch ells and English yards is generally taken at three yards to four ells, but the real one is 100 yards = 129 1-9th ells.

Land Measure.—144 square inches = 1 square foot Rhyndland; 144 do. feet = 1 do. rood do.; 600 do. roods = 1 do. morgen do.

A morgen is generally taken to be equal to two English statute acres; but the true proportion is considered at 49 71-100 morgen to 100 acres.

The weights generally in use in this colony, are of the standard of Amsterdam, and were introduced by the Dutch Government. They consist of pounds subdivided into 16 ounces or 32 loots each. The proportion generally made use of here in comparing Dutch with English weight, is 92lbs. Dutch to 100lbs. English: the true proportion, however, is considered to be 91 4-5lbs. Dutch to 100lbs. English or avoirdupois.

The pieces of weight admitted to assize, are from 50lbs. down to one loot, or the 32nd part of a pound, which is regarded as equivalent to ½ an ounce, though slightly exceeding that proportion. [B. B. 1836.]

XIV. Corn, wine, wool, provisions, oil, aloes, and fruits are the staples of this fine colony, but many other articles are either produced in the country, or obtained from the neighbouring nations. There is an annual exportation of corn, and it brings, as flour, a higher price at the Mauritius, and other markets, than the best American.

The corn of the new settlers in Albany suffered much at first from the 'rust,' but it has now almost disappeared, and the introduction from Bengal of a hard flinty grain, termed 'Patna wheat,' has been productive of good. Barley, oats, and Indian corn thrive well; the latter is admirably adapted for fattening swine, the export of which, in the shape of hams, bacon, and salt pork, is yearly increasing. Two crops of potatoes are raised in the year, of a succulent and yet mealy quality; and the nutritive property of every article of provisions is abundantly exemplified in the fat and healthy appearance of the people. Agriculture is as yet quite in its infancy at the Cape: the Dutch boors are so heedless of manure that they allow it to accumulate until it reaches a mountainous height, when they set fire to the mass as a means of getting rid of it; some of these masses (which would be so valuable in England) have been known to continue burning for seven years.

Wine has long been a staple export of the Cape. The culture of the vine was introduced at first into the colony by the refugee Protestants, after the revocation of the edict of Nantes, but it received a considerable stimulus, when the dominion or influence of Napoleon extended over the greater part of the wine countries of Europe; the British Government wisely considered it desirable to encourage the growth of the vine in our own colonies, beyond the power of foreign nations, and by a government proclamation of the 19th of December, 1811, the merchants and cultivators of the colony of the Cape of Good Hope, had their attention directed to the wine trade as "a consideration above all others of the highest importance to its opulence and character;" this proclamation, after *authoritatively* demanding from the settlement a serious and lively attention to their interests, promised "the most constant support and patronage on the part of government, and that no means of assistance should be left unattempted to improve the cultivation, and every encouragement given to honest industry and adventure to establish the success of the Cape commerce in this her great and native superiority." This proclamation was followed by another offering premiums to those who planted most largely, and

those who produced the best wines, by the promise that the old channels of this trade should be reopened and new ones formed, and by a variety of regulations, all strongly evincing the lively interest which government felt in promoting the trade, and which was fully ratified and confirmed by the Act of July, 1813, admitting Cape wines to the British market at *one-third* of the duty then payable on Spanish and Portugal wines. The consequence was a rapid and constant increase from the above period of the quantity of wine produced, so that in the space of eleven years, the annual produce (as appears from official returns) rose in the wine districts from 7,335 leaguers (117 gallons imperial) to 19,230 leaguers.

In this state the trade continued till 1825, when the duties on all wines underwent an alteration, and notwithstanding the urgent remonstrances of the merchants, and others interested in the trade of the colony, supported by the consistent patronage of Earl Bathurst, who was still the Colonial Secretary, the protection was suddenly reduced from 28*l.* to 11*l.* per pipe, with a further prospective reduction of about 2*l.* 15*s.* per pipe at the end of eight years. The effect of this reduced protection was the immediate ruin of some of those largely engaged in the trade, and the general depreciation, to a great extent, of the property of those who were embarked in it, and from which it was impossible for them to withdraw their capital.

The property embarked in England, and in the colony, in the trade in Cape wine, was recently estimated as follows:—vineyard lands and growing vines, 1,200,000*l.*; buildings, stores, vats, &c. in the country, 60,000*l.*; buildings, vats, &c. in Cape Town, 300,000*l.*; brandy, casks, &c. 100,000*l.*; wine in Cape Town, 125,000*l.*; stock in bond, in England, about 10,000 pipes, at 12*l.* each, 120,000*l.*:—total, 1,905,000*l.* A very small portion of the immense capital thus employed can be withdrawn under any circumstances, even by its present possessors. In the gradual decay, and ultimate ruin of the trade, it will perish and be utterly lost to the country.—Even the soil in which the vines are planted, is in general unfit for any other species of profitable culture. Wheat cannot be raised upon it, and what is now an extensive vineyard would be altogether contemptible as a grazing farm. The fustage, buildings, &c., might at once be committed to the flames. Cape wines have formerly had in general a peculiar *raciness* which much injured their sale in European markets; this was most probably owing to the avidity of the wine farmers, who attended more to *quantity* than *quality*; whenever the latter has been attended to, the wine produced at the Cape has been equal to that prepared in any part of the world.

The produce of wine and brandy in 1821, and subsequent years, is thus given in a manuscript prepared at the Colonial Office, and not before printed. The quantity in leaguers (a leaguer being 152 gallons) 1821, 16,254 of wine; 1,205 of brandy; 1824, w. 16,183, b. 1,326; 1828, w. 20,405, b. 1,413; 1831, w. 18,467, b. 1,382; 1832, w. 16,973, b. 1,394*½*.

Wool will, in time, be one of the greatest and most profitable staples of the Cape; by an unaccountable want of foresight it has long been neglected; but stimulated by the example of New South Wales, the colonists are now actively engaged in endeavouring to replace the coarse woollid, or rather hairy sheep (of which they possess 3,000,000) for the fine and pure blood breed of that animal, whose numbers at the Cape now amount to upwards of 50,000—the

wool from which has brought 2*s.* 6*d.* per lb. in the London market. The British settlers in Albany have taken the lead, and are at present importing Saxon and Merino rams from England and New South Wales, the former bringing 15*l.* per head, and the latter 30*l.* per head. Algoa Bay or Port Elizabeth, as it is now called, has thus increased its exportation of fine wool; 1830, 4,500 lbs., value 222*l.*; 1831, 10,600 lbs., value 551*l.*; 1832, 19,700 lbs., value 935*l.*; 1833, 44,896 lbs., value 2,649*l.*; 1834, 59,266 lbs., value 3,279*l.* It is a singular circumstance that some of the original Merino stock of New South Wales were rejected at the Cape, and then carried on to Sydney, where they were purchased by Mr. M'Arthur: had the Africans received the proffered boon, they would probably now be exporting a quantity greater than that of their brother colonists (see New South Wales.)

The fineness of the climate, requiring no winter provender, and the great extent of upland soil and park-like downs, with the numerous salsola and saline plants, so admirably adapted to prevent the duke or rot, shew the adaptation of the colony for a vast sheep fold, capable of supplying an almost indefinite quantity of the finest wool; and, together with New South Wales and Van Diemen's Land, rendering England not only totally independent of supplies from Germany and Spain, but really furnishing a much finer and more durable and elastic wool, which will enable us to maintain our superiority in woollens against foreign competition: this is a view of the subject which it behoves a statesman to attend to.

Provisions, particularly salt beef, ought to be a larger staple than it is, but I trust it will augment in quantity as it certainly has improved in quality. I can bear testimony to the excellence of the Cape salt provisions: among other instances I may mention one, namely, that when in H. M. S. *Leren*, in 1823, I, as caterer of our mess, laid in six month's salt provisions at Algoa Bay, the price paid for the beef being, as well as I remember, 14*d.* per lb.; we were cruising for the next six months in the tropics, but the last cask of beef was as fresh and as juicy as the first, while the contrast between the Cape and our ration provision from Cork was very great, the advantage being decidedly in favour of the former. At present, cured meat is pretty largely exported to the Mauritius, and other places, but it should be used for victualling our navy at the Cape, India, and West Africa stations, the contractors being placed under the same supervision as at home, every cask being examined and branded before shipment, and a heavy penalty attending any default. Its importation should be permitted into England at a gradually decreasing rate of duty, until it was perfectly free.

Oil.—The fisheries of the Cape have not yet been sufficiently attended to: during the calving season, whales come into every bay on the coast, to bring forth their young, and thus, in some seasons, a good number of these immense creatures are taken; but there have been no vessels fitted out for whaling along the coast, or among the islands to the northward of Madagascar, where the sperm whale abounds, and where, under a genial climate, and an atmosphere never troubled with tempests, the American whalers fill up in a few weeks. Even in Delagoa Bay, almost a part of the colony, I have seen 20 whale ships, English and American, but not one from the contiguous settlers at the Cape. A good banking system would afford a stimulus to such profitable undertakings, and the Africans in this instance, as well as

in that of wool example set the hours at New might also be ex luxuriantly whe oil, collected by may be obtained tribes to the east The *Aloe* plan

Manufactures, Mil Cape Town.—There flour mill, two tan breweries, three cano factories; one soap lery, two whale fish fields, ovens at the mill, one iron found quarries of coarse h Lion's Rump. The the whale fishery,

in that of wool, would do well to profit by the example set them by their more enterprising neighbours at New South Wales. Oil from vegetables might also be extensively collected; the olive thrives luxuriantly where planted, and a rich and peculiar oil, collected by expression, from the *sesamum* plant, may be obtained in large quantities from the native tribes to the eastward and northward.

The *Aloe* plant grows indigenously in most parts

of the colony, and a considerable quantity of the inspissated juice has been exported for some years, a large portion being probably used as a substitute for taxed hops in England.

Fruits of a dried nature, including apples, apricots, peaches, pears, &c., have been long in great demand. Hides, horns, ivory, gums, are also valuable branches of produce.

* The quantity in the vicinity of the town is very inconsiderable. † A small quantity of these articles are cultivated in the District, for which no duty is paid. The quantity raised by the farmers is not stated. ‡ No accurate accounts have been received of either stock or produce for the last two years. § Undefined. || The produce raised in the Cape Town District is principally used by the grower. The prices annexed are the average of sales at the public market.

Manufactures, Mines, and Fisheries. [B. B. 1836.]—**Cape Town.**—There are seven water mills, one steam flour mill, two tanneries, one hat manufactory, four breweries, three candle manufactories, five snuff manufactories; one soap manufactory; one spirit distillery, two whale fisheries, four brick fields (two brick fields, ovens at the military lines), one steam sawing mill, one iron foundry. There are no mines, but eight quarries of coarse building stone at the foot of the Lion's Rump. There are seven boats employed in the whale fishery, &c.; four whales were taken in

Table Bay last year, yielding about 10,000 gallons of oil, valued at 1,200*l*. Small fish of various descriptions are also caught in large quantities, but their value is unknown. Very few whales entered Table Bay during this year. A manufactory of hats of a superior quality has been recently established in Cape Town; those previously manufactured were of a coarse quality, intended chiefly for the use of the country people. Many articles of Colonial growth or produce are annually exported.

Cape District.—There are two breweries near New-

lands, five tanneries, three whale fisheries, seven water mills and 40 wind and horse mills for grinding. No mines, but quarries of coarse building stone and lime stone. There are 17 boats employed in the whale fishery, &c. Seven black whales were taken at Kalk Bay last season, when 10 boats were employed, value of fish, 350*l*. Small fish of every kind are taken along the coast for home consumption.

Stellenbosch.—There are two water mills and one horse mill in the village, two tanneries in the village, three tanneries at the Paarl, three tanneries at Hottentots Holland, one water mill at the Paarl, two water mills at Hottentots Holland, one water mill at Madderat, and various water mills and tanneries throughout the district; one tile kiln near Stellenbosch. This is the principal wine district of the colony; grain and all sorts of fruit are also produced here in abundance. The supply of oranges is very considerable, and the finest chestnut trees are found here. The average quantity of wine is estimated at about 10,000 leaguers, and of brandy about 700 leaguers, per annum. There are no mines in this district, but stone for building purposes is found in different parts: there are no quarries. Limestone is found near the sea coast at Hottentots Holland, and is burnt by some inhabitants of that place and of Madderat. The value is 1*s*. 6*d*. per half aum. There are several boats, employed at Hottentots Holland, in taking small fish, which are either consumed there or sold to persons present on the spot. Seven boats are employed in whale fishing, &c.; 11 whales caught this year, valued at 1,550*l*.

Worcester.—One water-mill in the village, and three hat manufactories. Two hat manufactories at Clan William. No mines of any description, and one quarry of coarse building stone in the neighbourhood of Worcester. Lime is also found in very great quantities along the Oliphant's river, but is not used. With the exception of the hatteries on a small scale, where coarse hats are made for the use of the farmers, there are no manufactories in this district. Each person is provided with either a water, horse, or hand mill, to grind their corn for family consumption. Two tanneries on a small scale are also met with in this district, one at Worcester and one at Tulbagh. On most of the farms the people tan skins for their own use. A quarry of coarse slate, used for building, has been opened near the town, and is there worked by the builder. No mines of any mineral substance have as yet been found in this district; and if mines were discovered, which, from the nature of the country and external appearance of the mountains, is not improbable, the want of labourers, fuel, and a convenient sea-port, would render the working of them unprofitable to the undertaker. This being an inland district, having no communication with the sea coast, and no navigable rivers, no ships or boats are built or employed by the inhabitants; neither are any of them engaged in fisheries. In the division of Clan William, there are also a couple of hatteries of the same description, and for the same purposes as at Worcester, besides a few mills for grinding corn for home consumption, and tanneries for the preparation of skins for domestic use. There are no manufactories, mills, or works of any description in this division; neither have any mines or mineral substance been found in it. This division borders on the west, from the Groenwally to the Kouise River on the Atlantic Ocean. The mouths of several periodical and a few constant rivers, of which latter the Oliphant's River is the principal, are met in the tract of this coast; but

are all barred, either by reefs of rocks or by bars of sand, which unfavourable circumstance prevents any commercial enterprize on this coast.

Swellendam.—Three water mills at the village; two horse ditto at ditto; three tanneries at ditto; two water mills near ditto; two tanneries in the village of Caledon; one water mill in Caledon; two ditto near ditto; one ditto at Gnadenthal; one ditto at Elim; one tobacco manufactory at Gnadenthal; one tannery at ditto; one tannery at Elim; one cutlery manufactory at Gnadenthal. There are no mines but quarries of stone for building along the coast, particularly in the eastern part of the district. Limestone is also found along the coast. The quantity of lime burnt is very trifling, and only for private use or sale in the village. There are between 40 and 50 water and horse mills, and as many tanneries, in various parts of this district. Fishing boats are also kept by every farmer residing near the sea coast for fishing for private consumption. Seals are caught on Dyer's Island, near Cape L'Agulhas. The island belongs to Government, and is let for three years at 15*l*. 10*s*. per annum. There are four warm springs in the district. Fish of every description are caught in this district, but for private consumption only.

George.—Three hat manufactories; one saddle manufactory; three tanneries; one water mill; one horse mill; all in the village of George. No mines; but quarries along the coast, one of coarse building and mill stones, but the latter are seldom used, on account of their softness. There are six boats employed in the whale fishery, &c. Only two whales were taken this year, valued at 300*l*., which is ascribed by the proprietors of the fisheries, with great reason, to the number of American vessels constantly fishing on our coasts. There is a seal island in Mossel Bay, which has been let for a term of seven years at 13*l*. 7*s*. 6*d*. per annum. Much corn is annually exported from Mossel Bay.

Uitenhage.—Two hat manufactories; two tanneries; also several saw, wind, and water mills. There is a lead mine, situate about 12 miles from Port Elizabeth, but it is not worked. Six boats employed in the fisheries. Quantity caught this year, five whales, value 660*l*., and 681 seals, value 444*l*. The annual value of other fish caught averages 45*l*. The St. Croix Islands have been let for the term of seven years for 187*l*. 10*s*., and the Bird and Chuam Islands at an annual rent of 20*l*. 1*s*.

Beaufort.—One hat manufactory in the village; one ditto in Nieuwveld.

Graaff Reinet.—Five hat manufactories in the town, and several mills and hatteries in various parts of the district.

Colesberg.—One hat manufactory; one ditto at Camdeboo.

Albany.—Two water mills near Graham's Town; one ditto on the Koonap; two ditto at Bathurst; one wind-mill at Graham's Town; two ditto near Bathurst; one ditto near Kafir Drift; one ditto at Trappes Valley; six tanneries in various parts of the district; one hat manufactory at Graham's Town; two breweries at ditto; one tile-kiln near ditto; two candle manufactories at ditto. No mines of any description are worked in this district. Several quarries of good limestone are found between Bathurst and the Fish. Abundance of stone for building purposes is found in every part of the district, and numerous quarries have been opened, the most remarkable of which is situated near Bathurst. The material here found at a few feet below the surface is a stratum

of indurated lime quarried, but the Many indications not yet been ascertained rich and abundant return for the investment of found caught here in the

Somerset.—1 ditto near ditto two tanneries; Several parts of limestone, and quartz and at Cradock. II. The island was Don Pedro Mascareguese Government Governor Almeida. Cerné. The Portug any settlements the

of indurated limestone; it is easily worked when first quarried, but hardens on exposure to the atmosphere. Many indications of iron ore are met with; but it has not yet been ascertained whether the ore is sufficiently rich and abundant to hold out the hope of a profitable return for the investment of capital in the establishment of foundries or iron-works. Small fish are caught here in abundance at the Kourie River.

Somerset.—Two water-mills in the village; two ditto near ditto; two ditto in the Tarka division; two tanneries; one hat manufactory; one brewery. Several parts of the district of Somerset abound with limestone, and quarries have been opened near Rodeval and at Cradock, both on the banks of the Fish River. Saltpetre is sometimes met with in the fissures of the rocks at the northern end of the district; but it has never been found in sufficient quantities to attract attention to the collection of it. The quantity of lime produced annually may be estimated at 16,000 bushels; the value to the burner is 100*l*. Many parts of the Fish River which runs through this district abounds with mullet and eel; but they are merely taken by the inhabitants for private consumption. Somerset is a pastoral district, and trade is only engaged in by a small proportion of the inhabitants. The northern and eastern parts of the district contain some of the finest pasturage of the colony. From these quarters the Cape Town market is annually supplied with cattle and sheep for slaughter. A few farmers have turned their attention to the production of fine wool.

Quantity of fish caught in 1836 throughout the colony—18 whales, 681 seals and small fish; in value 3,349*l*. Total number of boats employed, 47.

The value of property has thus been estimated:—*Property annually created, and consumed or converted into Moveable or Immoveable Property*.—Animal food for 150,000 mouths, at 200 lbs. each per annum, 30,000,000 lbs. at 1½*d*. per lb. 187,500*l*.; fish for 150,000 mouths, at 25 lbs. per annum, 3,750,000 lbs.

at 1½*d*. per lb. 7,800*l*.; vegetables and fruit for 150,000 mouths at 1*d*. per day, for 365 days, 228,125*l*.; butter, eggs, milk and cheese for 150,000 mouths, at 1½*d*. per day for 365 days, 114,062*l*.; grain raised of all sorts, 600,000 bushels, at 3*s*. 6*d*. per bushel, 105,000*l*.; wine, 1,700 leaguers, at 60*s*. per leaguer, 51,000*l*.; brandy, 1,285 leaguers, at 180*s*. per leaguer, 11,565*l*.; luxuries, such as tea, sugar, coffee, &c. for 150,000 mouths, at 1½*d*. per day for 365 days, 114,062*l*.; wearing apparel, 5*l*. each, 750,000*l*.; household furniture, at 10*l*. per house, 100,000*l*.; increase of agricultural stock, viz. horses, sheep, &c., 600,000*l*.; net income from commerce, trades, and professions, 550,000*l*.; value of exports not included in the foregoing, 100,000*l*.; total annually created, 2,929,114*l*.

Moveable Property: horses, 100,000, at 10*l*. each, 1,000,000*l*.; horned cattle, 500,000, at 2*l*. each, 1,000,000*l*.; sheep, 3,000,000, at 3*s*. each, 450,000*l*.; goats, 600,000, at 2*s*. each, 60,000*l*.; swine, 160,000, at 1*l*. each, 160,000*l*.; poultry, value 100,000*l*.; furniture for 10,000 houses (I estimate a house for each 15 mouths), at 50*l*. each, 500,000*l*.; clothing for 150,000 persons, at 10*l*. each, 1,500,000*l*.; machinery, farming implements, &c., 800,000*l*.; bullion, including coin, 150,000*l*.; ships, boats, &c., 150,000*l*.; merchandize of all kinds, 500,000*l*.; total moveable property, 6,910,000*l*.

Immoveable Property: houses, 10,000, at 100*l*. each, 1,000,000*l*.; land cultivated, 300,000 acres, at 25*l*. per acre, 7,500,000*l*.; land uncultivated, but valuable, 10,000,000 acres, at 5*s*. per acre, 2,500,000*l*.; private stores, buildings, &c., 300,000*l*.; roads, bridges, and wharfs, 500,000*l*.; forts, gaols, hospitals, and other public buildings, 1,000,000*l*.; vines, plantations, &c., 800,000*l*.; total immoveable property, 13,600,000*l*.; property annually created, 2,929,114*l*.; ditto moveable in the colony, 6,910,000*l*.; ditto immoveable in ditto, 13,600,000*l*.; total, 23,439,114*l*.

CHAPTER II.—MAURITIUS, OR ISLE OF FRANCE.

SECTION I. Mauritius, or Isle of France, is situated in the Indian Ocean, 40 leagues to the N. E. of the Isle of Bourbon, and 160 from the great island of Madagascar, between the parallels of 19.58 and 20.32 S. Lat. and the meridians of 57.17 and 57.46 E. Long. It is nearly elliptical in form, measuring in length, about forty miles from N. to S., and 32 from E. to W., and comprises an area of 432,680 superficial English acres, or 676 square miles.

The greatest diameter of the oval is 63,780 yards, and its breadth 44,248 yards. Some estimate the length at 35 and the breadth at 20 miles.

II. The island was discovered in the year 1507, by Don Pedro Mascarenhas, a navigator of the Portuguese Government in India, under the orders of Governor Almeida. Mascarenhas named the island *Cerné*. The Portuguese do not seem to have made any settlements there during the period they were

masters of it, which comprehended almost the whole of the sixteenth century; they appear merely to have placed some hogs, goats, and monkeys on *Cerné* and Bourbon, in the event of any of their vessels being thereon wrecked.

In 1580, Philip II. of Spain having become possessed of the Government of Portugal, acquired the nominal sovereignty of *Cerné*, but totally disregarded it during the period of his sway, viz. for eighteen years. The Spaniards were unable to maintain the possessions in South America, and the West Indies, originally belonging to Portugal: while the successful Belgic or rather Dutch insurgents of the Castilian Monarchy appeared in India, to dispute with the successors of Vasco De Gama the sovereignty and commerce of the rich territories of the oriental world, and in 1593, the Dutch Admiral, Van Nerck, at the head of a large squadron, landed on the unin-

habited Isle of *Cerné*, took possession of it and named the place *Mauritius*, in honour of the Prince of Orange.

The Dutch do not appear to have, at this time, settled permanently on Mauritius; they, however, occasionally touched at the island to water. In 1613, an Englishman, Captain Castleton, commanding an English ship, visited Mauritius, and found it still uninhabited; in which state it continued until some pirates in the Indian seas settled on its shores; but at what precise period it is impossible to say. The Dutch had, undoubtedly, regular governors appointed to the island, who resided at Grand Port, from 1644 to 1712, when Mauritius was finally abandoned by the Hollanders, and subsequently colonized by the French, with a few settlers from the contiguous island of Bourbon; its formal occupation not taking place until 1721, when the name was changed from *Mauritius* to Isle of France, and the territory given by the King to the French East India Company, under whose sway it remained from 1722 to 1767. The inhabitants, however, for a long time were chiefly composed of adventurers, refugees, or pirates, from all nations, and it was not until 1730, that the Home Government and the French East India Company began to pay attention to the island, by sending engineers and other persons to form a regular establishment; the real founder of the colony, however, was M. de la Bourdonnais, who was sent out as Governor-General of the Isle of France, Bourbon, &c. in 1734.

Up to the arrival of M. de la Bourdonnais at Mauritius in 1735, the French East India Company had been at considerable expense in maintaining the island, which was considered to be solely fit for a refreshing station for their ships, while Bourbon was made a great coffee plantation. Bourdonnais, in order to save the Company's finances, introduced the culture of the sugar cane into Mauritius, established manufactures of cotton and indigo, attended to agriculture and commerce, destroyed the Maroon negroes, founded a Court of Justice, made roads, fortified the coast, formed aqueducts, arsenals, batteries, fortifications, barracks, wharfs, &c. and in the eleven years, during which his government lasted, changed the whole face of the country, laying the foundations of prosperity which subsequent disasters however almost entirely destroyed. [The History of the Colony during the French Revolution will be found in my *Colonial Library*, vol. iii.]

The Marquess Wellesley, when Governor-General of India in 1800, projected and fitted out an expedition destined for the conquest of Mauritius and Bourbon—the command of which was given to his brother Arthur then Lieut. Colonel Wellesley, who was to have assumed the governorship on their conquest. [See Despatches of the Marquess Wellesley, vol. i. to v.] The subsequent expedition of the Indian army to Egypt frustrated that against the Mauritius, but it was urgently pressed on the home government by the noble Marquess that no time should be lost in destroying the nest of French pirates which these islands harboured. In all their enterprizes against British commerce the French were materially assisted by a set of desperate American speculators who infested the whole of our possessions in the east; they brought fast-sailing ships to the Mauritius, fitted them out, met them at fixed stations, gave intelligence of the sailing of all our trade; bought not only the cargoes of the prizes for the American markets, but the hulls of the ships to carry back to our own settlements; and there are strong reasons to believe col-

sive bargains were entered into in anticipation of the captures made in consequence of such intelligence; in short this island was made a rendezvous for all the freebooters of every nation to fit out privateers and commit depredations on English property.

To put a stop to these proceedings, a strong armament of 12,000 troops, with 20 ships of war, was therefore despatched from India, and from the Cape of Good Hope, for the conquest of Mauritius in 1810:—a landing was effected some distance from Port Louis, and after the French troops and national guard had suffered several repulses a capitulation was entered into, and the Mauritians became subject to the crown of Great Britain. At the peace of 1814, the acquisition was ratified, and the island has ever since remained a colony of the empire.

The following is a list of the governors of the island, French and English, since its colonization:—*For the French East India Company*—M. de Myon, 1722; M. Dumas, 1726; M. de Maupin, 1728; M. Mahé de la Bourdonnais, 1735; M. David, 1746; M. de Lozier Bouvê, 1750; M. Magon, 1755; M. Boucher Desforges, 1759. *For the King*—M. Dumas, 1767; M. de Steinhart, 1768; M. le Chevalier Desroches, 1769; M. le Chevalier de Jernay, 1772; M. le Chevalier Guirand de la Brillanne, 1776; M. le Vicomte de Souillac, 1779; M. le Chevalier Brunni d'Entrecasteaux, 1787; M. le Comte de Conway, 1789; M. Charpentier de Cossigny, 1790; M. le Comte de Malartic, 1792; M. de Magallon de la Morlière, 1800; M. Decan, Captain-General, 1803. *For his Britannic Majesty*—M. R. J. Farquhar, 1810; Major-General H. Warde, 1811; M. R. J. Farquhar, 1811; Major-General G. J. Hall, 1817; Colonel J. Dalrymple, 1818; Major-General R. Darling, 1819 and 1823; Sir R. J. Farquhar, Bart. 1820; Lieut.-Gen. the Hon. Sir Galbraith Lowry Cole, 1823; Major-Gen. Coiville, 1827; Major-Gen. Nicolay, 1833.

III. The Mauritius is one of the most picturesque and romantic looking islands in the eastern hemisphere; the land rises from the coast to the middle of the island, and chains of mountains intersect it in various radii, from the centre to the shore; there are however, three principal ranges, in height from 1,800 to 2,800 feet above the sea, mostly covered with timber, and few presenting, except at their very summits, bare rock.

Extent of the Island of Mauritius and the Height of its Mountains.—This island offers in its outline, so many bays, arms of the sea, and points or promontories, that it is difficult to determine exactly its superficies. The following distances may be considered as nearly exact:—From the signal post of the Butte aux Sables to that of the Port La Fayette, 9,399 fathoms 7 ft.; from the Port La Fayette to the signal of the Puits des Hollandais, 5,399 fathoms 7 ft.; from the Well of the Hollandais to the rock of the Pointe du Diable, 7,914 fathoms; from the Pointe du Diable to the Mont Chaour, 10,863 fathoms; from Mont Chaour to the signal of the Savane, 7,839 fathoms; from the signal of the Savane to the S. W. point of the island, 11,286 fathoms 2 ft.; from the S. W. point to the Piton of the Little Black River, 6,271 fathoms 4 ft.; from the Piton of the Little Black River to the Coral Point, 4,639 fathoms 2 ft.; from the Coral Point to the Point of the river Bellisle, 5,619 fathoms 2 ft.; from the river Bellisle to the Sand Plain, 4,677 fathoms 3 ft.; from the Land Point to the middle of the Great River, 2,518 fathoms; from the Grand River to the Cannonier's Point,

10,064 fathoms to the Sank mark, 4 the 'and, 90,66 is equal to 45 Pa

Mean of 3 years.	30.1497

10,664 fathoms 5 ft.; from the Cannonier's Point to the Sank mark, 4,214 fathoms 7 ft. Circumference of the land, 90,661 fathoms 2 ft. This circumference is equal to 45 Paris leagues, or $35\frac{1}{2}$ marine leagues.

In supposing that the arms of the sea are nearly compensated by the tongues of the land, we must reckon on the superficies of the island being 480 millions 744,002 (toises carrés) or 432,680 roods of 100 perches, a perch consists of 20 feet.

Height of the Mountains.—Signal Mountains of Port Louis to the foot of Mât de Pavillon, 996 feet; Long Mountain, at the foot of the Mât, 534; Piton, at the foot of the Mât, 804; Summit of the Pouce, 2,484; Summit of the Peterbot, 2,520; Piton of the Little Black River, 2,564; Piton of the Canot, 1,644; The Corps de Garde, 2,214; Rempart, 2,376; From the highest summit to the Trois Mamelles, 2,052; Morne de la Rivière Noire, 1,698; Morne Brabant, 1,698; Montagne de la Savant, 2,130; Montagne de Creoles, 1,128; Morne du Grand Port, 2,094; Pointe du Diable, 318; Piton du Bambou, 1,932; Piton du Milieu, 1,812; Piton de Fayence, 1,338; Coin de Mire, 486; Ile Longue, 324; Ile Blanche, 162; Ile Ronde, 990; Parasol, 498.

In the centre of the island there are plains of table land several leagues in circumference, and of different elevations, forming the several parts of the districts of Moka and Pleins Wilhems. From among the ranges of mountains several streams take their source, running generally through deep ravines, pervious however to the breeze and sun's rays.

The two principal ports are that of *Port Louis*, to the N. W. or leeward, and the capital of the island, and the other that of *Mahebourg* or Grand Port on the S. E. or windward shore.

Port Louis (the seat of Government), with a population of 26,000, of whom 16,000 are apprentices (erst slaves) and 3,000 whites, is a very neat town, well laid out, and now that stone are being substituted for wooden buildings, presents a handsome appearance. The shops are numerous and well laid out; the markets admirably supplied, and the water is of crystalline purity.

IV. The appearance of the island and the nature of its material would indicate it to be of volcanic origin. The rocks are disposed in strata, which rising from the sea shore form in the centre of the island an elevated plain upon whose declivity are several rocky mountains. These may be regarded as the remains of an immense volcano which having exhausted itself fell in, either by the effect of a violent eruption or by an earthquake, leaving its firmly supported sides standing. These mountains are composed of iron

stone, and a species of lava of a gray colour, the soil produced from the decomposition thereof forming an earthy substance consisting chiefly of argyl and an oxyde of iron.

The tops of the mountains are in general indented with points like the comb of a cock; the few which have flat summits present the appearance of a pavement, no signs of a funnel being seen in any part.

A bank of coral surrounds the island for the distance of a quarter of a league from the shore, and the several inlets that appear on the coast have all a coral formation at the base.

The soil of Mauritius is in many parts exceedingly rich; in some places it is a black vegetable mould, in others a bed of solid clay or quaking earth, into which a stake of 10 feet in length may be thrust without meeting any resistance.

The surface of the plain at Port Louis, is of coralline or calcareous rock, with a slight covering of vegetable soil; at St. Denis the soil is reddish and lightly spread over a stratum of stone; at the Field of Mars it is a bed of rich clay mixed with flints; but most generally the earth is of a reddish colour mixed with ferruginous matter, which often appears on the surface in small orbicular masses; in the dry seasons it becomes extremely solid, and resembles potters' earth from its hardness; after rain it becomes viscid and tenacious, yet it requires no great labour in cultivation. Many of the plains and vallies are strewn with huge blocks of stone, but there is no real sand in the island.

V. The climate is on the whole very salubrious; there are four seasons at Mauritius; the 1st begins in May, accompanied by S. E. winds, when squalls and rains occur; the 2d, with Sept. or October, when the S. E. changes to the N. W.; the sun now approaches the zenith, warms the atmosphere, causing the rains and winds, which begin in December, when the 3d season commences; this is terminated in March, when the 4th or dry season begins, lasting only about eight weeks. These are the seasons as regards the cultivator, but they may be generally divided into two, when the winds blow from the S. E. to S., and from the N. E. to N., forming a kind of monsoon. The S. E. winds, although they never exceed a certain degree of force, are always more or less strong and violent; and though they give a certain freshness to the air, yet, while they blow, every thing ceases to vegetate. The winds from the S. prevail in winter, and are cold; E. winds are unfrequent, and generally accompanied by abundant rain. The N. W. and W. winds are hot, often weak, interrupted by calms, violent storms, and great rains.

December....	96	77	30	29	E. & S. E.	Showery.	—	—	1

At Black River Post the climate is in general warm and dry, as the rains do not often reach the shore, for the lofty mountains in the neighbourhood arrest and attract the clouds and rain. The months of September, October and November are dry and moderately warm; the mean of the thermometer 79, and the prevailing winds S. E., N. N. E., and N. W. In December, January, February and March, (which form the wet season) the heat is greatest; mean 86, winds N. N. W., W. and S. W., April, May, June cool and refreshing; mean 70, winds S. and S. E. in strong breezes. At the Powder Mills the mean heat throughout the year is at sun-rise 70, afternoon 86, and sun-set 72.

The mountains and eminences make up for the difference of latitude; and although within the tropics, the climate is that of a temperate region.

The S. E. winds prevail for nine or ten months of the year.

The range of weather round the coast is thus shewn; the average being deduced from the different military stations.

Average range of Weather round the Coast—Mauritius.

Months.	Ther.		Weather.
	Highest.	Lowest.	
January..	86	74	Warm and rainy, storms, sometimes thunder.
February	86	74	Violent gales, occasional hurricanes and thunder.
March....	85	74	W. S. E. rain less frequent, heat moderate.
April....	88	73	Fine season, delicious temperature.
May.....	89	70	Winds westerly, dry, and air agreeably fresh.
June.....	80	70	S. E. constant, rain in drops.
July.....	79	64	Ditto strong breezes by day, calm by night.
August....	80	71	Rain more or less daily. mountains cloud-capt.
September	79	68	Ditto, ditto, principally harvest weather.
October..	80	65	Temperate, sometimes warm.
November	83	71	Winds variable, heat increasing, storms.
December	86	73	Ditto, ditto, sun vertical, heat moderated by clouds and rain.

Many of the East India Company's civil and military officers seek and find health at Mauritius; and I have myself invariably found the air, especially at Moka, exceedingly elastic, and giving a pleasing flow of spirits to the mind.

The hurricane months are January, February and March, but these tempests do not occur every year, their return is uncertain. [Full information on the Physical Aspect, Geology, Climate, Animal and Vegetable Kingdom, &c. will be found in my *Colonial Library*, vol. iii.]

6. *Islands of St. Paul* have been named T. and are in lat. 5.23 from the Mauritius to the other islands

an abundance of trees of tree affording very 40 feet. The largest and a half in circumference, two smaller, three miles; and the last arranged circularly, forage for vessels

7. *Peros Banhos*—in number, in 5.23 S. latitude, about 1,260 islands, the largest long, present an extent in breadth, having two the other dangerous the S.

8. *Legueur Island*. by the proprietor M. it derived its name Governor Farquhar

tent of 18 miles in length and three or four in breadth, it contains but about 9,000 acres of arable land; the western coast does not furnish drinkable water. It offers two places for anchorage; the one at the N. is safe and commodious, the other in the S. has but a very narrow entrance. It contains 123 inhabitants. There is a good fishery.

2. *St. Brandon*.—Near the bank of St. Brandon, which is 27 miles long, 12 broad, and 72 in circumference, are seen 12 small islands, forming five groups, one or two leagues apart from each other. This bank, in latitude 16.26, and longitude 59.35, is 246 miles from Port Louis. These islands are used only as a place of security for fishing implements belonging to five persons, who thus gain a livelihood. There is no permanent settlement here. In a great hurricane, these islands are totally submerged.

3. *Diego Garcia*.—Situated in latitude 7.15, and 72.32 E. longitude, and 1,176 miles from the Mauritius. This island, in the form of a horse-shoe, comprises 12 miles from N. to S., and six miles in breadth, forming a bay capable of holding a large number of vessels. The water is saltish, and is found in wells dug in the sand. Its possession has been conceded to three inhabitants of the Mauritius. It produces an abundance of cocoa-nut trees, and wood for burning. The population consists of 275 individuals.

4. *Six Islands*.—Thus named from their number; they are situated in latitude 6.35, and longitude 71.23, 72 miles from Diego, and 1,188 miles from the Mauritius. These islands, arranged in the form of a horse-shoe, present an anchorage of eight or nine miles round, and two fathoms and a half deep. A late inhabitant of the Mauritius is settled there.

5. *Three Brothers*.—Between the Six Islands and the Three Brothers, a distance of 18 miles, are two small nameless islands. The most southerly is very dangerous, on account of the sand banks with which it is surrounded. Those of the N. are accessible at the N.W. The Three Brothers derive their name from their number; they are situated in 6.10 latitude, and 71.28 longitude, about 1,209 miles from the Mauritius. Cocoa-nut trees, fish, and tortoises are found here; water is procured, similar to that at Diego. These islands have been given into the possession of a planter of the Mauritius, who employs 43 people on them.

6. *Islands of Solomon*.—are 11 in number; they have been named the Eleven Islands by the French, and are in lat. 5.23, long. 72.35, about 1,275 miles from the Mauritius. The soil is in general superior to the other islands of this Archipelago; it produces an abundance of the cocoa-nut tree, and a species of tree affording very good wood, with an elevation of 40 feet. The largest of these islands is seven miles and a half in circumference; the next, four miles; two smaller, three miles each; the other six, two miles; and the last, one mile and a half. They are arranged circularly, and form a basin, with safe anchorage for vessels of small draught of water.

7. *Peros Banhos*.—A collection of small islands, 22 in number, in 5.23.30 S. latitude, and 72.3 E. longitude, about 1,260 miles N.E. of Port Louis. These islands, the largest of which is scarcely two miles long, present an extent of 18 miles in length and 12 in breadth, having two passages to the N.; one narrow, the other dangerous, and a third tolerably good at the S.

8. *Legour Island*.—This island, discovered in 1820 by the proprietor M. Legour, of Port Louis, from whom it derived its name by the order of his Excellency Governor Farquhar, is situated in 5.59 S. latitude,

and 72.37 E. longitude, about 1,250 miles N. E. of the Mauritius. Its length is about two miles, and between two and three in width; it is difficult of access, without anchorage, and devoid of resources.

9. *The Islands of George and Roquepiz*.—These islands are said to extend through 6.20 to 7.15 S. latitude, and 60.4 to 63.8 E. longitude; but they are of very doubtful existence. Some have supposed that they form a part of the bank of Saya de Malha, the position of which is uncertain.

10. *Agalega*.—This island, in 10.29.50 S. latitude, and 56.55 E. longitude, about 561 miles in the N. 4 N.W. from Mauritius, is divided in two by a canal, about 500 fathoms in width, fordable at low water. It is about 11 miles from N. to S., and one mile and a half from E. to W.; it is covered with cocoa-nut trees in the centre. There is but little vegetable soil; and water, which is saltish, is obtained by digging wells in the sand. It is situated low, and is without anchorage. A merchant of the Mauritius, who is in possession, has established two manufactories of oil, which employ 199 individuals.

11. *Coetivi*, in 7.15 S. latitude, and 56.23 E. longitude, is about 768 miles N. of the Mauritius. This island, about nine miles in circumference, possesses at the N.E. an anchorage for small boats from 25 to 30 tons, but not a sufficient one for large vessels. Its sand and coral soil is interspersed with 500 or 600 acres of cultivated land, where maize thrives tolerably well. The water, which is procured by the same means as in the other islands, is saltish. A resident of the Mauritius, who is in possession of it, employs 100 persons, who cultivate maize, and supply him with cocoa-nut oil and tortoises.

12. *Seychelles Islands*.—These islands, 30 in number, of which many are very small, form an archipelago, which is the most considerable of the dependencies of the Mauritius. They lie between 3.38 and 5.45. S. latitude, and between 55.15 and 56.10 E. longitude, about 915 miles in the N. 4 N.W. of Port Louis. The islands are:—1. L'Île Mahé; 2. St. Anne; 3. Aux Cerfs; 4. Anonyme; 5. Du Sud Est; 6. Longe; 7. Ronde; 8. Moyenne; 9. Therese; 10. De La Conception; 11. Aux Vaches Marines; 12. Aux Fregates; 13. La Digne; 14. Praslin; 15. Les Cousin et Cousine; 16, 17, 18. Les Trois Sœurs; 19. L'Île Ronde; 20. L'Île Aride; 21. L'Île Felicite; 22. L'Île Marianne; 23. Aux Recifs; 24, 25. Les Dense Iles du Nord; 26. L'Île Denis, the most northerly; 27. L'Île Curieuse; 28. Les Mamelles; 29. L'Île Silhouette, the most westerly; 30. L'Île Plate, the most southerly of the group.

The circumference of Mahé is 75 or 76 miles. It contains 72,768 roods of land; the country is mountainous, intersected with ravines, and interspersed with rocks. The soil, which varies considerably, is generally moist. On the E. coast (near the town of Mahé) there is a bay large enough to contain 30 vessels of considerable size. Mahé contains 5,834 inhabitants.

St. Anne is about a league from Mahé. The soil is tolerably good, and contains about 1,200 roods of cultivated land. The population is in number 246.

The Aux Cerfs is close to the S. end of the above, much smaller, and contains 33 inhabitants.

The Anonyme Islands, from the S.E. a very small group of islands near the preceding ones, are not inhabited.

Long Island. This islet and the following, Round Island and Moyenne, between the St. Anne and Cerfs Islands, alone possess some little value, and are cultivated by 22 individuals.

populous during the period prior to the French revolution, than subsequent to that event, as it is on record that, in 1792, 20,000 persons perished of small-pox in the Mauritius. In 1799 the population was stated, by Baron Grant, at—slaves, 55,000, whites and mulattoes, 10,000; total 65,000; and the armed force, national guard, blacks and mulattoes, 2,000, blacks and mulattoes, to serve as chasseurs, and the artillery, 3,000; total 5,000.

The statistics which I have derived from the Colonial Office, and from the Mauritius Almanack for 1838, relative to the progressive increase of the population for more than 50 years, are very complete. It will be seen by the census of 1827, that in the whites and slaves, the males preponderated over the females; but in the free coloured there was a larger proportion of females, which, however, may be owing to women slaves being emancipated in greater number than men.

The comparative increase of the three classes of inhabitants from 1767 to 1832, is thus shewn:—

Years.	Whites.	Coloured.		Total.
		Free.	Slaves.	
1767..	3163	587	15627	18777
1777..	3434	1173	25154	29761
1787..	4372	2235	33882	40489
1797..	6237	3703	49080	59020
1807..	6489	5919	65367	77768
1817..	7375	10979	79493	97847
1827..	8111	15444	69076	92631
1832..	26560*	..	63506	89616

* No distinction of colour; the number of slaves in the island, in 1830, is stated by the returns to Parliament, to be—males, 41,454; females, 26,293; total, 67,743.

A complete census of the whole island, distinguishing the inhabitants according to the *quartiers*, or cantons, for 1827:

It will be perceived that the female births have latterly begun to preponderate. The greatest number of deaths are those under five years of age, and of these the males exceed the females. After 85 years of age, women have the greatest longevity.

A statement of the station has been preferred for a compensation attached, prædial, elementary rate

X. The affairs of the island are managed by a Governor, as in the Cape of Good Hope, aided by an Executive and a Legislative Council. The Executive Council consists of four members (the Governor), the officer second in command of the troops, the Colonial Secretary, the Procureur and Advocate general. The Legislative consists of 15 members, 7 of whom hold no official station. When the island was in the possession of the French, a Colonial Council was created by a decree of the 29th September, 1810. The decree recited, that the colony was bound to contribute its assistance to the expense of providing for its own safety; and, in order to raise the revenue necessary for this purpose, a Council was created, consisting of 11 persons, to be chosen from among the principal inhabitants and traders of the different parts of the

A Council of the Governor Farquhar and inhabitants of Port Louis from each of the parishes. The number of inhabitants was—30,000 (if so, over the colony; an annual Port Louis, or 5,000 by the Governor from number of persons in office five president, vice and aid of six other members, roads, education, and by the Governor.

order of Lord Bathurst is not now any more of the active and useful

Before it was occupied was governed by far which had been previously administered by before the time of the creation of the several courts modified from time to time by the Governor, and finally of Justice, dated St. Louis, establishes a Supreme Court of Justice, presided over by a petty court for the small amount, and from this court the has authority to establish dependencies of Mauritius their powers.

The French law of Mortgages every ten years by an auctioneer. The authority by the Civil Commission death made by two of the neighbours of the deceased.

Port Louis is well supplied with batteries on Tonnellerie it is accessible on the indefensible when occupied. There are several strong garrisons by detachments of infantry, and a strong force of artillery.

There is no militia for regulating one if invested in the Government great seal, to raise troops.

There is a local corporation died partly by voluntary slaves, emancipated in 1835, captured under the act of 1835, and enlisted by trade, and enlisted by virtue of the powers in order in council in 1831. The authorities for this corps are conveyed by Despatches, No. 41, of 30th December, 1831.

XI. The revenue in 1830, per annum is 132,000*l*. The custom duties at Port Louis

The importation tax estimated value of the goods

island; three from the Port Napoleon, and one from each of the other districts. The members of the Council were to be named by the Captain-general, on the presentation of the Colonial Prefect and the Commissary of Justice, from a list of candidates elected for the district of Port Napoleon, and three for each of the other districts. Any vacancy in the Council was to be filled up by the first of the candidates whose names remained upon the list of election. Electoral chambers were to be formed for the election of these candidates for the Council, and members of these chambers were to be named by the Captain-general, upon the presentation of the Colonial Prefect and the Commissary of Justice. This Council has not been convened since the British occupation of the island.

A Council of the Commune was established by Governor Farquhar in 1817, composed of 15 notable inhabitants of Port Louis, and three proprietary inhabitants from each quarter of the island. The qualifications were—30 years of age, unless born in the colony (if so, over 27); to have resided 10 years in the colony; an annual income of 3,000 piastres in Port Louis, or 5,000 in the country; to be nominated by the Governor from lists containing three times the number of persons so to be nominated, and to continue in office five years. The Council to elect a president, vice and secretary; to discuss, with the aid of six other members, questions of commerce, roads, education, and internal affairs, as transmitted by the Governor. This Council was suppressed by order of Lord Bathurst, in January, 1821; and there is not now any municipal body to regulate the affairs of the active and wealthy inhabitants of Port Louis.

Before it was occupied by Great Britain, Mauritius was governed by four out of the five codes of law which had been promulgated by Napoleon; these were administered by courts established in the island before the time of the French Republic. The formation of the several courts and their powers have been modified from time to time by the authority of the Governor, and finally settled by the Mauritius Charter of Justice, dated St. James's, 13th April, 1831, which establishes a Supreme Court of Civil and Criminal Justice, presided over by three judges. There is also a petty court for the adjudication of civil causes of small amount, and for the trial of petty offences; from this court there is no appeal. The Governor has authority to establish minor courts in any of the dependencies of Mauritius, and to extend or limit their powers.

The French law of divorce has been adopted in Mauritius. Mortgages are required to be registered every ten years by article 2154 of the code of Napoleon. The authority to bury a corpse must be given by the Civil Commissary, upon a declaration of the death made by two witnesses, the nearest relatives or neighbours of the deceased.

Port Louis is well defended on the sea side by the batteries on Tonneliers island and on Fort Blanc, but it is accessible on the land side, and was found to be indefensible when our troops approached it in 1810. There are several strong posts throughout the island, garrisoned by detachments from two regiments of infantry, and a strong section of artillery and engineers.

There is no militia at the Mauritius, nor any law for regulating one if embodied. Power is, however, vested in the Governor by commission, under the great seal, to raise troops in cases of emergency.

There is a local corps of military laborers, embodied partly by voluntary enlistment of government slaves, emancipated in 1833; and partly from Africans captured under the acts for the abolition of the slave trade, and enlisted by the collector of customs, by virtue of the powers in him vested by His Majesty's order in council in that respect made and provided. The authorities for the formation and payment of this corps are conveyed in the Secretary of States' Despatches, No. 41, of 1st July, 1832, and No. 6, of 20th December, 1834. The expense of this corps is defrayed by Great Britain.

XI. The revenue in the gross receipts averages 132,000*l.* per annum; a large sum is raised from custom duties at Port Louis.

The importation taxes are—6 per cent. on the estimated value of the goods in English ships; on foreign

vessels, 15 to 30 per cent.; 40 per cent. on tobacco, and 2*s.* per gallon on spirits. Wheat, rice, cattle and bullion are free on English ships. The exportation taxes are on English ships—sugar, 1*s.* 2*d.* per 100 lbs.; on a foreign ditto, 2*s.* 2*d.* per ditto; cotton, 7*s.* on former, 7*s.* 10*d.* on latter, per ditto; coffee, 4*s.* and 6*s.* 5*d.* ditto ditto; other articles in proportion. Entrepôt taxes 1 per cent. English, 1½ per cent. on foreign.

Direct Taxes are 6*s.* upon each slave above seven years of age, and under 60, in Port Louis, and 2*s.* 6*d.* in the country: this is independent of vaccine, maronage, corvée, and other slave taxes. Upon all goods (*les immeubles*) in Port Louis there is an annual tax of 1*s.* 3*d.* per cent. on the estimated value. Every thing sold in the bazaar, whether it be fish, flesh, fowl, vegetables, or hucksteries, is taxed; as are also the shop-keepers who sell them, according to the stall.

Indirect.—Two per cent. registering acts of sales; one ditto for transcribing ditto; and proportional taxes on every business act. Stamped paper from 3*d.* to 2*s.* 8*d.* and upwards. Licenses, for instance, on an inn and coffee house in Port Louis, 10*l.* per month, and in the country, 7*l.* ditto. On a pedlar, 1*l.* per ditto. On carriages, gigs and carts, from 1*l.* 12*s.* to 2*l.* per annum. Boats, canteens, distilleries, printing offices, are farmed out by auction. On grants of land, 1*l.* to 6*l.* in proportion. The right to fish in the sea with a *seine* is 1*l.* a year, and with a line 12*s.*; may even according to the size of the *seine* the tax is raised.

The Police taxes are numerous and heavy, for instance a *certificate of life* costs 4*s.* and of *enregistre-ment*, 12*s.*; and for every hundred words of the certificate above the first, 1*s.* 7*d.* A visit on board an English ship, 7*s.*; a foreign, 12*s.*; and so on. Local tax for the poor in 1836, 2,395*l.*

Comparative Yearly Statement of the Expenditure of the Mauritius. [B. B. 1836.]—Civil Establishment, 38,402*l.*; contingent expenditure, 5,970*l.*; Judicial Establishment, 24,620*l.*; contingent expenditure, 11,963*l.*; Medical Establishment, 2,745*l.*; contingent expenditure, 476*l.*; Ecclesiastical Establishment, 3,361*l.*; contingent expenditure, 60*l.*; Seychelles Establishment, 1,760*l.*; contingent expenditure, 430*l.*; Leper Establishment, 192*l.*; contingent expenditure, 39,119*l.*; Pensions, 6,778*l.*; total, 135,876*l.*

Expenditure incurred by the Colony of the Mauri-

tius during the year 1836, on account of its military defence. [B. B.]

Military Posts and Works.—Established amount paid to the ordnance department annually, for repairing barracks, &c., 5,000*l.*; repairs of signal stations and the barracks at Reduit, and transferred to the ordnance, 110*l.*; total military works, 5,110*l.*

Militia or other local corps.—Pay of signal men and orderly dragoons, 235*l.*; contingencies of orderly dragoons, 156*l.*; total local corps, 391*l.*

Pecuniary allowances to King's troops.—Colonial allowances to staff and departmental officers, to officers of the Royal Artillery and Royal Engineers, of 29th, 87th, and 99th regiments, 16,759*l.*; and pension to the widow of an officer of the late Bourbon regiment, 36*l.* Total expenditure, 22,296*l.*

The officers of His Majesty's forces serving in Mauritius receive pecuniary allowances paid from the Colonial Treasury, in lieu of the ordinary allowances which, at other stations, they receive from the British Treasury, in money or kind, such as rations of provisions, forage, fuel, light, lodgings, servants' wages, marching allowance, carriage of baggage, expenses of attendance on Courts' Martial, and other contingencies provided for in His Majesty's several warrants. The monthly sums received by the officers of the several grades, are enumerated in the schedule annexed. House rent being deducted from such officers as occupy public quarters. These allowances were established at the capture of the Colony in 1810, but have since undergone some modification.

Schedule of Colonial allowances.—His Excellency the Commander in Chief, 80*l.* per month; Colonel, when commanding, 67*l.* 6*s.* 2*d.*; Colonel, not commanding, 40*l.* 8*s.* 10*d.*; Lieut.-Colonel, 34*l.* 16*s.* 2*d.*; Major, 26*l.*; Captain, 14*l.* 17*s.* 6*d.*; Lieutenant, 8*l.* 19*s.* 1*d.*; Ensign, 6*l.* 15*s.* 9*d.*; Pay-master, 14*l.* 17*s.* 6*d.*; Quarter-master, 8*l.* 19*s.* 1*d.*; Adjutant, 10*l.* 19*s.* 6*d.*; Surgeon, 14*l.* 17*s.* 6*d.*; Assistant Surgeon, 9*l.* 10*s.* 8*d.* Officers commanding corps—Lieut. Colonel, 5*l.* 12*s.* 8*d.*; Major, 8*l.* 16*s.* 2*d.*; Captain, 11*l.* 2*s.* 5*d.*; Lieutenant, 5*l.* 18*s.* 5*d.*; Ensign, 2*l.* 3*s.* 4*d.* Officers commanding posts—Lieut.-Col. 11*l.* 14*s.*; Major, 8*l.* 16*s.* 2*d.*; Captain, 3*l.* 9*s.* 4*d.*; Lieutenant, 2*l.* 6*s.* 2*d.*; Ensign, 1*l.* 14*s.* 8*d.*

Detail of the numbers and expenses of the corps of military labourers, for a period of 12 months:—one lieut. commanding, at 5*l.* 18*s.* 5*d.* per month, 72*l.* per annum (this amount is defrayed from the colonial revenue, as being the extra colonial allowance to which a lieut. is entitled for commanding a corps, and would be received by any other lieut. so situated); one staff sergeant (European), 2*s.* 6*d.* per day, 45*l.* per annum; one sergeant at 1*s.* per day, 18*l.* per annum; two corporals at 6*d.* per day each, 18*l.* per annum; 67 privates at 3*d.* per day each, 306*l.*; total, 459*l.*

Allowance to the officer in command for funeral expenses and stationary, 1*s.* per day, 18*l.* per annum; do. to the staff sergeant for quarters at 5*s.* per week, 13*l.* per annum; rations for one staff sergeant at 5*d.* per day, 7*l.* 12*s.*; do. for one sergeant, 3*l.* 16*s.*; do. for two corporals, 7*l.* 13*s.*; do. for 67 privates, 256*l.* 17*s.*; clothing for one staff sergeant (European), 3*l.*; do. for one sergeant, 2*l.* 6*s.*; do. for two corporals, 4*l.* 12*s.*; do. for 67 privates, 155*l.* 13*s.*; total, 442*l.*; hospital expenses, 30*l.*; grand total, 862*l.*

There is also a small body consisting of five mounted orderlies attached to the governor's establishment, for conveyance of despatches to different parts of the island. The expense is borne by the colony, and is estimated at 464*l.*

XII. The commerce of the Mauritius is considerable, and widely extended. It would have been desirable to give an extended tabular view of the trade for a consecutive series of years; but, unfortunately, the return of the imports and exports in the Blue Books not being given in the same form for two years in succession, it is impossible to form a correct table from that source of information. From documents obligingly furnished me by Mr. Ebsworth, of the firm of Reid, Irving, and Co., I am enabled to supply a complete view of the trade of the island for four years, and which will serve at a future period for comparison.

The duty paid on the export of sugar from Mauritius being levied according to weight and not to value (no declaration of actual cost being required), and the import of specie into, and its export from the island, having since 1834 been permitted without any entry at the Custom House, neither the real value of the sugar nor the exact amount of the specie can be there ascertained.

The average prices of the sugar exported during the last four years have however been deduced from the nett French weight and total cost on board of shipments constituting nearly two thirds of the quantity annually exported, to the original invoices of which reference has been allowed by the principal mercantile houses of Port Louis; and a very nearly correct account of the specie imported and exported during

the last three years has been obtained from the official returns made to government at the close of each successive year.

The average cost on board, of the sugar shipped from Mauritius was, in 1833, 18s. 9d. per 100 lbs. nett Fr. wt.; in 1834, 20s. 10d.; in 1835, 22s. 3½d.; in 1836, 22s. 11d. The amount of specie imported into the island was, in 1833, 117,732l.; in 1834, 85,692l.; in 1835, 54,230l.; in 1836, 279,121l. Whereof was re-exported, in 1833, 8,757l.; in 1834, 38,708l.; in 1835, 14,130l.; in 1836, 97,118l. Leaving for circulation, in 1833, 108,975l.; in 1834, 46,984l.; in 1835, 40,100l.; in 1836, 181,711l.

In 1833, the total nett French weight of sugar exported was 67,483,572 lbs., making, at 18s. 9d. per 100 lbs., 632,658l.; the custom house value of other produce exported was 10,713l.; the amount of treasury bills issued by the commissariat in exchange for British money or in payment for supplies, 81,760l.; the amount of bottomry bonds and bills drawn for ships' repairs and expenses, may be estimated at 58,000l.; total means of remittance, 783,131l. The total amount of imports, including specie, was 577,429l.; whereof the re-exports amounted to 62,796l.; leaving for consumption, 514,633l. Surplus 268,498l.

In 1834, the total nett weight of sugar exported was 71,143,898 lbs., making at 20s. 10d. per 100 lbs., 741,082l.; the custom house value of other produce, was 11,750l.; the treasury bills issued by the commissariat amounted to 47,742l.; the bottomry bonds and bills for ships' repairs and expenses may be taken at 75,000l.; total means of remittance, 875,574l. The amount of imports, exclusive of specie, was 769,396l.; and of specie, 85,692l.; total imports, 765,084l.; deduct specie re-exported, 38,708l.; deduct other imports re-exported, 96,203l. = 134,911l.; leaving for consumption, 630,177l. Surplus, 245,397l.

In 1835, the total nett weight of sugar exported was 64,854,515 lbs., making, at 22s. 3½d. per 100 lbs., 732,857l.; the custom house value of other produce, was 8,763l.; the treasury bills issued by the Commissariat amounted to 53,266l.; the bottomry bonds and bills for ships' repairs and expenses may be taken at 60,000l.; total means of remittance, 844,886l. The amount of imports, exclusive of specie, was 642,091l.; and of specie, 54,230l.; total imports, 696,321l.; deduct specie re-exported, 14,130l.; deduct other imports re-exported, 57,867l. = 71,997l.; leaving for consumption, 624,324l. Surplus, 220,562l.

In 1836, the total nett weight of sugar exported was 63,357,317 lbs., making, at 22s. 11d. per 100 lbs., 947,719l.; the custom house value of other produce, was 11,809l.; the treasury bills issued by the Commissariat amounted to 36,090l.; the bottomry bonds and bills for ships' repairs and expenses may be taken at 90,000l.; total means of remittance, 1,085,698l. The amount of imports, exclusive of specie, was 916,520l.; and of specie, 279,129l.; total imports, 1,195,649l.; deduct specie re-exported, 97,118l.; deduct other imports re-exported, 93,010l. = 190,128l.; leaving for consumption, 1,105,221l. Surplus, 80,477l. Total surplus means of remittance during the four years, exclusive of bills drawn by virtue of letters of credit and drafts of occasional residents, 814,934l. Average annual surplus, 203,733l.

Number of vessels arrived at Port Louis, in 1833, 448; in 1834, 482; in 1835, 451; in 1836, 533. Vessels belonging to the Colony, 92; tons, 7,879.

Total	
Total for 1839	

5,000/; total, 40,000/; atg., being equal to 200,000 dollars. The treasury notes thus issued are of the following tenor:—"The government of Mauritius and Dependencies promises to pay the bearer, on demand, the sum of _____ pounds sterling in specie, at the rate established by law."

The paper currency in circulation during the year 1836 was at par with specie, for which it was exchanged on demand. Of the amount prepared as above stated, 6,365/ was in the treasury, and the remaining 33,635/ in the hands of the public, on 31st December, 1836.

In the month of January, 1832, there was established a banking company, by charter, comprising 1,000 shares of 100/ each; their issues amounted on 31st December, 1836, to 129,077/. Their transactions were generally in discounting merchant's bills at 7 per cent.

Course of Exchange. [R. B. 1836.]—During the year 1835 paper and specie were at par, but British money bore a premium of 2 to 2½ per cent. from January to September inclusive, above the other coins, in consequence of the demand for bills on England; but for the months of October, November, and December, British coins were at par. No bills drawn on England, during the year 1836, by the civil government. The Commissariat draw bills for British sterling money, at the rate of 101/ 10s. for every 100/ bill. The government accounts, since January, 1826, are kept in sterling money. Merchants and shopkeepers keep their accounts in dollars and centimes.

2 sous = 1 centime.

20 sous = 10 centimes, 1 livre, or franc Colonial

200 sous = 100 centimes, 10 livres, or 1 dollar.

The sou, centime, livre or franc, are monies of accounts.

Weights.—In the transactions with the Military Commissariat department, imperial weights are used. With this exception, the weights in use in this island are the same as they were in France before the revolution, viz.:—100 lbs. French, poids de marc, equal to 108 lbs. English; and the same proportions in the subdivisions, which are the ounce, gros, and grains. 16 ounces make 1 pound, 8 gros make 1 ounce, 72 grains make 1 gros. The quintal is 100 lbs. French. The ton is 20 quintals. Sugar is reckoned per pound or per quintal; coffee, per bag of 100 lbs. (net French); cotton, per bale of 250 lbs. Rice is sold per bag of 150 lbs.

Measures.—In the transactions with the Military Commissariat department imperial measures are used, but the measures in general use are French, viz.:—The French foot is to the English in the proportion of 100 to 92.89, or in common practice of 16 to 15. 12 lines make 1 inch, 12 inches 1 foot, 6 feet 1 toise, 3 feet 1 fathom. The aune is 11 inches, and it is to the English yard as 9 to 7. Every kind of cloth is measured and sold in this island by the aune or ell. The velt is equal to 1 gallon 7 pints 4-5ths English, but it is always taken as 2 gallons in commercial transactions; it is by the velt that every liquid is measured here. 3 gills make 1 pint, 2 pints 1 quart, 4 quarts 1 gallon, 2 gallons 1 velt. Nine English quart bottles are generally considered equal to a velt, and 40 drams to 1 gallon. A cask measures 30 velt. The ton of sugar is 2,000 lbs. French; Ebony wood, 2,000 lbs.; coffee, 1,400 lbs.; cotton, 750 lbs.; cloves, 1,000 lbs.; grain, 1,000 lbs.; liquids, 120 velt; square cut timber, 32 cubic feet; boards, 386 feet; shingles, 3,300. The arpent, or acre, is 100 square perches, the perch is 20 feet French. The tonnage of cases, 42 cubic feet measurement.

In this return are not reckoned the oxen killed for the troops and the marines. Since 1834, the bazaar being leased, it has been impossible to procure the necessary returns for continuing the table; but it is considered that the number of oxen killed may be estimated at 3,000 annually.

Riviere du Rempart—34 steam-mills, 5 water-mills, 1 mill worked by animals, 2 windmills, 11 guilleveries, 6 fisheries. *Placq.*—13 water-mills, 20 steam-mills; 5 water-mills, 2 distilleries, 17 alembics, 2 lime-kilns, 1 tan-house, 2 fisheries. *Savanne*.—2 steam-mills, 15 water-mills, 11 guilleveries, 1 fishery. *Black River*.—5 water-mills, 3 steam-mills, 2 salt pits, 7 fisheries. *Plaines Wilhems*.—7 steam-mills, 3 water-mills, and 2 mills worked by animals, 10 guilleveries, 3 lime-kilns. *Moka*.—2 water-mills, 1 mill worked by animals. There are no mines in this island.

The fishery is carried on for the supply of Port Louis market on the coasts of this island; it is also

carried on to some extent at several of the dependent islands, where the fish are cured, and being brought to market here, form a great resource for the subsistence of the poorer classes of the population and of the apprentices.

Although no vessels are employed in whale fishing in the vicinity of the island, it was carried on to some extent at the dependencies, particularly at Seychelles, chiefly by vessels belonging to the United States. Three vessels belonging to this part have been employed during the year 1836, in whale fishing at Seychelles. According to a doubtful return in the B. B. Colonial Office, 316,684 acres of land have been granted in the colony, and 116,005 acres remain to be granted.

Ravinsara, Vanilla, Clove, Allspice, Betle Nut, Cinamon, Coffee, Betle.

Nature and value of property annually created, moveable and immoveable, in Mauritius and its dependencies.

Property annually created and consumed or converted into Moveable or Immoveable Property.—Animal food for 100,000 mouths, at 100 lbs. a year each, 10,000,000 lbs. at 3d. per lb., 125,000l.; fish for 100,000 mouths, at 100lbs. a year each, 10,000,000lbs., at 1d. per lb., 41,666l.; eggs, poultry, milk, butter and cheese for 100,000 mouths, at 1d. per day, 152,083l.; bread—viz. flour, manioc, potatoes, yams, &c. for 100,000 mouths, at 2d. per day, 304,186l.; condiments—viz. salt, pepper, spices, &c. for 100,000 mouths, 5,000l.; tea, coffee, spirits, wine, &c. for 100,000 mouths, at 4d. per day, 76,041l.; personal clothing renewed for 100,000 persons, at 2l. per ann., 200,000l.; furniture for 10,000 houses, at 5l. each per annum, 50,000l.; food for horses, cattle and live stock, 50,000 head, at 1l. a year each, 50,000l.; sugar annually produced, 70,000,000 lbs., at 1½d. per lb., 437,500l.; rum, molasses, and other articles, 65,000l.; luxuries consumed by the rich, 50,000l.; surplus incomes derived from trades, professions, &c.,

10,000 persons, at 50l. each, 500,000l.; losses by fire, storm, accident, &c., 10,000l.; total annually created, 2,066,476l.

Moveable Property.—Horses, 800, at 20l. each, 16,000l.; mules and asses, 2,500, at 10l. each, 25,000l.; horned cattle, 25,000, at 5l. each, 125,000l.; sheep and goats, 10,000, at 2l. each, 20,000l.; swine, 20,000, at 1l. 10s. each, 30,000l.; poultry, value, 10,000l.; house furniture in 10,000 houses, at 25l. a house, 250,000l.; personal clothing of 100,000, at 5l. each, 500,000l.; stock of merchandize, value, 600,000l.; ships and boats, value, 200,000l.; machinery and agricultural implements, value, 500,000l.; bullion, 35,000l.; total moveable property, 2,311,000l.

Immoveable Property.—10,000 houses, at 50l. each, 500,000l.; cultivated land, 100,000 acres, at 20l. per acre, 2,000,000l.; meadow and wood land, 200,000 acres, at 3l. per acre, 600,000l.; manufactories of sugar, &c., 200, at 500l. each, 100,000l.; public buildings, forts, churches, &c., 1,000,000l.; roads, bridges, aqueducts, wharfs, &c., 800,000l.; total immoveable property, 5,000,000l. Property annually created, 2,066,476l.; moveable and immoveable, 7,311,000l.

DEPENDENCIES OF MAURITIUS.—RODRIGUE, SEYCHELLES, &c.

[The position, latitude and longitude, &c., of the Dependencies, is given at p. 500.]

THE island of *Rodrigue*, the *Seychelles Islands*, *Diego Garcia*, &c., belong to Mauritius, and an agent from the colony is placed on the vast and important island of Madagascar. Rodrigue is situate about 300 miles to the eastward of Mauritius, in 19.13. S. lat., about 26 miles long by 12 broad. I passed close to it in 1823, but did not land on account of the heavy surf which breaks along the shore. It is mountainous, or more properly speaking a succession of hills, clothed with verdure, the vallies are full of rocks and stones, which cover the surface to a great extent, leaving, however, a large portion of fertile soil, which is cultivated by a few French colonists from Mauritius, with which a constant intercourse is kept up in transporting turtle from the former to the latter. There is abundance of fish around Rodrigue, but it is singular that those caught outside the reefs in deep water are poisonous, and several sailors have died from eating of them. One sort caught near the island resembles a whiting, and from its destructive qualities is named by the French, *mort au chien*. The existence of poisonous fish has never been properly accounted for; we know of no birds or animals that are poisonous, even the most venomous snake, when decapitated, is good eating. Some think that the fact is owing to copper banks, on which the fish feed; but it is remarkable that those caught on the same bank are at one time poisonous and at another edible. Some sorts are, however, poisonous at all times, and I have seen a dog die in a few minutes after eating one. Mariners ought to reject fish without scales; unless they know them to be good, and a silver spoon if boiled with the fish will turn black should it be noxious. The early French settlers narrate that they found eels of an exquisite flavour on the island, so large that one of them was a load for two men to carry. On the N. side of the

island there is a bay affording excellent anchorage, a secure shelter for ships of all dimensions, (the squadron which was collected from India and the Cape, for the conquest of Mauritius, in 1810, rendezvoused here;) and abundance of wood and water. The air is delightful, the water clear, the vegetation luxuriant. In time of peace it is useful as a haven for shipwrecked mariners, and in a period of war as a cruising station (a vessel from Bombay, the '*Eldon*,' laden with cotton, took fire at sea in October 1834, and the crew, after being many days in an open boat, reached Rodrigue when almost perishing, and from thence the Mauritius.)

THE SEYCHELLES OR MAHE ISLANDS, situate to the northward of Madagascar, between the parallels of 4. and 5. S. lat., were partially explored by M. Lazarus Picault, in 1743, by order of Mahé de la Bourdonnais, the Governor of the Isle of France; but in all probability they were previously known to the Portuguese, as were the Amirantes, a low and comparatively insignificant group, 80 miles distant; if, however, the Portuguese saw them, it seems strange that they were not explored, as we should then have had an earlier account of the *coco de mer* peculiar to those islands.

The Seychelles capitulated to the English in 1794, after which their flag was considered neutral by the English and French, when belligerents: on the capture of Mauritius the islands were taken possession of as a dependency of that colony, and have since continued under the superintendence of an agent deputed from Mauritius, who is aided by 25 soldiers from one of the regiments in garrison at the latter place.

The following are the names of the principal islands, with the number of acres contained in each:—(The total acres are, 50,120.)

Names.	Acres.
Mahé .	36000
Praslin .	8000
Silhouette .	3700
La Digue .	2000
Curieuse .	1000

There are upwards of 100,000 persons on the island, all resting on the coral, which also

Mahé, the sea and principal island, and from three rugged granite centres. The town, on the N. side, in a small gully, is a very good harbour, however, in the densely peopled town, when I visited it, 582; free colour people, 6,963. There is a large number of quail seas; sometimes the low verdant isles are infested with insect, we have seen off from the shore or Portuguese, coming in, sending us with a time informing us and that his family we would land.

Amirante group but abundance of cocoa nuts, and about this beautiful than reality; where the serenity of the breeze add a round. The old witnessed there is constant, and nearly vertical rays. I have seen island to island, revelling in their protection from a straw hat, yet with and with but little from 84. to 64., healthiness of the age and large family is no uncommon sight down at the same party.

Although the islands are of coral, situate is of coral islands, except two which, generally, mass, form their verdure. Lieutenants and myself, with a or Fearn Island, are climbing. Towards there was nothing on each other as be on an Irish coast the magnitude of poised that one finger.

Names.	Acres	Names.	Acres	Names.	Acres
Mahé .	30000	St. Anne .	500	Felicity .	800
Praslin .	8000	Cerf .	400	North Island	500
Silhouette	5700	Frigate .	300	Denis .	200
La Digue .	2000	Mariane .	250	Vache .	200
Curieuse .	1000	Conception	120	Arde .	150

There are upwards of 15 other islands of a smaller size, all resting on an extensive bank of sand and coral, which also surrounds them to a great extent.

Mahé, the seat of government at the Seychelles, and principal island in the group, is 16 miles long, and from three to five broad, with a very steep and rugged granite mountain running through the centre. The town of *Mahé* is situate on the north side, in a small glen, irregularly built, and containing some good houses; the principal persons being, however, in the environs. It is of course more densely peopled than the others; the total population, when I visited the group in 1825, was, whites, 582; free coloured, 323; and slaves, 6,058; total, 6,963. There is, however, a scattered population on many of the flat islands spread about those tranquil seas; sometimes on approaching one of these low verdant isles, the recent creation of the coral insect, we have been surprised by a boat pushing off from the shore, and a dark-coloured Frenchman, or Portuguese, coming on board the frigate and presenting us with eggs, milk, and fowls, at the same time informing us that the island we saw was his, and that his family would receive us hospitably if we would land. On several of the Seychelles and Amirante group we found no human inhabitants, but abundance of hogs and goats, as also papaws, cocoa nuts, and other edible fruit; indeed cruising about this beautiful archipelago is more like romance than reality; while the Italian beauty of the skies, the serenity of the atmosphere, and the purity of the breeze add a peculiar charm to the soft scenery around. The oldest resident at the Seychelles never witnessed there a gale of wind; but the sea breeze is constant, and tempers the heat so as to divest a nearly vertical sun of the ill effects of its fervid rays. I have spent whole days wandering from island to island among the Seychelles group, and revelling in their romantic scenery, with no other protection from a tropical sun than a broad-brimmed straw hat, yet without feeling the slightest bad effect, and with but little fatigue. The thermometer varies from 84. to 64., its mean being 70. to 72.; the healthiness of the station is indicated by the great age and large families of the inhabitants; indeed it is no uncommon sight to see four generations sitting down at the same table, and forming a numerous party.

Although the bank on which this archipelago is situate is of coral formation, yet all the Seychelles Islands, except two, are of granite, huge blocks of which, generally piled up as it were in a confused mass, form their peaks, which are covered with verdure. Lieutenant (now Captain) R. Owen, R. N., and myself, with a party of seamen, ascended North or Fearn Island, after two hours and a half difficult climbing. Towards the summit, for many feet, there was nothing but huge blocks of granite, piled on each other as a number of paving stones would be on an Irish *cearn*; several of these rocks were of the magnitude of a small sized house, and so nicely poised that one might be moved with the little finger.

The Seychelles possess many excellent harbours, and being never visited by tornadoes, the neighbourhood is frequented by whalers who fill up their vessels rapidly with sperm oil. The inhabitants cultivate cotton of a superior quality, spices, coffee, tobacco, rice, maize, cocoa nuts, &c., and carry on a lucrative trade in the numerous small vessels which they possess, in articles suited to the Indian, Mauritius, and Bourbon markets. (Some ships are afraid to fish on this bank, the whale being so violent when wounded.)

The vegetation around is extremely luxuriant; the most remarkable specimen is the *coco de mer*, so called because the nuts were found on the shores of Malabar, and on the coasts of the Maldivé Islands, many years before the place of their growth was ascertained, when each nut sold for 300*l.* or 400*l.* from its supposed medicinal quality. The nut is confined in its growth to the Seychelles, and even there to two islands—*Praslin* and *Curieuse*. It springs from a species of palm, 60 to 80 feet high, with full leaves; at their junction hangs the nut, one foot long, eight inches thick, with a light coloured tasteless jelly in each of the compartments; the seed vessel is about two feet long and three inches diameter, studded with small yellow flowers issuing from a regular projection, which resemble those of the pine apple. The smell arising from the flower is by most Europeans considered intolerable, its offensiveness increasing the longer the flower is kept.

Various spices grow on *Mahé*, &c. such as the cinnamon plant, cloves, nutmeg and pepper, which were introduced by orders of *M. De Poiré*, the intelligent governor of Mauritius, with a view to rival the Dutch in the Moluccas: the cultivation, if persevered in, would probably have rendered the Seychelles, at the present day, as valuable as the far-famed spice islands, but the plantation was burnt on the approach of a ship of war (French), which was supposed to be an English frigate.

Mahé has a British resident from the Mauritius, with some subordinate officers, and there is a petty civil and criminal court, held for the trial of causes and offences. The inhabitants are extremely hospitable; and I would strongly recommend our whalers visiting the Seychelles, instead of leaving the fishing to the Americans and French. The central position of the Seychelles for trade with the Eastern Hemisphere, is thus shewn;—*Mahé* to Madagascar, 576 miles; Comoros, 828; Mauritius, 928; Mombas, 930; Delagoa Bay, 1800; Bombay, 1,680; Arabia, 1,230; Cape of Good Hope, 2,640. Had the settlement which Captain W. F. W. Owen so wisely formed at Mombas, on the E. coast of Africa, not have been given up (the Americans are now establishing themselves on this coast), we should have had a perfect chain of posts, if I may so term it, for the extension and protection of our commerce.

Diego Garcia is situate farther E. about 4°, from the Equator, and is one of those numerous coral islands with which these seas abound. (The *Coco* islands in lat. 12.06. S., long. 27.04. E., are a circular chain of islands and keys lined by coral reef, with a sounding from 12 to 20 fathoms, where a ship may anchor; there is an extensive harbour on the N. extremity with but one entrance, three miles wide; straggling rocks and a reef project one mile and a half from W. side of entrance. The islands are now settled on by Capt. Ross an American.) It contains plenty of turtle, and has a few residents from the Mauritius.

CHAPTER III.—ST. HELENA.

SECTION I.—St. Helena (celebrated as the prison and grave of Napoleon Buonaparte), is situate in the Southern Atlantic in 15.15. S. lat., and 5.49.45. W. long, 1,200 miles from the coast of Africa, 2,000 do. from that of America, and 600 from the island of Ascension. Its extreme length is 10½ miles, breadth, 6½, circumference, 28 miles, and area 30,300 acres.

II. The island was discovered by Juan De Nova Castella, a Portuguese navigator, on 21st May, 1502, and named by him in honour of the day of its discovery, *Saint Helena*.

When first visited, the island was uninhabited, covered by one entire forest and its shores abounding with turtles, seals, sea-lions, and various sorts of wild fowl; its settlement, and early improvement in 1513, are attributed to the debarkation of a Portuguese nobleman, who had been mutilated by Albuquerque for crime committed in India, and sent home in disgrace. This gentleman, Fernandez Lopez by name, prevailed on the captain to set him on shore, in preference to the life of ignominy he was destined to lead in Portugal, and his wishes being complied with, and abundant supplies forwarded to him by his commiserating friends, he quickly brought some spots under cultivation, and imported hogs, goats, domestic poultry, partridges, and wild fowl, besides various sorts of fruits and vegetables, all of which increased and thrived exceedingly, such as figs, oranges, lemons, peach trees, &c. Fernandez was removed from his voluntary exile by orders of the Portuguese government in about four years, and the next inhabitants appear to have been four slaves of different sexes, who escaped from a ship, and multiplied to the number of 20; these people subsisted on the live stock and fruits which had increased prodigiously; but the Portuguese being jealous of their consuming what was required for the refreshment of the ships, which touched here on their passage from India, finally succeeded in hunting them out, and destroying them. Tavernier informs us that a Franciscan friar had also taken up his abode on the island and led an austere life for 14 years, when he died; though other accounts say, he was removed in consequence of the great destruction he committed among the goats, for the sake of trafficking in their skins.

The Portuguese mariners preserved the secret of the existence of St. Helena from other nations until 1588, when it was discovered by Capt. Cavendish, on his return from a circumnavigating voyage. He gives the state of the island very circumstantially, from which it appears, that the Portuguese had built a town and a church: he found abundance of goats, pigs, and poultry, with game, wild fowl, and various kinds of fruits and vegetables. The settlement was afterwards frequently visited by English, Dutch, Spanish, and Portuguese ships: the salubrity of air, and the abundance of fresh provisions invigorating their exhausted crews.

It sometimes happened that ships of nations at

war with each other visited St. Helena at the same time—accordingly we have accounts of various sea fights between the Dutch and Spaniards at the anchorage, who are, moreover, accused of wantonly destroying the plantations, lest succeeding visitors should profit by the supplies which had proved so beneficial to them. From all these causes the island was destroyed by the Portuguese, when they acquired possession of settlements on the eastern shores of Africa, and for some time continued desolate, owing to the wanton excesses which had been committed: however, about the year 1643, two Portuguese vessels being wrecked, their crews got safe to land, and once more stocked the island with cattle, goats, hogs, poultry, &c. In 1645 the Dutch took formal possession of St. Helena, and established a colony; but they also abandoned it, when settling at the Cape of Good Hope in 1651.

The homeward bound English East India fleet calling at the island at this period, took possession of St. Helena, and the East India Company obtained a charter for its possession from Charles II. ten years after. Under the superintendence in 1658 of Capt. Dutton, the first English Governor, a fort was erected and called Fort James, in compliment to the Duke of York, the king's brother. Settlers were encouraged to emigrate thither, and slaves were imported from Madagascar to work in the plantations. It is reported to have been captured by the Dutch in 1665, but of this event the accounts are vague and doubtful, and the writer of Rennefort's voyage, who visited the island in 1666, makes no mention of such occurrence, but eulogizes Governor Stringer, and his family for the attentions he received, and describes the settlement as thriving, being then composed of about 50 Englishmen, 20 women, and some negroes. Its population was shortly after increased by many, who had been reduced by the great fire of London, seeking relief in the island.

In the latter part of 1672, the Dutch, through the treachery of a planter, succeeded in landing in the night 500 men from an expedition which had been repulsed the same day; the fort being thus attacked in the rear, the Governor thought prudent to abandon it, and retired, with his garrison and principal effects, on board some ship in the roads, taking, however, the precaution of placing a sloop to cruise to windward of St. Helena to warn British vessels of its capture, and a squadron arriving soon after (in May, 1673), under Captain Munden, he succeeded in recapturing the island, and, by keeping the Dutch flag flying after he got possession of the forts, decoyed six Dutch East Indiamen, as well as a ship from Europe, having a Governor and reinforcements for the garrison on board, into the roads where they were captured. Having formed a British garrison by detachments from the ships, Captain Munden sailed for England with his prizes, and was knighted.

St. Helena remained in the possession of the E. I.

Company until 1833, when it having been rendered a maritime station, which they no longer required for their commerce, was given up for further purposes.

Chronological List.—Sir Richard B. Bland, Capt. G. Field, Capt. J. Johnstone, Capt. S. Poirer, Capt. J. Roberts, Capt. M. Bazeley, Johnson, Esq., Smith, 1723; 1738; D. Crisp, T. Lambert, 1741; Dunbar, 1743; Towse, Esq., 1766; Brooke, 1787; Patten, 1802; Genl. A. Beatson, Genl. Sir Hudson, (actg.); 1821; H. Brooke, Esq., C. Dallas, 1828.

III. When first the appearance of a large island on its northern south. On approach, broken, and the on a near approach rugged and barren nearly perpendicular precipices of basaltic bases, exhibiting most fantastic surrounding Munder, exists, James' Valley, the west side of the by a view of the Town is situated in mountains, and appearance, from—a species of the the peepul tree.

There is good five fathoms; the at times; the surf but about Christlets by which the Valley, James' Town west side, and St. these, however, are ravines, where it is also fortified.

Throughout the are only two plains comprising 1,500 a south-west. The running nearly curved direction to from this chain inn off, generally at right land in the island feet above the level the eastern extrem peak the whole island intercepting the Cuckold's Point,

Company until the last renewal of their charter in 1833, when the island was given up to the Crown, it having been retained by the E. I. Company solely as a maritime station for refitting their ships &c., and which they no longer required, on the abolition of their commercial privileges. (See *Colonial Library* for further particulars).

Chronological account of Governors of St. Helena:—Sir Richard Munden and Capt. R. Kegwin, 1673; Capt. G. Field, 1674; Major J. Blackmore, 1678; Capt. J. Johnson, 1690; Capt. R. Keelinge, 1693; Capt. S. Poirier, 1697; Capt. T. Goodwin, 1707; Capt. J. Roberts, 1708; Capt. B. Boucher, 1711; Capt. M. Bazett, (actg.) Capt. J. Pyke, 1714; E. Johnson, Esq., 1719; E. Byfield, (actg.); Capt. J. Smith, 1723; Capt. J. Pyke, 1731; J. Goodwin, Esq., 1738; D. Crisp, 1739; R. Jenkins, Esq., 1740; Maj. T. Lambert, 1741; G. G. Powel, Esq., 1742; Col. D. Dunbar, 1743; C. Hutchinson, Esq., 1747; J. Skottowe, Esq., 1764; D. Corneille, Esq., 1782; Col. R. Brooke, 1787; Lieut. Col. F. Robson, 1801; Col. R. Patten, 1802; Lieut. Col. W. Lane, 1807; Major Genl. A. Beatson, 1808; Col. M. Wilks, 1813; Lieut. Genl. Sir Hudson Lowe, 1816; T. H. Brooke, Esq., (actg.); 1821; Brigadier Genl. A. Walker, 1823; T. H. Brooke, Esq., (2nd actg.) 1828; Brigadier Genl. C. Dallas, 1828; Major Genl. Middleton.

III. When first seen at sea, St. Helena presents the appearance of a small barren rock, nearly perpendicular on its northern side, but gradually shelving to the south. On approaching, its eminences appear more broken, and the central ones covered with verdure; on a near approach this view is again shut out by the rugged and barren appearance of the shore, which is nearly perpendicular, forming a girdle of inaccessible precipices of basaltic rocks, some of them rent to the bases, exhibiting extensive chasms, and of all the most fantastic shapes that can be imagined. On rounding Munden's Point to the only anchorage that exists, James' Valley Bay, on the north-west or leeward side of the island, the eye is suddenly relieved by a view of the town and fortifications. James' Town is situated in a narrow valley between two lofty mountains, and presents a pleasant and refreshing appearance, from the trees being generally in full leaf—a species of the banian of India, called in Bengal the peepul tree.

There is good anchorage in from eight to twenty-five fathoms; the tide rising to the height of five feet at times; the surf upon the shore is generally strong, but about Christmas tremendous. The principal inlets by which the island can be approached are Lemon Valley, James' Town, and Rupert's Bay on the north-west side, and Sandy Bay on the south-east; all these, however, are strongly fortified. Even the small ravines, where it might be possible to effect a landing, are also fortified.

Throughout the whole length of the island there are only two plains, the largest that of Longwood, comprising 1,500 acres of fertile land, sloping to the south-west. The island is divided by a ridge of hills, running nearly east and west, but bending in a curved direction to the south, at each extremity, and from this chain innumerable valleys and ridges branch off, generally at right angles. The highest point of land in the island is Diana's Peak, which rises 2,700 feet above the level of the sea, and is situated towards the eastern extremity. From the summit of this peak the whole island lies under the view, no point intercepting the horizon: on the same ridge are Cuckold's Point, 2,672 feet, and Halley's Mount,

2,467 feet, which, from their extreme altitude, are often enveloped in clouds. The other remarkable eminences, the altitude of which have been ascertained by Major Rennell, are Flag Staff, 3,272, and Barnscliff, 2,215, nearer the coast and overhanging the sea; Alarm House, 1,260, in the centre of the island; High Knoll, 1,903, to the southward of Ladder Hill, and the official country residence of the Governor; Longwood House, 1,762; most of the central eminences are covered with timber and shrubs, consisting of the cabbage tree, redwood, stringwood, dogwood, &c., and formerly the greenwood was to be found in great abundance, but, at present, few of these trees are to be seen, except about 1,500 acres of an irregular forest at Longwood, preserved by order of the East India Company.

St. Helena is plentifully watered by clear and wholesome springs, abundant in every direction: those issuing from the sides of the hills frequently form picturesque cascades. Roads have been formed in a zig-zag direction, with incredible labour, which now give easy access to the interior of the island. [See "*Colonial Library*,"]

IV. St. Helena is probably of volcanic origin, perhaps like the Mauritius, the result of a submarine convulsion; or it is the lofty peak of some vast range of mountains, whose base is beneath the ocean. Limestone is plentiful in some situations, as well as iron ore, but the scarcity of fuel prevents the latter being made available. There have been appearances of gold and copper, but not to the extent to encourage mining. There is a substance called terra puzolana, found in considerable quantities, which, in conjunction with lime, makes an excellent cement, and is therefore used in forming aqueducts, as it sets hard, and is retentive of water, though subject to become speedily foul by vegetable substances adhering to its surface.

V. The climate of this island is not ill adapted to the European constitution; indeed it has been found congenial to the crews of vessels that have been kept for a long space of time on salt provisions, and without vegetables. The thermometer seldom rises above 80. in James Town, and the heat is only excessive when it is reflected from the sides of the valley in calm weather; in the interior of the island the temperature is more even, never so cold as in England, and scarcely so hot. The average temperature throughout the whole year has been found to be at Longwood from 56. to 68., at James Town from 66. to 78., and at Plantation House from 61. to 73. Fahrenheit.

The healthy condition of the inhabitants was visible to me in their cheerful manners, and active rural industry, the cultivation of the soil being their principal occupation.

It will be seen by the table in the next page, that in 1833, out of a population of 5,000 or 6,000 inhabitants, there were but 80 deaths, and of these nine were above 70 years of age. The proportion of baptisms to burials (see next page) is also very remarkable; in some years the proportion of the former is to the latter as 3 to 1. For the whole period it is more than 2 to 1—thus demonstrating that a high degree of temperature merely is not unfavourable to human life.

State of the Thermometer (Fahrenheit) at Deadwood, St. Helena, taken by Dr. Short, physician to the forces, from 1st September, 1829, to 31st August, 1832.

Months.	Range.			Monthly Average of Thermometer.	State of the Wind.
	Max.	Med.	Min.

Yearly average	71	67	62		

Thunder and lightning are rare, and the rains, which fall most abundantly in February, are for the other months more regular than in other tropical situations. The higher peaks and their vicinity from their approximation to the clouds, are generally visited with a shower daily, and cloudy days are more frequent than scorching sunny ones. The atmosphere is, however, generally so clear that a vessel may be descried at a distance of sixty miles.

VII. Schools, &c., of St. Helena. [B. B. 1836.]

Name of the parish and in what county or district.	Public or Free School, and where situated.	Salary of Schoolmaster or Schoolmistress.	Number of Scholars.			Mode of Instruction.	If supported by Gov. or voluntary contributions, and amount of each.		Expenses of each School.
			Male	Fm.	Totl.		Govmt.	Vol. Con.

The head and lower schools are consolidated under the superintendence of the head master. The sums under the head of voluntary contributions are defrayed by the St. Helena Benevolent Society, the funds of which are raised by voluntary subscriptions.

VIII. During the East India Company's sway, the chief authority was vested in a governor, aided by a council, composed of the principal and senior civic servants. It is now governed as a crown colony.

The military has hitherto been composed of one

VI. The population is estimated at 5,000 (4,977 in B. B. for 1836), of whom about 2,200 are whites, and the remainder either people of colour, Chinese, or Africans, whom the East India Company's government have for several years liberally and generously aided to purchase their freedom. The total number of paupers in the island is 28, principally old and blind people. Those who are born in the island evince considerable quickness and talent. The baptisms and burials at St. Helena, from the 30th September, 1820, to the 30th September, 1833, were as follows:—

	Bps.	Brs.		Bps.	Brs.		Bps.	Brs.
1821	140	90	1827	180	99	1832	229	89
1822	113	70	1828	159	96	1833	201	70
1823	118	57	1829	156	65	1834		
1824	101	90	1830	204	68	1835		
1825	154	125	1831	239	73	1836	152	99
1826	129	83						

Total baptisms, from 1821 to 1833, 2,123; burials, 1,076.

The bill of mortality, ending December, 1833, was 80; of whom 16 died under 1 year; 5 under 5 years; 5 under 10 years; 4 from 10 to 20; 23 from 20 to 40; 18 from 40 to 70; and 9 above 70 years of age.

8; 6 pounds, tars 8; 8 inch 16; 18 ditto, 3 17; 4 ditto, 2 68 pounds, 4 ditto, 1.

IX. Hitherto the charge for St. Helena has been large, unless it be considered in the important view of an invaluable naval station. The revenue derived from a few licenses and fines is small, but increasing in amount. The following is a statement of the Revenue and Charges of St. Helena:—

Years.	CHARGES.				Revenues— viz. Rents, Licenses, and Fines.	Net Charge.
	Civil.	Military.	Buildings and Fortifica- tions.	Total Charges.		
1809-10	12503	69926	2824	83253	1432	83821

In the [B. B.] for 1836, the cost is stated at 42,104.

* The Company have since been repaid by Her Majesty's Government a part of these charges, credit for the amount having been allowed to them in their account with Government, settled by the Act 3rd Geo. IV. c. 93.

† Add to this sundry expenses paid in England, and at the Cape of Good Hope—1829-30, 11,389*l.*; 1830-31, 14,213*l.*; 1831-32, 10,929*l.*; 1832-33, 10,208*l.*; 1833-34, 10,166*l.*; 1834-35, 11,219*l.*; 1835-36, 13,304*l.*

Commissariat.—From the 1st April 1836, to 31st March, 1837; supplies for rations of provisions and forage, 7,784*l.*; fuel and light, 1,000*l.*; miscellaneous purchases, 39*l.*; Transport, 193*l.*; pay of extra staff, 1,554*l.*; military allowance, 160*l.*; special service 2,287*l.*; contingencies, 61*l.*; ordnance department, 4,682*l.*; ordinaries, 6,897*l.*; pay of commissariat officers, 570*l.*; advances to departments, 20*l.*; colonial government, 26,752*l.*; total, 52,003*l.*

Ordnance.—Engineer expenditure, 465*l.*; store-keeper expenditure, 351*l.*; pay of barrack sergeants, 89*l.*; new works, 2*l.*; buildings and repairs, 1,183*l.*; barrack master's expenditure, 459*l.*; total ordnance and barracks, 2,550*l.* Artillery department, 69*l.*; subsistence, 1,387*l.*; rations, 850*l.*; total artillery, 2,306*l.*; grand total, 4,856*l.*

Estimate of the sum that will be required in the year ending 31st March 1839, to defray the charge of the civil establishment at St. Helena, and of pensions and allowances to the civil and military officers and

soldiers of the East India Company's late establishments in that island.

Salaries of Civil Establishment.—Governor 2,000*l.*; colonial secretary, 700*l.*; chief and treasury clerk, 400*l.*; assistant clerk, 200*l.*; surveyor of rents and lands, 300*l.*; office-keeper, secretary's office, 50*l.*; auditor of accounts, 365*l.*; harbour master, 200*l.*; collector of customs, 400*l.*; clerk and warehouse-keeper, 100*l.*; searcher, 120*l.*; chief justice, 700*l.*; queen's advocate, 200*l.*; clerk of the peace, 200*l.*; provost marshal, 100*l.*; gaoler, 35*l.*; judge of summary court, 200*l.*; police magistrate, town, 100*l.*; ditto, country, 100*l.*; reporter of slave emancipation, 50*l.*; civil chaplain, 500*l.*; total 7,020*l.*

Miscellaneous and Incidental.—Governor for messenger and repairs of residences, 227*l.*; harbour master and customs departments, for boats and boats' crews, 400*l.*; judicial department, for constables and incidents, 400*l.*; ecclesiastical department, 75*l.*; schools, 500*l.*; incidental expenses of civil offices, 700*l.*; repairs of public buildings and property, 500*l.*; repairs of roads, 300*l.*; hospitals and medical department, 450*l.*; total, 3,552*l.*; pay of the staff and other expenses for training the militia, 300*l.*

Retired allowances to Officers of East India Company's late establishments.—Civil 6,376*l.*; military, 7,027*l.*; total, 13,403*l.*; less, deductions from pensions of officers re-employed on the present establishment of the island, 9,45*l.*; total, 12,458*l.*; Non-commissioned Officers and soldiers, 1,555*l.*; total, 14,013*l.*; total estimated expenditure, 24,885*l.*; deduct estimated amount of local revenue collections, 8,885*l.*; leaving, 16,000*l.*

X. Imports of the island of St. Helena, [B. B. 1836.] There is no export return. From Great Britain, 350 ships, 137,400 tons, value 12,470*l.* From United States, 121 ships, 36,531 tons, value 2,783*l.* From foreign states, 172 ships, 81,654 tons, value 5,804*l.* From elsewhere, 3 ships, 499 tons, 19,295*l.* Total, 646 ships, 256,084 tons, value 40,352*l.*, men, 16,410.

Number of vessels that received supplies at the island in 1833; British, 156 ships, 58 barques, 79 brigs, and 7 schooners, total 300, tonnage, 131,974, guns 1,666, men 11,459; American vessels 93, tonnage 26,275, guns 158, men 1801; French 51, tonnage 17,478, guns 139, men 1,191; Dutch 23, tonnage 9,995, guns 142, men 589; Portuguese 3, tonnage 883, guns 14, men 71; Swedish 2, tonnage 608, guns 10, men 40; German 2, tonnage 541, guns 8, men 31; Danish 1, tonnage 145, men 14. Total, vessels 475, tonnage 187,899, guns 2,134, men 15,196; and 162 vessels sighted the island. Of British vessels touching at St. Helena 7 were from Algoa Bay, 9 Batavia, 42 Bombay, 69 Calcutta, 30 Cape of Good Hope, 7 Ceylon, 23 China, 5 London, 17 Madras, 9 Manilla, 51 Mauritius, 2 New South Wales, 1 Rio Janeiro, 14 Singapore, 2 Van Diemen's Land, and 12 from whaling voyages; of the above 300 vessels, 189 were bound to London, and 51 to Liverpool, the remainder to different ports in the United Kingdom. If we value the property vested and embarked in 131,974 tons of British shipping at 30*l.* per ton, we shall have nearly four millions annually (3,959,220*l.*) indebted for its better security to our possession of St. Helena.

Vessels calling at St. Helena during 1837, 685, aggregating 269,591 tons, from Calcutta 134, Bombay 49, Madras 21, Ceylon 25, China 65, Manilla 23, Singapore 15, Java 110, Sumatra 12, Mauritius 53, Bourbon 36, Cape of Good Hope 27, Whalers 89, London 7, the remainder from New South Wales,

Siam, &c. 19. The value of the oil in the whale ships nearly 1,000,000*l.* sterling.

Most kinds of tropical or European fruits ripen, more particularly in the sheltered valleys. Vines, oranges, citrons, lemons, figs, pomegranates, mulberries, tamarinds, mangoes, cocoa-nuts, sugar cane, pine apples, &c. thrive well; apples have succeeded tolerably, but the climate is not congenial to cherries, currants, or gooseberries. The common blackberry increased to such an extent after its introduction in 1780, as to cause an order for its extirpation. Three successive crops of potatoes are often produced in the year, and garden vegetables, such as cabbages, beans, peas, &c. are raised on every farm in great abundance. As the principal object of the settlement is to provide fresh meat and vegetables for the refreshment of the homeward bound ships, the cultivation of corn and pulse has not been encouraged, neither is the climate congenial to their production on account of droughts. The provisions exported and brought to market in James Town, and solely grown on the island during the five years ending in 1833, were—

Potatoes, bags, *exported* 7,650, *consumed* 1,960; cabbages, *ex.* 7,470, *c.* 16,250; vegetables, bunches, *ex.* 33,800, *c.* 42,030; pumpkins, *ex.* 3,800, *c.* 570; hay, cwts. *ex.* 380, *c.* 2,880; fowls, *ex.* 27,700, *c.* 20,240; ducks, *ex.* 4,100, *c.* 4,000; bullocks, *ex.* 260, *c.* 560; calves, *ex.* 30, *c.* 460; sheep, *ex.* 220, *c.* 1,230; pigs, *ex.* 870, *c.* 390; the total value of the exports of the above was 20,400*l.* of the consumption, 24,500*l.*

Cattle produced from English stock are not numerous, owing to the great demand of passing ships; poultry is plentiful and well tasted; and in some parts of the island rabbits abound. The stock in the

island consists of horses 300, horned cattle 1,500, sheep and goats 3,000.

Fish are numerous, and more than seventy different kinds have been caught on the coast. Amongst the most prized are the coal fish, which is very delicate but scarce: those commonly taken are jacks, congers, soldiers, mackerel, albicore, bulls' eyes, &c.

The number of fish caught near the island during the five years ending in 1833 were as follow:—mackerel, 115,300; bulls' eyes, 2,500; jacks, 35,900; congers, 24,000; old wives, 72,000; soldiers, 8,400; sandspeer, 6,000; cavaliers, 6,000; deep-water bulls' eyes, 3,520; yellow-tail, 350; coal fish, 30; cod-fish, 40; silver fish, 7,050; stumps, 4,600; long-legs, 35; bear fish, 35; turtle, 40; five fingers, 490; sword fish, 80 (weighing 10 to 80 lbs. each); barracotta, 50; albicore, 8,300 (10 to 80 lbs.).

Prices of stock and provisions at St. Helena, in 1834:—horned cattle, from England, 15*l.* to 20*l.*; from the Cape of Good Hope, 7*l.* 10*s.* to 10*l.*; sheep, Cape, 1*l.*; goats, ditto 10*s.*; pigs, weighing 100lbs. 1*l.* 10*s.*; turkeys 10*s.*; geese, 7*s.*; fowls, 2*s.*; horses, 20*l.*; flour per lb. 2½*d.*; biscuits, 112lbs. 1*l.* English; 16*s.* Cape; oats, per muid, Cape, 12*s.* 6*d.*; barley, ditto, 11*s.* 6*d.*; hops, pocket, 30*s.*; malt, per hogshead, 4*l.* 10*s.*; rice, bag of 165lbs. 12*s.*; English salt, per lb. 1*d.*; salt fish, per cwt. 1*l.*; fresh beef, mutton, &c. 6*d.* to 4*d.* per lb.; ditto, salt ditto, 3*d.* to 4*d.*; sugar, 2*d.* to 3*d.* per lb.; coffee, 5*d.* to 8*d.*; tea, 1*s.* 3*d.* to 2*s.* 6*d.* per lb.; wine, Cape, 1*s.* 6*d.* to 2*s.* per gallon; foreign wine, 12*s.* to 1*l.* per dozen; brandy and gin, 1*l.* per gallon; English beer, 9*s.* per dozen; Island ditto, 2*s.* per gallon; servants' wages, 10*s.* to 15*s.* per month with board, or 1*s.* 6*d.* per day without board; women, 10*s.* to 20*s.* per month, with food.

ASCENSION.

Ascension is contiguous to St. Helena, in lat. 7.57. S., long. 14.28. W. It is a small island of volcanic production, the surface consisting of barren rocks relieved, however, in some places by the verdure on the declivity of the Green Mountain. The island has been of late years well fortified at every accessible part (the sea breaks on the island with tremendous violence) and garrisoned by a detachment of marines and marine artillery, who, aided by artificers, have erected a neat establishment for their location. A shaft has been sunk in one of the mountains, abundance of excellent water conveyed to the anchorage by iron pipes and hoses, and good soil was found two feet under the lava on which an abundance of esculent vegetables may be reared. The beach, at first thought to be composed of sand, was found to consist of very small fragments of shells; in some places firmly compacted together. These slabs were formed of several layers, of which the size of the fragment differs in each layer; they are used for tombstones, steps of doors, and are broken and burned for lime; red volcanic ashes prevail, several hills entirely exhibiting that appearance. Of the vegetable kingdom, the euphor-

bia only is found growing in small tufts, distributed not very abundantly about the rugged lava,—a beautiful object among such barren scenes. Sea fowl are very numerous, and there are three species of butterflies on the island, of handsome colours.

Ponds are kept stocked with turtle, weighing from 200 to 800 lbs each, which may be bought for 50*s.* Abundance of fish and marine birds are obtainable. At a place called 'The Fair,' the birds named sea-swallows, as well as numerous other aquatic birds, congregate; the eggs of the sea-swallows, which are of a dirty white with dark red spots, and about the size of a crow's egg, are collected at certain seasons of the year in thousands, and considered delicate and excellent eating.

Moorings are laid down in the roads, and vessels in want of water and vegetables can be supplied at a moderate price.

During war, these islands in the possession of an enemy, would, as outlying picquets, be a means of serious injury to our commerce; during peace they are refreshing stations, enabling our seamen to have at all times a friendly haven under their lee.

CHAPTER IV.

WESTERN AFRICA.—SIERRA LEONE.

SECTION I.—None of the colonies of England have been misrepresented more than those situate on the western coast of Africa; few surpass them in moral, commercial, and political interest. They are an important and essential link in the maritime empire of Britain.

The trade between Western Africa and Europe commenced about the middle of the fifteenth century, for we learn that in 1455, Prince Henry of Portugal built a fort on the island of Arguin. At the beginning of the sixteenth century, the English, Spaniards, French, Danes, and Dutch had begun to send private ships to trade on this coast; but during the middle of this century the commerce of each nation was organized under the management of chartered companies, who formed establishments on different parts of the coast, built forts at the mouths of several rivers, and prosecuted an active trade, the greater part of which was for slaves. The English settled chiefly at Cape Coast Castle; the French at the mouth of the Senegal and at Goree Island; the Dutch on the Gambia; the Portuguese at St. George del Mina; the Danes at Christianborg, &c. Each of these strong fortresses, mounting from 50 to 60 pieces of cannon, had subordinate posts and stations, several of which continue to this day. At the present moment our settlements are situate at Bathurst, on the Gambia, at Sierra Leone, Cape Coast Castle, and Accra, and a brief description of the sea coast, followed by a succinct account of each settlement, will be therefore necessary.

II. In general the coast of Western Africa, extending for 4,000 miles along the Atlantic, with an average breadth of 300 miles, is along the ocean boundary a flat country, backed by ranges of lofty mountains, which in some places approach the sea, and as at Cape Verd, project in bold headlands. The great coast chain runs parallel to the coast from west to east, where, affording a passage for the disemboguing waters of the Nun, one of the mouths of the Niger, tends towards the north-east to join or form the Gebel el Kumri, or Mountains of the Moon; some of the peaks of this range (those of Cameranca, near Benin) are said to be 13,000 feet in elevation. It is only, however, about the estuaries of the great rivers and along their banks that the country can be said to be flat, in other places it consists of gentle undulations and rising eminences, giving considerable beauty to the landscape, the most conspicuous feature of which are the numerous rivers that disembogue into the ocean, most of them arising in the chain of mountains above described, and running a tortuous course to the coast.

Among the principal rivers are the Senegal, Gambia, Rio Grande, Rio Nunez, Kokelle, Cameranca, Mesurado, Nun or Niger, Congo and Coauzo. Be-

ginning with the most northerly, the Senegal appears to rise in the Kong range of mountains (heights of Foota Jalloo), in nearly 10° north latitude, and 10° west longitude, where the Niger was thought to rise; the Senegal, about 15° north latitude, is joined by several tributary streams, viz. the Woolery, Faleme, Neriko, &c., and after passing Galam and the falls of Felu, makes a circuitous bend to the north-west along the borders of the desert, and falls into the Atlantic at Fort Louis, its course being 950 miles.

The Gambia has its source in the same mountain range as the Senegal, near the Faleme, one of the tributaries of the latter named river, and rolls a powerful and rapid stream, at first to the north-west and then westerly, falling into the Atlantic, after a course of 700 miles, about 13.13. N. Lat. The country between the rivers Senegal and Gambia, is called by the French the Sene Gambia. The Rio Grande is, as far as we know, a large stream, nor is any river equal to the Gambia met with until we arrive at the Bight or Gulf of Benin, where, for the space of above 200 miles, there is a succession of large estuaries, now ascertained (through the persevering enterprize of the Landers) to be the mouths of the long-sought Niger, whose origin we are still ignorant of, and whose course and embouchures are still to a great extent unexplored; the delta of this mighty stream stretching into the interior of Western Africa for more than 170 miles, occupies, it is supposed, a space of more than 300 miles along the coast, thus forming a surface of more than 25,000 square miles, being a considerably larger area than is embraced in all Ireland. Captain Belcher, who surveyed the coast line here in 1830-32, in the *Etna* and *Raver* says that he thinks the whole of the space between the Nunez and Rio Grande is one great archipelago, and navigable, at high water, for vessels of four or five feet draught, and it is generally believed that canoes can navigate from Isles de Los to the Gambia, within the islands of this (supposed) huge archipelago. It is probable that a large river will yet be found here. The Compone, as far as explored, is a very extensive stream. Further S. the Congo or Zaire pours its ample volume of waters into the broad Atlantic, 400 miles having been navigated during Captain Tuckey's unfortunate expedition, leaving its further course and source still involved in mystery. Of the Coauzo, though a large river, we are not yet in possession of sufficient information to speak positively. With a knowledge of the foregoing leading physical features, we proceed to examine the coast more in detail as regards its social as well as geographical divisions, beginning on the north with the river Senegal, where the French established themselves upwards of a century since.

Fort St. Louis, the capital, is situated on an island in the river, a mere sandbank, without any water

which can be drank without being filtered, and dependent entirely for provisions on the southern coast, which, however, yields them in abundance. St. Louis never became a large settlement; Golberry, in 1786, reckons not above 60 Europeans settled there for the purposes of trade. The military and civil servants of government amounted to 600, the natives to 2,400. The French lost St. Louis during the revolutionary war, but we restored it to them on the friendly peace which succeeded in 1814, under a treaty that Portenick was always to be open to us for the trade in gum; but which treaty the French violated. The disastrous fate, however, of the expedition sent out in the *Medusa* frigate has been unfavourable to any attempt to restore and extend the prosperity of the colony. It is said, however, to have experienced an increase within the last few years, and to contain now about 600 inhabitants. The original hopes of its greatness were founded on the supposed identity of the Senegal with the Niger, and on the prospect of a communication by it with the inmost regions of Africa. All the efforts founded upon this erroneous theory proved of course abortive, and the commercial advantages of the colony (the procuring of slaves not included) have been confined to the gum trade and the gold trade of Bambouk.

The kingdom of Bambouk, situate near the head of the river, and so enclosed between its main stream and the great branches of the Kokora and the Faleme, as to form almost a complete island, is the next object of commercial importance to the French on the Senegal. It is almost entirely a country of mountains, whence flow numerous streams, almost all of which roll over golden sands; but the main depositories, where the metal is traced as it were to its source, are two mountains, Natakou and Semayla. The former composes almost an entire mass of gold, united with earth, iron, or emery. The first four feet of depth consists of fat earth, from which the grains of gold are extracted by agitation with water in a calabash; afterwards the precious metal begins to appear in small grains or spangles, and at 20 feet in small lumps of from two to ten grains. The pieces become always larger as the work descends; but as the natives have no means of propping up the sides, they often fall in and bury the workmen. Semayla, a mountain 200 feet high, presents a different structure. The gold is here embedded in hard sandstone, which must be reduced to powder before the extrication can be effected. Part of it also is found in red marble, a substance which to the natives is perfectly unmanageable. Bambouk is said to have been early conquered by a Mahometan force, and afterwards by the Portuguese. Both have been driven out, and the French never made any serious attempt to establish themselves in it.

The point at which the French attempted to carry on the commerce of the Upper Senegal is at Fort St. Joseph, in the kingdom of Galam or Kajaaga. A voyage thither was reckoned to produce cent. per cent.; but the unhealthiness of the climate, the difficulties of the navigation, and the constant hazard of being plundered by a succession of barbarous chiefs, who occupy the banks, rendered it a very precarious speculation. At present the fort is abandoned and in ruins; but the Serawoolies, who inhabit this fine country, are among the most industrious of the African tribes, and have engrossed the trade of Bambouk, Manding, and most of the upper countries on the Senegal and Niger.

In descending the Senegal, there are several popu-

lous and powerful states, among which is that of Fouta Torra, extending considerably both to the south and north of the river, but of which the interior has not been explored by Europeans. The king is a zealous Mahometan, and, under pretext of making converts, has endeavoured to subdue the almost pagan Daniel or Burb of the Jalofs. The latter, however, by the strength of his country and a prudent system of warfare, has been able to baffle his attempt. On the middle Senegal, the most important personage is the Siratic, who holds his court at Ghiorel, considerably to the north of the river. Nearer the sea is the kingdom of Hoval, governed by a petty prince called the Great Brak, which, in the language of the country, signified king of kings. [I give these and several other details on the authority of Murray's *Encyclopedia of Geography*, who, however, does not state his authority; it appears to be derived from Golberry. My object is to stimulate to further investigation.]

The coast between the Gambia and Senegal is chiefly occupied by the kingdom of Kayor. It is stated, by Golberry, to extend 750 miles in length, and to contain 180,000 inhabitants, who are Jalofs. At the little island of Goree, on this coast, the French have established the capital of all their African settlements. Its advantages consist solely in its almost inaccessible situation on a rock, three sides of which are perpendicular, and the fourth very steep. The rock is fortified, but not, it is said, in the most skillful manner. The town contains 7,000 inhabitants, and presents a very bustling scene, being the entrepot of all the trade with the opposite coast, and also a place of refreshment for French ships on their way to India. It lies on the southern side of the peninsula, which terminates in Cape Verde, the most westerly point of the African continent. Though the soil be sandy, it bears a number of those immense trees called Baobab, which give to the cape that verdant aspect whence it derives its name. On the northern side, two hills, 600 feet high, mark this striking geographical position, and serve as a guide to mariners.

The Gambia is almost entirely an English river, the attempts to form settlements upon it having, for nearly two centuries, been confined to our own nation. Our settlements on the Gambia will be found subsequently detailed.

The Gambia is bordered on its north bank by several flourishing little kingdoms. That immediately on the sea is Barra, said to contain 200,000 inhabitants. The capital is Barra Inding; but the chief place of trade is Jiliffrey. In the kingdom of Barra there are seven principal towns, with a family entitled to the crown in each, who succeed to the cap or throne alternately. Boor Salum is a still more extensive kingdom, situated on a small river that falls into the Gambia, and containing, it is said, 300,000 inhabitants. Above it occur successively the two smaller kingdoms of Yani and Wooli. The territory of all these states is flat and fertile, abounding in rice, grain, and other provisions. The inhabitants are chiefly of the Mandingo race, and carry on a considerable trade into the interior. At Barraconda, about 400 miles up the river, are falls, or rather rapids, above which sandbanks and flats soon render the navigation difficult.

To the south of the Gambia nothing of great importance occurs, till we come to the alluvial estuaries of the Rio Grande, a river supposed, as its name imports, to be of some magnitude; but Captain Owen found it a mere inlet, receiving some inconsiderable streams. At its mouth occur a number of islands

which, with sen, form villages. The Bugas, are driven out of original tenancy themselves to Grande. Bited by the In 1792, an view to plama; but, the first instance colony under pecially amid obliged us to made a settlemonstrances the Gambia.

which, with a group opposite to them in the open sea, form what is called the Archipelago of the Bissagos. The inhabitants of the same name, called also *Bijugas*, are a tall, robust, warlike people, who have driven out the peaceable race of the *Biafamas*, the original tenants, and have compelled them to confine themselves to the continent and the banks of the Rio Grande. Bissao, the largest of these islands, is inhabited by the *Papels*, also warlike and enterprising. In 1792, an association was formed in England, with a view to planting a settlement in the island of *Bulama*; but, though no opposition was made in the first instance, the difficulty of establishing a new colony under circumstances so unfavourable, and especially amidst the hostility of these rude neighbours, obliged us to desist. The Portuguese have lately made a settlement upon this island, despite the remonstrances of Colonel Findlay, the late governor of the Gambia.

Along the heads of the Rio Grande lies the important kingdom of *Foota Jallo*, said to extend about 350 miles in length, and 200 in breadth. It appears to be the most improved of all the states in this part of Africa. The inhabitants are *Foulahs*, and of the Mahometan faith, but not bigots, and their marabouts are held in high reputation for learning. They manufacture cloths of considerable fineness; they work in iron dug from extensive mines in the country, also in silver, wood, and leather, and they conduct large caravans into the interior, as far even as *Timbuctoo* and *Cassina*. Here, where they are the ruling people, they by no means display that pacific character which distinguishes the tribes on the Gambia and Senegal. They can bring into the field 16,000 men. *Timbo*, or *Teembo*, the capital, is said to contain 7,000 souls, and *Laby* 5,000.

To the south of *Foota Jallo* is *Soolimana*, also warlike and considerable. It borders on the Niger in the highest part of its course, though the sources of that river are placed in the hostile territory of the *Kissi*. The king is at present Mahometan, but the bulk of the nation pagan. They are a gay, thoughtless, stirring race. On the eastern side of the Niger is the country of *Sangara*, still more extensive and more warlike; the people of which would, it is supposed, have by this time conquered *Foota Jallo*, had they been united among themselves. At present, whenever the *Soolimas* are inclined to go to war, they can easily command 10,000 auxiliaries from beyond the Niger.

In returning to the coast, we pass through the *Koorango* country, inhabited by the *Mandingoes*, who, as usual, are gay, thoughtless, hospitable, and enterprising. Farther down are the *Timmanees*, a more depraved race, who were the chief agents in the slave trade. They are described as treacherous and avaricious. Captain Laing met a woman who accused her two children of witchcraft, and on that ground offered to sell them to him at a low price. Their agriculture is peculiarly rude, and the cloths of their manufacture very coarse. They abuse the English as having deprived them of almost their only source of wealth, which consisted in the sale of slaves. This people are oppressed by a singular association called *Purrah*, who, united by a bond and always supporting each other, have become almost masters of the country, and often exercise their power in a very tyrannical manner.

The country of the *Timmanees* borders on that part of the coast where Britain, with the most philanthropic views, has founded the colony of Sierra

Leone. Its principal seat at *Freetown* is on the south side of the bay, which receives the river formerly called by the same name, but now more usually the *Rokelle*, and which rises in the *Soolimana* country; it will be found subsequently described.

The space from Sierra Leone to the commencement of the grain coast of Guinea, an extent of about 200 miles, is chiefly marked by the entrance into the sea of the considerable rivers of *Sherbro* and *Mesurado*. The former is navigable twenty leagues up, and has a tolerably large island at its mouth. On the banks is found a species of pearl oyster. The *Mesurado* is a still larger stream, and very rapid. According to the natives, it requires three months' navigation to reach its source, which would appear to be in the mountains of *Kong*, not very far from that of the Niger. The banks are described as finely wooded, fertile, and, in many places, very well cultivated. The states here are entirely negro in religion and manners, none of the Mahometan institutions having penetrated so far. Travellers enumerate the kingdoms of *Bulm*, *Quoja*, *Monon* and *Folga*, which they sometimes even dignify with the title of empires. The sovereigns are, in general, absolute, and their obsequies are celebrated with human sacrifices, though not to the same frightful extent as in some of the countries to the west.

The Americans, in 1820, formed a settlement on this coast, which was called *Liberia*; while its capital, on an island at the mouth of the *Mesurado*, was named *Monrovia*. The object was to obtain an asylum for liberated negroes, who, notwithstanding their emancipation, are, by the prejudices of the Americans, regarded as beings of an inferior order. In spite of disastrous events, which obstructed its progress, it had attained in 1830, a population of 1500. The population of *Monrovia* amounted to about 700, the rest were distributed in eight different stations along 150 miles of coast from *Cape Mount* to *Tradetown*. The territory is healthy and fertile; the colony was well conducted, and opened a friendly intercourse with the natives, from which happy effects were confidently anticipated, but we have no recent accounts to determine how far it has succeeded.

From the *Mesurado* to *Cape Palmas* extends what is commonly called the *Grain* or *Malaghetta Coast* of Guinea. The two rivers of *Sesters* and *Sangwin*, near the centre of the coast, are rather considerable, and their banks are said to be fertile and populous. A settlement, called *St. George's*, has recently been made at this river by Captain *Spence*. The state of society seems to be nearly the same as in the countries last described; the sovereigns absolute, human sacrifices prevalent to a certain extent, and also self-immolation.

Great sway is in the hands of a peculiar priesthood, called the *belli*. The youthful candidate, for a place in this body, must qualify himself by a long initiation, during which he is withdrawn from all his friends, and lodged in the depth of a sacred forest, where, it is said, he is kept in a state of entire nudity. Amongst the tests of his proficiency is the performance of songs and dances, of a very extravagant and often indecent nature; but peculiar knowledge is also supposed to be communicated on various high points; and those who have gone through the course with success, and are called the "marked of the *belli*," look upon all the rest of the community as *quoiga*, or idiots. They not only administer all the concerns of religion, but conduct the judicial proceedings; most of which are made dependent on

some form of ordeal. Although the Portuguese have lost all their settlements in this part of Africa, considerable numbers of their posterity reside there, mixed with the natives, by whom they are treated with some degree of respect.

Beyond Cape Palmas, tending to the north-east, and reaching as far as Cape Apollonia, is called the Ivory Coast. The name is evidently derived from the quantities of that valuable product, obtained from the numerous elephants on the sea shore, and in the interior. The teeth are of good quality, and uncommonly large, weighing sometimes not less than 200 lbs. Towards the east, at Assinoo and Apollonia, a considerable quantity of gold is brought down from the countries behind the Gold Coast. There is also a good deal of ivory at the ports of Cape Lahoo, and Great and Little Bassam. There are no European settlements upon the coast, except an English fort at Apollonia, which perhaps belongs rather to the Gold Coast. Navigation along this, as well as the Grain Coast, requires much caution, as the shore is flat and destitute of any conspicuous land marks, while a heavy surf, borne in from the whole breadth of the Atlantic, breaks continually against it. Early navigators describe the natives as the most violent and intractable race on the whole African coast. The teeth filed to a point, the nails long, while their harsh and guttural language, almost resembling the cry of wild beasts, inspired disgust; they have been accused of cannibalism; and their suspicion of Europeans is usually said to be so great, that nothing can induce them to go on board a vessel. Captain Adams, however, the most recent visitor, gives a much more favourable account: he even says, that almost all the business is transacted on board European ships, though, when he did go on shore, he was hospitably received.

From Apollonia to the Rio Volta extends what is called the Gold Coast of Africa. It was long the most frequented by European traders, particularly English and Dutch, both for that highly-prized commodity which its name indicates, and for slaves, while so nefarious a commerce was permitted. The coast presents the appearance of an immensely thick forest, only detached spots of which are cleared and cultivated. The soil near the sea, being light and sandy, is scarcely fit for any important tropical product, except cotton; but six or seven miles inland it improves greatly, and might be made to produce sugar, and others of the richest West India products, if the profits of industry were secured to the inhabitants. Maize is the grain principally cultivated. The gold, which forms the staple commodity, is chiefly brought down from mountainous districts far in the interior. The natives understand the process of smelting the golden ore, but the pure metal is found in such large quantities close to the surface as to require the exercise of little ingenuity. In many places, however, even upon the coast, a small quantity may be extracted from the earth by mere agitation with water in a calabash. Little or no ivory is exported. The ruling people on the coast are the Fantees, a clever, stirring, turbulent race. They exert more ingenuity in the construction of their dwellings, and canoes, than the nations to the west. The form of government is republican, and each village has a large public hall roofed, but open at the sides, where an assembly is held, and public affairs are debated. The pynins, or elders, possess considerable authority, and the administration of justice is chiefly in their hands.

The capital of the British settlements is at Cape

Coast Castle, subsequently described. To the west of Cape Coast, we have Dix Cove and Succondie, in the Ahanta country, a very fertile tract, and to which purer gold is brought than to any other part of the coast. The inhabitants are also peaceable and tractable, and the chances of improvement, as Mr. Meredith conceives, are on the whole favourable. The British station at Anamaboe was formerly the great mart of the slave trade. The fort is compact and regular; and in 1807 it withstood, with a garrison of twelve men, the attack of 15,000 Ashantees. Winnebah, in the Agoona country, though in an agreeable situation, has been abandoned; but Fort James, at Accra, would, in peaceable times, afford great convenience for trade, as no other place on the coast has such extensive intercourse with the interior. Cape Coast Castle and Accra are now the only places where any garrison is maintained.

The capital of the Dutch settlements, in this part of Africa, is El Mina, or the Castle; first founded by the Portuguese, and taken from them in 1637. It is about nine miles west of Cape Coast Castle, in an open country, close to a large dirty town of 11,000 inhabitants. The fort is well built, on a high situation, and vessels of 100 tons can come close to the walls; but its strength has been doubted. The Dutch maintain here a garrison of 100 men, and keep their establishment, on the whole, upon a more reputable scale than the British. Their forts along the coast are numerous, but none now are garrisoned except Elmina and Axim. The Danes have a respectable fort near Accra, called Christianborg Castle, and also one at Ningo, near the eastern extremity of the coast.

The country behind the Gold Coast, when first known to Europeans, was divided among a number of considerable kingdoms, Dinkira, Akim, Warsaw, and Aquamboe; but all these have now sunk beneath the overwhelming sway of the Ashantees. This warlike power has also reduced the interior countries of Gaman, Inta, Dagwumba, and others, of which some are more extensive and populous than itself. Ashantee Proper, is estimated to contain 14,000 square miles, and about a million of people; but this last number would be more than quadrupled, if we were to include all its subjects and vassals. The character of the Ashantees is detailed under the head of Population.

On the eastern side of the Rio Volta commences what Europeans have called the Slave Coast, because slaves were there procured of the most docile and tractable character. It consisted originally of the two kingdoms of Whydah and Ardrah, forming the most populous and the best cultivated part of the African coast. The vast and impenetrable forests which cover so much of the continent had here been cut down, leaving only what was requisite for ornament and convenience. The whole country is said to have been like a garden, covered with fruits and grain of every description. Amid this abundance, the Whydahs, having become luxurious and effeminate, were unable to make head against the warlike power of Dahomey, in the interior, which invaded and conquered them at the last century. The first ravages were dreadful, and rendered their country almost a desert, nor has its peaceful submission ever allowed it to regain its former prosperity.

Dahomey, which is thus predominant both over the coast and over the interior, to a depth of about 200 miles, is governed upon the same system as Ashantee, and with all its deformities, which it car-

ries to a still more violent excess. The bloody cus-
toms take place on a still greater scale; and the
bodies of the victims, instead of being interred, are
hung upon the walls and allowed to putrefy. Human
skulls make the favourite ornament of the palaces and
temples, and the king is said to have his sleeping
apartment paved with them. His wives are kept up
to an equal number with those of the king of
Ashantee. All the female sex are considered as at
the king's disposal, and an annual assemblage takes
place, when, having made a large selection for him-
self, he distributes the refuse among his grandees,
who are bound to receive them with the humblest
gratitude: in short, this ferocious race allow them-
selves to be domineered over in a manner of which
there is no example among the most timid and
polished nations. The greatest lords in approaching
the king throw themselves flat on the ground, laying
their heads in the dust; and the belief is instilled
into them, that their life belongs entirely to their
sovereign, and that they ought never to hesitate a
moment to sacrifice it in his service. The king of
Dahomey has been lately worsted in his wars with
Eyeo, by whom he is now held in a species of vas-
salsage. His country consists of an extensive and
fertile plain, rising from the sea by a gradual ascent.
The soil is a reddish clay mixed with sand, and no-
where contains a stone of the size of a walnut.
Though capable of every species of tropical culture,
little is actually produced from it that is fitted for a
foreign market; so that since the abolition of the
slave trade, small advantage has accrued from con-
tinuing the intercourse with it, and the English fort at
Whydah has been abandoned.

Whydah, now commonly called Griwee, may be
considered the port of Dahomey, from which a route
of about 100 miles reaches through Faviés and Toro
to Abomey, the capital. Griwee is situated in a fer-
tile country, still highly cultivated, and is plentifully
supplied with all the necessities and conveniences of
African life. Captain Adams, whose estimates on this
point are unusually low, represents it as containing
about 7,000 inhabitants. The despotic and capricious
manner, however, in which foreign residents are
treated by the tyrant of Dahomey, has gradually in-
duced the different European powers to withdraw their
factories. Ardrah is still larger and more flourishing,
containing, according to the same authority, 10,000
inhabitants. It is situated about 25 miles inland, on
a long and beautiful lake or lagoon, running parallel
to the sea, with which it becomes connected at its
eastern extremity by the river of Lagos. The Ardra-
nese are industrious in the manufacture of cotton,
interwoven with silk: they make also soap, baskets,
and earthenware, and are skilful in working iron.
Their market is the best regulated of any on the
coast, and exhibits the manufactures of India and
Europe, tobacco from Brazil, cloth from Eyeo and
Houssa, and every other article that is here in demand.
Though so close to Dahomey, the people appear to
enjoy a republican form of government. A consider-
able number of Mahometan residents have made their
way hither, and have introduced the management of
horses, and the use of milk, to both of which the
negroes in general are strangers. Badagry, though it
has suffered by recent contests with Lagos, appears
by Lander's report to be still a large and populous
place, situated in a fine plain, and divided into four
districts, each governed by a chief, who assumes the
title of king. Lagos is built upon a small island, or
rather the bank at the point where the channel com-

municates with the sea on one side, and on the other
with the Cradoc Lake, a parallel piece of water. The
town is scarcely a foot above the lake, and is over-run
by water-rats from it. It has 5,000 inhabitants, with
a good deal of stir and trade. Its petty despot assumes
all the airs of the greatest African monarchs, never
allowing his courtiers to approach him unless crawling
on the ground. Some barbarous customs prevail,
such as impaling alive a young female, to propitiate
the goddess who presides over rain, and hanging the
heads of malefactors to some large trees at the end of
the town. The currency here consists of cowries,
which are imported in large quantities, and trans-
mitted into Houssa and other interior countries,
where they form the universal circulating medium.

At the termination of the Cradoc Lake commences
a large tract of coast, of a peculiar character, which,
from the principal state, receives the name of Benin.
It extends upwards of 200 miles, and presents a suc-
cession of broad estuaries, now discovered to be all
branches of the Niger, of which this country forms
the delta. They communicate with each other by
creeks, and, frequently overflowing their banks, render
the shore for 20 or 30 miles inland, a vast alluvial
wooded morass. The natives, having thus very ex-
tended water communications, are the most active
traders anywhere in Africa; but, except slaves, the
commodities in which they deal are entirely changed.
Gold has disappeared; ivory is again found in con-
siderable plenty; but palm oil is the great staple of the
eastern districts. A great quantity of salt is made at
the mouths of the rivers, both for consumption at
home and in the interior.

The first leading feature is the river Formosa, two
miles wide at its mouth; on a creek tributary to it
lies the capital of Benin. This city appeared to Cap-
tain Adams the largest he had seen on the coast of
Africa; he, therefore, probably under-rates its popu-
lation at 15,000; being irregularly built, and consist-
ing of detached houses, it occupies an immense space
of ground. The surrounding territory is well culti-
vated, though not so thoroughly cleared of wood as
that round Ardrah and Whydah. The king is not
only absolute; but "*feliche*," or a god, in the eyes of
his subjects; and all offences against him are punished
in the most cruel and summary manner, not only as
treason, but impiety. Gatto, about 50 miles below,
is the port of Benin; accessible to vessels of 60 tons.
The trade on this river has greatly declined.

Warré, or Owarri, is another state and city, situated
on another creek, communicating with the Formosa,
on its opposite side. It consists of a somewhat
elevated and beautiful island, appearing as if dropped
from the clouds amidst the vast woods and swamps
by which it is surrounded. Here, too, the king is
absolute, and carries polygamy to a very great extent.
A recent traveller, happening to get a peep into the
seraglio, saw about 50 queens, busied in various
employments, from the toilette to the washing-tub.
New Town, on the Formosa, is the port of Warré.

After doubling Cape Formosa, and passing several
estuaries, we come to that of the Brass River, called
by the Portuguese, the River of Nun. Though not
the largest estuary of the Niger, yet, being most
directly in the line of the main stream, and that by
which Lander entered the Atlantic, it at present en-
joys the reputation of being the principal channel.
It is divided into two branches; but the navigation
is greatly impeded, and the trade limited, by a dan-
gerous bar at its mouth. Brass Town is built not on
either branch, but on one of the numerous creeks

connected with both, and in a country overgrown with impenetrable thickets of mangrove. It is a poor place, divided by a lagoon into two parts, each of which contains about 1,000 inhabitants. Bonny River forms the next important estuary, having on its opposite sides the towns of Bonny and New Calabar. Being only a few miles up, they are in the midst of the morasses which overspread all this country. The people support themselves by the manufacture of salt, and they trade in slaves, and palm oil. Bonny, in particular, is become the great mart for these last commodities, and is supposed to export annually about 20,000 slaves! The dealers go in large canoes two or three days's sail to Eboe, the great interior market. The king is absolute, and more barbarous than the rest of his brethren on this coast. He boasts of having twice destroyed New Calabar, and ornaments his fetiche house with the skulls of enemies taken in battle.

To the eastward of Bonny is the estuary of Old Calabar River, the broadest of all, and navigable for large vessels 60 miles up to Ephraim Town, governed by a chief, who assumes the title of duke. It appears to contain about 6,000 inhabitants, carrying on a considerable trade; and the duke has a large house filled with European manufactures and ornaments of every kind, received by him in presents. This river is followed by that of Rio del Rey, and then by the Rio Cameroons. The country yields a good deal of ivory and palm oil. The continuity of that vast wooded flat, which has extended along the coast for more than 200 miles, is now broken by some very lofty mountains, the principal of which is supposed to reach the height of 13,000 feet.

Several islands lie in the Bight of Biafra. Fernando Po, in 3.28. N. Lat., and 8.40. 15. E. Long., is a fine large island, lately occupied only by a lawless race, composed of slaves, or malefactors, escaped from the neighbouring coast. The British Government, formed, in 1827, a settlement at this island, the mountainous and picturesque aspect of which afforded hopes of a healthy station; the settlement is, I believe, abandoned by government, but I think prematurely, for as the island became cleared, its insalubrity would have diminished; and it would be an extremely valuable colony to Great Britain, from its vicinity to the mouths of the Niger. Prince's Island, situate also in the Bight of Benin, $9\frac{1}{2}$ miles long by 6 broad, is high (the loftiest peak, 4,000 feet), and wooded. St. Thomas is large and fertile; towards its south extremity it presents a mass of steep elevations, with abrupt craggy faces, and two or three pinnacles, resembling gigantic nine-pins; one half the island is mountainous. The pretty little Isle of Annabona is inhabited by a simple native race, to the number of 3,000; it is near 3,000 feet high, but its length does not exceed four, nor its breadth two miles; its heights are rounded like those of Fernando Po, rather than peaked and pointed like Prince's Island. These islands run in a chain to the south west from the Rio Calabar; and the last three are in nominal subjection to the Crown of Portugal.

The next division of Western Africa consists of Congo and Loango, the coast of which is generally named Angola. The principal feature is the Zaire, or Congo, a powerful and rapid river, which rushes by a single channel into the Atlantic. Its course was traced upwards by Captain Tuckey, in his unfortunate expedition, about 400 miles, yet nothing was ascertained as to its origin and early course; though the hypothesis of its forming the termination of the

Niger is now completely refuted. The population along the river is said to be small; the largest villages, Cooloo, Embomna, and Inga, containing only from 300 to 600 inhabitants. The interior capital of Congowar, however, mentioned as the residence of the Blindy North Congo, to whom all the chiefs pay a species of vassalage, is probably what the Portuguese called St. Salvador; and where, according to Mr. Bowdich, they still maintain a mission; but no recent details have been obtained respecting it. There is regular distinction of ranks, the Chenoo, or chief, hereditary in the female line; the Mafoots, or collectors of the revenue; the Foomoos, or cultivators; and the domestic slaves, which latter are not numerous.

The slave trade, for which alone this part of Africa is now frequented, is chiefly carried on at Malemba and Cabenda, on the north side of the river. Malemba has been called the Montpelier of Africa. It stands on a hill about 100 feet high, commanding a beautiful prospect of the windings of the Loango Louisa, through an extensive plain. Its dry and elevated situation preserves it from those deadly influences which operate so fatally on the health of mariners. Cabenda, near the mouth of the river of that name, also a beautiful city, is situated at the foot of a conical wooded mountain, and has been called the Paradise of the Coast. It is a great mart for slaves, who are brought from the opposite territory of Sogno.

The country to the south of Congo is called Benguela, and its commerce is still almost entirely in the hands of the Portuguese. They frequent the bay and river of Ambriz, in which there is a tolerable roadstead; but their great settlement is at St. Paul de Loanda, a large town in an elevated situation. It is said to export annually 18,000 or 20,000 slaves, chiefly to Brazil. (It is a disgrace to England to permit the continuance of this infamous traffic.) S. Felipe de Benguela, in a marshy and unhealthy site, is now considerably declined; and its population does not exceed 3,000, mostly free negroes and slaves. There is also a smaller port, called Novo Redondo. The Portuguese claim a certain jurisdiction over the native states for several hundred miles in the interior, obtaining presents and purchasing slaves. Further inland is the country of Jaga Cassanga. The Jagas are celebrated by the writers of travels, two centuries ago, as a formidable devastating tribe, addicted to the most ferocious habits; and no change is since asserted to have taken place in their character. Behind them, and in about the centre of the continent, the nation of the Molouas, are represented as more numerous, more intelligent, and possessing a higher degree of industry and civilization than any other in Africa, under this latitude. Of the remainder of the coast, towards our own territories, in Southern Africa, little is known.

Portugal at first claimed the whole of the coast just described, but was driven from it by the Dutch, who took El Mina in 1643; the latter were in turn compelled to retreat by the English, in 1661, who took Cape Coast Castle, and having formed an African Company, commenced the establishment of forts for the protection of trade.

The settlements at present belonging to England in Western Africa are at Sierra Leone, the river Gambia, Cape Coast Castle, Accra, and Annamabae.

Sierra Leone.—The first settlers here were the Portuguese; shortly afterwards, the English established themselves upon Bance Island, in the middle of the river. At the suggestion of Dr. Smeathman,

the negroes discovered the American war, 60 whites, were with all things in the year 1787; and having been pur a town, called mortality shortly one-half, and a weakness, plundred the colony Island. In 179 Association having a charter, conv among whom w been sent from was plundered b was the disaster, settlers, that the ment with the go their jurisdiction. A charter was Company; it w some alterations) settlement was tr in 1821, when t African Company Sierra Leone.

The boundaries define; in 1787 Leone was ceded tending 15 miles east to west;—the advanced to the False Cape. In Leone Company is described as the on the north by the Camarancas Bance; and on the as at present known Sierra Leone river at Calmont Creek, Calmont to the W the Bance (which River) constituting south, and 12 from 1819 between Sir named Ka Konka, dary of the peni Britain the unlimit by the name of M on the banks of the King of the North the islands of Bance islands on the no Zogrine Point, and north banks of the river Conray Bay Creek on the east vigation of the River the boundaries to Learciss, in 8.50. n line which separates from that of the G the estuary of the the west the Atlan River; and on the defined.

Our possessions district having been

the negroes discharged from the army and navy after the American war, to the amount of about 400, with 60 whites, were conveyed to Sierra Leone, furnished with all things necessary to establish a colony, in the year 1787; and a piece of ground 20 miles square having been purchased from one of the native chiefs, a town, called Freetown, was founded. A dreadful mortality shortly afterwards reduced the colonists to one-half, and a native chief, taking advantage of their weakness, plundered the settlement in 1789, and drove the colonists to seek for shelter in Bance Island. In 1791 and the following year, the African Association having become incorporated and obtained a charter, conveyed thither a number of settlers, among whom were the Maroon negroes, who had been sent from Jamaica to Nova Scotia. Freetown was plundered by the French in 1794, and so great was the disaster, and so destitute the condition of the settlers, that the company entered into an arrangement with the government to place the colony under their jurisdiction.

A charter was granted in 1802 to the Sierra Leone Company; it was subsequently revised and (with some alterations) confirmed, first, in 1808, when the settlement was transferred to the Crown, and, finally, in 1821, when the forts and possessions of the late African Company on the Gold Coast were annexed to Sierra Leone.

The boundaries of the settlement are difficult to define; in 1787 a tract of the peninsula of Sierra Leone was ceded to England by the native chiefs, extending 15 miles from north to south by four from east to west:—the western boundary subsequently advanced to the sea as far as the point of land called False Cape. In the charters granted to the Sierra Leone Company in 1800, 1809, and 1821, the colony is described as the peninsula of Sierra Leone, bounded on the north by the river of that name; on the south by the Camarancia River; on the east by the River Bance; and on the west by the sea. The peninsula, as at present known, is bounded on the north by the Sierra Leone river; on the south and west by the sea at Calmont Creek, and on the east by a line up the Calmont to the Watslod Creek, and down this last to the Bance (which is in fact part of the Sierra Leone River) constituting a tract 18 miles from north to south, and 12 from east to west. By a convention in 1819 between Sir C. McCarthy and a Timmanee Chief, named Ka Konka, possessing country on the boundary of the peninsula, that chief ceded to Great Britain the unlimited sovereignty of the lands, known by the name of Mar Ports, and Roe Boness, situate on the banks of the Bance River. In 1824, Ba Mauro, King of the North Balloms, ceded to Great Britain the islands of Bance, Tasso, Tombo, and all the other islands on the north side of Sierra Leone, between Zogrino Point, and Ka Keeper Creek: as well as the north banks of the river for one mile inland from the river Conray Bay on the west, to the Ka Keeper Creek on the east; with a right and title to the navigation of the River Sierra Leone, &c. On the north the boundaries touch the River Mengo or Little Learciss, in 8.50 north; on the south as far as the line which separates the King of Sherboro's territory from that of the Gallinos, in lat. 7°0' north embracing the estuary of the Sherboro and its tributaries; on the west the Atlantic, as far north as Sierra Leone River; and on the east an imaginary line, imperfectly defined.

Our possessions at Sierra Leone (so called from the district having been the favourite resort of lions)

extend over a mountainous tract of country, formed by two rivers, which nearly intersect it. The general appearance of this Sierra presents an outline of an irregular congeries of conical mountains, with valleys and prairies in their interstices; the mountains are covered to their summits with lofty forests, giving to the distant scenery a beautiful, rich, and romantic appearance; the territory on the north side of the river is however low and flat. Many streams of water descend from the hills, and are concentrated in a large basin, called the Bay of Franca, which is considered the best watering place along the whole line of coast.

The river called Sierra Leone is more properly speaking an estuary, about 20 miles in length, and varying in breadth from 10 at its entrance, between Leopard's Island and Cape Sierra Leone, to about four miles at the island of Tombo, where it terminates; it has several arms, which extend themselves in different directions; the Rokell River is, however, the only one which offers the advantage of water communication from any considerable distance into the interior; its source being stated to be within 30 miles of Fallaba, and 200 from Sierra Leone; falls or rapids intercept its course at Rocon, 50 or 60 miles from Freetown. The Kates River, 25 miles from Freetown, is navigable for boats upwards of 70 miles.

Freetown, the capital, is built upon the south side of the Sierra Leone River, and at the north extremity of the peninsula. It is five miles from Cape Sierra Leone, which is considered to mark on the south as Leopard Island, seven miles distant, does on the north the entrance of the river, to which the access is easy and safe. Immediately in front of the town, the river forms a bay, where there is good and commodious anchorage for vessels of all classes, and timber ships of 400 or 500 tons burden go with facility nearly 20 miles higher up the stream for the purpose of taking in their cargoes.

The settlement has the advantage of a modern plan for its formation; it occupies a large space of ground, extending in a very gentle ascent from the banks of the river, and is about three quarters of a mile long, with spacious streets, intersecting each other at right angles. Most of the houses were at first built of mud or wood, not however without taste, but many of the natives are now constructing storehouses.

The town is open to the river on the north, but on the south-east and west completely hemmed in by a semicircular range of mountains, from 12 to 1,500 feet high, and wooded to the summit. The distance between the town and the base of these mountains varies from three quarters to a mile and a half, the intervening space broken by numerous undulations, the outline exhibiting the appearance of a sylvan theatre, replete with highly picturesque scenery. With the exception of the cultivated spots, the hills are thickly clothed to their summit with wood, and ascend almost in regular gradation towards Leicester Mountain, above which the Sugar-loaf is seen to rise at some distance in the rear. The amphitheatre includes, from east to west, a space, the semi-diameter of which is nearly a mile, embracing the town, the Tower Hill, and a small portion of land, called 'King Tom's Point.' The Tower Hill is nearly in the centre of this amphitheatre, and Freetown stretches from the water-side towards its base; about half way up its sides are situate the fort, the barracks, hospital, and a Martello tower, the whole when viewed from the sea forming a striking *coup d'œil*.

Mr. Rankin says, the shore is broken into a series of little bays, with moderate hills gently rising above, and waving with palm-trees; in front is the wide Sierra Leone, glittering in constant sunshine, and bordered by the low woods of the Bullom shore. The inland country, to the west, is intersected by the waters of the Port Logo, Rokel, and Bunce rivers, varied with many a green island, and bearing many a little canoe, formed of the trunk of a tree, and paddled by sturdy savages. The aspect of the country immediately behind Freetown is bold and imposing; it is a succession of evergreen mountains soaring one above another.

No site for a town more lovely could have been selected, had charms to the eye been the sole guide; it is not possible that gloomy forebodings should thrust themselves forward when a stranger arrives, and for the first time looks upon the glowing bosom of the estuary, scarcely rippled by the light airs and gentle tides of these latitudes; the quiet Bullom shore, green to the water's edge; the bold sweep of that amphitheatre of undulating mountains which appear to be embracing the capital for its protection, gaping with enormous ravines and dark valleys, and clothed with never-fading forests. The town itself is picturesque. It rises from the water's edge, and gradually creeps up the sides of the surrounding hills, with its white dwellings and prolific gardens; whilst in the distance, emerging from high woods, appear the country mansions of white gentlemen, with patches of ground devoted to the produce of coffee and fruits. The style in which the houses are generally built throws an oriental character over the view; they are as often of wood as of stone, and are washed white or yellow; piazzas, with pillars at due intervals, support the verandahs, and secure a shady walk in the open air even during mid-day; the verandahs exhibit rows of jalousies, a kind of venetian blind painted green; and the roofs, principally formed of layers of thin dry wood, called shingles, project to a great distance, with white eaves. The greater number of dwellings stand in a court-yard or in a garden; causing the extent of space covered by buildings to be much greater than in a European town of equal population, and giving it, from the foliage of luxuriant trees, a healthy and fresh appearance. It is flanked on either side by a brook of clear water, which never fails in the most intense weather of the dry season. The channel of these streams may be easily traced by the abundant vegetation. The prolific bounty of nature, which makes the spot so beautiful and so exciting, and almost invests the busy streets with the charms of the country, is, however, one of the causes of that evil name which pestilence has fixed upon Sierra Leone. The public ways are no sooner watered by the first showers of the wet season, than they appear to be converted into fields; the most frequented thoroughfares become nearly impassable from the dense herbage that rises beneath the feet, particularly the indigo, which is constantly cut down to allow the common movements of the inhabitants.

Of the amazing circuit occupied by the buildings of the capital, a very limited portion is inhabited by Europeans,—that which immediately borders the sea. They are not arranged together, but often at long intervals; the intervening space being filled with clusters of the lowest huts or sheds of the lowest blacks. No taste, however, has developed itself so strongly as that which urges the savage to toil, in order to be enabled to build a house like that of the white man; and, where ample remuneration for

labour is joined to a frugality approaching abstemiousness, the taste is often gratified.

The number of white residents throughout the peninsula of Sierra Leone bears no proportion to that of the blacks. It fluctuates but little: the majority being stated officers or clerks in the different colonial departments. In 1833, 84 only, including the ladies of such as had married white women, were to be reckoned in the entire colony. Of these 73 dwelt in Freetown, with, however, between ten and eleven thousand blacks, out of the thirty thousand under British authority in the settlement.

The free blacks, who, at the close of the American war, were transferred by the British Government to Nova Scotia, and thence to Sierra Leone, occupy, on the western side of the capital, the quarter called Settler-town. Next to this, on the east, is Foulah-town, the abode of the Mohammedan tribes, the Foulahs and Mandingos. Then we have Maroon-town, Zaloff-town, and Soldier-town; besides the cluster of wicker huts called Kroo-town; and on the heights above all the rest, the village of the Congoese or Congo-town. But the miscellaneous collections of slaves of all tribes, imported here in the captured slavers, defy a minute classification. Some 20 or 30 languages are in use among the inhabitants of Freetown, where a zealous and intelligent inquirer would never want a favourable opportunity of acquiring fresh information respecting the geography and civilization of the interior of Africa.

Throughout the peninsula several villages have been formed at the following periods: in 1809, Leicester; 1812, Regent; 1816, Gloucester; 1817, Kiskey and Leopold; 1818, Charlotte, Wilberforce, and Bothwell; 1819, Kent, York, Wellington, Waterloo. These villages are generally situate in different parts of the mountain, but all connected by good roads with each other, and with Freetown, the capital.

The Bannana Islands, two in number, south-west of Freetown, may be termed one island, six miles in length and one in breadth, and were ceded to the crown in 1819 by the family of the Caulkers, who receive for them an annual payment.

The *Isle de Los*, in north latitude 9. 16., west longitude 16., five in number, are situate about 60 miles to the northward of Sierra Leone, and five or six miles from the coast, and were ceded to Great Britain by the chief, Dalla Mahomeda, to whom an annual payment is made for them. Factory Island, the second in extent, is four and a half long, by half a mile broad; they are however very valuable for the trade which is from them carried on with the rivers of the adjacent continent, consisting in the exchange of British goods for hides, ivory, gold dust, &c. There is also a considerable commerce in rice on this part of this coast, some of which is exported by the traders at Sierra Leone to the West Indies, but the quality is much injured by the imperfect process in use amongst the natives for cleaning it. British factories have recently been established in several of the rivers between the Gambia and Sierra Leone, particularly at the Rio Pinez, Scarces, &c.

Observations on the Public Works at Sierra Leone. [B.B. 1836.] *Old and New Market.*—The old market being situated in the centre of Water-street, caused considerable inconvenience to the public, from its obstructing a large portion of the thoroughfare, and the unavoidable accumulation of filth rendered it also a nuisance to the immediate neighbourhood; a more convenient site has in consequence been purchased (in 1835) near the water side, upon which it is in-

tended to erect one of which, including iron railing in brick one-story present market converted into public rooms stalls for hay revenue to the

tended to erect the necessary stalls, &c., the expense of which, including the inclosing with stone walls and iron railing in front, is estimated at 400*l*. The large brick one-storied building, under which a part of the present markets are kept, it is proposed should be converted into a court hall and commercial and other public rooms, and the lower or basement story, into stalls for hawkers, which will yield a considerable revenue to the funds of the colony.

Congo Bridge and Road.—This undertaking was commenced in December, 1836, and is an improvement highly desirable, as affording an easy communication with the western districts, which is one of the most populous of the colony, and from whence the largest supplies are daily brought to the markets of Free Town.

Street Drains.—This necessary work is still in progress, and will, when completed, effectually carry off the waters which fall at the back of the town, during the rainy season, and would, if left, stagnate to the great injury of the health of the inhabitants.

Freetown Gaol.—Several necessary repairs and improvements to the premises have been executed during the year, viz.: a new and more commodious kitchen has been erected at the lower part of the yard, the old and decayed one being contiguous to the side wall of the yard, afforded great facility to the prisoners in escaping over the roof. A separate airing yard for females has been divided off, with stone walls and iron railings for the admission of air. The expenses of which amount to 73*l*. 7*s*. 11*d*.

III. On the head of Geology, of course, nothing more than isolated facts can yet be expected. The soil in the vicinity of Sierra Leone, consists chiefly of a slight stratum of brown gravel on a semivitrified rock of the same colour, containing a large portion of the oxide of iron. This is what is called the *brown* iron stone; the *red* iron stone is also found in extensive strata, but the *brown* appears to be the more prevailing one. Both these varieties of hæmatites are cellular throughout their entire substance, strongly indicating volcanic origin; they are intersected with yellow streaks, and kidney-shaped segments. Magnetic iron ore is found in the mountains in small detached masses. Some of the mountains are chiefly composed of granite, large blocks of which are frequently seen studding the surface of the plains. No limestone has hitherto been discovered in the colony, but fortunately there is a large abundance of fossil shells. Gold is abundant, as will be subsequently shewn by the quantities exported to England during the last three years.

There is very little difference in the soil of the coast from Cape Palmas to the River Volta; within five or six miles of the shore it is of a siliceous nature; the clumps of hills which are to be met with in every direction are composed principally of gneiss and granite: mica slate is found to enter into the composition of some at no great distance from Cape Coast Castle. These rocks, from containing large proportions of felspar and mica, are rapidly passing into decomposition, more especially such as are exposed to the influence of air and water; the result of the decomposition is the formation of a clayey or an argillaceous soil.

As the sandy sea-coast is receded from, the soil is siliceous, mixed with decayed vegetable or animal matter, where no granite or micaceous rocks intervene; it is in the valleys where the rich alluvial soil is met with, formed of the disintegrated materials of the surrounding hills (washed down by the heavy torrents of rain) and deposited along with the vege-

table decomposition, giving richness to the clayey mould. It is in such valleys, from ten to twelve miles inland, that the natives delight to make extensive plantations.

IV. According to the distance north or south of the equator, and to the elevation of the country, the temperature and seasons of course vary; on the north of the Equinoctial line May, June, July, August, September, and October, may be considered the wet winter months; and the remainder of the year the dry or summer months; harmattans and tornadoes are peculiar to the latter, and fogs to the former. The rains commence with the end of May or beginning of June, and terminate in August. October, November, and December are cold, with occasional fogs. The winds along the Gold Coast may be divided into the land and sea breezes, the former from the north-north-west generally, and the latter from the south-west, west-south-west generally; during the rains the land breezes are irregular. The land breeze generally continues from 9 A.M. to 7 P.M.

The range of the thermometer is not great; during 1819 it did not rise higher than 95°—the minimum being 76°, making a range of only 9°. In 1820 maximum 84°, minimum 74°, range 10°. In 1821 maximum 86°, minimum 66°, range 20°. In 1822 maximum 89°, minimum 74°, range 15°—and so on ever since, with this exception, that there is a visible change in the duration of the respective seasons; thus, as Dr. Tedlie in his valuable Report to the Army Medical Board observes, solar heat alone is not a cause of disease.

The range of the thermometer at Sierra Leone is very slight, and the average heat throughout the year is eighty-two. The rains continue for six months, and the torrents which pour down from the mountains deluge the plains beneath. The mountains in the vicinity of Freetown are now, however, generally cleared and cultivated, and the settlement is as healthy for European residents as any other tropical climate.

Indeed of late years the salubrity of different parts of Africa has materially increased: and many Europeans residing on the shores of Western Africa enjoy better health than they have experienced in England.

All tropical countries with an exuberant vegetation, necessarily yield a large portion of deleterious miasma from decomposing matter: but the formation of drains, the clearing of jungle, and the cultivation of the soil, invariably produce a healthy place of residence. If Africa were fully peopled, cleared, and tilled, it would be one of the finest countries in the world in point of beautiful scenery, abundant produce, and inexhaustible resources. Soldiers and sailors are imperfect criterions of the healthiness of any station, but as there are no other returns available, their statistics have been given in this chapter, as well as elsewhere.

It were very desirable that accurate returns were transmitted from all our colonies, of the deaths of Europeans, specifying whether male or female, the age, number of years residence in the colony, and occupation. A valuable series of vital statistics would thus be obtained.

Meteorological Table, kept at the Military Hospital, Freetown.

In the Annual Medical Report from the West African stations for 1832, transmitted to the Army Medical department, I find these remarks:

'Sierra Leone.—This station has continued during this year as during the two preceding years, to maintain its character for salubrity, the total number of casualties in the sick returns is eight; the strength being 446, and the total number of sick treated 230, of which last number (as in the preceding year) more than one-fifth were cases of sexual disease.'

Not only are febrile and other climatorial diseases less prevalent than formerly, but their type is of far greater mildness, and during the years 1831-32, and 1833, when most parts of the globe were suffering from cholera and other pestilential diseases, the British settlements in West Africa were in the enjoyment of perfect health.

The Deputy Inspector of Hospitals at West Africa, states in his official report, in reference to the causes of disease in Europeans—"Breakfast is taken at rising—at eleven A.M. they sit down to 'relish,' consisting of soups, meats, and the highest seasoned dishes; wine is drank as at dinner, and afterwards sangaree, or brandy and water, which too frequently they continue sipping and drinking till late in the afternoon, sometimes to the dinner hour." (6 P.M.) "In all the countries," says Dr. Nicoll, "which I have visited, I never saw so much eating and drinking."

The wet season, as in some parts of India, is usually ushered in by tremendous tornadoes, or violent gusts of wind, which come from the eastward, attended by thunder, lightning, and in general, heavy rains. The violence of the wind seldom continues longer than half an hour; but the scene during the time it continues may be considered as one of the most awfully sublime in nature. Its approach is foretold by certain appearances, which enable people

to be on their guard. A dark cloud, not larger than 'a man's hand,' is indistinctly observed on the verge of the eastern horizon. Faint flashes of lightning, attended sometimes by very distant thunder, are then seen to vibrate in quick succession. The clouds in that quarter become gradually more dense and black; they also increase in bulk, and appear as if heaped on each other. The thunder, which at first was scarcely noticed, or heard only at long intervals, draws nearer by degrees, and becomes more frequent and tremendous. The blackness of the clouds increase until a great part of the heavens seem wrapped in the darkness of midnight: and it is rendered still more awful, by being contrasted with a gleam of light which generally appears in the western horizon. Immediately before the attack of the tornado, there is either a light breeze, scarcely perceptible, from the westward, or, as is more common, the air is perfectly calm and unusually still. Men and animals fly for shelter; and, while 'expectation stands in horror,' the thundering storm in an instant bursts from the clouds. It is impossible for language to convey a just idea of the uproar of the elements which then takes place.

The temperature of the air is greatly affected by a tornado (it becomes cool and clear); and it is not unusual for the thermometer to suffer a depression of eight or ten degrees within two or three minutes after the storm has come on. After a tornado, the body feels invigorated and more active, and the mind recovers much of that elasticity which long continued heat tends to impair.

The harmattan, or north-east wind, generally blows once or twice in January and February; it is of extreme siccidity, and is near the great desert of Sahara in particular, accompanied by a dense haze, occasioned by a vast quantity of impalpable powder floating in the gusty atmosphere.

* The calculations for this year are founded on the returns for three-quarters of a year, the return for the fourth quarter not having yet been received.

† The returns for this period do not show the number of white troops as distinguished from Black, but the number of white troops is known to have been very small.

V. Of the numbers, characters, and almost of the names of the people of Western Africa (estimated at 26 to the square mile, 1,200,000 square miles, thus giving 31,000,000 mouths) we know very little.

Three great negro races inhabit the country:

1st. *The Foulahs*, from Fouladoo on the Upper Senegal, or of the same race with the Fellatahs, in Central Africa, have now spread all over the banks of that river, besides the great kingdom of Fouta Jalloo to the S., and many districts on the banks of the Gambia.

They have not the extreme negro characteristics; neither the deep jet hue, the flat nose nor the thick lips, on the contrary, their features are high, with an olive tint, and an agreeable expression. They have embraced the Mahometan faith, but without that bigotry which almost universally accompanies it. Their manners are peculiarly courteous and gentle: they practise the most liberal hospitality, and relieve the wants not only of their own aged and infirm, but even of those belonging to other tribes. Their em-

poyments are pastoral, and their habits, in some degree, nomadic. Occupying countries where there is no fixed property in land; they drive their flocks, according to the season, to the tops of the mountains, or the banks of the rivers. At night they collect their herds within the circle of the tents, and light large fires to deter the approach of wild beasts. Such is their good conduct and industry, that it is considered infamous to injure them, and a blessing is said to rest on any territory that contains one of their villages. Their internal government is republican, under chiefs of their own; and this form they insist upon retaining, even when they settle under a sovereign of another tribe.

2d. *The Mandingoes* are a race more numerous, and more decidedly negro, both in form and disposition. Though capable of great occasional exertion, they have by no means the steady industry of the Foulahs. Their employments are chiefly a slight agriculture, fishing with nets and baskets, and, above all, traffic, in which their enterprise exceeds that of the other negro races. They conduct large kafilas to a considerable distance in the interior, and their language is well understood in all the commercial districts. They are cheerful, inquisitive, credulous, and so gay, that they will dance for 24 hours, without intermission, to the sound of the drum or balafon. Polygamy is practised to a great extent.

The Mandingoes have some tastes more refined than are usual among Africans, particularly in poetry, the extemporary composition, and recitation of which forms one of their favourite amusements. The original country of these people is the elevated territory of Manding; but they are now widely diffused over all this region, and particularly along the banks of the Gambia.

The third great race are the *Jalofs*, who occupy nearly the whole of the inland territory which intervenes between Gambia and Senegal, and the extent of which is estimated, by Golberry, at 4,800 leagues. A number of them are subject to a powerful inland prince, called Burb-y-Jalof, who boasts of himself as anciently the sole ruler in this part of Africa. The *Jalofs*, though of a deep black complexion, and with the decided negro features, are considered a handsome race. They boast of their antiquity, and in many respects excel their neighbours. Their language is softer and more agreeable; they manufacture finer cotton cloths, and give them a superior dye (Mr. Forster presented me with some specimens of the cotton cloths manufactured by the natives of Western Africa; these cloths have a softness, weight and texture, which our manufacturers at Manchester cannot equal; the patterns before me are novel and tasteful, proving that the African is not the degraded being he has been so unjustly represented); in horsemanship they are fearless and expert, and as hunters they rival the Moors. They possess not, however, the invention of writing, and reckon by *fives* instead of by *tens*.

The *Feloops* are a wild and rude race, inhabiting the shores to the S. of the Gambia; their traffic with us is carried on through the Mandingo merchants, and we consequently know little of them.

The *Timmanees* border on our colony of Sierra Leone.

The *Ashantees*, amounting, it is thought, to 1,000,000 people, with 3,000,000 of dependants, belonging to other nations, inhabit Ashantee Proper, a region behind the Gold Coast, comprising about 14,000 square miles. They are a very superior class of natives to

those on the coast,—manufacture excellent cotton, smelt metals, and build large houses. The country is governed by a king, aided by four chiefs as councillors. Notwithstanding that the manners of the Ashantees are more polished and dignified than their neighbours, annual hecatombs of unfortunate slaves and captives are offered to propitiate the manes of their ancestors; and on the death of any member of the royal family, thousands of human beings are slain as attendants for the next world.

The *Dahomians* (who have conquered the fearful and effeminate *Wydahs*) predominate along what is termed the *Slave Coast*, and in the interior to the depth of about 200 miles; their rule is equal in barbarity to that of the Ashantees. The *Fantees* manufacture cottons interwoven with silk, earthenware, iron, soap, &c.; and enjoy a republican form of government. Other tribes and nations exist, of whom we do not know even the names.

It is difficult to obtain corrected statements of the population of our settlements on this coast. The most thickly inhabited, by British subjects, is *Sierra Leone*; the census of which, at two intervals, was as follows:—

Town.	Parish.	In 1820.

In 1833—males, 16785; females, 12979; total, 29764.

Abstract of returns, shewing the number of slaves captured, emancipated, and registered in the Mixed Commission Courts at Sierra Leone, since their establishment, to the 6th day of February, 1826.

Captured in 1819, 96; 1820, 455; 1821, 1,399; 1822, 2,753; 1823, 670; 1824, 1,331; 1825, 1,752. To Feb. 6, 1826, 1,045; total, 9,502.

Died before Adjudication, 1,462; emancipated, but died before their descriptions could be taken to be registered, 38; delivered over to the Colonial Government, not emancipated or registered, 626; emancipated, but not registered, 254; emancipated and registered, 7,122; total, 9,502.

At Sierra Leone, the total number of slaves emancipated between June 1819, and January 1833, was 27,697.

Many of the colonists possess wealth—some of the liberated slaves being now worth upwards of 1,000l. sterling.

* School children.

Out of a total population of 37,463 in the colony, there are but 105 white colonists. The proportion of females to males is, in the whites, scarcely more than one-fourth. In the coloured inhabitants, the sexes are nearly balanced. The number of mouths to the square mile is, in some districts, large (comparatively speaking); but in the whole colony the average is but 96 to the square mile. The proportion of deaths to births is considerable; and, but for the fact of many of the captured slaves dying soon after their liberation from the ill-treatment they experienced while in the hands of the slave-dealers, the table would indicate a rapidly increasing population.

VI. The following table shews the large extent of religious instruction provided for the liberated slaves, and judging by the column which indicates the number of the congregations usually attending the respective places of worship, at least an external observance of the form of religion is preserved. The table of crime at page 540, does not prove a large amount of crime; and it is but fair to conclude, that the Christian efforts of the missionaries are attended with beneficial results.

* The 18 Dissenting Chapels at Freetown have congregations amounting altogether to 3,850, and are supported by voluntary contributions.

† The Gibraltar Hamlet Chapel, superintended by the Rev. T. Raban of the C. Methodist Society.

‡ The whole of the Clergymen, as well as the day assistants, receive their salaries from the Church Missionary Society, without any other emolument.

§ The ministers of these Chapels are partly paid from funds raised in the colony from the members, and partly by the Society in England. They are aided by native teachers who are paid in the like manner.

|| These Dissenting Chapels are supported by voluntary contributions, and Church service is performed in them all.

IX. Sierra Leone is governed by a Civil Lieutenant-Governor, assisted by a Legislative Council of seven members, all officials. There is a Chief Justice and a Vice Court of Admiralty. Here is also established the mixed commission for the adjudication of vessels taken in the slave trade.

The following is the succession of Governors of Sierra Leone:—J. Clarkson, Esq., superintendent, 16th March, 1792; W. Dawes, Esq., 31st December, 1792; Z. Macauley, Esq., pro temp. 1st April, 1794; W. Dawes, Esq., returns 1795; Z. Macauley, Gov., 1796; T. Ludlam, Esq., pro temp. 1799; W. Dawes, 4th January, 1801; Capt. W. Day, R. N., 15th February, 1803; J. Ludlam, Esq., 28th August, 1803; Ditto, pro temp. 1st January, 1808; T. Perrinet Thompson, Esq., 27th July, 1808; Capt. Columbine, R. N., 12th February, 1810; Lieut. R. Bones, R. N., pro temp., 1st May, 1811; Lieut.-Col. Maxwell, Governor-in-Chief, 1st July, 1811; Lieut.-Col. M'Carthy (Lieut.-Gov.), 11th July, 1814; Lieut.-Col. M'Carthy, Governor-in-Chief, 29th November, 1815; Capt. Grant, 2nd W. I. Reg. pro temp. 25th July, 1820; Brig.-Gen. M'Carthy, Governor-in-Chief, from 20. N. to 20. S. latitude, 28th November, 1824. Major-Gen. Turner; Major-Gen. Sir Niel Campbell; Col. Denham; Lieut.-Col. Lumley; Major Ricketts; Col. Findlay; Mr. Temple; Major Dundas Campbell, 1834; Lieut.-Col. Doherty, 1837.

The African corps consists of 20 officers and 511 non-commissioned officers and rank and file; the charges for which in the army estimates are 14,205*l*.

The ordnance at three of our forts in Western Africa was, in 1815, as follows:—at Cape Coast Cas-

tle, 6 42-pounders, 9 24-ditto, 2 18-ditto, 11 12-ditto, 18 9-ditto, 5 6-ditto, 26 3-ditto, 2 3-inch mortars, 1 7-ditto: at Accra, 7 18-pounders, 5 12-ditto, 4 24-ditto, 9 4-ditto: at Annamaboe, 14 24-pounders, 8 18-ditto, 7 12-ditto, 12 6-ditto, 14 3-ditto.

Return of the number and distribution of the Effective Force, Non-commissioned Officers, Rank and File, of the British Army on the West Coast of Africa, including Colonial Corps, in each year since 1815; including Artillery and Engineers.

* Occupied by the Lieut.-Governor.

X. The expenditure on Sierra Leone was, for the five years ending 1824, 75,000l. per annum; for the succeeding five years it was diminished to nearly half that sum.

In aid of a Parliamentary Grant there are local duties collected upon imports; the progress of which for Sierra Leone is thus shewn (the amount for the Gambia will be found under that head.)

Amount of Duties collected upon Imports at Sierra Leone:—1812, 1,922l.; 1813, 1,528l.; 1814, 1,163l.; 1815, 1,816l.; 1816, 2,486l.; 1817, 3,096l.; 1818, 5,124l.; 1819, 4,656l.; 1820, 6,153l.; 1827, 4,846l.; 1828, 4,191l.; 1830, 6,839l.; 1831, 7,265l.; 1832, 6,457l.; 1833, 6,316l.; in all 1834, 7,170l.

Comparative Yearly Statement of the Revenue of Sierra Leone.—[B. B. 1836.]

Separate Tax or Duty.		1831.	1832.	1833.	1834.	1835.	1836.	1837.
1. Regular Revenue.		£.	£.	£.	£.	£.	£.	£.

3. Incidental Revenue		768	1187	764	244	432	297	
4. Repayment of Advances		..	865	276	17	3541	365	
5. Receipts in aid of Revenue		5959	6527	6608	5290	6456	5515	
6. Miscellaneous		..	361	..	960	38	1352	
7. Deposits available		..	..	62	97	24	136	
8. Liberated African Department		7722	7579	8051	8566	10559	11394	
Spirit Licenses		276	1088	549	752	642	701	
Total		22239	24156	23135	22663	28050	26285	

This table shews a slight increase of revenue, which has still further augmented since the last official returns were made. The following table of the expenditure clearly points out how much of the colonial expenditure is defrayed by the colony, and how much by the imperial government. It could not be expected that the colony was to support the liberated slaves landed on its shores.

Comparative Yearly Statement of the Expenditure of Sierra Leone.—[B. B. 1836.]

Exclusive of the above, we exported in 1829 to Western Africa 161,431*l*. worth of British, colonial, and foreign merchandize, making a total of 511,792*l*., which is now considerably increased.

As near as I can ascertain, (gold not being entered at the Custom-house) the following are the importations of African gold for three years; weight after melting, taken from the refiner's books.

* It is difficult to state the trade accurately, because the denomination of the Exports varies to different countries.—*t.* stands for *tons*, *c.* for *casks*.

The principal exports from Sierra Leone in 1834, were in quantity and value thus:—arrowroot 45,344 lbs., value 756*l.*; dye and hard woods 827 tons, value 10,040*l.*; ginger 11,900 lbs. value 205*l.*; gum copal packages 197, value 673*l.*; hides, no. 15,879, value 1,158*l.*; ivory, 740 pieces, value 970*l.*; Oil, palm, 92,087 gallons, value 4,665*l.*; pepper, 35,420 lbs., value, 512*l.*; rice, 1,776,960 lbs., value 7,590*l.*; tobacco, 9,000 lbs., value 110*l.*; wax, bees', 6,833 lbs., value 276*l.*; timber, 13,227 loads, value 33,068*l.*; boards and planks, 25,210 feet, value 161*l.*; shingles, no. 100,000, value 500*l.*; bullion, gold, 214½ oz., value, 764*l.*; the total value of the exports were 65,558*l.* of which the amount to Great Britain was 51,231*l.*

I cannot better illustrate the mere commercial importance of the British settlements in West Africa than by placing before the reader the following luminous and truly patriotic statement, drawn up by M. Forster, Esq., (of the mercantile firm of Forster and Smith, New City Chambers) in a letter addressed to the Secretary of State for the Colonies. The officers of the Colonial Office are qualified to judge whether the assertions herein made are in the slightest degree exaggerated. The letter is dated the 9th January, 1832.

"Attempts have been frequently made to depreciate the commercial importance of our settlements on the west coast of Africa, compared with the cost of maintaining them; and conceiving that parliament and the public are not fully aware of the nature and extent of the trade dependent on these settlements, I have taken the liberty of drawing up a statement shewing the benefit arising from them to the revenue and national industry of this country, which I have the honour herewith to annex for your Lordship's inspection.

"The annual direct and indirect advantages to the national industry from the trade, I estimate as per statement No. 1, at £3,234*l.* 19*s.*, and the annual benefit to the revenue as per statement No. 2, at 207,873*l.* 13*s.* exclusive of ship-building materials and labour, as also of some other minor sources of national benefit not enumerated. The total gain to

the industry and revenue of the mother country cannot be less than 600,000*l.* per annum.

"Within the last 20 years the increase in the trade in palm oil, timber, and bees' wax, has been very great. Attempts are making in Gambia and elsewhere on the coast to introduce the cultivation of some articles of produce new to the trade of Africa; but these endeavours require time, on account of the unenlightened state of the natives, the very recent abolition of the slave trade, and its partial continuance by other nations. In several cases, however, the natives have proved themselves capable of entertaining new ideas of trade and cultivation more readily than might have been expected. The trade in teak timber for ship-building was unknown in Africa 20 years ago; the annual importation of that article from Sierra Leone at present is from 15,000 to 20,000 tons of British shipping annually.

"Fifteen years ago, it was not known that mahogany grew in the Gambia; since that period several thousands load of mahogany have been imported into England from our settlement on that river; and although the natives would not at first cut and prepare it for shipping, they are now willing to supply any quantity of it which this market may require. The low price of Honduras mahogany, however, renders it impossible to afford any encouragement to their industry in this article at present; but these instances afford pleasing and conclusive proofs that the natives will turn their attention to trade whenever the opportunity is afforded them.

"The annual cost of our settlements on the Western coast of Africa, as respects the protection of our commerce, exclusive of those expenses incidental to the suppression of the slave trade, which ought not to be charged to the account of those possessions, is better known to his Majesty's Government than to me; but I may venture to assume that it bears but a trifling, indeed insignificant, proportion to the advantages derived from the trade; and those settlements are to be considered not with reference to their present value alone, but to their future importance as outlets to British manufactures, when time shall have removed some of those difficulties which at present

obstruct the trade. The policy of most foreign governments is directed against our commerce, the acknowledged source of our national power. The territorial extent of the British islands is too limited ever to have raised this empire to its present proud pre-eminence in the scale of nations, without the aid of manufactures and foreign trade; consequently I humbly submit, that every foreign settlement which gives facility to the sale of British goods, is to be estimated not only with reference to the direct amount of revenue received on the produce imported from it, but still more by the employment it affords to our manufacturers, artisans, and shipping. Without a large manufacturing population, the revenue necessary to pay the interest of the national debt and the annual cost of the civil and military establishments of the country cannot be raised; hence the vast importance of our foreign possessions, which a too limited view of our colonial policy leads some persons to undervalue.

"Striking out of the public estimates every charge belonging to the account of the slave trade, I do not think the annual cost of maintaining our settlements on the western coast of Africa exceeds from 25,000 to 30,000*l.* per annum, probably not so much, while the national gain is considerably above half a million per annum. It is a common error to regard those settlements in the light of colonies having a taxable population, from which they may be expected to raise a revenue sufficient to maintain themselves; but the fact is, that nothing can yet be raised from the natives for their support, while the protection they afford is indispensable to the protection of our trade; a trade even now important, and which time may render of incalculable value, when the effect of the slave trade shall have ceased to exercise its baneful influence over the native population.

"Neither is it reasonable or politic to require individuals trading on the coast to contribute towards their maintenance beyond the duties they at present pay to the colonial funds on the goods they import from England, and the personal services they are called upon to render as militiamen in defence of the forts. I humbly submit, that British subjects are as much entitled to protection in carrying on a trade, by which the national industry is benefited, in Africa as at home. In applying their industry, and risking their capital and health in a trade giving employment and profit to their countrymen at home, and by which the national revenue gains so largely, they may surely not only claim the protection but the gratitude of their country. Besides which, you cannot invest individuals with a property in public works necessary for the defence of our trading companies in Africa. Individuals change, but the advantage is national and permanent, and so should be the protection.

"By upholding these forts on a footing to command the respect of the natives, our Governors in charge of them may render the most important services in carrying into effect the convention recently concluded with France, for the suppression of the trade in slaves, the due execution of which treaty cannot fail to produce effects as favourable to the trade and civilization of Africa, as to the cause of humanity, now hourly violated by the continuance of the traffic. France, America, Holland, and Denmark, have each their settlements on the coast, which they evince the utmost anxiety to retain and encourage. Our settlements on the Gold Coast cost lately only 4,000*l.*, and are now reduced, I understand, to 3,500*l.* per annum; and this is the sole

expense of protecting a valuable trade. The Dutch settlement of Elmina, which is only seven miles from our settlement at Cape Coast Castle, costs the Dutch an equal sum to ours, while Holland has not one-twentieth part of the trade on the Gold Coast that we have.

"It should be borne in mind that every article imported from Africa is in exchange for goods, and that consequently it is one of the very few legitimate trades remaining to this country. The article of palm oil, which has increased so much of late years, can be obtained only in Africa, and is already extensively used as a substitute for Russian tallow in the manufacture of soap, &c. [There are 20,000 steam engines in the United Kingdom, and each engine requires two casks of tallow per annum. This immense consumption of tallow renders the trade in palm oil of great consequence to this country, as a substitute for tallow in the manufacture of soap.—R. M. M.]

"The recent additional duties imposed on British goods imported into the Russian market, may suggest to us the policy of cherishing a trade which consumes the products of our national industry without limitation or restraint by hostile tariffs.

"The abolition of the slave trade took effect on the 1st of March, 1808. Twenty-three years is too short a period to effect a change in the character and pursuits of a people corrupted by three centuries of war and cruelty consequent on that traffic, and whose kings and chiefs have been taught by the sordid slave dealers of enlightened Europe to despise and neglect the pursuits of legitimate commerce, in favour of a trade in the persons of their people. Let, however, those chiefs be convinced by experience that they will gain more by the labour of their people at home, than by the sale of their persons for exportation, and you lay at once the foundation of a new system under which war and treachery shall give place to the regenerating influence of peaceful industry. Europe owes to Africa a heavy debt for the crimes that have been committed under the slave trade. England has been the first to offer payment of her portion of that debt, and she will not only have the high consolations of humanity for her reward, but probably, at no very distant period, the advantages of a trade with Africa, of which it is difficult at present to foresee the extent."

No. I.

Annual value of Exports from London, Liverpool, and Bristol, to the West Coast of Africa, between the Gambia and Angola, calculated from the amount of Shipments by the several Merchants trading to the Coast from those places.

A few introductory remarks may be necessary to render these tables more clearly understood by those who have not been accustomed to estimate the importance of our foreign and colonial trade on the principles on which they are drawn up. Perhaps I cannot more clearly illustrate those principles than by the following examples:—Let us suppose two cargoes of British manufactured goods to be sent to Canada, one consisting of cotton fabrics, and the other of hardware articles. In the case of the former we may assume that the average cost of the cotton wool of which the goods are made is about 25 per cent. of the export value, the remaining 75 per cent. having been added to the value of the raw material by the application of British capital and labour, and is therefore so much value gained to the national wealth and industry. In the case of the hardware

cargo, the iron of which the articles are made being a native production, we may assume that the total value is an actual creation of national capital and labour. Many persons limit their notions of the importance of our colonial and foreign trade to the profits of the exporter who ships the goods abroad, whereas that is a point scarcely worth considering compared with the advantage to the national industry in manufacturing them. Hence the importance of keeping open every possible outlet for the consumption of our manufactures, without which our capital and artisans must lie idle, the revenue fall off, and the wealth and power of the nation rapidly decay. In addition to this it may be stated, that as every thing which the capitalist and labourer who produce these goods consume, is taxed either directly or indirectly (which tax is included in the cost of production), you virtually obtain the help of the foreign consumer to pay your taxes, or in other words, you make foreigners contribute towards the national revenue.

London and Bristol Exports.—Amount of colonial goods, 58,000*l.*; ditto foreign ditto, 52,000*l.*; ditto British manufactures, 213,000*l.* Total, 323,000*l.*

The principal articles in these exports are Manchester cotton, and India piece goods. The freight, insurance, &c. particularly of the teak timber, hides, palm oil, and those articles collected in the floating trade, compose a large portion of the gross import value of the returns.

Liverpool Exports.—Colonial goods, 13,000*l.*; British ditto, 102,500*l.*; foreign ditto, 5,500*l.* Total, 121,000*l.*

The exports from Liverpool are chiefly for the palm oil trade, and the cargoes are differently assorted from those shipped from Bristol and London. The freight, insurance, &c. of the shipping employed in the trade, constitute a large portion of the returns compared with the value of the exports.

Estimate of National Profit thereon.—On colonial goods amounting to 71,000*l.* the value of British labour in transit and other charges (including profits) may be estimated at 30 per cent. thereon (on some articles, on rum for instance, these charges are nearer 70 than 30 per cent. and the average amount cannot be less than my estimate), 21,300*l.*; foreign ditto, 57,500*l.*; ditto, 17,280*l.*; British ditto, 315,500*l.*, the value of the raw material on an average being 25 per cent., leaves 75 per cent. for labour and manufacturer's profit, 236,625*l.* The shipping employed in long voyages in the palm oil and floating trade is about 16,083 tons, which, at the low estimate of 9*l.* per ton for sailing charges per annum,

Imports from the Gambia, Sierra Leone, and Cape Coast, by one mercantile house, for the years 1832-33 and 1834, will indicate the importance of this trade, which has so often been denied.

* The annual importations of palm oil are now upwards of 12,000 tons, which, at the market price of 28*l.* per ton, amounts to 336,000*l.* per annum; giving constant employment to 14,000 tons of shipping.

amounts to 114,747*l.* The shipping employed in short voyages (of six months) in the teak timber and other trades, about 17,000 tons, at 4*l.* 10*s.* per ton, 76,500*l.* Deduct for raw material of stores, &c. 15 per cent. 33,187*l.* 1*s.* Total annual gain to the national industry, exclusive of ship-building, 463,234*l.* 19*s.*

N.B. Of this sum of 463,234*l.* 19*s.* one-third may be estimated as paid to the revenue in the consumption of exciseable and taxed commodities, consumed by the labourers and artisans to which the trade gives employment, amounting to the sum of 154,411*l.* 13*s.* carried to Statement No. 2.

No. II.

Estimate of the annual duty on Imports from the British Possessions on the West coast of Africa, between the Gambia and Angola.

Imports, London and Bristol. Gross import value. Timber, 15,000 loads 127,500*l.* Duty thereon 7,500*l.* Bee's-wax, 200 tons 28,000*l.* Excise and Customs 8,000*l.* Hides, 60,000, 12,000*l.* Duty 500*l.* Ivory, 72 tons 25,200*l.* Duty 1,400*l.* Palm-oil, 1,200 tons 36,000*l.* Duty 3,000*l.* Sundries, including gum Senegal, &c. 20,000*l.* Duty 1,000*l.* Gold, 45,000 oz. at 7*s.* 168,750*l.* Bills 25,000*l.* Total value 442,450*l.* Total Duties thereon 21,450*l.*

Liverpool Imports. Palm oil, 9,000 tons 270,000*l.* Duty 22,500*l.* Ivory, 65 tons 22,750*l.* Duty 1,300*l.* Gum copal, 15 tons 200*l.* Duty 840*l.* Timber, 3,000 loads 25,500*l.* Duty 1,500*l.* Bee's-wax, camwood, barwood, &c. 25,000*l.* Duty 1,222*l.* Gold, 3,000 oz. 11,250*l.* Total imports 355,400*l.* Total Duties thereon 27,362*l.*

Duty on policies of Insurance, 3,150*l.* Duty, Customs outwards, 1,500*l.* Revenue from Labour, as per Statement No. I. 154,411*l.* 13*s.* Total annual gain to the Revenue from this trade, 207,873*l.* 13*s.*

Balance.—Gross amount of imports as per No. 2. 797,853*l.* By direct annual gain to the Revenue, brought from No. 2. 207,873*l.* 13*s.* Balance of national industry, being the difference between the sum of 463,234*l.* 19*s.* as per Statement No. I, and 154,411*l.* 13*s.* charged to the Revenue as above, 308,823*l.* 6*s.*

Total annual gain to the nation, direct and indirect, exclusive of ship-building, &c. 516,696*l.* 19*s.* Nett cost of Foreign goods, deducting transit and other charges 89,450*l.* Cost of raw materials for English manufactures, including Iron, Wool, and other articles wholly of English growth and production, 78,875*l.* Insurance, 35,000*l.* Interest on capital 7*l.* per cent. returns not in cash on an average in less than 18 months, merchants in England and traders' profit in Africa, 77,828*l.* Total, 797,850*l.*

This table does not include gold dust. In fact, it is very difficult to give correct tables, or returns of the trade of the western coast of Africa. A considerable portion of the trade is conducted on the ancient system of "adventures" afloat, or, what is called, the "floating trade." A ship is fitted out, and committed, with her cargo, to the direction of the captain, who acts as supercargo, and who trades along the coast, backwards and forwards, till he has disposed of his cargo, in barter with the natives, when he returns home. On the abolition of the slave trade this old-

fashioned system of adventure was resumed by many of the captains who had been engaged in that traffic (in which some of them had made considerable sums of money), and who, finding their former occupation gone, turned their attention in this way to the lawful pursuits of trade. It is a system of traffic, however, attended with great risk, and wholly dependent for success on the honesty, sobriety, and good conduct of the captain, and one which the increasing security, afforded by our settlements on shore has already greatly limited, and will ultimately supersede.

XII. *Amount of Coin in circulation.*—The amount of coin in circulation may be estimated at 25,000*l*.

About the close of the year 1835, the officer in charge of the commissariat department at Sierra Leone, received from the treasury, a remittance in dollars to the extent of 14,000*l*., the whole of which, with the exception of from eight to ten thousand dollars, was cut into quarters to prevent its exportation.

[The consequence of this system has been the depreciation of this currency by "clipping," and by cutting dollars into five pieces in place of four; a species of fraud so easy that it ought to have been foreseen. By the last accounts, the circulation of this "cut money" at Sierra Leone was completely at a stand, in consequence of the commissary by whom it was originally issued refusing to take it, and the greatest confusion and inconvenience is the result. Unless government take upon itself the loss, which it ought to do as the cause of the mischief, it must fall, where it can be very ill borne, on the poor inhabitants. This ought to be a lesson to government not to attempt to maintain treasury bills, at a premium, by artificial means. It is absurd to think of preventing the exportation of dollars by cutting them, while the merchant finds it his interest to ship dollars in place of remitting bills, owing to the extravagant premium demanded on the latter, which on reasonable terms must always have a preference owing to the comparative facility of transmission. The moment the commissary observes that dollars are preferred to his bills he may be sure the premium demanded on the latter is too high, and it should be reduced accordingly until it becomes the interest of the merchant to prefer bills to dollars. This is the legitimate method to keep dollars in a colony, and not the expedient of cutting them in pieces, which opens a door to fraud of which the innocent native is the victim. So obvious and easy is the fraud, and so tempting the profit, that the native blacksmiths, the armourers on board the ships of war, and the Americans (never backward in turning a dollar, particularly at a profit of 25 per cent.), have all been busy at the task of cutting dollars and five frank pieces into *five quarters*. The result of this experiment ought to be a lesson to government not to attempt any thing of the kind again; and in this instance justice demands that, as the author of the mischief, it should receive the depreciated coin at par.]

There was also during the past year 2,000*l*. in British silver in the military chest, which at one time ceased to be issued, with a view to induce persons to tender Spanish money for bills on the treasury; and within the last few years there was also remitted to the commissariat for circulation 800*l*. in copper coin.

Towards the latter end of the year 1836, a very considerable decrease was observable in the circulating medium, which is partly attributable to the following causes.

1st. Persons returning to Great Britain, taking home with them British silver.

2nd. Strangers (Americans and other transient people) taking away round dollars in return for part of their sales, considering it much more advantageous, than giving the high premium demanded on treasury bills.

3rd. Ships of war, who on leaving this are supplied with round dollars from the military chest, to defray incidental expenses, and for the purpose of purchasing refreshments for their crews down the leeward coast.

4th. Natives from the interior, taking the silver coin back with them to be made into ornaments.

5th. To the reduction for a time in the value of the doubloon, from 69*s*. 4*d*. to 66*s*. as the former value could always be got for it at any part of the coast, by which the amount of this species of coin, became considerably diminished.

For some time past the circulation has become more extended in consequence of the great increase in the shipping, which arrived for cargoes of timber, whose disbursements are all defrayed, by the merchants to whom they are consigned, and who are repaid by Bills drawn on the owners at par.

For bills drawn on the treasury at thirty days sight

the rate of exchange during the year was as follows: Spanish Money,—Forty nine pence per dollar, or 6½ per cent. premium.

British Money,—One and a half per cent. premium fixed by the Lords Commissioners of His Majesty's Treasury.

Bills drawn on the owners of Merchant vessels, to defray the disbursements of their ships in the Colony are usually paid at par.

No rate of exchange with foreign countries.

XIII. Gum Senegal, is the produce of some scattered oases, or verdant spots, that occur in the vast desert of sand to the north of the Senegal. The species of acacia from which it exudes has every appearance of a stunted and desert tree: its aspect is crooked and rough, its branches are thorny, its leaves of a dry or dirty green. The mere blowing of the harmattan causes the bark to crack in numberless places, and the gum to flow in large transparent drops, which remain attached to the surface. The harvest of the gum is in December, when the Moorish tribes, of whom the Trazars are the most powerful, break up from their usual camps, their kings and princes at their head, and proceed in a confused and tumultuous crowd to the forests, of which each claims one or more. After six weeks spent in collecting the gum, they put it in large leathern sacks, with which they load their camels, and proceed in the same tumultuous array to the spot fixed on for the gum market, between Fort Louis and Podor. This plain, which is one of the most desolate spots in nature, is suddenly covered with an innumerable multitude of people enveloped in clouds of dust. The kings appear mounted on beautiful horses, their wives seated in baskets on the backs of camels, the crowd on foot; the air resounds with the cries of men, women, children and animals. A cannon is fired as the signal for commencing the trade. A dreadful scene of wrangling and higgling immediately ensues. The French accuse the Africans of most dishonest arts in order to enhance the value of their commodity. They themselves, it appears, are not far behind, since they have not scrupled to adopt the policy of insensibly augmenting the size of the cantar by which the gum is measured, a change which escapes the notice of their rude antagonists. The French take off annually about 1200 tons of gum, which sells in Europe at from 70*l*. to 90*l*. per ton. The returns are taken almost exclusively in East India cotton cloths dyed blue, which are called pieces of Guinea, and for which it has been in vain attempted to substitute the manufacture of Europe.

From the River Senegal, in about 16° north latitude, to the Congo, which is in upwards of 6° south latitude, there is a remarkable uniformity of vegetation, not only as to principal orders and genera, but even to a considerable extent, in the species in which it consists. Many of the trees, the palms, and several other remarkable plants, which characterises the landscape, as *Adansonia*, *Bombax pentandrum*, *Elaeis guineensis*, *Raphia vinifera*, and *Pandanus Candelabrum*, appear to be very general along the whole extent of coast. *Sterculia acuminata*, the seed of which is the *Cola*, mentioned in the earliest account of Congo, exists, and is equally valued in Guinea and Sierra Leone, and, what is remarkable, it bears the same name throughout the west coast. The ordeal tree, called by Professor Smith *Cassa*, and by Captain Tuckey, erroneously, *Acossia*; if not absolutely the same plant as the red water tree at Sierra Leone and the Gold Coast, belongs at least to the same genus. a wholesome and pleasant saccharine fluid, used by the natives of Sierra Leone to quench their thirst, though belonging to that generally deleterious family the *Apocynæ*, is also met with. The *Sarcocephalus Afzelius* which is probably what he has noticed under the name of the country-fig of Sierra Leone, is found on the banks of the Congo. *Anona senegalensis*, whose fruit, though smaller than that of the cultivated species, is said to have a flavour superior to them all, and appears to be a general plant along the whole extent of coast: and *Chrysobalanus Icaeo*, or a nearly allied species, is equally common from Senegal to Congo.

The trunk of the *Dracæna Draco* cleaves open in many parts, and distils, at the time of the summer solstice, a fluid, which condenses into red tears, soft at first, afterwards hard and friable: this is the true dragon's blood of the shops, and must not be confounded, though dry, friable, blood-red, and inflammable, with other resinous substances, known under the same name, and derived, the one from a species of *Calamus* (*Rotang*), and the other from a *Pterocarpus*. To the dragon's blood are attributed astringent, desiccatory, and incassating virtues. It is administered internally for dysentery, hæmorrhage, violent bowel complaints, and inward ulcers; and externally, to dry up running sores, to heal wounds, and to strengthen the gums. The painters make use of it, in the red varnish with which they colour the Chinese boxes and chests. Mr. Sewel informs me that the castor nut grows abundantly in the neighbourhood of Cape Coast Castle, and also on most parts of the Western Coast.

The esculent plants of the Congo, cultivated, as well as indigenous, are very similar throughout the west coast. On the banks of rivers the principal articles of vegetable food are the Indian corn, or Maize (*Zea Mays*) *Cassava*, both sweet and bitter (*Jatropha Manihot*), two kinds of pulse extensively cultivated; the *Cytisus Cajan* and a *Phaseolus* (?), with ground nuts (*Arachis hypogæa*). The most valuable fruits are plantains (*Musa sapientum*), the papaw (*Carica Papaya*), pumpkins (*Cucurbita Pepo*), limes and oranges, pine apples, the common tamarind, and safu, a fruit the size of a small plum. One of the most important plants, not only of the Congo, but of the whole extent of coast, is *Elais guineensis*, or the oil palm, which also affords the best palm wine. The palm tree is truly called the 'native's friend'; it supplies wine, oil, fishing-lines, hats, baskets, palm nuts, cabbage, tinder, &c. &c. The wine is obtained by driving a hard peg or a gimlet into the cabbage-like head of the palm, when a stream of sweet liquor flows into a calabash suspended beneath, and by the time it is filled (six to eight hours) fermentation has reduced the whole into a milky tinted pleasant beverage; the natives, sometimes, allow it to have a harsh and bitter flavour; the process and liquor is, in fact, somewhat similar to that obtained from the cocoa nut blossom, and termed *toddy*. Wine is likewise obtained from two other palms. Among the other alimentary plants, of less importance, or imperfectly known, are the shrubby holcus, the common yam, and another *dioscorea*, found wild only, and very inferior to the yam, requiring it is said, four days boiling to free it from its pernicious qualities. Two kinds of sugar canes, capsicums, and tobacco are generally cultivated, according to the herbarium of Captain Tuckey. A second kind of ground nut, opera (*Glycine subterranea* ?), which is extensively grown at Madagascar,

also appears. A species of *ximenia* (*X. americana* ?) is likewise found, the fruit yellow, the size of a plum, and acid, but not unpleasant, in the higher parts of the Congo, where it is generally planted. An *antidesma*, perhaps like that mentioned by Afzelius, as having a fruit of the same size and taste as a currant, is met with.

The edible fruits of Sierra Leone are numerous and luscious. The peach of the negroes (*Sarcocephalus esculentus*) is a large, fleshy, and solid fruit, hard and eatable throughout, and full of small seeds, not much unlike a strawberry in flavour and consistence. The tree grows plentifully throughout the colony of Sierra Leone, 10 to 15 feet high; leaves large and elliptical, flowers pink, produced in globular heads, and seated on a receptacle, which afterwards becomes the fruit. The *Anona senegalensis*, or African custard apple, fruit not much larger than a pigeon's egg, and with the same or a superior flavour to the rest of the species. The monkey-bread (*Adansonia digitata*) is much used by the negroes; its fruit, which is of considerable size, and of an oblong shape, is full of seeds, and tastes like ginger-bread, with a pleasant acid flavour. The locust tree of Sierra Leone (*Inka biglobosa*) is a beautiful tree when in blossom, covered with compact biglobular heads of fine vermilion-coloured flowers, which are succeeded by compact bunches of pods, containing a yellow farinaceous substance, of which the natives are very fond. It is mentioned by Park as affording an agreeable and nutritive food. The country cherry is rare, growing on the mountains, and bearing a small oval reddish fruit, somewhat like a plum in flavour, and produced in clusters on the topmost branches. *Anisophyllea laurina*, the monkey apple, is a fruit of the size of a pigeon's egg, red on one side and yellow on the other, with a flavour between the nectarine and plum. Country grapes are the produce of *Vitis cæsia*, they are black, austere, and acid; chiefly eaten by the negroes. Country currants resemble elder-berries, and are found plentifully on the mountains. The shrub (*Ficus Brassii*) which bears the large fig, grows about the colony; fruit pleasant; as is also a smaller fig, that bears abundantly, and is the size of a hazel nut. Wild guavas (*Psidium pyrifera*) are natives of the country: Mr. Don saw and tasted the fruit, but could not exactly identify the plant with the West Indian guava. The hog plum is the fruit of *Spondinus Myrobalanus*; it is well tasted, and sharper than the plum of our gardens, but the stone forms half the bulk of the fruit. The grey plum tree (*Parinari excelsum*) is more valuable for its compact and durable wood than for the fruit, which, though large and abundant, is dry and farinaceous, with a very large stone; an allied species (*P. macrophyllum*) is called by the colonists, ginger-bread-plum. Of four other fruits, called plums, the small pigeon plum (*Chrysobalanus ellipticus*), the yellow pigeon plum (*C. luteus*), the black plum (*Vitex umbrosa*), and the sugar plum; it may be said that the first three, though good, are inferior to the latter, which is sold in large quantities in Sierra Leone, and is one of the very best fruits in the colony. The tree is very handsome, 60 feet high, and bears many fruits of the size of a bullace; at 10 feet from the ground the stem throws out roots like a mangrove or pandanus, but its botanical affinities are not known. From the fruit of the sweet pishamin (*Carpodinus dulcis*) a quantity of sweet milky juice exudes, the pulp is also pleasant and sweet. The sour pishamin (*C. acidus*), though sharp, acid, and rather bitter, is much relished

by the natives. The Mammee apple (*Mammea africana*) is a lofty tree, with useful wood, and a very large fruit. The butter and tallow tree (*Pentadesma butyracea*) abounds in a yellow greasy juice, to which it owes its name, and which is given out plentifully when the fruit is cut; this is mixed by the natives with their food, on account of its turpentine flavour, which renders it disagreeable to the European settlers. Two kinds of star apple (*Chrysophyllum macrophyllum* and *C. obatum*) are very inferior to the West Indian star apple (*C. Cainito*). *Tonella pyriformis* bears a rich and sweet fruit, like a bergamot pear. There is a tree, called pomegranate, said to be excellent; but having no affinity to *punica*. The seeds of *Sterculia acuminata* are called cola by the negroes, who hold them in great esteem, as possessing the same virtues as Peruvian bark. They are like horse-chestnuts, and produced in pods, which grow two to five together. A somewhat similar seed, named tola, is used in the same way. Velvet tamarinds, the fruit of *Codarium acutifolium*, are produced in beautifully black velvet pods, and possess an agreeably acid taste, while brown tamarinds differ little, except in the colour and larger size of the pods.

Pine apples both grow wild and are cultivated by natives: they abound in the woods so as to obstruct the passage through them in every direction, shooting most vigorously, and yielding fruit abundantly. Two kinds only, the black and white, are grown at Sierra Leone: though not so large as those cultivated in England, the flavour is superior. The wild varieties are innumerable; and a very pleasant kind of wine is made in the colony from the juice.

Besides the fruits already mentioned as found wild near Sierra Leone, the following are cultivated : plantains (*Musa sapientum*), bananas (*M. paradisiaca*) the cocoa nuts are still rare, and papaws (*Carica papaya*) are only seen near the settlers' houses. Oranges are abundant, and have now grown wild ; lemons are rare, but limes plentiful. Cashew nuts have been cultivated in large quantities of late : rose apples (*Eugenia Jambos*), and tamarinds from the West Indies, love apples (*Solanum Lycopersicon*) ; melons, water melons, cucumbers, gourds, &c., of many kinds and qualities ; among the melons some which having the smell of musk, are called musk melons. Two sorts of capsicum are grown.

The Baobab, or Monkey Bread, above mentioned (*Adansonia digitata*), may be deemed one of the most valuable productions of Western Africa. It is likewise said to be found in Egypt and Abyssinia, and is cultivated in many of the warmer parts of the world. It is the largest known tree; its trunk being sometimes no less than 30 feet in diameter. At one year old, its diameter is one inch, and its height five inches: at 30 years old, when the diameter has attained to two feet, the height is but 22 feet; and so on, till at 1,000 years old, the Baobab is 14 feet broad, and 58 feet high; and at 5,000 years, the growth laterally has so outstripped its perpendicular progress, that the trunk will be 30 feet in diameter, and only 73 feet in height. The roots are of a most extraordinary length; in a tree with a stem 77 feet round, the main branch, or tap root, measures 110 feet in length. The foliage is not so abundant as to conceal the vast proportion of the trunk; but it often happens that the profusion of leaves and of drooping boughs almost hide the stem, and the whole forms an hemispherical mass of verdure, 140 to 150 feet in diameter, and 60 to 70 feet high. The wood is pale coloured, light, and soft, so that in Abyssinia, the

wild bees perforate it, and lodge their honey in the hollow, which honey is considered the best in the country. The negroes on the western coast apply these trunks to a singular purpose. The tree is liable to be attacked by a fungus, which, vegetating in the woody part, without changing the colour or appearance, destroys life, and renders the part so attacked as soft as the pith of trees in general. Such trunks are then hollowed into chambers, and within them are suspended the dead bodies of those to whom are refused the honour of burial. There they become mummies, perfectly dry and well preserved, without further preparation or embalming, and are known by the name of *Guirots*. The Baobab, like all plants of the same order (*Malvaceae*), is emollient and mucilaginous. The pulverised leaves constitute *Yalo*, a favourite article with the natives, which they mix with their daily food to diminish excessive perspiration, and which is even used by Europeans in fevers, diarrhoeas, &c. The fruit is perhaps the most useful part of this tree; its pulp is acid and agreeable, and the juice expressed from it, mixed with sugar, constitute a drink that is deemed a specific in putrid and pestilential fever. Owing to these circumstances, the fruit forms an article of commerce. Bowditch mentions that it possesses such an agreeable flavour, and is so abundant, that it constitutes a principle article of food with the natives, who season many of their dishes with it, especially their corn gruel. The Mandingoes convey it to the eastern and southern districts of Africa, and through the medium of the Arabs, it reaches Morocco, and even Egypt.

If the fruit be injured, it is burned, the ashes being mixed with rancid palm oil, and serving for soap. The flowers are large, white, and handsome, and on their first expansion, bear some resemblance, in their snowy petals and violet mass of stamens, to the white poppy (*Papaver somniferum*). Both the flowers and fruit are pendant. The Baobab tree loses its leaves before the periodical rains come on.

The *Arachis hypogæa* deserves notice on account of the singular economy of its fruits. It belongs to the very few plants which mature their seeds underground; the flower stalk, after the blossom has withered, bending downwards, and burying the germin in the soil, where it soon increases in bulk, and perfectly ripens. The fruit is a pod, containing one or two seeds, the size of small nuts, with a flavour of almonds; the natives of several countries eat them, either boiled or fried, and make very pleasant confections of them, the taste resembling chocolate. A valuable oil is also extracted from the seeds of the *Arachis*, alike useful in food and for supplying lamps, as it never turns rancid. Many attempts have been made to naturalize this plant in Europe; but the climate is too cold for it every where north of the southern coast of France.

The native names of the different species of timber exported from the River Sierra Leone for ship-building and carpenter's work are—1. Co-Tartosar, or African oak; 2. Tolongah, or brimstone; 3. Bumia, rather scarce; 4. Cooper; 5. Kon; 6. Conta; 7. Roth; 8. Wossomah; 9. Jumo; 10. Backam; 11. Topercanico; 12. Mooll, the tree produces vegetable butter; 13. Sop; 14. Kelill; 15. Cong; 16. African almond; 17. Bombay; 18. Dye-wood; 19. Pissaman; 20. Pissaman, (no marine animal of any kind attacks it); 21. Black oak; 22. Wismore; 23. African cedar; 24. White wismore; 25. Cronko; 26. Shiu-shinginara; 27. Blue wismore; 28. Arwoora; 29. African mammee apple; 30. Catepy; 31. Lowland box-wood; 32. Singa-singa marah; 33. African pine; 34. Highland box-wood; 35. Singuora; 36. Cabooco; 37. Brimstone; 38. Bessey; 39. African mulberry; 40. Mangrove. The grain of several of these woods is very rich, and the furniture made therefrom not only durable, but extremely beautiful. In Mr. Forster's elegant mansion at Hampstead, there are several articles of furniture made from African mahogany, which would vie with the wood of any country in the world: and for ship-building the African teak is now generally and deservedly esteemed. (For the animal kingdom, &c., see my "Colonial Library.")

The rivers and coasts abound with many sorts of fish, beautiful in their colours, or nutritious for food.

The larvæ or caterpillars, of all the beetles that feed upon decayed wood, are rich and delicate eating, so that every forest affords the traveller plenty of nourishment did he know where to search for it. The children in Africa, at the proper season, are busily employed in digging out of the ground the females of

a particular sort of cricket, which are then full of eggs, and so enclosed in a bag as to resemble part of the roe of a large fish: these, when roasted, are deemed very delicate.

Manufactures, Mines, and Fisheries in 1836. [B. B.] —There are no manufactures or mines in this colony. There are many different sorts of fish, viz.—turtle, barracouta, snapper, ten-fish, grouper, mullet, mac-karel, ten-pounder, bonetta, crocus, shy-nose, soles, skait, white bait, eels, cavalla, flounder and green jar; all averaging in value $\frac{1}{4}$ d. per lb., or 6d. per bundle. Also oysters (opened), 6d. per pint; cray-fish, 1s. each; cockles, 6d. per pint; crabs, 2d. each; shrimps, 6d. per pint; perrywinkles, 6d. per pint; muscles, 6d. per pint.

There are about 20 boats and 40 canoes employed in fishing.

* Cannot be ascertained.

The exact number of acres of land under cultivation in this colony cannot be ascertained; nor can a correct account of the produce gathered and saved during the year be given. The articles, however, usually raised in the colony are—rice, coffee, yams, cotton, arrow root, pepper, cassada, Indian corn, castor oil plant, sugar cane, maize, ginger, ground nuts, and other vegetables and fruits indigenous to a

tropical climate. The natives also extract from the palm tree "palm wine," and manufacture from the same tree palm oil, which forms an article of export to England and elsewhere.

Average Prices of Produce and Merchandise.—[B. B. 1836.]—Horses, 15*l.* each; horned cattle, 2*l.* 10*s.*; sheep, 8*s.* 8*d.*; goats, 6*s.* 6*d.*; swine, 6*s.*; milk, 1*d.* per gill; fresh butter, none; salt ditto, 2*s.* per lb.; cheese, 1*s.* 6*d.* per lb.; wheaten bread, 2*s.* per lb.; beef, 5*d.* per lb.; mutton, 9*d.* per lb.; pork, 9*d.* per lb.; rice, 3*s.* 10*d.* per bushel; coffee, 1*s.* 6*d.* per lb.; tea, 8*s.* 8*d.* per lb.; sugar, 1*s.* per lb.; salt, 2*s.* per bushel; wine, 1*l.* 16*s.* per dozen; brandy, 10*s.* per gall.; beer, 13*s.* per dozen; tobacco, 1*s.* per lb.

Wages for Labour.—[B. B. 1836.] Domestic, 17*s.* 4*d.* per month; Prædial, 4*d.* per day; Trades, 1*s.* 9*d.* per day.

The labourers employed in loading timber vessels, receive on an average, 20*s.* per month.

Mr. Mathew Forster, of New City Chambers, Bishopsgate-street, a British merchant, to whom the colonies in general, and Africa in particular, are under deep obligations, thus writes to me, on applying to him for information on the staples of Africa.

'It may add some interest to your chapter on our African settlements if you notice the probable discoveries that may yet be made in the products of that quarter of the world, which till very lately, was seldom visited for any more legitimate article of produce than human flesh. The teak timber for the

purpose of ship-building, and mahogany are discoveries within the last twenty years. The first importation of palm oil is within the recollection of persons now 'alive, and when the slave trade was abolished in 1808, the quantity imported annually did not exceed one or two hundred tons. The annual importations now exceed twelve thousand tons!

I have lately been attempting to obtain other oils from the coast, and it was only yesterday I received from the hands of the oil presser the result of my most recent experiment on the ground nut, which I am happy to say is encouraging. I send you a sample of the oil extracted from them. They are from the Gambia. [It is a pure golden coloured oil, with a pleasant flavour, free from the frequent rancidity of olive oil.] I lately received from Cape Coast a quantity of the palm nut from which the palm oil is previously obtained, for the purpose of examining the kernels to see whether they would not yield an oil worth extracting; I send you a sample of the nuts, and one of the candles made from the styrene obtained from them, but I do not think they have had fair play in the management.

'If I am blessed with health and life for a few years longer, I do not despair of increasing the number and value of our African imports. It is the surest method of improving Africa and benefiting the mother country, and it becomes a British merchant to carry his views sometimes beyond the boundary of sordid gain.' [I trust these sentiments may be widely diffused among our colonial merchants.]

CHAPTER V.—GAMBIA, CAPE COAST CASTLE, ACCRA, &c.

1. St. Mary's Island (our principal settlement on the Gambia) lies close to the continent on the south side, running nearly east and west about fifteen miles, but of very inconsiderable breadth, and commanding the entrance to the river Gambia. The island is an uninterrupted flat, somewhat elevated, and covered with a thick brush of underwood, denoting the fertility of the soil. (Cattle can cross over at low water to Cape St. Mary's.)

Bathurst Town is built on the east side of the island, on a point which admits of a strong battery, being surrounded on nearly three sides by the tolerably deep and rapid river. The strata is a gravelly soil, consisting of the brown oxyd of iron strewn over a stratum of rock of the same composition; the other parts of the island consist principally, of a rich, dark, loamy mould.

The river from which the settlement derives its name, empties itself into the ocean by a mouth about nine miles wide between Cape St. Mary on the south and the Bird's island on the north. It was formerly supposed to be a branch of the Niger, but this notion was refuted by Mr. Park. Its sources have never been explored by European travellers, but it has been ascertained to take its rise amongst the lofty range of mountains which form the eastern front of Fouta falls. It communicates with the Senegal River by the Neriko, and is called by the natives River Ba Deema in the upper country. Vessels of 300 tons

navigate it for sixty leagues, and smaller vessels as far as Barraconda, 250 leagues from the entrance; here the obstructions commence which render further navigation impossible. From December to June, which is the dry season, the flow of the tide is felt, but in the rainy season, from June to September, the stream sets down so strong, that vessels cannot stem the current by ordinary means; though no doubt advantage might be taken of navigating by stream throughout the year.

Colonel Findlay, the late intelligent and humane Governor of the Gambia, has justly observed to me that it is greatly to be lamented the British government have not yet surveyed the various large rivers and creeks which empty themselves into the Gambia; if this were accomplished, there can be no doubt but an extensive inland navigation would follow, which would increase the trade, by affording a more ready and friendly intercourse with the natives.

There are two channels into the Gambia, the northernmost of which has six or seven fathoms water, is six miles wide, and lies between the Bird's Island and the Bangouin bank; the smaller, on the other side of the bank and under Cape St. Mary, has about nine feet water. The river is at all times muddy, and is infested with crocodiles, and also inhabited by the hippopotamus. It abounds with fish of various kinds.

The population of this settlement I can only

show as regular was in 1823,

Population

The foregoing does not include the garrison, which consists of about 150 of the Royal African corps.

The population of Cape Coast Castle is about 8,000; of Accra about 5,000; of Annamabou about 3,000; of Dix Cove about 2,000. In the aggregate we may estimate the number of British subjects, on the western coast of Africa, at about 50,000, of whom but 500 are Europeans.

Population of Gambia, including Discharged Soldiers located at Fort Bullen.—[B. B. 1836.] Settlement of St. Mary, River Gambia; area in square miles, 5; whites—male, 31, female, 5; coloured—male, 1,450, female, 1,254; total—male, 1,481, female, 1,259; aliens and resident strangers, 85; population to the square mile, 565; employed in agricul-

ture, 640; ditto in manufactures, 234; ditto commerce, 391; births, 92; marriages, 30; death, 160.

Population of Mac Carthy's Island.—[B. B. 1836.] Area between four and five square miles; whites—males, 7; coloured—males, 777, females, 378; total—males, 784; females, 378; aliens, and resident strangers, one Mandingo town, population about 350, established before the island was in possession of the British, also a number of labourers who came from Tillibunco, varying from 60 to 100; employed in manufactures, a few Mandingoes employed, making cloths, dying, &c.; ditto commerce, 21; births, unknown; marriages, 72; deaths, 63.

Bathurst, Island of St. Mary's Gambia, the population by the census in 1833, was, 2,825. There 3 Wesleyan Chapels, which will contain together about 720 persons. There has been no resident chaplain since 1835. There are also two Dissenting places of worship (Wesleyan) at the Island of Mac Carthy.—[B. B. 1836.]

III. There is no public free school, but the Wesleyan Missionaries have one at Bathurst, Island of St. Mary's, Gambia, which contains 80 male and 74 female scholars; the system of instruction pursued is similar to that of the infant school, it is supported by voluntary contributions. There is another school in Berwick Town, Fort Bullen, but no return has been made. There are also two private schools.

At Mac Carthy's Island, the Wesleyan Missionaries also conduct a school, which contains 25 male and 20 female scholars; this is also conducted on the infant school system, and is supported by voluntary contributions. There is likewise one private school, and an adult school on the Sabbath day.

V. The administration at the Gambia is under a Civil Lieutenant-Governor, but no council has yet been established to assist him; and the want of one has been repeatedly complained of by the settlers.

Return of Militia.—[B. B. 1836.] Bathurst, 1 lieutenant-colonel; 2 majors; 6 captains; 4 first-lieutenants; 4 second-lieutenants. Staff, 1 adjutant; 1 quarter-master; 1 pay-master; 1 surgeon. Strength, 6 colour-serjeants; 12 serjeants; 18 corporals; 12 drummers; and 252 privates.

Fort Bullen, 1 captain; 1 lieutenant; 2 colour-serjeants; 4 serjeants; 6 corporals; 4 drummers; and 84 privates.

Macaulay's Island, 3 captains; 5 lieutenants; 1 surgeon; 4 colour-serjeants; 8 serjeants; 12 corporals; 8 drummers; 168 privates.

There are several establishments on the Gambia belonging to Great Britain, as well as Bathurst. Macarthy's Island is up the river, more than 300 miles. Fort James is situated on an island about thirty miles up the river; it is only 200 yards long and 50 broad, and was, formerly, strongly fortified, but the French, on capturing it in 1668, destroyed the works which have never been entirely restored. Opposite Fort James on the north bank is Jilfree, in a healthy situation, and surrounded by a fertile district. On the south bank are Vintain, Tancrowal, and Jouka Konda, the first two, the second twelve leagues from Fort James, and the last, considerably up the river. About a league above Fort James on the south side, the River Bittan flows into the Gambia, and this is at all times navigable for large boats

to the village of that name, inhabited by African Portuguese. The sovereignty of a tract of country (one mile inland from the beach between Burradoo Creek and Junkarda Creek) was ceded to the King of Great Britain by treaty with the King and Chiefs of Barra, signed at Jillifree, 15th June 1826, a small spot of 400 yards by 300 yards called Albredar, near James's Island, excepted. This tract is extremely valuable from its position on the left bank of the river Gambia, opposite St. James' and St. Mary's islands, giving us a control of the navigation of the stream from its entrance to James' Island.

The French have a factory called Albredar, about three miles below Jillifree, which they retain possession of, in defiance of the treaty of 1783 (confirmed by the treaty of Paris), and despite the repeated remonstrances of the English Government. The following is the article of the treaty in question:—"Art. X. The most Christian King, on his part, guarantees to the King of Great Britain the possessions of Fort James and of the River Gambia." When Senegal and Goree fell into our hands by conquest, during the last war, in 1809, the commerce of the Gambia was carried on by the English traders exclusively from Goree. On the restoration of those places to the French by the treaty of Paris, exclusive possession of the Gambia was reassured to us on the same footing as by the treaty of 1783, and our settlement at Cape St. Mary's was immediately formed for the protection of its trade. Shortly afterwards the French, for the purpose of securing a footing in the river, dispatched an agent from Goree to establish a trading post, or *comptoir*, as they call it, at Albredar, under pretence of their having formerly had a *comptoir* at that place. Unfortunately this was not resisted at the time by the English commandant, Col. Grant, for want of sufficient information on the nature of the treaties; and every attempt made since to dislodge them by fair means, has failed of success. It is but justice to our government to add, that the most persevering remonstrances have been addressed in vain to the French government on this subject.

Akin to this conduct on the part of the French is their behaviour in respect to our right by treaty to carry on the gum trade with the Moors at Portindic. That right is solemnly guaranteed to us by the treaty of 1783 (since confirmed by the treaty of Paris), in the following words of Art. XI. "As to the gum trade, the English shall have the right of carrying it on from the mouth of the river St. John, to the Bay and Fort of Portindic inclusively: provided that they shall not form any permanent settlement of whatsoever nature in the said river St. John, upon the coast or in the Bay of Portindic."

Nothing can be more clear and definite than this article of the treaty, which has been faithfully adhered to on our part; no permanent (nor even temporary) establishment having been formed by the English within the prescribed limits. But what has been the conduct of the French? During the gum trade of 1834, under pretence of a war with the Trazar tribe of Moors, from whom we obtain our supply of gum at Portindic, they sent from Senegal a naval force, and seized our vessels trading there; which, however, on the remonstrance of Lieutenant-governor Rendall, they subsequently gave up, and it was supposed that the outrage would not be repeated. In this, however, the English traders have found themselves mistaken: the desire of the French at Senegal to monopolize the gum trade is not to be restrained by the faith of treaties.

The most valuable part of our traffic is carried on high up the river, above Macarthy's Island, where no protection by government has yet been provided for the trade. This, by means of block houses, might be afforded at a small expense, which the value of the trade would amply repay. The immense extent of the River Gambia, and the thickly populated and fertile country through which it has its course, will render it, ultimately, the most valuable of our possessions in that quarter of the world.

VI. Revenue and Expenditure of the Gambia. [B.B.]

	1833.	1834.	1835.	1836.	1837.

‡ The logs average 50 feet.

The trade of Western Africa is of considerable importance to this country, and yearly increasing.

VIII. The following shews the prices of different articles in the markets at the Gambia, 1833:—Yellow bees' wax, 130*l*. per ton; African teak, 3*l*. 10*s*. per load; camwood, 12*l*. per ton; ivory, 3*s*. 6*d*. per lb. Mahogany of various kinds at 4*l*. currency, or 3*l*. 9*s*. 4*d*. sterling (exchange dollar at 4*s*. 4*d*.) Ebony of very good quality grows abundantly in Salum River, and partially in Gambia. Dittach, a very hard and durable wood, stands well under water, and is used in the construction of vessels, wharfs, &c. Toulacouna, or bitter oil, 3*s*. 6*d*. (currency) per gallon. Cotton, nominal or barter price, in the rough, 2*d*. per lb. Indigo, in the rough cake, 2*s*. 6*d*. each. Hemp, made into ropes or cords, and sold at about 6*d*. each. Potash, about 5*d*. per lb. Honey, retailed in Mandingo country at 2*s*. 6*d*. per gallon. Butter, same price as honey. (N.B. The natives preserve the butter by a process of melting, and retail it in the liquid state at 2*s*. 6*d*. per gallon). Cola nut, 3*s*. 9*d*. per 100. Cardamums, sold in barter among the natives, at about 10*s*. the lb., and brought from a distance in the interior by the gold merchants. Goat, calf, and bullocks' skins, dressed by the natives, but usually made into articles of use. (The natives dress these skins well by means of potash and banna seeds). Cayenne pepper of all kinds, in plenty. Beef, good, at 3*d*. (sterling) per lb. Fowls, 1 to 1½ dollar per dozen. Mutton, generally private property, seldom in market. Goats, 1 dollar to 1½ (with one or more kids).

Wines, claret, 5 dollars the case. Tea, 2 dollars the lb. Dried oysters (good). Eggs, 14 to 16 for quarter dollar.

In the settlement of Bathurst, St. Mary's, Gambia, there are about 20 wax manufactories. Country cloths, &c., are manufactured in town, the number of looms averaging from 50 to 60. About 12 goldsmiths have considerable employment in manufacturing rings, and trinkets of various kinds. Bricks are also manufactured by liberated Africans.

There are no boats employed in the fisheries, but a number of canoes. The different sorts of fish are as follow:—Mullet, value 1*d*. each; Soles, 2*d*. each; Baracuta, 1*s*. 1*d*. each; Boneta, 1*d*. each; Turbot, 2*s*. each; Turtle, 10*s*. each; Snappers, 1½*d*. each; Skates, 5*d*. each; Ray, 2½*d*. each; Captain Fish, 1*s*. 1*d*. each; Cat Fish, 1*d*. each; Craw Fish, 6*d*. each; Grouper, 1*s*. 1*d*. each; Prawns, 2*d*. per dozen; Mangrove and Rock Oysters, 7½*d*. per bushel; Muscles and Cockles, 7½*d*. per bushel; besides a variety of other fish known only by country names. There are also 39 vessels belonging to the port engaged in trade, and upwards of 200 boats and canoes.

Mac Carthy's Island.—Country cloths are manufactured by small hand looms. There are various kinds of fish caught, but the names are unknown.

Return of the Produce, &c. of Gambia, in 1836. [B. B.] Bathurst, Isle of St. Mary, Gambia: Indian corn, 100 acres; millet, three kinds, 550 acres; rice, three kinds, 250 acres; ground nuts, 100 acres; beans, 50 acres. After the crop is cut, the whole of the island is under pasture. Nearly all cultivated

during the cultivated land; horses, 76; hives, 560. Quantities of rice, three kinds, about 2,400 bushels, 3*s*. 6*d*. per bushel, about 2*s*. 6*d*.; Mac Carthy's Island; 17; horned cattle; Quantity of produce, millet, three kinds, about 6,000 bushels. Price of millet, from 1*s*. 6*d*. to 2*s*. 6*d*.

The British fort are at Dix Cove, Castle, Annamaboe, of these only a few are at Dix Cove, is a Point, affording twenty tons bushels quality.

The coin in circulation is about 20,000*l*. There is no paper money. Dollar=4*s*. 4*d*.

CAPE COAST CASTLE, ACCRA, &c.

The British forts and stations on the Gold Coast are at Dix Cove, Secunde, Comenda, Cape Coast Castle, Annamaboo, Tantum, Winnebah, and Accra; of these only a few here require notice.

Dix Cove, is a few miles to leeward of Cape Three Points, affording only shelter to boats of fifteen or twenty tons burthen, but yielding much gold of a fine quality.

CAPE COAST CASTLE (long the seat of the British government on the Gold Coast, and residence of the chief governor during the sovereignty of the late African Company), stands upon a rock of gneis and mica slate, about twenty feet above the level of the sea, in latitude 5° 6' north, longitude 1° 10' west.

It may be considered the centre capital between Sierra Leone and the Bights of Benin and Biafra; as also the great emporium of trade for the introduction of British manufactures, and the obtaining gold dust, palm oil, and ivory.

The castle is an irregular figure of four sides, with four bastions at each angle; the whole mounting about eighty pieces of cannon. Two-thirds of the walls of the fortress are washed by the very heavy sea which invariably runs along this line of coast, and it is well protected on the land side.

Within the castle is an extensive line of spacious buildings, three stories high, running north and south, dividing the fort into nearly two equal parts, and containing the government-house, &c.; a nearly similar structure runs east, forming a triangular space of considerable extent.

The Cape, on which the castle stands, is an angular promontory, bounded by the sea on the south and east sides. It was originally settled by the Portuguese, but the Dutch dispossessed them in a few years, and took great pains to strengthen the fortifications. Admiral Holmes captured it, and demolished the citadel in 1661, since which time it has remained in the possession of Great Britain, having been confirmed by the treaty of Breda. When the Dutch Admiral De Ruyter destroyed all the English factories along the coast in 1665, this place withstood his utmost endeavours, although he attacked it with thirteen men of war. The Company, who obtained a charter in 1672, subsequently added greatly to its strength by building some bastions, though the fort is considered to be too near the town, and commanded by some of the houses.

Cape Coast Castle was originally surrounded with wood, but a large tract of country has been now cleared and rendered fit for cultivation.

The native towns on the sea coast are generally built close to the walls of the European forts; the houses are principally constructed of mud, and covered with Guinea grass, and so crowded together as to render it almost impossible to pass through the spaces allotted for streets; ventilation is of course quite out of the question, and as the inhabitants are filthy beyond description, their villages are productive of much disease, not only to themselves, but to those Europeans who happen to reside near them.

To this description, Cape Coast Town is, however, an exception; streets are now formed, immense masses of filth have been removed, the surrounding hills have been cleared of their luxuriant foliage, roads have been cut, and the *tout ensemble* presents prospects of gratifying improvement.

About five miles north-west from Cape Coast Castle is a small river, running in a southerly direction, and emptying itself into the sea within two miles of Elmina, forming the boundary between the Dutch and British possessions. The number of European stations on the Gold Coast was at one time considerable. From Appolonia to Accra, a distance of 64 leagues, there were, in 1808, of Dutch forts, 13, of Danish 4, and of British 10; namely, Appolonia, Dix Cove, Succondoe and Commenda, to westward of Cape Coast Castle, and Annamaboe, Tantum Querry, Winnebah, Accra, Prampram and Whydah, to leeward of Cape Coast Castle.

At a distance of about two miles to leeward (eastward) a chain of hills, forming an irregular amphitheatre 160 feet above the level of the sea, commences and runs in a semicircular direction approaching the castle at some places within a quarter of a mile, and terminating on the shore about a mile to windward. There are no mountains within several miles of Cape Coast Castle, the highest land not being more than 200 feet above the sea; nor are there any plains of great extent; clumps of hills, with their corresponding valleys, are however every where to be seen covered with a most luxuriant foliage throughout the year.

Annamaboe, ten miles to eastward of Cape Coast Castle, is a good fortification, of a quadrangular form, built on the extreme margin of the shore, the sea washing the foot of the southern boundary wall, and the town of Annamaboe taking the form of a crescent, embraces it. Tantum and Winnebah require no separate notice.

ACCRA lies in 5°33' north latitude, and 0°5' west longitude; there are three settlements there, English,

Dutch, and Danish. The view from seaward is picturesque, the houses white and regularly built, and in their rear a large plain, studded with 'bush,' or groves of various foliage. As the voyager advances towards the River Succomo the prospect widens—and is finally bounded by high lands, whose slopes yield excellent sheep pasturage. The country around is in general a fine, open and level land, with a sandy, red, and black soil or rich mould.

Accra carries on a considerable trade with the Ashantees, who bring ivory, gold dust, horses, &c. to exchange for romals, silks, tobacco, and rum, creating a considerable extent of business, for the Ashantees are a shrewd and intelligent people, well acquainted with the advantages of social intercourse, and greatly superior to the Fantees, and other water-side people. Indeed, it is a remarkable fact, that the people nearest the shore on the whole line of coast, are more treacherous, cowardly, and unprincipled, than those of the interior; a striking proof how little the natives have hitherto benefited by their intercourse with the civilized nations of Europe while slavery existed. But the natives, near the British forts, are now receiving daily advantage and improvement from the residence and example of Europeans who are no longer, as formerly, engaged in the slave trade. Mr. President Maclean, the present excellent governor of Cape Coast Castle, has exerted himself with the most praiseworthy zeal and ability to wean the natives from many of their barbarous customs (that of human sacrifices, on the death of their kings and chiefs in particular, which were formerly sometimes performed within sight of the castle walls), in which he has been eminently successful, and for which he merits the thanks of every friend of humanity.

Mr. Sewell, who resided eighteen years at Cape Coast Castle, and who is now in London, says that he considers the natives on the Gold Coast more remarkable for their humanity than for their ferocity. It is true that under the influence of religious fanaticism they perpetrate (although now but seldom) human sacrifices; but during the eighteen years he resided on the coast he scarcely ever heard of a murder, or any other act of personal violence amongst the natives, and certainly fewer than amongst an equal given number of the inhabitants of any nation in Europe.

James Fort, Accra, belongs to the English;—not quite a cannon shot to leeward lies the dismantled Dutch fortification of Crevœur; and about two and a half miles distant from James Fort is situated Christianborg Castle, built on a promontory, and the chief settlement in Western Africa belonging to the Danes.

Cape Coast Castle was replaced under the management of the merchants in 1828. The forts are governed by a President and Council, according to certain rules and regulations agreed upon with government. The business in London is managed by a committee of three merchants, appointed by government, and accountable to the Secretary of State for the due application of the funds, allowed for the maintenance and defence of the settlements, which is 3,500*l.* per annum. With this small sum 80 men are clothed, armed and maintained for the defence of the castle; the forts kept in repair; the President's salary, and all other expenses provided for.

The establishment for the support and maintenance of Cape Coast castle and Accra is—

Cape Coast Castle.—President of the council, treasurer, warehouse-keeper, and commander of the troops, per annum, 400*l.*; secretary, accountant,

assistant warehouse-keeper and register, 200*l.*; captain of the guard, adjutant, chief engineer and surveyor, 200*l.*; surgeon, and superintendent of schools, 200*l.*; schools, 100*l.*; 80 men, at 12*l.* per man, 960*l.*; clothing for ditto, at 2*l.* 10*s.* per man, 200*l.*; labourers, male and female, 400*l.*; extraordinaries, including ammunition, presents, forts' repairs, stationery, medicines, canoe hire, funerals, non-commissioned officers, messengers, &c. 740*l.*

Accra.—Officer in charge of fort, per annum, 100*l.*; 12 men, at 12*l.* per man, 144*l.*; clothing, at 2*l.* 10*s.* per man, 30*l.*; labourers, 50*l.*; extraordinaries, including ammunition, presents, forts' repairs, &c. 176*l.*

Home Establishment.—Secretary, and office rent, 100*l.*; stationery, postages, &c. Total, 4,000*l.*

The preceding charges are now reduced to 3,500*l.*, and yet with this trifling amount the forts are kept in a better state than when ten times that sum was laid out on them by the colonial authorities.

The main advantages arising from these forts is the power which they enable us to exercise for the suppression of the slave trade, and the security which they afford to our commerce, which increases in proportion to the total suppression of the traffic in human beings. Mr. James Swanzy, an officer in the service of the late African Company of Merchants, stated in his evidence before a Committee of the House of Commons, on the 16th June, 1816, that when he served on the coast, from the year 1789 to 1799, the proportion of the slave trade, to the other trade of the coast, was at that period nine-tenths of the whole trade.

In the same Committee, Mr. Swanzy (who had resided 10 years on the Gold Coast) was asked the following question:—of what nature is the accommodation which the Forts afford to trade? "Very great; they open the communication with the interior; they are the depôts for goods; they protect the British subjects residing near them; by these means the trade is collected, day by day, and a collection of *three months* is shipped in 24 *hours*, without which no ship could profitably trade to the Gold Coast, as she would otherwise be obliged to stay three months at each point to collect the same quantity of goods. I would wish to add also, that these forts give an exclusive trade to a considerable extent to the British subject." Mr. Swanzy was asked whether the legitimate trade of the Gold Coast had increased, or diminished, since the abolition of the slave trade (then only eight years ago); to which he answers, "I should think the Gold Coast produces 100,000 ounces of gold per annum: during the slave trade not more was collected than was sufficient for the currency of the country, and I think it may still be increased; it requires only exertion to increase it."

The late African Committee, in a letter to the Lords of the Treasury, correctly remark that, "Settlements on the coast of Africa are valuable on two grounds, as conferring an exclusive right of trade upon the power possessing them; and second, as the *only medium* through which it can be safely and advantageously carried on." It is a lamentable but certain fact, that Africa has hitherto been sacrificed to our West India colonies; her commerce has been confined to a trade which seemed to preclude all advancement in civilization; her cultivators have been sold to labour on lands not their own, while all endeavours to promote cultivation, and improvement in agriculture, have been discouraged by the government of this country, lest her products should interfere with those of our more favoured colonies.

BOOK VII. POSSESSIONS IN EUROPE.

CHAPTER I.—GIBRALTAR.

SECTION. I. Gibraltar promontory or peninsula, three miles long, and seven in circumference, situate in 36.9 of north latitude, and 5.21 of east longitude, and forming the southern part of the continent of Europe, and the key to the Mediterranean, is not the least remarkable possession of the British crown.

II. The earliest accounts of this singular rock are involved in fable, or clothed in the elegant fiction of mythology. The Greeks gave, it is thought, the term *Calpe*, *Κάλπη* (*Ulna*) to the mountain by reason of its advancing into the sea from the main-land, like a bucket, and Calpe together with the neighbouring Mons Abyla, on the opposite or African coast, received the appellation of "Pillars of Hercules;" that demi-god of the heathens having been supposed to have either erected pillars somewhere in the neighbourhood of the Straits, or probably it was put forth that Calpe and Abyla owed their creation to the vast strength of the Herculean giant.

Whether the Phœnician navigators, Carthaginian merchants, or Roman conquerors ever settled on the "Rock," does not appear, and it is probable that the natural strength of the position was first noticed in the beginning of the eighth century, when the Saracens or Moors invaded and made themselves masters of Spain. The particulars of this extraordinary invasion would be out of place in a work of this nature, suffice it to say, that Tarif Ebn Zarcá, a general under the Moorish sovereign or Caliph Alwalid Ebn Abdalmalik, landed A.D. 712, with an army of 12,600 men, for the conquest of Spain, and gave orders for the erection of a strong castle on the face of the mountain, for the purpose of keeping up his communication with Africa—the remains of which at present exist, though its completion bore the date A.D. 725. From this period Mons Calpe took the name of *Gibet Tarif* (hence Gibraltar), or mountain of Tarif, in compliment to the victorious Saracen general.

During the Moorish occupation of the Spanish territory, Gibraltar increased in importance, though its strength could not have been very great, as it was captured from the Moors with a small detachment of troops by Ferdinand, King of Castile, in the beginning of the fourteenth century; the fortress remained in the possession of the Spaniards until A.D. 1333, when Abomelique, son to the Emperor of Fez, who had been despatched to the assistance of the Moorish king of Grenada, laid siege to Gibraltar, which after five months' attack surrendered to the Africans.

Alonzo XI., an ambitious and warlike prince, then on the throne of Castile, attempted the recapture of this important station five days after its re-occupation by the Moors; but Mahomet King of Grenada, joining Abomelique's forces, so hemmed in the besiegers as to compel them to raise the siege. In the beginning of 1349, Alonzo again attempted the conquest of Gibraltar, but his army was forced to retire on the death of the Castilian monarch, 24th March, 1350.

Until 1410 A.D. the descendants of Abomelique continued in quiet possession of Gibraltar, when Jusaf, the third King of Grenada, availing himself of intestine feuds in the garrison, took possession thereof; but the Grenadian Alenide was driven out by a revolt of the people in the ensuing year, and the Emperor of Morocco solicited by the inhabitants to take the fortress under his protection; accordingly he sent his brother Sayd to their relief, with 1,000 horse and 2,000 foot; the King of Grenada resolving, however, to repossess himself of Gibraltar, appeared before it in 1411, with a large fleet and army, and the Morocco troops, after suffering great hardship were obliged to submit to the superior strength of their enemy.

In 1435, Henry de Guzman, Count de Niebla, lost his life in an attack upon Gibraltar. The son of this unfortunate nobleman (John De Guzman, Duke de Medina Sidonia) was however, more successful in 1462, having aided in the final capture of Gibraltar from the Moors, who had retained possession of the fortress for 748 years. Henry IV. of Castile and Leon was so rejoiced at the conquest, that he added Gibraltar to his royal titles, (Gibraltar had heretofore been the chief city in the kingdom of Abomelique) and gave it for arms *Gules*, a castle with a key pendant to the gate, *or*, (alluding to its being the key to the Mediterranean) which arms have been continued down to the present day.

In 1502, during the reign of Ferdinand and Isabella, Gibraltar was annexed to the Crown of Spain instead of being under the control of the Duke De Medina Sidonia, but its strength could not have been very great in 1540, as we find Piali Hamet, one of Barbarossa's captains, surprised and pillaged Gibraltar. During the reign however, of Charles V., the fortifications of the town were modernized, and from additions made by Daniel Speckel, the Emperor's engineer, it was thought to be impregnable.

While under the Government of Spain, Gibraltar was a place upon which divers kings of Spain had bestowed special privileges on account of its presenting the first point of attack from the Moors of Barbary. Among other privileges by Ferdinand IV. and Alonzo XI., it was declared to be a place of refuge for all malefactors, being a safeguard and protection granted them not only while there, but a residence of a year conferred the same privilege elsewhere. This protection, however did not extend to treason, to taking a man's wife from him, or to breking a treaty made by the King; nor did the protection extend to those committing the above mentioned crimes within the territory.

Little further is known of Gibraltar until the year 1704, when Sir George Rooke, who had been sent into the Mediterranean with a large fleet to assist Charles Archduke of Austria in recovering the crown of Spain, finding nothing of importance to be done, called a council of war on the 17th July, 1704, near

Tetuan, where, after several schemes were proposed (such as a second attack on Cadiz) and rejected, it was resolved to attempt the conquest of Gibraltar. On the 21st July, the fleet arrived in the bay; 1,800 English and Dutch were landed on the isthmus under the command of the Prince of Hesse D'Armstadt; the governor was summoned to surrender, and on his refusal, a cannonade was opened on the town by the ships, under the orders of Admirals Byng and Vanderdussen. In five or six hours the enemy were driven from their guns, especially from the New Molehead, which the admiral wishing to possess himself of, ordered Captain Whitaker, with the armed boats, ashore; Captains Hicks and Jumper, however, first pushed ashore in their pinnaces, upon which the Spaniards blew up the fortifications, killing two lieutenants and forty men, and wounding sixty. Notwithstanding this slaughter, the British kept possession of their ground, and being now joined by Captain Whitaker, advanced and took possession of a small bastion, half way between the mole and the town. The Governor being again summoned, thought it prudent to capitulate, for although the works were strong, mounting 100 pieces of cannon, well appointed with ammunition and stores, yet the garrison consisted of but 150 men, exclusive of the inhabitants; hostages were therefore exchanged, and on the 24th July, 1704, the Prince of Hesse took possession of the gates of Gibraltar, after a loss on the side of the British,—*killed*, two lieutenants, one master, and fifty seven sailors; and in *wounded*, one captain, seven lieutenants, one boatswain, and 207 sailors.

Gibraltar has ever since continued in the hands of the English; not, however, without frequent attempts of their enemies to wrest it from them. For the sieges, &c. see [*Colonial Library*, vol. vii.].

Until our occupation of Gibraltar, the following were the principal rulers:—1309–10, Ferdinand IV., King of Castile, took Gibraltar from the Moors, and lived here a short time. The place not of much importance before this time; 1331, Don Vasco Perez de Meyra was Governor; 1333, Abomelic, son of the Emperor of Fez, took Gibraltar, and added it to his royal titles; 1349–50, Albuhaen, son of Albuhaen (of Fez) was in possession of Gibraltar; 1427, Gibraltar was under the usurper and tyrant Mahomet, called the little; 1462, Don Juan de Guzman, first Duke of the House of Medina Sidonia, took Gibraltar from the Moors, and Henry IV. of Castile took the title of King of Gibraltar, as Abomelic had done before in 1333; 1462, Pedro de Porras was made Governor by Henry, afterwards Don Bertrand del Cueva. The duke of Medina recovered it, and it was added to his titles; 1502, Gibraltar was united to the crown of Ferdinand and Isabella, and had Spanish governors till 1704; 1704, Marquis de Salinas, the Spanish governor.

Since the British conquest, the following is the succession of governors, commandants, &c. of the fortress of Gibraltar, from 1704 to the year 1835:—Prince of Hesse, 1704; Major-gen. Ramos, Gov., 1705; Col Elliott, 1706; Gen. Stanwix, 1711; Colonel Congreve, 1713; Col. Cotton 1716; Major Batte-reau, 1718; Major Hetherington, 1719; Col. Kane, 1720; Lord Portmore, 1721; Colonel Hargrave, Commanding, 1722; General Clayton, 1728; General Sabine, Governor, 1730; Gen. Columbine, 1739; General Clayton, Governor, General Hargrave, Commanding, 1739; General Bland, 1748; Lord George Beauclerc, 1751; Colonel Herbert, 1752; General

Braddock, 1754; General Fowkes, Governor, 1754; Lord Tyravley, 1756; Earl of Panmure, Command. 1757; Lord Home, Governor, 1758; Colonel Tovey, 1761; General Parslow, 1761; General Cornwallis, 1762; General Irwine, 1766; General Cornwallis, 1767; General Boyd, Lieut.-gov. 1769; General Cornwallis, 1769; General Elliott, Governor, 1777; General O'Hara, Commanding, 1787; Sir Robert Boyd, Governor, 1791; General Rainsford, Commanding, 1794; General O'Hara, Governor, 1795; General Barnett, Commanding, 1802; Duke of Kent, Governor, 1802; Sir T. Triggs, Lieut.-gov. 1803; Gen. Fox, Lieut.-gov. 1805; General Drummond, Command. 1806; Sir Hew Dalrymple, Command. 1806; General Drummond, Command. 1838; Sir J. Cradock, Command. 1809; General Campbell, Lieut.-gov. 1810; General Smith, Command. 1814; Gen. Sir G. Don, Lieut.-gov. 1814; Earl of Chatham, Governor, 1820; Gen. Sir G. Don, Lieut.-gov. 1825; Lieut.-gen. Sir W. Houston, Lieut.-gov. 1831; Major-gen. Sir Alexander Woodford, Lieut.-gov. 1835.

III. Gibraltar mountain or promontory (forming with that of Ceuta upon the opposite coast of Barbary, the narrow channel which connects the Atlantic Ocean with the Mediterranean) is of an oblong form, in a direction from north to south two miles and three-quarters, a breadth nowhere exceeding three-quarters of a mile, and with a circumference of about seven miles. The greatest length of the peninsula, from Forbes's barrier to the flag-staff of Europa, is 4,700 yards; the breadth, from the New Mole to the sea, at the back of the Rock, 1,600 yards; from Europa Point, in the south of Gibraltar to Cahira Point, on the Spanish side, (which two points form the mouth of the bay) 10,945 yards. The area of Gibraltar and the adjacent neutral is thus stated:—Neutral ground (including gardens, meadow and arable ground), 106 acres; North Glacis, three and a half acres; Convent grounds, two and a quarter; South Glacis, seven; Alameda and grounds to south barracks, thirty-three and three-quarters; back of south barracks to upper boundary of Commissioners' garden, eight; gardens behind the naval officer's quarters, as high as cultivation extends, twelve and three-quarters; north ditch, about one-quarter; south ditto, one-quarter; farms up the hill, ten; Government grounds below Europa flats, three and a quarter; parterres and gardens attached to houses within the town of Gibraltar, 10; total, 197 acres. The summit is a sharp, craggy ridge, running from north to south, the greatest elevation being to the southward, where sugar Loaf Point rises to 1,439 feet above the sea level; Rock Mortar, the highest point to the northward, is 1,350 feet, and Signal House, the central point between the two, has an elevation of 1,276 feet.

The promontory is unequally divided by the above mentioned ridge, the side next to the Mediterranean being narrower and much steeper than that next the bay, on which stands the town and fortifications. The west side of the mountain is a series of rugged slopes, interspersed with abrupt precipices; the east mostly consists of a range of precipices, but a bank of sand, rising from the Mediterranean in a rapid acclivity, covers one-third of its perpendicular height; the southern extremity of the promontory falls in a rapid slope from the Sugar Loaf summit into a rocky flat called Windmill Hill, forming half an oval, and bounded by a range of precipices, at the southern base of which a second rocky flat takes place similar in form and extent to Windmill Hill, and also like

it surrounds termination called Europa is connected perpendicularly where the narrow pass flat, sandy height of which exceeds ten yards; about and near the from the shape of this the west and irregular, the the Spanish Bay sides, so at eight to ten

Gibraltar mountain, is in breadth up between 30 to the fortress and vol. vii.]

it surrounded by a precipice, the extreme southern termination of which is washed by the sea and called Europa Point. The northern point of Gibraltar is connected with the main land and is perfectly perpendicular, except towards the north-west, where what are called the Lines intervene, and a narrow passage of flat ground that leads to the low, flat, sandy isthmus, or neutral ground, the greatest height of which above the level of the sea, does not exceed ten feet; its breadth near Gibraltar, 950 yards; about midway to the garrison, 1,200 yards; and near the Spanish Lines, (which are 1,650 yards from the outworks of Gibraltar) 1,750 yards. The shape of this isthmus, which has Gibraltar Bay on the west and the Mediterranean Sea on the east, is irregular, the sand extending considerably beyond the Spanish Lines, both on the Mediterranean and Bay sides, so that its circumference may be estimated at eight to ten miles.

Gibraltar Bay, situate on the west side of the mountain, is nearly eight miles and a half long, and in breadth upwards of five; the circumference being between 30 to 40 miles. [A minute description of the fortress and adjacent coast, in *Colonial Library*, vol. vii.]

In 1783, the total number of guns servicable in the garrison, consisted of 663 pieces of artillery, as follows:—

Cannon.—Thirty-two pounders, 77; 24 and 26 ditto, 149; 18 ditto, 113; 12 ditto, 74; 9 ditto, 16; 6 ditto, 31; 4 and 3 ditto, 61. Total, 521.

Mortars.—Thirteen inch, 29; 10 ditto, 3; 8 ditto, 13; 5 and 4 ditto, 65. Total, 110.

Howitzers.—Ten inch, 19; 8 ditto, 9; 5½ ditto, 4. Total, 32. Grand total, 663.

There are now more than 1,000 guns mounted.

The streets of Gibraltar, which were formerly in a most deplorable state, are now well paved, lighted, and cleansed, and extensive improvements are daily going on. Many of the narrow streets have been widened, several alleys entirely removed, and free ventilation promoted by all possible means.

IV. Gibraltar (according to Major Imrie and Dr. Hennen) is composed chiefly of a rock of grey, dense primary marble, the beds or strata of which are of various thickness, from 20 to upwards of 40 feet, dipping from east to west at an angle of nearly 35 degrees. [See vol. vii. *Colonial Library*.]

V. The Andalusian atmosphere has long been celebrated for its salubrity, and with some exceptions, of late years the climate of Gibraltar is decidedly healthy, except for hard drinkers and phlegmatic constitutions. The temperature is decidedly warm, the hottest months being June, July, August, and September; and the coldest December, January, and February. Snow rarely falls, and ice is seen no thicker than a dollar; and the mercury ranges from 85° in July, to 50° in January; but the winds and the rain affect more acutely the animal frame than the solar heat. From 1816 to 1827, the greatest height of the barometer was 30° 90-100—the lowest 28° 62-100. Hail occasionally falls with much violence, and is generally accompanied by a thunder-storm, not unfrequently preceded by brilliant lightning, coruscations and falling stars, and other meteoric phenomena are observable. In 1753, a fire-ball shot over the rock with prodigious swiftness, in a direction from W. to E., and after the space of a minute and a half, exploded with a very loud report. In a period of ten years, from 1816 to 1825, the number of rainy days in each month was—January, 91;

February, 71; March, 62; April, 101; May, 61; June, 18; July, 4; August, 9; September, 29; October, 57; November, 95; December, 88. Total, 686.

But although the greatest number of rainy days is shewn to have been in April, the quantity of rain falling is greatest in January. The heaviest rains are accompanied with south-east winds, those from the south of east being raw, black, and bleak, and termed a "genuine Levanter," dislodging numerous masses of rock, which roll down the hill with prodigious violence.

Winds are divided into east and west; the duration of each may be seen by the following meteorological records from the books of the principal medical officer's office:—

Winds from 1810 to 1815.

In 1810, wind E. 164 days; W. 194 days; Var. 7 days.

1811,	198	160	7
1812,	159	189	18
1813,	233	114	18
1814,	219	133	13
1815,	200	161	4

Total, 1173 951 67

The easterly winds are most prevalent in July, August, and September, and westerly in December, January, and May. It is probable, from the observations of Ayala, Mr. Carter, and others, that the easterly winds prevailed formerly more extensively than at present, and that Gibraltar, like other places, has experienced a great change of climate; how far the latter and the rains affect the health of the troops in this important garrison, is a point of the utmost importance.

Memoranda relative to mortality from yellow fever at Gibraltar in five years in which it has appeared, since 1804 inclusive.

1804.—Military (including officers), 869; civilians, 4,864. Total, 5,733.

1810.—Military, 6; civilians, 17. Total, 23.

1813.—Military, 391; civilians, 508. Total, 899.

1814.—Military, 114; civilians, 132. Total, 246. Greatest number of deaths in September; disease began to decline from 6th October; no admissions or deaths after the 20th November.

1828.—Military, 507; civilians, 1,170. Total, 1,677. Greatest number of deaths on the 16th October; disease began to decline about the middle of November; last death on the 14th January, 1829.

For many interesting points relative to the yellow fever of Gibraltar, see article *Yellow Fever*, by Dr. Gilkrest (to whom I am indebted for the preceding facts), in the *Cyclopædia of Practical Medicine*; and my "*Colonial Library*."

This table of the diseases from which the greatest mortality usually arises, shews the occurrences among the troops at Gibraltar, during four ordinary (i.e. not epidemic) years.

Occurrences in regard to diseases, &c., in a regiment stationed for nine years at Gibraltar:—Arrived in the garrison, November, 1823, strength being 533; reinforcements within the period, 329; invalided or sent to England for the recovery of health, 69; average strength annually, 507; average deaths annually, 57–10ths.

Deaths in nine ordinary (*i.e.* not epidemic) years, in the regiment referred to:—Fever (remittent), 3; ditto (continued), 9; inflammation of the lungs, 3; inflammation of the bowels, 2; liver complaints, 3; phthisis, 21; dysentery, 6; other diseases and accidents, 10; total in nine years, 57.

VI. The earliest census I have been enabled to obtain is thus given by Colonel James. A list of constant inhabitants, taken March 20th, 1753:—

Those of Great Britain. Number of men, women, boys, and girls, 331; Navy and Victualling Office, 83; Genoa, 597; Spain, 185; Portugal, 25; Jews, 572; total, 1,793.

The next census was taken the 28th September, 1754:—

Roman Catholics:—men, 250; women, 112; boys, 135; girls, 295. Jews, 604; British, I have not heard there was any account taken; suppose the same as in the year 1753, 414; total, 1810.

The total number of military supposing the four regiments complete, 2,800; Artillery, 107; Officers, military and civil, to complete the four regiments, 182; number of women, military, and children, 1,426; total number of Britons, civil, 414; military, 4,452; total, 4,866.

The number of Catholics short of the Protestants, 4,074; the number of souls of all sects in the garrison, 6,260.

The resident aliens are composed of the following nations:—

Nation.	Males.		Females.		Total of each Nation.
	Above 12 years of age.	Under 12 years of age.	Above 12 years of age.	Under 12 years of age.

1834	7419	7589	..	..	..	..	..

A number of aliens were, on a revision of permits, warned to leave the garrison in 1832.

Occupations of the Inhabitants.—160 Merchants; 226 Shopkeepers; 303 Clerks; 48 Landed Proprietors; 4 Lawyers and Notary Publics; 24 Doctors and Apothecaries; 99 in Government Civil Service; 19 in Religious Establishments; 25 Brokers; 309 Hawkers and Dealers; 1,042 Tradesmen and Mechanics; 43 Wine and Spirit Dealers; 267 Gardeners, Brokers, Butchers, Fruit and Milk Sellers; 880 Tobacconists and Cigar Makers; 408 Mariners, Boatmen, Lightermen, and Fishermen; 646 Porters, Labourers, Carters, Coachmen, and Water-Carriers; 2,473 Servants, Laundresses, and Seamstresses; 364 Miscellaneous. The following are without employment or assisting in domestic affairs—625 men; 1,985 boys; 2,957 women; 2,101 girls; total, 15,001.

The statistical returns of the Board of Trade state the population of Gibraltar in 1831 thus:—

Area in square miles, 1½. Whites—males, 8,741; females, 8,268. Blacks—males, 11; females, 4. Total, 8,752 males, 8,272 females. Aliens and resident strangers, 6,908. Proportion to square mile, 10,214. Persons employed in agriculture, 113; in commerce, 1,095. Births, 456; marriages, 65; deaths, 367.

The following return is to January, 1835.

Civil Population of Gibraltar and Territory.

	Number of Houses or Dwellings.	Number of Persons.	Total Population.
Within the Walls of the Town	1384	12622	15008

On North Front outside the Gate, and the Fishing Village at Catalan Bay, at the foot of the Eastern side of the Rock	67	368	
Living in Government Quarters	..	300	
Total	1781		

The foregoing population consists of males, 7,419; females, 7,589; total, 15,008. Of whom 10,122 are natives and British subjects, and 4,886 resident aliens.

There is much poverty among the poorer classes at Gibraltar, especially among the aliens: the lower order of Moors and Jews have a filthy appearance; they wear a sort of frock composed of flimsy blankets

ing, with a cotton draw feet in clum len; this gar it drops to p lamb, &c, p but rather hi dish of the composed of and salt, into sit round the a wooden spo from Malaga

886 resident alien.
e poorer classes at
aliens: the lower
filthy appearance:
of flimsy blankets

ing, with a hood and sleeves for wet weather; loose cotton drawers, open at the knees, the legs bare, the feet in clumsy slippers, and skull-cap of greasy wollen; this garb is frequently worn night and day until it drops to pieces. Provisions, such as beef, mutton, lamb, &c., procured from Spain or Barbary, are good, but rather high priced; fish is plentiful, but the chief dish of the lower orders is called *gespacho*, and is composed of water, vinegar, oil, capsicums, garlic, and salt, into which bread is broken: all the family sit round the bowl, each person helping himself with a wooden spoon. The usual beverage is Spanish wine, from Malaga and Catalonia.

VII. *Churches, Livings, &c., of Gibraltar in 1836.* [B. B.] Gibraltar—1,414 Protestant population; value of living, 300*l.* per annum and 100*l.* allowed for house rent; church situate on the Line Wall; will contain 1,048 persons; number of persons generally attending, from 900 to 1,000 at 11 o'clock and less than half that number at six o'clock; chapel situate at the convent, and will contain about 300. The chapel is at present closed. Dissenting places of Worship—one Wesleyan Methodist chapel, and four Jewish synagogues.

One Roman Catholic Church, called St. Mary the Crowned, at Gibraltar; Catholic population by the late census, 11,900; value of living, 100*l.* per annum from government and 200*l.* from funds of the church arising from fees on baptisms, &c.; the church is situated in the main street of Gibraltar, and, when completely full, will contain 2,500 persons; number

of persons generally attending, about 10,000. There is no chapel properly so called. For the accommodation of the troops and inhabitants of the South District, a room is rented in which divine service is performed. This room will with difficulty contain about 70. As will be seen from the foregoing return, the church is quite inadequate to contain the whole congregation at one time. Service is therefore performed several times in the course of the day, by which means the inconvenience is in a great measure though not wholly got over.

A spacious Protestant church has been erected within the last few years, and a Protestant chapel, in the building called the Convent, the residence of the Governor or Lieutenant Governor; also a Roman Catholic Church within the walls of the town, and a small Roman Catholic Chapel in the district called "The South;" the clergymen being generally Genoese. There are four Jewish synagogues.

VIII. Of public schools there is one small garrison school, and also regimental schools in each of the corps stationed in the fortress; the numbers attending being 176 males, and 138 females; total, 314. A school for children of different persuasions; the number in 1835 being about 1,200.

The public library at Gibraltar is one of the finest in Europe; the patriotic Colonel Drinkwater may be considered its founder, in 1793. The medical library, as also that founded by the merchants, are of more recent origin.

Schools, &c. of Gibraltar in 1836. [B. B.]

Wholly by vol. contributions from the Catholic community.	2400 <i>l.</i> per annum
	Regimental schools in each of the corps stationed in the fortress; viz. in the artillery, 33rd, 47th, 52nd, 60th, 68th, and 82nd regiments.‡	A sergeant of each corps, with the regimental pay.	169	118	287	Dr. Bell's system.	By Government, 10 <i>l.</i> per annum for each.	

* The house is granted by Government for the purposes of the school. There are also eight private schools in Gibraltar.

† This school was instituted on the 1st January, 1836, with a view to combine with religious instruction and general education a diffusion of the knowledge of the English language among a very large class of the population heretofore unacquainted with it. For this purpose, it was necessary to provide masters from England, which, with the expense necessarily attendant on the formation of a new establishment, occasioned an outlay greatly exceeding the sum mentioned in the foregoing return. These expenses, as well as the current ones of the school, were defrayed by an extraordinary voluntary collection.

‡ The several regimental schools provided for according to his Majesty's regulations, are under the inspection of the chaplain of the forces.

X. The chief administration lies in the Governor, who is of course the commander-in-chief of the troops; and the settlement is treated as a garrison town. The laws of England are generally applied at Gibraltar, and the Charter of Justice of 1830 provides that the courts shall administer the law as nearly as may be according to the practice of Westminster Hall.

Military Establishment of Gibraltar.—Major-general, aide-de-camp, colonel of engineers, assistant military secretary, town major, town adjutant, garrison quarter-master, garrison chaplain, provost marshal; 1 company of sappers and miners, 5 companies of royal artillery; 5 regiments of the line at present, but subject to variation. Six is the regular peace establishment at the present strength of regiments.

The following table shows the military strength of the garrison for eighteen years.

Return of the Numbers and Distribution of the Effective Force, Officers, Non-commissioned Officers, and Rank and File of the British Army at Gibraltar, in each year since 1815, including Artillery and Engineers.

* Exclusive of two regiments detached to Lisbon, and including one from Malta.

XI. The Revenue of Gibraltar is raised by means of the following taxes:

Wharfage Toll.—On all wines and spirits, strong waters or cordials, landed or introduced into the garrison, per butt, 4s. 4d.: one moiety of which to be remitted as drawback on re-exportation. On all tobacco landed or introduced into the garrison, 4½d. per cwt. or per hoghead, 4s. 4d.; one moiety of which to be remitted as drawback on re-exportation. In case of dispute as to weight, to be weighed at the expense of the merchant.

Duties on Wines.—On all wines consumed in taverns, wine houses, canteens or other public houses, per gallon, 4d.; gauging do. do. 0½d.; total per gallon, 4½d.

Spirits, Strong Waters and Cordials, intended for consumption in the Garrison.—For every gallon of such spirits, strong waters or cordials, of any strength not exceeding the strength of proof by Sykes's Hydrometer, and so in proportion for any greater strength than the strength of proof, and for any greater or less quantity than a gallon, 2s. 2d.; gauging fee per gallon, 0½d.; total per gallon, 2s. 2½d. A proportion of six gallons of spirits to each pipe of wine is allowed free of duty for the purpose of infusion, under the superintendence of an officer belonging to the revenue department.

Storage on Wines and Spirits.—On every botasso or large butt, 5 rs. or 1s. 10d.; on every pipe, 4 rs. or 1s. 5½d.; do. hoghead, 2 rs. or 8½d.; do. quarter cask, 1 r. or 4½d.; do. 18 gallon barrel, 10 qts. or 2½d.; do. Demijohn, 10 qts. or 2½d.; do. hamper containing 54 bottles, 2 rs. or 8½d.; do. case containing 12 do. 8 qts. or 2½d.; do. do. 72 do. 2 rs. or 8½d.

Auction Fees.—On all goods sold by auction, allowing ½ per cent. to the auctioneer, 2½ per cent.

Weighing Fees.—On all spices per cwt. 4½d.; oil and other fine merchandise per do. 2½d.; coarse goods per cwt. 1d.; grain, and articles of measurement per fanega, 0½d.

Duties and Fees on Licenses and other Police Matters.—Fees on Documents relating to Crown property and issued from the Crown Land Office.—Original grant of ground under seal on paper, 6l. 18s. 8d.; transfer or partition or confirmation of ditto, 3l. 9s. 4d.; approval of a deed of mortgage, 3l. 9s. 4d.; new lease, 6l. 18s. 8d.

Casual Pay, bond, of wh 3l. 9s. 4d.

Duties on Licence.—Tobacco, 4d.; hawker cart do. 1l. 4l. 6s. 8d.

Duties on Licence.—Tavern, 6s. 6d.; wine, 6s. 6d.; wine, 6s. 6d.

Shipping Duties.—These are now levied on ships and vessels arriving at, touching at, or having communication with the town, territory, shipping or anchorage of Gibraltar, and collected and received in pursuance of the order in Council before referred to, in lieu of the quarantine rates previously levied.

For every square-rigged ship, having three masts,

2l. 3s. 4d.; for every brig, 1l. 14s. 8d.; for every schooner, sloop, xebecque, misticco, galliot, or other the like kind of fore-and-aft rigged vessels, 1l. 1s. 8d.; and for every small coasting vessel, 17s. 4d. And, in addition to each of the foregoing rates, a further duty, when the ship or vessel is liable to quarantine, of 8s. 8d. For every day's attendance by a health guard, when embarked, 4s. 4d.; for every visit by a health guard to a vessel in quarantine, 2s. 2d.; for every day's attendance by a health guard, in superintending the discharge of a vessel in quarantine, 8s. 8d.; for every bill of health, 4s. 4d.; for every endorsement on a bill of health, 4s. 4d.

The Spanish authorities levy duties at the lines on all articles passing into Gibraltar, varying from 6 to 23 per cent. of the market prices. These duties amount to from 3000l. to 4000l. per annum, are leviable at the pleasure of the Governor of Algeciras into whose pocket they go. [B. B. 1836.]

XII. The trade of Gibraltar has been of the utmost value to England during her wars, and it is still of considerable importance. Shortly after its capture in 1704, the settlement was wisely made a free port by Queen Anne, and it soon became a most valuable entrepôt for the distribution of British manufactures to the Barbary states, and to the different countries bordering on the Mediterranean. Progressively increasing, Gibraltar became at length the centre of commerce, which, considering the number of inhabitants, was perhaps without its equal in the world. An idea of the extent to which it was carried may be judged from the fact, that in one year the value of British manufactured goods imported into Gibraltar direct from England, and *exclusive* of colonial produce, was nearly 3,000,000*l.* sterling! And during the last war, it is important to add, that Gibraltar was the most abundant and never-failing source for the supply of the British army with cash. Various circumstances have occurred to diminish the trade of Gibraltar; among the most prominent are the creation of a free port at Cadiz, the establishment of manufactories in the eastern parts of Spain, and the various royal orders of the Spanish Government, which place Gibraltar almost in a state of commercial non-intercourse with Spain, under the plea of preventing smuggling into the provinces adjacent to the fortress. Gibraltar affords indeed a good illustration of the value of our transmarine possessions; for at first sight "the Rock" might be considered a useless appanage of the British Crown. It has no soil on which the enterprising emigrant may settle and by prosperity consume double or treble his heretofore supply of English manufactures (such as our N. American and Australasian colonies); and it possesses no tropical products (such as the E. and W. Indies), but by its commanding position it gives security to the whole of our trade with the Mediterranean and adjacent coasts of Spain and Africa equal to what twenty ships of war could afford; and it is the entrepôt of a trade in itself valued at more than a million sterling

a-year, and employing annually nearly half a million tons of shipping inwards and outwards. In 1830, the value of produce of the United Kingdom imported was 988,234*l.*, and of Colonial produce 129,381*l.*; total, 1,117,614*l.*

No return in the Blue Book prior to 1833.

Premium on Spanish pillared dollars 1½ to 2 per cent.

Weights and measures.—Arrobe, twenty-six lbs. English = 3½ gallons. Five fanegas (strake measure of wheat) or eight Winchester bushels, or two heaped fanegas of Indian corn = 4½ bushels. Pipe, 117 gallons = 126 gallons English wine measure. The Spanish quintal of 100 lb. = 101½ lbs. English.

XIV. Gibraltar is not the barren rock that has been supposed; Colonel James mentions the names of 310 different trees and plants growing on the promontory. Several kinds of fruits are cultivated, and the vine and fig flourish in exuberance; after rains vegetation is richly luxuriant. The olive, almond, orange, lemon, and indeed every tree planted in a proper spot, thrive on Gibraltar; in the naval garden in the south are some noble date trees; the prickly pear runs wild, the aloe abounds, and the palmetto was formerly plentiful. Geraniums of almost every species grow in the utmost profusion, and a great variety of wild and uncultivated plants and herbs are found in every part of the mountain. Among the *native* fruits brought to market are seven or eight kinds of grapes, figs, oranges, lemons, pomegranates, almonds, apples, peaches, plums, apricots, (vulgo "*Kill John's*") cherries, strawberries, &c., and potatoes, cabbages, onions, cucumbers, artichokes, tomatas, peas, kidney beans, spinage, lettuces, radishes, &c. &c., are produced in abundance. During the latter part of the last sieg, the quantity of vegetables grown was sufficient for the supply of the garrison, and the quantity of garden ground is now augmented. Different kinds of fishes are brought to market, in former times the bay was so celebrated for its fishing of *tunny* and salmonet-tas that coins were struck in which these fish are represented. [See *Colonial Library* for a specific description of all the fish usually taken.]

Manufactures, &c. [BB. 1836].—The garrison is indebted to Messrs. Duguid and Co., for the erection of a steam mill, for grinding wheat, sufficient for the consumption of the troops and inhabitants.

"The engine is of 14 horse power, on the latest and most approved principles, it is calculated to work 6 pair of stones of 4 feet diameter, and can with ease deliver ground, cleaned and dressed from 35 to 40 quarters of wheat in 24 hours; more might be produced in cases of emergency, but the quantity mentioned exceeds what the persons concerned in the mill expect to sell for the supply of the place, to which their attention is almost entirely confined.

The soft wheat hitherto ground by the mill, has been the produce of the Baltic ports, Weismar and Danzig, and this class is preferred by the military and British inhabitants. The hard wheat, ground, has been the produce of Tagauroe, Volo, Sicily and Morocco, and this class is much preferred by the Italians, Spaniards, Hebrews, and most of the foreign inhabitants. The labour and consequent expense is considerably more in grinding the hard wheat than the soft. The prices at which the mill flour has been sold, since the commencement of the establishment have varied from 5 to 6½ dol. per barrel of 196 lbs. net weight, wholesale and retail; the mill not selling a smaller quantity than 14 lbs. United States flour could not now be imported of a quality equal to that made at the mill to sell under 10½ dol. to 12 per barrel, the last year however has been one of great scarcity in that country, but I may say for many years past, flour could not be imported to sell under 7½ to 8 dol. in Gibraltar. The quality of the mill flour depends of course upon the quality of the wheat, as it is now perfectly demonstrated, that the machinery works admirably, and experience is daily benefitting this quite original undertaking in Gibraltar, from the cleaning and separating the grain to the final dressing of the flour; the pastry cooks and bakers, consider, and pronounce its quality to be quite unexceptionable, and as the supply is constant of fresh ground, and at unexampled moderate prices, the proprietors flatter themselves, the enterprize will prove a great public benefit, without their being individual sufferers. It is not undeserving of remark that the benefit is fully verified to the garrison by the ample supply of bran, for the cattle, which formerly was entirely imported from Spain, and is now as part of the produce of the mill, abundant, at less than half its former price.

CHAPTER II.—MALTA AND GOZO.

I. *Malta*, and its adjacent island of *Gozo*, are situated between Sicily and the African coast, in the mouth of the great bay formed by Cape Bon and Cape Razat, in the parallel of (*i. e.* Valetta, the capital) 35.54. north, and the meridian of 14.34. east, the most southerly island in Europe.

II. This island was known eighteen hundred years ago under the name of *Melite* or *Melita*, Pliny and Strabo both mentioning it under this denomination, and there is no doubt that *Melita*, and not an islet on the Illyrian shore of the Adriatic, was the site of St. Paul's shipwreck. It appears to have been at one period a Carthaginian colony, when this singular people held such powerful sway in the Mediterranean; but whether it was the island mentioned under the appellation of *Hyperia* (by Homer in the *Odyssey*) and *Ogygia*, is doubtful.

The Phœnicians landed, it is said, on Malta about 1519 years before Christ, and the navigation of the Mediterranean belonging at this period to that commercial people, they formed a colony there which soon rose in trade and wealth. Whether Malta was inhabited previous to the landing of the Phœnicians is doubtful; according to the fabulous history, it was originally tenanted by the Phœacians (*quæ* Phœnicians), a race of giants. After being in possession of the island for upwards of seven centuries, the Greeks, 736 years *a. c.* drove out the Phœnicians settled on the island, and called it *Melitas*.

Both the Phœnicians and the Greeks, while in the possession of Malta, erected extensive buildings, and struck different coins, the relics of some of which are still extant.

About 528 years *b. c.* the Carthaginians disputed the dominion of Malta or *Melita* with the Greeks, and it was for some time divided between these two powerful nations; the latter were, however, finally compelled to abandon the island to the Carthaginians, under whose sway it grew into such magnitude and wealth as to excite the cupidity and enterprize of the Romans in the first Punic war, where it was plundered by *Attilius Regulus*, and seized upon by *Cornelius*. The Romans, however, were soon expelled from the island, and only recovered it after the naval victory gained by *C. Lutatius Catulus*, 242 years *b. c.*, when a peace was granted to the Carthaginians on the hard condition of their giving up to the Romans all the islands in their possession between Africa and Italy. The Romans were justly proud of their acquisition of *Melita*; they took every precaution to gain

the attachment of the resident Greek and mixed population, permitted them the continuation of their ancient customs, and made it a municipium, allowing the inhabitants to be governed by their own laws, under a pro-prætor dependent on the prætorship of Sicily.

The commerce and manufactures of the island were sedulously encouraged; the cotton and linen cloths of *Melita* were so famed for their fineness and the skill with which they were prepared, as to be regarded at Rome as an article of luxury. Great attention was paid to improving and beautifying the settlement, and the merchants and the sailors were then wont to repair to the temples to offer incense to the protecting gods of the island and its trade. On the division of the Roman empire, the island of Malta fell to Constantine, but the feuds of religious dissensions occupying all parties, the Romans in their colonies, as well as at home, felt the desolating inroads of barbarism. The Vandals seized upon Sicily in 454 *a. d.*, and next took possession of Malta, whence they were driven ten years after by the Goths. Under the Goths and Vandals the commerce of Malta perished; it was, however, partially revived under the reign of Justinian, who sent *Belisarius* to wrest Africa from the Vandals. *Belisarius* landed in Malta *a. d.* 553, and reunited it to the remnant of the empire, but not being allowed the immunities previously granted by its former masters, the island never entirely recovered its ancient splendour.

Malta became now a prey to feuds and dissensions, and for three centuries from the reign of Justinian we are ignorant of the events which mark its history. About the year 870 *a. d.* the inhabitants called in the Arabs, but they were driven out the same year by the bravery of the Greeks, who from thence remained undisturbed masters for 34 years; but the Arabs again descended in great force, exterminated the Greeks, sold their wives and children for slaves, and established a government, dependent upon the Emir of Sicily. The name of *Melitas* was then by the Arabs corrupted into that of Malta. To supply the deficiency of taxes which the Arabs would not levy on the Maltese, the former fitted out piratical cruisers, fortified the city of *Notabile*, built a fortress on the site of the present castle of St. Angelo, and enriched Malta with the plunder acquired on the sea. The Arabs, in their turn, were also driven out of Malta by the Normans, *a. d.* 1090, under Count Roger, who established the popular council, which

was composed of elected. The Germans, on the other hand, Emperor Frederick II. into a country totally ruined and maintained solely by the Maltese.

Malta remained in the hands of the Germans until Louis IX., King of Sicily, made a change of sovereignty in the affair of the King of Arragon, the supremacy in title of feudal servant of the

III. The island phers in Africa, regards the service of Parliament. Europe, the parallel 35°. 53'. north, a

was composed of clergy, nobles, and people freely elected. The island was afterwards given up to the Germans, on account of the marriage between Constance, heiress of Sicily, and Henry VI., son of the Emperor Frederick Barbarossa. Malta was erected into a county and marquisate, but its trade was now totally ruined, and for a considerable period it remained solely a fortified garrison.

Malta remained for 72 years subject to the emperors of Germany; and Charles of Anjou, brother of Louis IX., King of France, on becoming King of Sicily, made himself master of the island. On the change of sovereigns in Sicily, after the well known affair of the Sicilian vespers, Malta continued faithful to the French, but was soon conquered by the King of Arragon, who, as well as (his successors in the supremacy in 1414) the Kings of Castile, ceded it in title of fief to some favourite of the monarch or servant of the crown.

The Maltese at this time beheld themselves twice mortgaged for sums lent to their princes; they, therefore, always jealous of their liberty, made a noble effort to retrieve themselves from this thralldom, by twice paying 30,000 florins of gold (a large sum in those days), for which the island was pawned. King Alphonzo, therefore, A. D. 1428, declared and promised that in future Malta and Gozo should never be separated from the kingdom of Sicily. Alphonzo permitted, also, the inhabitants, in case of a breach of promise, to oppose him by force, without such conduct being deemed rebellious.

Charles V., with a view towards commanding the Mediterranean, and to secure the coast of Sicily, became master of Malta; and aware of its great advantages, and that he might be saved the expense of its garrison, while at the same time he might prevent his European enemies from making a descent on the possession, located the order of St. John of Jerusalem at Malta, who being driven from their principal place of residence, Rhodes, were glad to accept the aid of a powerful prince, who in 1530 A. D., granted Malta, Gozo and the city of Tripoli, in perpetual sovereignty to the knights.

For a history of the Knights of St. John and of Malta, during their occupation of the island from 1530 to 1798, when it was forcibly occupied by the French under Napoleon, see my "*History of the Colonies*" and "*Colonial Library*." It will suffice to mention here, that the Maltese rose *en masse* on the 2d Sept. 1798, against the French troops (6,000 men) then in Valetta. A small detachment of British troops aided the Maltese blockade of the garrison in the beginning of 1800, and on the 4th September 1800, the French capitulated to the combined Maltese and British troops.

Malta has ever since formed a portion of the British empire. Mr. Cameron was first appointed Civil Commissioner, and was succeeded by Sir Alexander Ball, who died in 1809; General Sir Hildebrand Oakes, was Chief until 1813, when Sir Thomas Maitland arrived; Sir Thomas died in 1824, and was succeeded by the Marquess of Hastings, his lordship died in 1826; and was succeeded by General Sir Frederick Ponsonby, who died in 1836; the present Governor is Major-General Bouvier.

III. The island was formerly placed by all geographers in Africa, but was declared to be in Europe, as regards the service of our soldiery, by a British Act of Parliament. It is the most southerly island in Europe, the parallel (Valetta Observatory) being in 35° 53' north, and the meridian 14° 30' 35" east of

Greenwich. The shape is an irregular oval, which has been compared by some to a fish—its southern aspect resembling the back, the bay of Marsa Sirocco the mouth, the various indentations on the north aspect the ventral fins, and the deep indentation of the bay of Melleha, with a corresponding indentation at the back of the island, the tail; the island, in fact, stretches east and west, and is much indented with bays and inlets of the sea on the side which corresponds with the coast of Sicily, while that which looks towards the African coast is nearly a continual curve.

The extreme length of the island is stated by Dr. Hennen at 18 to 20 miles, and its greatest breadth from north to south 10 to 12 miles, and circumference 60 to 70; but a chart of the islands under the British crown, furnished me from the Colonial Office, makes the extreme length sixteen and three-quarter miles, extreme breadth nine, with an area of 95 square miles (another estimate will be found under the head of *agriculture*). The official document makes Gozo (the island adjacent to Malta, and under the same government) nine and three quarter miles extreme length, five and one-third breadth, with an area of 27 square miles. The following, according to Captain Smyth, are the bearings and distances between several points on the south coast of Sicily and Malta: from Cape Passaro to Valetta, south 33.41. west, 56 miles; Alicata ditto, 21.55. east, 75½ miles; Terra Nova ditto, 10.40. 70 miles; Girgenti ditto, 30.03. 90 miles; Sciacca ditto, 35.51. 118 miles; Cape Granitola ditto, 42.32. miles; Maretime ditto, 42.45. 173 miles. Malta is distant from Cape Passaro, the nearest point of Sicily, north, 56 miles, and Cape Bon, the nearest point of the African continent, is almost 200 miles distant in a south-west direction. It is bounded on the east by the island of Candia, on the west by the islets of Pantelleria, Linosa, and Lampedusa, on the north by Sicily, and on the south by Tripoli. The sea dividing Malta from Sicily is only 80 fathoms deep in the middle or deepest part, very shallow in other places, and the bottom sandy: it is called the Canal of Malta, and is generally rough, with strong currents setting through it on the north-west side towards the east-south-east, and on the east-south-east side towards the east. Gozo Isle, originally known under the name of "*Gaulus*" by the Greeks, "*Gaulum*," by the Romans, and by corruption in the Arabic language "*Gaudese*," which in process of time was Italianized into Gozo (pronounced Godso), is situate on the westward of Malta, distant from thence in its nearest point about three miles, though some parts of the strait is five miles broad. In the channel lies the small islet of Comino, formerly called "*Hephostia*," of an oblong shape, and about five miles in circumference, with a still smaller islet or rock called *Cominetto*, off its north-west extremity. Malta, comparatively speaking, is low, the highest land being estimated at no more than 1,200 feet above the level of the sea, and cannot be discerned until the mariner approaches within 20 to 30 miles of the shore. The hill and dale surface is beautifully diversified, and the natural industry of the Maltese has converted an apparently barren rock into a very picturesque country. As a general feature, it may be observed, that the island is furrowed with valleys running from south-west to north east, parallel to each other, and becoming longer and deeper as they extend from the eastern and western extremity. One, termed Melleha, nearly divides Malta into two parts; the most fertile, however, is the vale, which forms at its lowest extremity the Port of Valetta.

A small range of hills and craggy rocks, called the Ben Jemma Hills, bearing a north-west direction from Valetta, stretch across the entire breadth of the island, and from these different spurs branch off, giving variety to the landscape. The southern shore consists of high or shelving rocks, without creeks or ports, or where a landing could be effected. To the east there is the port of Marsa (*Marsa*, in Arabic, signifies port or harbour) Scala, and towards the south-west that of Marsa Sirocco, capable of containing a great number of vessels. On the west there are two bays, called Antifaga and Magiarro.

The port of St. Paul is on the coast opposite Sicily, and is so called from a tradition that the vessel in which St. Paul was sent prisoner to Rome was driven in thither by a storm. St. George's Port, towards the north, is not far distant from that of St. Paul; St. Julian's Bay is on the same shore. [For the topography of the island, and a description of its forts, &c., see "*Colonial Library*, Vol. VII.]

Gozo (or *Gauisch*, as the natives call it), as before observed, is separated from Malta by an arm of the sea, four to five miles wide; with an average length of eight miles, six broad, and 20 in circumference; although fertile and thickly inhabited, it contains no town, the inhabitants being scattered in six villages, protected by a strong fort, *Rabat*, in the centre of the island. The surface of the island is very agreeably diversified with hill and dale, some of the more elevated parts in the north-west being nearly 2,000 feet above the sea. A chain of these elevations encircle the island, embracing a beautiful series of fertile vallies, separated by gently rising grounds; the summits of some of the mountains are flattened, and form truly table lands; others are rounded or mammillary; and there are four or five remarkably detached hills, perfectly conical in shape, and presenting the appearance of old volcanic productions. The interior of the island and its shores abound in caves and rocks, being of the same calcareous nature as those of Malta, but the country is much more rural and agreeable.

Fort Chambray, commenced in 1749, contains the principal accommodation for troops; it lies on the south-east side of the island, and is built upon an elevated promontory, forming one side of a little bay in which the Malta boats anchor; the shore all round is very bold especially to the south, where it rises into rugged and inaccessible cliffs, with huge masses of rock broken off from them and projecting into the sea; the road gradually winds from the sea to the fort (which is 500 feet above the shore) after a circuit of about 700 yards; the area on which this fortification is built being about 2,500 feet in circumference. The barracks accommodate 250 men, are admirably arranged, and there is a small but excellent hospital attached.

The oblong islet of Comino, two miles in length, lying between the larger islands, has a few inhabitants, employed in cultivating about 30 acres of land, and in preserving the numerous rabbits.

Besides Cominotto, which lies off the north-west end of Comino, there are four or five other islets, or rather rocks, belonging to Malta and Gozo. On the south coast of Malta is Filfosa, or Filfla, which contains, it is said, an ancient parish church; nearer the shore, and more to the eastward, is a rock called the Pietra Nera; and at the north-west end of the island, towards Gozo, is another rock, called the Scoglio Marfo. At the north end of St. Paul's Bay is the island of Salmonetta, but the best known of these

appendages is the fungus rock of Gozo, or "*Hagialul general*," celebrated for its production of *Corallina Officinalis* (Linnaeus), or *fungus melitensis*, at one time esteemed as a sovereign panacea for all diseases.

IV. Malta is composed of limestone of different species and of unequal density, though generally speaking remarkably soft, and crumbling down even under the action of the weather with great facility. Calcareous freestone is more or less abundant, limestone generally lying on the freestone, and the latter incumbent on a bed of marl.

The hard stone used in architecture is a species of coarse marble of crystalline structure, of specific gravity 2.5,—not absorbent of moisture, and not liable to decompose or disintegrate on exposure to the atmosphere. It consists almost entirely of carbonate of lime. It is well adapted to all works requiring strength, and particularly well fitted for pavements and floors. It is found in many parts of the island, generally near the surface. (See "*Colonial Library*,")

V. The climate of Malta is decidedly warm, indeed, almost tropical. The maximum temperature for the year may be taken at 90. Fahrenheit, the minimum at 46., and the mean at 63. The barometer may be similarly quoted at 30.8, 30.2., and 30.5. The hydrometer 87., 30., and 58½. The heat of the summer is doubtless increased by radiation of the solar rays from the rocks surrounding Valetta; but in the country around, and in Gozo in particular, the atmosphere is from 2. to 4. cooler.

The most prevalent winds are the south-east (the Sirocco) and the north-west; the former characterized by its humidity, accompanied by an exhausting degree of temperature, producing a damp and suffocating smell to the sick; these Siroccos are most prevalent in August, September, and October. The north-east wind ("*gregale*") is brief and violent in its duration, frequently occasioning serious mischief in the harbour during the winter months.

Occasionally sudden and partial gusts of intensely heated air are felt in Malta, which are blown from the coast of Africa. Fortunately they seldom exceed half a minute in duration, for if longer continued, life would be extinguished, owing to the severity of the heat, which is remarkable for blowing in tracts, affecting the inhabitants of one house and not their neighbours. It is probably a portion of the "Samiel" or "Simoom" of Africa. When dry wind blows over the island, especially in summer, volumes of impalpable dust float about, which is precipitated in the shape of a shower of mud, on the recurrence of a damp wind, or when the fogs and dews are peculiarly long.

No regular sea and land breezes are felt in Malta, by which the heat would be moderated; and it is a remarkable fact that Captain Smyth found the temperature of the sea, round the adjacent shores of Sicily, at a depth of 10 to 20 fathoms, 73. to 76. Fahrenheit, which was 10 or 12 degrees warmer than the water outside of the Straits of Gibraltar. Snow only appears at Malta as a luxury imported from Etna, but in the winter months there are frequent hail showers. Rain falls with tropical violence in December, January, and part of February. About March the sky gets settled; an occasional shower may fall in April and May, but during June, July, and August not a cloud is to be seen. September and October are cooled with showers, the air is placid and invigorating, and termed "St. Martin's," or the "little summer."

* The greater number of deaths were in January, February, March, and August, and the principal fatal diseases, Diarrhoea, Marasmus, and other diseases arising from debility.

Mortality of infants received into the Foundling Hospital at Malta from 1833 to 1836:—Entered in 1833, 163; Died, 135; Survived, 28. 1834, E. 125; D. 112; S. 13. 1835, E. 149; D. 99; S. 50. 1836, E. 160; D. 132; S. 28. Total E. 597; D. 478; S. 119.

The endemic diseases are few; small pox has been unknown for some years; varicella and scarlatina, occasionally appear, and measles are not unusual. The most important endemic is the plague, which was first noticed in the Maltese annals in 1549, A. D.; in 1593 it again appeared:—in 1623, 40 persons died of it, and in 1663 it reappeared, when only 20 persons fell victims to it: but its advent in 1675 was dreadful, for 11,300 persons died of this terrible malady. For 130 years Malta was free from plague, when it broke out with fearful violence in 1813; for, from its commencement in April, 1813, to its termination in September the same year, 4,486 deaths took place in the island, of which 1,223 occurred in Valetta, the mortality being about 80 in the 100 attacked: the monthly progress is shewn by the deaths from April to November, viz.: April, three cases; May, 110; June, 800; July, 1,595; August, 1,042; September, 674; October, 211; November, 53; *maximum* of the thermometer during those months was, 71° 82° 84° 88° 86° 88° 83° 72° F. strong winds blew during part of the period, particularly in July. How the plague

originated was never clearly ascertained: it was generally attributed to three vessels which arrived in Malta, 29th March, 1813, from Alexandria, where the plague was then raging; some of the crews of these vessels died on the passage, from pestilential diseases.

It is a remarkable fact, that some of the populous villages or casals in Malta totally escaped the disorder, and cases are on record where a woman held her dying husband in her arms, or the husband nursed his dying wife and children with perfect impunity; nay, even children sucked their dying mothers, and lay infolded in their arms without contracting the disease.

VI. When, or by whom Malta was first peopled is unknown; according to fabular tradition, the island was primarily tenanted by a race of giants. When in possession of the Phœnicians and Carthaginians it was probably thickly inhabited, owing to the extensive commerce carried on; but the earliest data I can obtain are those given by Boisgelin, who says, that in 1559, after the raising of the famous siege of Malta by the Turks, the island contained only 10,000 inhabitants: in 1632, without reckoning the knights, &c. of

the Order, a Brotherhood 51,750 men, According two islands of 28,864; 161 In 1775 the Gozo, native gular militia, ring the siege 1800, amou children; in forcibly took The next d of Malta and delle Isole di A Catholic N (Citta Vecchia Valetta, and Cospicua (city Senglea (city Burgh), 3,810 do.) 3,186; Z do.) 4,024; G 2,715; Zebug 731; Musta, 703; Crendi 1,003; Zabbas 180; Tarxien Safi (18th do. In 1824, the p by the deputy i Population of and Floriana, 2 side of the har 5,166; Zebug, 4 Micabiba, 814; 315; Ascicah, 1 Zabbar, 3,537; 4,130; Bircihir Attard, 907; M gur, 1,139; tota The estimate and the three ci is only to the er to the month of The following 1828, has been sonby, together

the Order, and ecclesiastics and officers of the Holy Brotherhood, the number of inhabitants amounted to 51,750 men, women, and children.

According to the records the population of the two islands of Malta and Gozo was in 1590, mouths, 28,864; 1617, 43,798; 1670, 60,000; 1780, 100,000. In 1775 there were computed to be in Malta and Gozo, native Catholic inhabitants, 121,507; the regular militia, 16,000 (effective men). The loss during the siege of the French, in Valetta, from 1798 to 1800, amounted to 20,000, including women and children; independent of the troops Buonaparte forcibly took with him to Egypt.

The next document I can find gives the population of Malta and Gozo, as extracted from *L'Almanacco delle Isole di Malta e Gozo* for the year 1807:—

Catholic Natives of Malta.—The Capital Notabile (Citta Vecchia, or Medina), and its suburbs, 7,311; Valetta, and its suburb Floriana (city) 24,546; Cospicua (city), 9,224; Vittoriosa (city), 3,300; Senglea (city), 4,152; Bircircara (1st casal, or Burgh), 3,810; Naxaro (2nd do.) 3,020; Curmi (3rd do.) 3,186; Zurrico (4th do.) 3,016; Zeitun, (5th do.) 4,024; Gudia (6th do.) 890; Siggieri (7th do.) 2,715; Zebug (8th do.) 4,026; Attard (9th do.) 731; Musta, (10th do.) 3,003; Micabiba (11th do.) 703; Crendi (12th do.) 924; Hasciack (13th do.) 1,003; Zabbar (14th do.) 2,542; Dingli (15th do.) 180; Tarxien 16th do.) 910; Gargur (17th do.) 949; Safi (18th do.) 178; Chereop 19th do.) 300; Luca (20th do.) 836; Balzan (21st do.) 444; Lia (22nd do.) 882; total in Malta, 80,225.

From the registers of the parochial priests:—

Catholic Natives of Gozo.—Castello e Rabato, 5,100; Caccia (casal) 1,469; Garba (ditto) 1,459; Naxar (ditto) 1,800; Zenda (ditto) 1,364; Saimat (ditto) 1,369; Zebug (ditto) 768; total in Gozo, 12,829.

From the registers of the parochial priests:

In Malta, 80,225; in Gozo, 12,829; total native Catholics, 93,054. Other inhabitants and domesticated strangers, estimated, 22,100; absent, estimated by register, 7,650. Grand total, 122,804.

The number of foreigners residing in Malta during the six or seven years preceding the plague of 1813, was estimated at from 30,000 to 40,000. Many houses were fitted up like ships, with tiers of berths, and several large vessels were converted into floating hospitals.

In 1824, the population of Malta alone was estimated by the deputy inspector of police as follows:—

Population of Malta, March, 1824.—La Valetta and Floriana, 25,546; the three cities on the other side of the harbour, 18,649; Notabile and Dingli, 5,166; Zebug, 4,776; Siggieri, 3,373; Crendi, 1,052; Micabiba, 814; Zurrico, 3,618; Safi, 227; Chircop, 315; Asciach, 1,136; Gudia, 1,040; Zeitun, 5,440; Zabbar, 3,537; Tarxien, 1,011; Luca, 1,268; Curmi, 4,130; Bircircara, 5,253; Balzan, 633; Lia, 1,039; Attard, 907; Musta, 3,369; Nasciaro, 2,965; Gargur, 1,139; total, 96,404.

The estimate of the population of Valetta, Floriana, and the three cities on the other side of the harbour, is only to the end of the year 1823. The villages are to the month of March, 1824.

The following record of Malta alone, from 1824 to 1828, has been furnished me by Sir Frederick Ponsonby, together with the census of 1834:—

Return of the Population of Malta, during the following years.

Years.	Number of the Population.	Number of Deaths.	Under what Age died.					
			Infants under 8 years.	Children from 8 to 14.	Youths from 15 to 28.	Men from 29 to 50.	Old from 51 to 70.	Decrept from 71 upwards.
1824	96404	2345	1125	80	158	231	372	379
1825	97627	2612	1276	82	179	293	398	384
1826	98739	2277	1090	62	152	330	370	373
1827	99549	2434	1180	60	160	260	385	389
1828	100949	2592	1260	79	178	291	390	394

During this period of five years, there died each year of apoplexy, about 120; of dropsy, 200; of marasmus, 200; of dentition, 550; of dysentery, 130; of diarrhoea, 280; of miscarriage, 120; still born, 30; of debility (infants who died soon after birth), 150; of phthisis pulmonalis, 100; of nervous and bilious fevers, 170. During this period, of those who died, no one had reached the age of 100; the oldest did not exceed 98 years; of this age about four or five in each year; about 30 individuals died annually of 90 and upwards.

The population of Valetta and Floriana, up to the 31st December, 1826, was 26,100

Ditto	ditto	at Vittoriosa	4,482	} 19,706
Ditto	ditto	at Senglea	5,250	
Ditto	ditto	at Cospicua	9,974	

Total 45,806

It is difficult to form any estimate of the number of Maltese who are residing in the Turkish dominions, or in other countries bordering the Mediterranean. For the last five years an account has been kept of the departures and arrivals, by which it appears that about 10,000 have departed in each of those years, and about 9,000 have returned.

The returns to the Colonial Office give the following as the number of inhabitants in both Malta and Gozo:—

Population of Malta and Gozo.

Years.	White and Free Coloured People.		Births.	Marriages.	Deaths.
	Males.	Females.			
1823	112204		—	—	—
1824	114106		2204	857	2631
1825	115155		4075	736	3026
1826	116505		3973	706	2622

1835					
1836	61028	62120	4091	918	3199

It is asserted that the natives of Malta are long lived; but it is to be regretted that we have not in the list of deaths the ages of the deceased. Abela states instances of persons living to 80, 90, 100, 105, 107, and 110 years. He notices one man, a native of Zabbar, who lived to near 120 years of age, and preserved his strength, his teeth, and in part the colour of his hair; and another, a resident in the civil hospital at Citta Vecchia, completed 120 years, retaining his memory and judgment. It is asserted by the same authority, that some of the ancient inhabitants lived to 130 years of age, owing to the purity of the air, and their temperate mode of living.

The annexed shews the population of Malta and Gozo in 1834 classified:—

MALTA :	Males.	Females.	Totals.		Population to the Square Mile.
			Males.	Females.

It would appear from the foregoing, that the population was then slowly increasing, the births preponderating over the deaths. The annexed table I was favoured with by Sir F. Ponsonby. His excellency did not inform me whether it included Gozo or otherwise. It will be seen that it differs from the preceding table; in some years the excess of births is very slight.

The upper class
common people
German, Italian, &

The Maltese are generally of middle stature, with robust frames, and small hands and feet; the hair black, and sometimes inclined to frizzle: lips frequently thick, and skin swarthy among the common people where exposed to the atmosphere; the eye dark and bright, and among the higher classes of females, remarkable for that fulness and languishing beauty which constitutes the great charm of oriental women. In some of the villages, such as the Casal di Zurrico, there are a remarkable number of blue-eyed persons to be met with. In general there is throughout the villages a good deal of the Spanish character displayed, but in the cities, and among the higher orders, a sort of French and Greek character is combined. The men are industrious, active, frugal; attached to their country, passive, but yet no-wise deficient in courage, as they have often shewn, and they are considered the best seamen in the Mediterranean. Those in easy circumstances dress like other Europeans, but the lower orders are clothed in a loose cotton shirt, over which is a wide vest, or jacket, with silver, sometimes golden buttons, a long twisted scarf, wound several times round the body, with very often a sheath'd knife placed therein; loose trowsers, leaving the legs bare from nearly the knees downwards, and very peculiar shoes called *korch*, which is a leathern sole, fastened with strings, or thongs, to the foot and leg, nearly like the old Roman sandal. The head in winter is covered with a woollen cap of different colours, having a hood attached, and falling down on the back; in summer, large straw hats are worn. The women are attached to their primitive dress, consisting of a short cotton shift, a petticoat (generally of a blue colour), an upper robe opening at the side, and a corset with sleeves. The hair, covered with pomatum and powder, is arranged in a high cone in front of the head, and the face is concealed by a large black silken veil called *faldetta*, which the wearer adroitly shifts when exposing her features to a side or full view. Many ladies of the upper class have recently adopted the English costume, except during the time of performing their religious duties, when they appear at church in their ancient costume.

The Maltese marry early; instances are not rare where girls have been mothers at thirteen years of age; they suffer little in childbirth; twins are a common occurrence, but no instance of triplets have ever been heard of in the island; and when we speak of such occurrences as not unfrequent in England, they shake their heads in emphatic silence. Deformity is exceedingly rare, and monstrosity still more so; in early infancy the children are swathed round from the shoulders to the toes, including the arms, which are laid close along the sides, so as to present a striking resemblance to an Egyptian mummy. Notwithstanding this apparently unnatural restraint, the use of the limbs is early acquired; a crippled or an impotent child is a rare sight; and the activity of the Maltese, especially as swimmers and divers, is very great. In the female hospital there are two preparations of monstrous twins; one pair joined by the backs, and the other by the bellies.

The upper class speak Italian; the language of the common people is a patois compounded of Arabic, German, Italian, and other languages. The Arabic,

however, so far predominates, that the peasants of Malta and Barbary can without much difficulty understand each other. Captain Vella contends that the Maltese language, as it is generally spoken by the mass of the people, is still the original Punic, which has passed unaltered through the changes and revolutions of so many nations, which have successively occupied and oppressed the island of Malta. Some slight differences may be perceived, chiefly in the pronunciation, in various parts of the island, but without disparagement to the language itself, whose substance is in every place the same. There is no national alphabet, but according to the fancy of the writer those of other tongues are adopted. English is becoming generally understood throughout the island.

The Lord's Prayer in the Maltese language (according to Anderson), "Missierna li inti fis meuiet jikkaddes ismech, tigi saltatech icun li trit int chif fis sema hegda flart. Hhobsna ta culum atina illum u Ahhfrilna dnubietna chif ahhna nahhfru lil min bhata ghalina u laddahhna fittigir ta tentazzioni isda ehhlisna middeni. Amen."

VII. A scrupulous attention to the rites of their church is characteristic of the Maltese, whose established faith is that of Rome. The landed property belonging to the church is considerable; and there are about 1,000 secular and regular clergy in the two islands. By the calendar of 1742, it appears that there were then 2,000 priests and ecclesiastics in Malta and Gozo, exclusive of the members of the order.

Previous to the year 1827, many of the churches enjoyed the privilege of sanctuary, and ecclesiastics were not under the jurisdiction of the civil tribunals: but a law was passed in that year abolishing those privileges, and the bishop's court has now jurisdiction only in spiritual matters.

There is a Protestant clergyman, and the service is performed in a chapel in the governor's palace; it is not, however, large enough to contain half the Protestants who reside at Valetta, and it is a well founded subject of complaint that a church has not been built. A military chaplain performs service for the garrison, in a building not very suitable for the purpose; indeed the want of any suitable Protestant church must appear very striking to those who visit the island, when it is recollected that it has been a British possession 35 years. The church service is now performed in Valetta in one of the lower offices of the palace, formerly either the kitchen or wine cellar of the grand master; and the accommodation on the other side of the water, in the Borgo, is worse, consisting only of what was a sort of storehouse of small dimensions.

The following table shews the great attention paid by Roman Catholic communities to the religious instructions of the people. Every parish has its chapel, its *cure* and its festivals. The value of the livings it will be observed is very small, but voluntary offerings, &c. doubtless compensate for the deficiency in the fixed stipends of the priesthood (see remarks p. 580.) There is a Roman Catholic bishop at Malta and a very large establishment of ecclesiastical functionaries. The parishes are pretty equally divided. Some of the churches were extremely rich in gold, silver and paintings, until the French got possession of Valetta.

Remarks.—The military have a Chaplain of Brigade, who performs divine service for the troops. The Governor's chapel is not large enough for the accommodation of the Protestant civil inhabitants, of which, however, it is calculated 250 attend the Dissenting places of worship.

Besides the several livings, the fixed annual value of which is stated in the returns, the Catholic clergy enjoy other emoluments, called "Tithes Primitive," and parochial dues; the maximum, however, of receipts of each, every thing included, is 50*l.*, and the minimum, 20*l.* per annum.

The curate of the four cities receives about 66*l.* a year, liable to certain expenses.

The great church of St. John, at Valetta, is a Conventual Cathedral, with the Cathedral of St. Paul, at Notabile, to which canonries are attached, as is the case in respect to the collegiate churches.

There are no fixed rectors, but the Curé is exercised by removable vicar-curates, who receive each about 58*l.* a year, which is bonified to the religious establishment of which the curates may happen to be a member.

Independent of the parochial churches and chapels, there are the churches in which great part of the population attends on holidays in particular, belonging to, and supported by, the following religious establishments: the Dominicans; Minori Osservanti; Minori Conventuali; The Augustines; The Carmelites; The Nunneries of Saint Ursula and Presentatione in Valetta; the Capuchins at Floriana; The Barefooted Carmelites or Theresians, and Nunnery of St. Margherita at Cospicua; The Dominicans; The Minori Conventuali; The Carmelites; The Augustines and Nunnery of St. Benedetto, at Notabile; The Dominicans and Nunnery of St. Scolustrea and Vittoriosa, and The Capuchins.

The Augustin's Minori Conventuali, and The Capuchins at Gozo.

VIII. Education is well attended to in Malta. There is a college in Valetta, instituted by the grand master, Pinto, in 1771; it is held in the convent of the suppressed Jesuits, and has lately undergone complete

reform. Degrees in divinity, law, and physic are conferred under certain regulations; and there is a preparatory school attached to it, in which all boys are received upon payment of a trifle. The support of the college devolves upon government, as on the expulsion of the Jesuits from Malta, their property, which now amounts to about 700*l.* a year, was allotted for the support of the university, and of a church which now costs the government 176*l.* per annum, the remainder being devoted to the university, in which there are 490 scholars; those in higher schools (unless specially exempted by the council) pay 4*s.* 2*d.* each month, from which is defrayed the salary of the secretary (1*l.* 15*s.* 4*d.* per month), and certain pensions to superannuated professors. To this fund the students in medicine, surgery, and anatomy, do not contribute, but pay 4*s.* 2*d.* each month to their respective professors.

There are two normal schools, at which more than 1,000 boys and girls are educated free of any expense. These schools, together with a small one at Gozo, are supported chiefly by government,—private subscriptions are however received. There was for a considerable time much jealousy on the part of the Catholic clergy on the subject of education, as it was feared that it might be made use of as the means of conversion. This feeling has subsided; and in one of the normal schools lately established, a canon of the church is the principal director.

The children are taught reading, writing, arithmetic, and the rudiments of Italian grammar, and in some instances, English and Latin; the females are taught needle-work, spinning, and weaving.

Of private schools there are 82 in Malta: viz. 24 in Valetta and Floriana; 25 in Vittoriosa, Sangle, and Cospicua; and the remainder in the different casals, or villages. In Gozo there are six private seminaries; and a public free school in Rabato, with 35 scholars.

* The university was instituted by the grand master, Pinto, in 1771, under statutes, which have been modified from time to time. A new arrangement of the university and lyceum was carried into effect from 1st January, 1834, having been submitted to and approved of by His Majesty's principal Secretary of State for the affairs of the Colony.

† On the expulsion of the Jesuits from Malta, their property, which now amounts to 700*l*. a year, was allotted by the grand master for the support of the university and the keeping up of the church. The government supports the university, having appropriated to itself the whole of the said property.

‡ These schools were established 18 years ago, during which period there have been admitted 2,304 males and 1,651 females. The children generally are taught reading, writing, and arithmetic, the English and Italian languages. The females are taught all sorts of needle-work.

§ This school was established 1st July, 1834.

|| In the seminary, the pupils are divided into two classes—the first, called Almuri, pay 5*l*. per annum; and the second, called Convittori, pay 12*l*. 10*s*. per annum. They, as well as the professors, &c., live in and are fed by the Establishment. The seminary, independent of the contributions of the pupils, has an annual revenue derived from landed property of about 310*l*.

†† The children are taught reading and writing and the rudiments of the Italian grammar.

** These schools were first opened in January, 1820, since which period there have been admitted 730 males and 527 females. Reading, writing, and arithmetic taught the children. The females are also taught needle-work, spinning, and weaving. There are also 26 private schools in Valetta; 2 in Floriana; 17 in the Three Cities, Vittoriosa, Senglea, and Cospicua; 1 in Notabile, and the rest in the different casals or villages.

†† Intended for 50 boys, belonging to Rubato and the different casals or villages, in proportion to the population of each; of this number 35 are educated gratis, and 15 on payment of a small gratuity to the master. Reading, writing, arithmetic and the rudiments of the English, Italian, and Latin languages are taught. There are also six private schools in this island.

Libraries.—In the year 1761, the Baile De Tencen founded the public library at Malta, which was increased by many gifts from distinguished private individuals, princes and kings. The King of France contributed a select set of books to it; and it was privileged to receive copies of all works published at the royal press at Paris. The library formed at the general hospital was transferred to it, and a regulation was established, by which the books of all the deceased knights became its property; it also had an annuity of 300 crowns left in perpetuity to it, and derived some additional income by the sale of duplicates, inasmuch that in 1798 the number of books, if we are to credit Boisgelin, amounted to upwards of 60,000. This library was, since the capture of the island from the French, removed to a large building adjoining the palace, formerly called the Conservatoria. It is a very respectable foundation, and contains a number of excellent and some very valuable works. This library is open to the public at certain hours of the day, but no books are lent out.

The garrison have a subscription library, both for reference and lending out; it was formed in 1806.

The books are distributed under the five following heads, and the number of volumes as they stood in the library catalogue and supplement to February, 1824, is thus:—

	vols.
Divinity, Ethics, Arts and Sciences ..	426
History, Biography, Voyages, Travels, Military Publications ..	835
Polite Literature, Poetry and Dramatic Works ..	644
Novels and Romances ..	356
Periodicals, Miscellaneous, &c. ..	273

There are also books on medicine, surgery, and the accessory sciences.

In the general hospital there is also a good library founded by the medical officers of the garrison.

The university of Malta grants degrees in medicine and chirurgery; and the Maltese physicians and surgeons are now principally educated in the island, many of them being possessed of considerable professional talents, to dispense which they are required to produce certificates to the government.

X. Malta is ruled by a governor and a council of seven members, four of which must hold office within the island, namely, the senior officer in command for the time being (not in the administration of the government); the chief justice; the bishop; and the chief secretary to government. The three unofficial members of the council are selected by the governor; two from out of the chief landed proprietors and merchants, being his majesty's native (Maltese) born

subjects; and the merchants of the island, and who shall hold a period of not less than

The supreme president, and the courts, viz. that of the magistrates' court, commercial court.

The past state of any thing like a has been appointed the state of the island, civil, and commercial.

The law, as it is, is so expensive and tedious that jury has been in the judges, who are independent with by any authority council. The Italian.

In the criminal is much business common offence is a remarkable advantage nature.

The island is being the head of and by a garrison Maltese fencibles, commissioned do Maltese themselves

subjects; and the third from among the principal merchants of the island, being a British born subject, and who shall have actually resided in the island for a period of not less than two years.

The supreme court consists of a chief justice or president, and four members; and there are minor courts, viz. that of special commission, an inferior or magistrates' court; a court of piratical offences; a commercial court, &c.

The past state of Malta has almost annihilated any thing like a code or *lex scripta*. A commission has been appointed by the Crown to examine into the state of the law in Malta, and to prepare a criminal, civil, and commercial code.

The law, as it is now administered in Malta, is expensive and tedious. A modified system of trial by jury has been introduced for certain criminal cases. The judges, who were formerly paid by fees, are now independent with fixed salaries, and not removable by any authority except by an order of the king in council. The language of the courts of law is Italian.

In the criminal court it does not appear that there is much business of a very serious nature. The common offence is stealing and pilfering; but there is a remarkable absence of all crimes of a very aggravated nature.

The island is protected by a naval squadron, Malta being the head quarters of our Mediterranean fleet; and by a garrison of British troops, and a regiment of Maltese fencibles, consisting of 25 officers, 41 non-commissioned do., and 468 rank and file, which the Maltese themselves pay for.

Numbers and distribution of the Effective Force, Officers, Non-commissioned Officers, Rank and File, of the British Army, Artillery and Engineers, including the Maltese Fencibles, in each year since 1815.

The revenue and expenditure is subject to the examination of an auditor who resides on the island, and whose duty it is to remark upon any thing not authenticated by the Secretary of State or the Treasury in England. The accounts are forwarded at a fixed period of the year to the auditor in England.

The following is a comparative yearly statement of the Revenue, &c. :—

Recapitulation of the Establishment.—[B. B. 1836.]—Civil establishment, 25,307*l.*; contingent expenditure, 35,482*l.*; judicial establishment, 12,553*l.*; contingent expenditure, 2,529*l.*; ecclesiastical establishment, 316*l.*; miscellaneous expenditure, 8,700*l.*; pensions, 7,456*l.* Grand total, 92,344*l.*

Pensions granted for Civil Services.—[B. B. 1836.]—No. 1. To persons connected with the order of St. John of Jerusalem, 2,130*l.*; No. 2. On reduction of office, 1,844*l.*; No. 3. On superannuation retirement, &c. 3,955*l.*; total, 7,929*l.* Pensions granted for military services, 1,432*l.* Grand total, 9,361*l.*

Commissariat Department. [B. B. 1836.]—Amount paid to British regiments, viz. 5th Fusiliers, 9,250*l.*; 7th Royal ditto, 1,396*l.*; 53rd Regiment, 3,479*l.*; 59th Regiment, 4,511*l.*; 60th Royal Rifles, first battalion, 3,835*l.*; 70th Regiment, 3,215*l.*; 92nd Highlanders, 5,953*l.*; total, 31,641*l.*; deduct sums repaid by paymasters as overdrawn, 134*l.*; total, 31,506*l.* To Royal Malta Fencible regiment, 8,903*l.*; deduct as overdrawn, 11*l.*; total, 8,892*l.* Pay of officers, drawn through agents in England, 15,714*l.*; to staff and extra staff, military and civil, 4,996*l.*; allowance in lieu of quarters, ordnance and commissariat, 83*l.*; value of rations, of provisions, forage and fuel, and oil for light issued, 19,200*l.*; deduct for ration stoppages, 151*l.*; total, 19,049*l.* Contingencies on the preceding, 300*l.*; transport, land and water, 245*l.*; rent of buildings, commissariat, 42*l.*; total, 587*l.* Grand total, 80,350*l.*

Ordnance Department. [B. B. 1836.]—Amount received from the military chest for the service of the ordnance, viz. subsistence of military corps, 6,510*l.*; expenses in royal engineer department, 751*l.*; ditto in royal artillery ditto, 312*l.*; ditto in storekeeper's ditto, 1,316*l.*; ditto for military works, 1,804*l.*; ditto for barracks, 2,901*l.*; ditto for commissariat, 4*l.*; ditto for works not belonging to the ordnance service, 109*l.*; total, 13,709*l.* Deduct ration stoppages, 1,321*l.*; repayments into the military chest, for rent

of canteens, barracks, damages, and works not belonging to the ordnance service, 1,898*l.*; total, 3,230*l.*; balance, 10,479*l.* Pay of officers of the royal engineers and royal artillery, drawn in England, 2,235*l.*; total, 12,714*l.* Grand total, 93,545*l.*

The ordnance expenditure in Malta cannot be correctly stated, the respective officers not being in possession of any document showing the cost of stores and ammunition.

The amount of bills drawn by the Deputy Commissary-general on the Lords Commissioners of His Majesty's treasury, for the service of the year 1836, was 120,476*l.*; loss by exchange, 42*l.* 17*s.* 10*d.*; produce of bills, 120,433*l.* 6*s.* 7*d.*—[B. B. 1836.]

Details of the Expenditure incurred by the Colony on account of its Military Defence in 1836. [B. B.]—Military Posts and Works in the island of Malta and its Dependencies under the controul of the Ordnance Department. Fortresses: Valetta, Floriana, Isola, Vittoriosa, Citta Vecchia, Rubato in the Island of Gozo. Lines: Coltonera, Margarita, Nascaro.—Entrenchment on the coast. Forts: San Salvatore, Riccasoli, St. Angelo, St. Elmo, Tigné, Manoel, Chambray in the Island of Gozo. Batteries and Towers: on the coast. The Colonial Government has only been at the expense of some trifling repairs to some of the towers on the coast used for colonial purposes.

Establishment, Pay and Allowances of the Royal Malta Fencible Regiment. [B. B.]—One colonel (including six warrant men), 1*l.* 5*s.* 6*d.* per day; 1 major, 10*s.* 3*d.*; 6 captains, at 7*s.* each per day, 2*l.* 2*s.*; 6 lieutenants, at 5*s.* 1*d.* per day, 1*l.* 10*s.* 10*d.*; 6 ensigns, at 4*s.* 1*d.* per day, 1*l.* 4*s.* 10*d.*; 1 paymaster, 7*s.*; 1 surgeon, 7*s.*; 1 adjutant, 6*s.*; 1 assistant-surgeon, 4*s.* 3*d.*; 1 quarter-master, 4*s.* 3*d.*; 1 sergeant-major, 2*s.* 3*d.*; 1 quarter-master sergeant, 2*s.*; 6 colour sergeants, at 1*s.* 5*d.* each, 8*s.* 7*d.*; 22 sergeants, including 4 staff sergeants, paymasters, clerk, drum-major, armourer, and schoolmaster, at 1*s.* 3*d.* each, 1*l.* 8*s.* 5*d.*; 24 corporals, at 1*s.* each, 1*l.* 4*s.*; 11 drummers, at 10*d.* each, 9*s.* 4*d.*; 444 privates, at 8*d.* each, 15*l.* 14*s.* 6*d.* Total per day, 27*l.* 1*s.* 4*d.*—Allowance to colonels in lieu of reckoning for clothing, 1*l.* per day; ditto to officers commanding the regiment, 3*s.*; ditto to field officers and captains, instead of contingent allowance, 20*l.*; ditto for regimental stationery and postage, 20*l.*; ditto for paymaster's ditto, 20*l.*; ditto for regimental school ditto, 10*l.* Bounty money for seven years: for recruits, 2*l.* each; re-enlisted, 1*l.* each.

Pensions at Malta in 1836. [B. B.]—Pensions connected with the Order of St. John of Jerusalem, 2,130*l.* The existing knights of Malta receive of this sum 1363*l.*, and 25 persons connected with the Order of St. John, 765*l.*, granted during and subsequent to the siege of Valetta. Granted on reduction of offices, 1,844*l.*; on superannuation and retirement, 3,955*l.*; for military services, 1,432*l.*; total, 9,361*l.*

XII. The trade of Malta in former times, and even during the continental war, was very great; but the plague and the opening of foreign ports tended much to its diminution. It was impossible to deprive Barcelona, Marseilles, Genoa, Leghorn, Messina, Ancona, Trieste, Smyrna, Alexandria, and other places, of some share of a trade which local or other advantages would always command; but neither a temporary pestilential disease, nor a general peace, which ought to facilitate commerce, could deprive Malta of the advantages which it naturally possesses for trade under the protection of the British flag.

List of vessels of all Nations which have entered the Ports of Malta during the year 1834: Quarantine harbour, above 30 tons, English 249, Foreign 287; under 30 tons, English 16; tonnage 86,012. Great harbour, above 30 tons, English 186, Foreign 457; under 30 tons, English 377, Foreign 247; tonnage, 76,089; total number of vessels, 1,819.

Return of the number of vessels, &c. belonging to Malta and Gozo, in January, 1835: number of vessels belonging to Malta, 250 tons and upwards, 15; 100 to 250 tons, 67; 20 to 100 tons, 25; 20 tons and under, 40; total number of vessels, 147; total number of tons, 16,868; of which were built in Malta, 250 tons and upwards, 9; 100 to 250 tons, 42; 20 to 100 tons, 17; 20 tons and under, 40; total number of vessels, 108; total number of tons, 10,434; crews of the above, 1,522; number of boats of all descriptions, belonging to Malta, 906; number of boats, belonging to Gozo, 97; total, 1003; number of men employed, 2,817.

The value of the cottons manufactured in Malta is upwards of 118,000*l*. Black silk stuff is also made. Ship building is on the increase, the Maltese being good carpenters: the timber employed is chiefly from the Adriatic. About 50,000,000 of segars are annually made, and find a market in every port of the Mediterranean. Stone for paving and building, is carried and exported in considerable quantities to Constantinople, the Black Sea, Egypt, &c. There are manufactures on a small scale of soap, leather, macaroni, iron bedsteads, &c. The Maltese jewellers are remarkable for the elegance of their gold fillagree-work, neck chains, &c. Salt is prepared in large quantities by exposing sea-water in the cavities of the rocks to solar evaporation. As ship builders, the Maltese are highly prized. Large quantities of sofas,

chairs, &c. are annually exported to the Ionian Isles, Greece, and other places.

XIII. Coins.—*G. S. 1836.* Gold: none in circulation, Silver: British crown, half-crown, shilling and six-penny pieces. Spanish pillared dollar, dollar of the South American States, Sicilian dollar and half-crown pieces, Maltese dollar, half-dollar, two scudi, one scudo, six, four, two, and one tari pieces. Copper: British penny, halfpenny, farthing and grain pieces, the latter of the value of one-third of a farthing.

The Spanish dollar was declared a legal tender at the rate of four shillings and fourpence sterling, by proclamation of the 11th October, 1825; issued in consequence of an order of the King in council bearing date the 23rd of March 1825. The dollar of Mexico, Peru, Bolivia, Chili, and Rio Plata, was made current at the rate of four shillings and four pence sterling, by proclamation of the 27th May, 1834, issued in consequence of instructions to that effect contained in a despatch from his Majesty's principal Secretary of State, dated 5th April, 1834. The Sicilian dollar which formerly passed current at the same rate as the Malta dollar, namely at two scudi and a half of Malta, continues to pass, since the introduction of the British silver money into these possessions, at a proportioned sterling rate. The scudo being equivalent to one shilling and eight pence sterling. The Sicilian dollar consequently passes for 4*s*. 2*d*. 12th of a penny; the Sicilian half dollar, 2*s*. 1*d*.; the Malta dollar, 4*s*. 2*d*.; half dollar, 2*s*. 1*d*.; two scudi piece, 3*s*. 4*d*.; one scudo, 1*s*. 8*d*.; six tari piece, 10*d*.; four do., 6*d*.; two do., 3*d*.; one do., 1*d*.

The introduction of British money into these possessions has not hitherto produced, among the commercial body or inhabitants generally any alteration of keeping their accounts, and of making sales, con-

XIV. The principal objects of agriculture are cotton, grain, and sulla; and it is to these that the farmers principally direct their attention; they, however, extensively cultivate beans, peas, a species of wild pea (called cucciarda), carrots, melons, potatoes,

cabbages, cauliflowers, and other articles of that description: these are principally cultivated as intermediate crops between cotton and corn. [See "Colonial Library" for details.]

Nature of Produce and price of each in sterling money.—Wheat, per bushel, from 3s. 9½d. to 5s. 0½d.; meschiato, from 2s. 3½d. to 3s. 9½d.; barley, from 1s. 8½d. to 2s. 9½d.; beans, from 1s. 8½d. to 3s. 2d.; sesamum, from 5s. 0½d. to 6s. 5½d.; cotton, per cwt., from 16s. 1d. to 1l. 5s. 8d.; cumin seed, from 8s. to 1l. 10s. 8d.; vegetables, from 5s. 4½d. to 3s. 6d.; forage, per serna, from 10d. to 2s. 7d.

Manufactures, Mines, Fisheries, &c. in 1836. [B. B.]—In private houses in the four cities and the various casals of Malta and Gozo.—Cotton sail cloth, value 28,000l.; nankeen, table cloths, counterpanes, blue and striped cloth for shirts, trousers, &c. 64,000l.; cotton yarn, spun by hand, 38,000l.; Malta stone, wrought into vases, flower pots, &c. 1,000l.; wrought gold and silver, 14,000l.; six ships built in the colony, 592 tons burthens, 2,083l.; total, 147,033l. There are stone quarries in every part of the island. The cotton used is the growth of the island. The cotton cloths are chiefly of a coarse quality, for the use of the inhabitants and for exportation. The stone for paving and building is exported in considerable quantities to Constantinople, the Black Sea, Egypt, &c. The intrinsic value of the metals is included in the value of wrought gold and silver. The Maltese are good shipwrights, and ship-building is much increased of late years. The timber is chiefly from the Adriatic. At one season of the year (viz. from August to October) great quantities of a particular kind of fish are taken, something resembling the dolphin, called here lam-

pankey. There are no fish caught, except for the daily supply of the market, in which are employed 285 boats.

The following is a statement of all foreign wheat sold and delivered for the consumption of the public, from the year 1823 (exclusive of the supplies for the service of the army and navy), and a return of the native produce of wheat and meschiato (one-third wheat and two-thirds barley) from the year 1828.

Years.	Total Consumption of Foreign Wheat.	Native Crops, from 1828 to 1834, both inclusive.

Cumin seeds and anniseeds are successfully cultivated, and exported in considerable quantity to the surrounding countries in the Mediterranean, as well as to England and America; and the cumin seeds of Malta are as good as any, if not the best, in the world. The squills grown and dried in Malta are found to produce the best oxamel attainable from that bulb; and the quantity of oranges hitherto furnished by Malta to the tables of the luxurious in France and England, might be greatly increased. Indeed, the oranges of Malta are confessedly the finest of the Mediterranean, and its melons are superior to the best of the southern countries of Europe. There is a variety of other delicate fruits. Vegetation of aromatic plants and herbs of every sort, aided by rich pastures refreshed by the regular falling of nocturnal dews, enable the natives to rear considerable herds of cattle and flocks of sheep and goats, whose flesh, aromatized by excellent food, possesses an exquisite flavour. Poultry is plentiful and excellent. Quails, and a great diversity of other wild fowl, never fail to come in vast flights at the time of their annual migrations.

Much attention is bestowed on the management of bees : a great many hives are kept in several parts of the island, from which they yearly procure a large stock of deliciously-flavoured honey. Great pains are also bestowed on the breeds of asses and mules, and the qualities of these useful animals have been highly improved by the inhabitants. The asses, especially, are well known for their unparalleled strength and beauty, and always sell at a high price.

The annexed return of the number of cattle, &c. in the islands of Malta and Gozo, 1st January, 1835, has been furnished me by Sir Frederick Ponsonby.

	Bullocks.	Sheep.	Goats.	Swine.
In Malta . . .	4437	8501	3213	3845
In Gozo . . .	447	4731	1035	405

Return of the number of carts and caleches in Malta and Gozo, which pay licenses, 1st January, 1835.

	Malta.	Gozo.	Totals.
Carts	1137	25	1162
Calcehes . . .	264	14	278
			1440

Carts employed solely on the farms are exempted from license. The number may be estimated, in the two islands, at about 800. The license on carts was taken off on the 1st April, 1835.

All the domesticated animals thrive in Malta. The Maltese dog, formerly so much celebrated, is now, I believe, extinct. The goats, are of a very fine breed, but the horned cattle are small, and principally imported from Sicily, Barbary, and the adjacent coasts. Snakes are to be found, but they are not poisonous. Birds of various kinds migrate to the island at different periods, and the hawks of Malta were formerly much celebrated; the bees were also renowned, and indeed continue to yield such excellent aromatic honey, that it is conjectured the island was thence called "*Melita*" by the Greeks.

Fish of various kinds are plentiful. The dory, rock-cod, and a species of whiting, popularly called the "lupo," are excellent. The cray-fish also, found on the rocks in the island of Gozo, are enormous in size, and of very fine flavour. One of the most remarkable fish is the "pholis dactylus," which abounds in the harbour, forming for itself a complete "habitat" in the soft rock, which is perforated as regularly by these creatures as if the perforation had been effected with an augur, while they approach each other so closely and so regularly, that several portions of the rock appear like the wood-work of a cartridge box.

The price of the best land is from 500 to 600 scudi the tumolo (50*l.* sterling). Land of moderate quality sells from 200 to 400 scudi, and the lowest from 200 to 100 scudi, and even less (16*l.* 13*s.* 4*d.* to 33*l.* 6*s.* 8*d.*). The best land rents for about 15 scudi (1*l.* 5*s.*); the second quality for about 10 scudi, and the inferior from 5 to 2 scudi (8*s.* 4*d.* to 3*s.* 4*d.*).

A man farming ten salms is obliged to maintain constantly two labourers, who generally receive from 100 to 120 scudi a-year (8*l.* 6*s.* 8*d.* to 10*l.*) each, and the farmer generally feeds them in whole or in part. His other labourers he pays as he wants them, by the day. The price of labour was in 1816 as high as seven and eight, and even ten tari (11*½**d.*, 1*s.* 1*d.*, and 1*s.* 4*½**d.*) per diem, in the summer time. In 1820 it was reduced to six and five tari (10*d.* and 8*d.*). At present the price is about four tari (6*½**d.*) per diem, and for this the labourers are obliged to furnish their own tools. Sometimes they are paid in money, at others in meschiatto (that is a mixture of wheat and barley). When they are paid according to the latter mode, they receive two tumoli each a week; and this is the method which is generally preferred both by the labourers and the farmers.

A catalogue of plants which grow in Malta and Gozo, and of the fish found on its coast, with various other particulars, will be found in vol. v. of my "History of the British Colonies."

SECTION I. The isles are situated in latitudes of 36.0 and 40.0 and 23.0 east of the Arabian Coast to the peninsula.

II. The early history of the Greeks Frank isles is shrouded with the mythology of antiquity; it is difficult for a modern to understand. The islands would have been civilized, remained free, and were partly in the hands of an alliance with the Cypriotes, Epirus, during his reign. Rome gave law to the islands on the fall of the empire. The public afforded protection to the reign of the island.

In 1737-38, the efforts for the ex Morea and other p sieged Corfu, which remained the chief public of Venice, t grandizing conqu directly affected the possession of, but out of the war in under the joint pr former becoming. h

Library vol. vii.]

III. The seat of God is situate at Corfu, altitude, and the mouth situate a little to the Adriatic; the capital about 30 leagues, and from north to south the north and western, and on the which separates it from rus. This channel, north-west, is about in length; at its north Cape Karagol, it is southerly, between about seven miles in neighbourhood of the exceed ten miles in the deepest parts.

CHAPTER III.—IONIAN ISLANDS.

SECTION I. The septinsular union of the Ionian isles are situate in the Ionian Sea, between the parallels of 36.0 and 40.0 south, and the meridian of 20.0 and 23.0 east of Greenwich, extending from the Albanian Coast to the southern extremity of the Morean peninsula.

II. The early history of these islands, called by the Greeks Frank isles (*Φραγκονησια*) is so intertwined with the mythology of the Greeks and Romans, that it is difficult for sober truth to find a starting point. The islands would appear to have been early colonized, remained for many years as separate states, were partly in the possession of Corinth, next in alliance with the Greeks, then with Pyrrhus, King of Epirus, during his invasions of Italy; subsequently Rome gave law to all the little Grecian republics; and on the fall of the Eastern Empire, the Venetian republic afforded protection to, and claimed the sovereignty of the islands.

In 1737-38, the Turks, who had commenced their efforts for the expulsion of the Venetians from the Morea and other provinces in European Turkey, besieged Corfu, which, notwithstanding repeated assaults, remained the chief of the Ionian Isles under the republic of Venice, the fall of which, beneath the aggrandizing conquests of the Gallic republic, immediately affected the islands, which the French took possession of, but evacuated them on the breaking out of the war in 1798-99, when they were taken under the joint protection of Russia and Turkey; the former becoming, however, the sole protector.

A constitution was organized at St. Petersburg, and afterwards promulgated in due form at Corfu, but which the septinsulars were far from being satisfied with; and by a secret agreement between Alexander and Napoleon, who had then his eyes on Turkey, the islands passed under the dominion of the latter. During the continental war, England took possession of several of the islands, and at the peace of 1815, the septinsular union was placed under the protection of Great Britain, with whom they have since remained. For ample details of the Ionian Isles, see [*History of the British Colonies* vol. v., and *Colonial Library* vol. vii.]

III. The seat of Government of the septinsular union is situate at Corfu, in the parallel of 39.30 north latitude, and the meridian of 19.50 east longitude, is situate a little to the eastward of the mouth of the Adriatic; the capital being distant from Otranto about 30 leagues, and 200 from Venice. It stretches from north to south in the form of a semicircle. On the north and west it is bounded by the Mediterranean, and on the north and east by the channel which separates it from Albania, or the ancient Epirus. This channel, which runs nearly south-east and north-west, is about twenty-one geographical miles in length; at its narrowest or northerly entrance, at Cape Karagol, it is not two miles across; at the southerly, between Cape Bianco and Gomenizza, it is about seven miles broad; and at its widest part, in the neighbourhood of the town of Corfu, it does not much exceed ten miles in breadth. The depth of the water in the deepest parts, varies from 40 to 50 fathoms.

The length of the island of Corfu, is about thirty-five geographical miles; its breadth, at the north-eastern extremity, about twelve: from whence it gradually lessens until it terminates in its most southerly point or Cape Bianco.

IV. The mountains of Corfu are composed chiefly of a compact limestone, destitute of any organic remains, but with occasional strata of flint, precisely similar to the Albanian mountains. In some places carbonate of lime alternates with strata of vegetable earth; and it is often met with, tinged with the oxide of iron, and presenting on its surface, when fractured, beautiful arborescences. Fibrous, crystallized, and granular gypsum abounds principally, disseminated in argillaceous deposits: breccia in immense masses, either purely calcareous or with a mixture of siliceous, is to be met in various parts of the island; in some spots carbonate of lime is mixed with nodules of sulphur, or with coarse jasper: and Dr. Benza, in one spot, found the rare mineral, dolomite. There is a quarry of white marble under the western peak of St. Salvador, of a very fine grain, and well adapted to statuary; and variegated marble is found in small masses widely scattered. The substance known on the Continent as alabaster of Corfu, is a fine gypsum. The lesser hills consist mostly of an argillaceous soil, mixed with lime: the substratum to all the low and cultivated lands in the island is principally a stiff tenacious clay, very retentive of moisture, and extremely productive.

The island is not apparently of volcanic production, but would appear to have been separated from the main land by some violent convulsion of nature. Earthquakes, however, are not uncommon at Corfu, and are supposed to originate in the island itself, and not to be shocks in relation to other earthquakes; they generally run from north-west to south-east, and are slight; but in 1745, one shock was so severe as to destroy the palace, bishop's house, and many other buildings. In May, 1819, a severe shock in the interior of the island stopped a copious spring. The great earthquake which not long since damaged Santa Maura and Zante, was not felt at Corfu.

V. The climate of Corfu is nearly tropical, and the animal sensations are influenced more by the winds than by the alternations of the mercury, in the thermometer. On an average of four years, the thermometer ranged from 44.0 to 91.0; the general annual average of rainy days for the four years being 96½. It appears that there is not a month in the year in which rain does not fall for a greater or less number of days, but November and December, February and March, are the most rainy.

Snow very seldom falls in the island, and when it does it soon melts. Sometimes the summit of St. Salvador is covered in patches, which continues for ten or twelve days. On the Albanian mountains the snow begins to fall, generally speaking, about the end of November, and continues till May.

Fevers, especially of the remittent and intermittent types, are of frequent occurrence, and form nearly two-fifths of the total admissions into the hospitals.

with a taste like tar-water, and it is prescribed in various dispeptic complaints. The pitch is collected with large snoods into a pit adjoining the well, and thence thro... into barrels. The best time for gathering it is summer, when it is exuded in the greatest quantities; and they annually fill about 100 barrels, which is used for smearing the bottoms of ships and similar purposes.

There are many instances of longevity among the Zantiotes, and several inhabitants are known to be above 90 years of age, in the full possession of all their faculties.

Zante abounds in aromatic herbs, the odour of which is experienced some distance at sea; and the delicious flavour of the Zantiote honey is doubtless owing to the fragrance of the herbage. Currants, oil, wine, and flax are the principal vegetable products.

Santa Maura Island (olim Neritos, then Leucadia, from λευκος, white, owing to its white rocks) formed by the artificial construction of a channel dividing it from the mainland of Acarnania, with Cephalonia 10 miles to the southward, and Corfu 35 to the north-west, is situate in 38.40. north lat., and 20.46. east of Greenwich, having an area of 180 square miles; in extreme length 23, in extreme breadth 10, and about 60 miles in circumference.

Santa Maura is a mass of mountains, of which St. Elias, the highest, rises to an elevation of 3,000 feet above the level of the sea. The figure of the island is somewhat triangular; the north-west coast, which forms the base line, runs straight and perpendicular, raising the land to a considerable height above the level of the sea; from this the surface inclines irregularly towards the eastern coast, giving the whole nearly an eastern aspect. A part, however, considerable in population and productiveness, although of small extent, owing to its narrowness, enjoys a fine western aspect.

Amaxichi, the chief town, about a mile in circumference, is situate on a very beautiful plain two miles long, one broad, and thickly covered with olives, and contains upwards of 6,000 inhabitants, the remaining being scattered among 32 villages, some of them situate on the very tops of the mountains.

Ithaca (called *Thiaki* by the natives, *Val de Compare* by the Venetians), in lat. 38.25. north, long. 20.40. east, is bounded on the south and east by Cephalonia, from which it is distant about eight miles; on the east and north-east by the channel of Zante, and a group of small islands, the ancient Echinades; on the north by a part of Santa Maura; and on the north-west, west and south-west by the channel which runs between Santa Maura and Cephalonia. It is distant from the main land of Acarnania about 15 miles at the nearest point, and somewhat more than 30 miles distant, in a south-east direction, lies the opening of the gulph of Lepanto. The shape is irregular, the extreme length from north to south being 18 miles, extreme breadth, five, but in some places not more than one mile and a half; its circumference about 30, and its area 44 square miles.

The appearance of Ithaca is unprepossessing, the whole island being a mass of mountains running in an irregular ridge east and west; or it may be considered a single mountain divided into rugged and mis-shapen rocks.

Vathi is little more than a single street, upwards of a mile long, containing from 3 to 4,000 inhabitants; the houses built of stone, and the town remarkable for its cleanliness and health.

Paxo, another of the Ionian islands, in lat. 39.12. south, long. 20.12. east, with an area of 27 square miles, and 12 in circumference, is of an oval shape, and composed of a single mountain, which probably at one period, formed part of Corfu, from the southernmost point of which it is only seven miles distant. Port Gai affords good anchorage for a few vessels; but there is an inner harbour formed by an island almost in contact with the other, having a circular battery commanding the town, which is scattered in an irregular manner on the beach.

Cerigo is the most southern island of the Septinsular Union, situate in lat. 36.6. north, long. 22.50. east, at the entrance of the Archipelago: to the north of Canea, and south of the Morea; five miles distant south from Servi, and 14 east-south-east of Cape Malio. The area is 116 square miles, the extreme length 20, the extreme breadth 12, and the circumference about 50. The island was anciently known (according to Pliny) by the name of Porphyris, from its possessing abundance of that beautiful marble. Ptolemy attributes the name of Cythera to Cytherus the son of Phoenix, who established himself in the island. According to some, Cerigo was first peopled by the Lacedemonians, who in the eighth year of the Peloponnesian war were expelled by the Athenians under the command of Nicias. At a subsequent period it passed under the dominion of the Spartan republic, and served as a retreat to Cleomenes, who on the approach of Antigonus, king of Macedonia, took refuge in the island. Ptolemy, king of Egypt, was afterwards lord of Cerigo; the Romans next came in possession, then the Venetians, and it followed the fate of the other islands of the Union. The relics extant denote the former greatness of the place; "Pelo Castro" ruin, to the northward of the harbour, stands on the ancient town of Menelaus, whose faithless wife Helen caused the siege of Troy, and whose bath is still shewn. Six miles from the harbour of St. Nicholas, on the east, was situate the former city of Cythera; and a little further to the south are situate some ruins, supposed to belong to a temple dedicated to Venus Cytheræa.

The island is oval-shaped: at the north is Cape Sparti, having a chapel on its extremity: to the south is Cape Kapello, close to which is situate the harbour, and immediately above the chief town called Kapsali, and containing about 5,000 inhabitants, whose tenements offer a marked contrast to the other islanders', being mostly of wood, and ill constructed.

VI. We have no early censuses; according to the Colonial Office Returns, the following shews the—

Population of the Ionian Islands since 1824.

* Included in the total number of population.

It will be seen from the foregoing, that the present population of Corfu is upwards of 65,000, from which it would appear that the number of inhabitants within the present century is on the increase, as shewn by the following census, taken in November 1802 :—

Within the Town.

Men, Women and Children of the Greek persuasion, 4,700; do. do. Latin, 1,600; do. do. Jewish, 1,229; total within the town, 7,529; in the suburbs of St. Rocco, 508; do. Manduchio, do. do. 1,829; do. Potamo, do. do. 2,192; do. Castrades, 2,160; total in the town and suburbs, 14,218; population in the 24 midland villages, 7,706; do. 44 northern, do. do. 12,660; do. 34 southern, do. do. 5,169; do. Island of Fano and Merice, do. do. 773; total population, 44,926.

The classification of the inhabitants in the town was as follows, according to the same census :—

Section.	Proprietors.				Number of Proprietors.	Servants.	Indigent People.	Children.
	Rich.	Middle Class.	Lower Class.	Poor.

In all ..	170	302	1152	2975	4599	429	588	1913

A curious table of the Roman Catholic inhabitants of the city of Corfu, for 51 years, viz. from 1770 to 1820, inclusive, was prepared by Dr. Benza, and the following is an abstract of a voluminous series of reports :—Years, 51; Born—males, 3,071; females, 2,750; total, 5,821. Dead—males, 5,109; females, 3,217; total, 8,326. Died more than 90 years old—males, 35; females, 36. Died more than 100 years old—males, 5; females, 3. Born twins and more, 44. Marriages, 2,235. So that the marriages were to chil-

dren born nearly as 1 to 2½, and twins stand to marriages as 1 to 50, and to births as 1 to 132.

The deaths in this table bear no proportion to the marriages and births. They exceed the latter by 2,505.

The Ionians partake in some general features of the Greek physical configuration. The upper and front parts of the skull are well developed; the features are, in general, pleasing, and wear an air of intelligence. The complexion, in healthy persons, inclines towards olive; and in some of the females, who are not exposed to the sun, it is clear and white. The complexion of the peasantry is, of course, much affected by the sun. Those who reside in the Lefchimo district in particular, and in the neighbourhood of marshes, in general have a sickly leucophlegmatic cast. The eyes are almost universally brilliant and full, in both sexes, and generally dark-coloured; the teeth good; the hair generally brown or black, and bushy in the men; the beard copious; the figure of the middle standard—sometimes beyond it,—and, if not indicative of strength, promising activity. The constitution sanguineo-choleric; the gestures vivacious; the gait erect and elastic, and the enunciation voluble and emphatic. (See *Colonial Library*, vol. vii.)

The females, are, in general, well formed, many of them handsome, but they soon fall into years.

VII. The Greek Church is the predominant faith of the islanders, the followers of the Latin or Romish faith being few, probably not exceeding 3,000; of Jews there are about 5,000 in the island, all of whom are cordially hated by the Corfiots. The Romish Church was introduced into the island by the Venetians, and at first was only a bishoprick, but Pope Gregory, in 1600, elevated the see to an archbishoprick; the chief being generally a noble Venetian, chosen by the Senate, whose nomination was attended to by the Pope. The cathedral has a chapter composed of six canons, who elect a grand vicar. The clergy of the Latin Church were heretofore paid by government stipends, but excepting life interests, this system has been now discontinued.

The Greek Church has for its head a protopapa (archpriest), elected by ballot in an assembly of the clergy and nobles, and confirmed by the patriarch at Constantinople. [For a description of the rites

In the Island of Corfu there is a dissenting preacher, of the Independent denomination.

VIII. At Corfu there is a public university, also an ecclesiastical seminary for the education of young men intended for the priesthood of the Greek Church; and in each of the islands of the state is a school entitled "secondary," maintained at the public expense, in which secondary schools the scholars are instructed in the Greek and Latin classics, in the modern Greek, English, and Italian languages, in arithmetic, and the elementary mathematics.

In the chief town of each island is a central school, likewise at the government expense, on the mutual instruction plan, for teaching reading, writing, and arithmetic; and in these schools the village schoolmasters are trained in the method of mutual instruction. Besides these schools entirely at the public expense, there are in each island district schools on the same plan as the central, and where similar instruction is given; one half of the salaries of teachers being paid by Government, and every other expense defrayed out of the subscriptions from the parents of the children.

The district and village schools are under the immediate superintendence of the head master of the central school in each island, and there is an inspector-general of all these schools.

The whole of the establishment for education is under the general direction of the commission for public instruction, revised and improved by Lord Nugent. The number of public schools in the islands, in 1834, was 32, and of private 206; the expenditure of Government 6,171*l.* The male scholars in public schools, 1789; of females, 117. Ditto in private schools, males, 4,583; females, 826. Total in all, 7,315. For details see Hist. of the Colonies, vol. v.

Libraries.—A collection of books, originally founded at Messina, in 1810, by British officers, and transferred to Corfu by them, has, since that period, gradually increased into a very respectable library of several thousand volumes, containing many valuable and well-selected books, to which a very ready access is at all times afforded. All military and naval officers, officers of the civil departments, British residents, and respectable inhabitants, may become members at a moderate entrance, and a small annual or monthly subscription.

Besides this library, the medical officers of the garrison have a collection of English periodical publications and standard works.

A small library was founded by the Canon Carale, from voluntary subscriptions among the nobility, &c. The books were lodged in the Franciscan Convent of St. Giustina: to this the Ionian Academy added theirs; but on the arrival of the French, the most valuable of the books were abstracted by them. Some few remain at the convent.

A Bible Society was instituted in the summer of 1819, for the purpose of distributing the translations of the Scriptures into the Greek language, without note or comment, and there can be no doubt that much good will be derived from it by the islanders, for whose benefit it is intended.

The goals seem to be well managed; wherever the localities will admit, the debtors are separated from the felons; the cost for each prisoner is about 5*d.* per diem; the average of hard labour is nine hours per diem, regulated according to the season. In Cephalonia those who work at the hand corn mills receive half of their earnings, the gaoler one quarter, and the remainder is paid into the police chest. The prisoners are supplied with coarse clothing.

X. The civil government is now composed of a legislative assembly; of a senate; and of a judicial authority. The *Legislative Assembly* consists of forty members, including the president: of the forty, eleven are integral members, and twenty-nine elected from the various islands in the following proportion: Corfu, seven; Cephalonia, seven; Zante, seven; Santa Maura, four; Ithaca, one; Cerigo, one; Paxo, one. Each of the three last in the rotation in which they stand (exclusive of that island whose regent becomes an integral member of the legislative assembly) elects a second. The members are elected (on a double list formed by a majority of the votes of the primary council) out of the body of the syndita of each island. [Chap. iii. Art. 8. Constitutional Charter, Appendix.]

The elections, and all civil appointments, are valid for five years; and the session of the parliament of the states is held every two years.

The votes are *virid voce*, and the sittings open; ten members, and the president, or vice president, constitute a legal meeting; and conferences with the senate, &c. are managed by the eleven integral members of the assembly, who form, with their president, the primary council. These eleven integral members in the case of parliament dying a natural death (that is, having run its full course of five years), consist of the president and five members of the old senate; the four regents of the great island during the late parliament; and of one of the regents of the smaller islands; but in case of a dissolution, instead of the regents, the lord high commissioner names five members of the late legislative assembly.

The *Senate*, which forms the executive power, is composed of six, viz. five, and a president, entitled "His Highness;" while the senators are styled the "Most Illustrious" (*Prestantissima*); the senators are elected out of the body of the legislative assembly in the following proportion, viz. Corfu, one; Cephalonia, one; Zante, one; Santa Maura, one; Ithaca, Cerigo and Paxo, one. The power of placing a member of the assembly in nomination for a senator

rests with the president, on an application being made to him in writing, signed by four members of that body and himself, demanding such nomination; and the president shall place in nomination any person when eight members make a demand; the election takes place three days at furthest after the meeting of the assembly, and is decided by the majority of votes, the president casting in case of an equality. The sanction of the lord high commissioner is necessary to the validity of the election. The vacancies thus caused by the election of five members of the assembly to the senatorship are filled up by the transmission of double lists of names from the primary council to the syndita of each island. The senate remain in office five years; his highness, the president, half that period, eligible however to be re-appointed by the lord high commissioner. The senate names its own ministerial officers, with several exceptions, and it has the power of nominating to all situations under the *general* government; the regents to the different local governments; the judges in all the islands; and generally to all situations, except merely municipal ones, with certain renovations. During the recess of parliament the senate has the power of making regulations which have pro tempore the force of laws; it has the power of originating laws, as well as disallowing any passed by the legislative assembly.

The lord high commissioner is appointed by the colonial office, and is generally a military officer; His Excellency appoints in each island a resident, or representative, of the lord high commissioner, who is a field officer of the regiments on duty in the islands. The regent, advocate, fiscal, secretary, and archivist of each island, are appointed by the senate, subject to the approbation of the lord high commissioner. The municipal administration of each island consists of five members, independent of the president (who is the regent), appointed by the syndita of each island; out of the body of the said syndita, from "lists" of names sent in to the regent by the syndita from these "lists;" and from these ten, five are selected by the Regent to form the municipal body. (See Ch. iv. Art. 9, Constitutional Charter.)

The qualifications of the syndita, or "noble electors," I have not been able to ascertain with any accuracy; I understand that some votes are hereditary, but that pursuing any trade or business is a disqualification.

To form a legal meeting one half of the syndita of each island must be present. For the other details of

this unique form of government, I refer to the Charter. For the respective powers of the assembly and senate, [See Constitutional Charter in the Appendix.]

The judicial authority in each island consists of three tribunals,—a civil, a criminal, and a commercial; and there is a court of appeal in each island: the judges being appointed by the senate, subject to the approval of the lord high commissioner. Independent of these courts, there are in each island tribunals for the trial of minor criminal offences, and for the adjudication of small civil suits; these are presided over by justices of the peace for the island, appointed by the regent of the same.

At the seat of government there is, in addition to the foregoing courts, a superior or high court of appeal denominated "the Supreme Council of Justice," and consisting of four ordinary members (judges)—two English and two Greek, and two extraordinary members, viz. the lord high commissioner, and his highness the president of the senate. For the power of the courts, see the Constitutional Charter. Trial by jury does not exist; nor are there any assessors to aid the judges. No crimes but those of murder and high treason are punishable with death,—which infliction is now rarely suffered.

The laws were partly Venetian, partly Greek;—a code has now been digested for the islands, and is much needed, particularly as regards the law of entail now abolished, and that singular enactment by which a purchaser was compelled to restore a property to a seller several years after the bargain, for the same price at which it was vended, if the vender tender the original sum; a measure that of course struck a blow at all improvement.

Military Establishment.—Article 1. The military defence of the United States of the Ionian Islands being placed in the hands of the protecting sovereign, the sole regular military establishment shall consist of the forces of His Majesty.

Article 2. Independent of the regular troops of His Majesty the protecting sovereign, there shall be established in each island a corps of militia.

Article 3. The organization of the militia of the United States of the Ionian Islands shall be left to the Commander-in-chief of the forces of the protecting sovereign within the same, subject to the approbation of the Senate, and of his Excellency the Lord High Commissioner of the protecting sovereign.

Article 4. The general charge of preserving the tranquillity of the country being immediately and directly connected with the military establishment, the high police of the United States of the Ionian Islands shall be placed under the direct management of his Excellency the Lord High Commissioner of the protecting sovereign and His Majesty's Commander-in-chief.

Article 5. No officer can be appointed to any corps of the militia of the Ionian Islands who is not a native-born subject of the same.

Article 6. His Majesty the protecting sovereign shall appoint inspectors and sub-inspectors of the militia of the Ionian Islands, who shall be either British or Ionian officers.

Article 7. The corps of the militia of each island shall be placed under the control of the inspectors or sub-inspectors of the militia appointed by His Majesty the protecting sovereign.

Article 8. The regular forces of His Majesty the protecting sovereign shall, in all instances of civil suit, be amenable to the laws of the land within the United States of the Ionian Islands.

Article 9. The regular forces of the protecting sovereign in these states shall, in respect to criminal jurisdiction, be alone subject to the martial law of His Majesty.

Article 10. The militia within these states is of course subject to the laws of the land; but when it shall have been duly organized and called out, it shall be amenable to the martial law of the protecting power, and liable by it alone, to be tried for criminal offences.

Article 11. The regular established number of His Majesty's troops for the garrison of these islands shall be considered as consisting of 3,000 men; but it shall be competent to increase or diminish that number, as H. M.'s Commander-in-chief may deem fitting.

Article 12. All expenses of quartering the regular forces of His Majesty the protecting sovereign, and, generally speaking, all military expenses of any kind to be incurred by these states, (as far as relates to the 3,000 men above named), shall be paid out of the general treasury of the same.

Articles 5 and 6 between Great Britain and Russia, &c., respecting the Ionian Islands, signed at Paris 5th November 1818:—

In order to ensure without restriction to the inhabitants of the United States of the Ionian Islands the advantages resulting from the high protection under which these states are placed, as well as for the exercise of the rights inherent in the said protection, His Britannic Majesty shall have the right to occupy the fortresses and places of those states, and to maintain garrisons in the same. The military force of the said United States shall also be under the orders of the Commander-in-chief of the troops of His Britannic Majesty.

His Britannic Majesty consents, that a particular Convention with the Government of the said United States shall regulate, according to the revenues of these states, every thing which may relate to the maintenance of the fortress already existing, as well as to the subsistence and payment of the British garrisons, and to the number of men of which they shall be composed in time of peace. The same Convention shall likewise fix the relations which are to exist between the said armed force and the Ionian Government.

The military force of the British army in the islands is about 3,300 men.

There are six barracks for the garrison at Corfu, viz. one in the citadel, one at Fort Raymond, one at Fort Neuf, and another for a small detachment at Vido Island. The barrack in the citadel is a very good stone building of four stories, including the basement story, situated at the foot of the rock on which the citadel is built, and open to the north.

Distribution of the troops in the Ionian Islands:—

XIII. Amount of Coin in Circulation.—[B. B. 1836.]—The only coinage in the States is a small currency to the amount of 11,000l. sterling; viz.—Silver quarter-shillings, 1,000l.; copper quarter-pence, 6,000l.; copper one-tenth pence, 4,000l.

The general circulating medium is in dollars, Spanish, South American and Austrian, in which description of coins mostly, the States receive for staple produce, exported to the amount of about 275,000l. sterling annually, exclusive of returns from a considerable capital employed by ship-owners in the Levant trade; remittances received for the subsistence of the troops, &c., and in Spanish dollars pay for the article bread corn alone, imported into the States from the Black Sea and in Italy, to the amount of about 170,000l. st. per annum. The quantity of bread corn grown in the islands being equal to one-fourth only of the consumption.

Since June 1825, British silver to the amount of 95,000l. sterling, has been received from England and thrown into circulation; but judging from the necessity of public duties and rents, and recent state of balances in the respective treasuries, the total amount of British silver now remaining in the States, does not exceed 20,000l. sterling; and there has been withdrawn from circulation of this description of money 75,000l. sterling for remittances to Malta, &c. by regiments returning to England, for payment of articles imported by British trading vessels, and occasionally for payments of produce of the Morea.

Coins.—[B. B. 1836.]—Gold, Spanish doubloons, subdivision of coins in circulation, $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$; Gross weight in grains troy, 416 $\frac{1}{2}$; rate established per tariff, 3l. 6s. British currency, alloy per cent. 6 2-3ds. Spanish pillared dollars, $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$, 1-16th; Gross weight

in grains troy, 416 $\frac{1}{2}$; alloy per cent. 9 $\frac{1}{2}$; rate established per tariff, 4s. 4d. Mexican, Bolivian, Peruvian, Chilean, and Rio de la Plata dollars, rate established per tariff, 4s. 4d. Imperial Austrian dollars, subdivision of coins in circulation, $\frac{1}{2}$; rate established per tariff, 4s. 2d. Venetian, St. Mark dollars, subdivision of coins in circulation, $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$; gross weight in grains troy, 432; alloy per cent. 16 $\frac{1}{2}$; rate established per tariff, 4s. 2d. Ionian currency, pieces of (rate established per tariff), 3d. Copper Ionian currency, pieces of (rate established per tariff), 1-10th. There was no paper money in 1836.

The following rates of exchange may be quoted as nearly stationary for some months past at Corfu:—London, 5l. 1-4th per dollar, at 4s. 4d.; Trieste, 2 l. 8th florins, 4s. 4d.; Venice, 6 l. 6th lire of Austria, 4s. 4d.; Ancona, 1 scudo, 4s. 4d.; Naples, 128 grains, 4s. 4d. Government bills if paid for in British currency, at the rate of 100l. for 101l. 10s. currency, when negotiated for dollars at () per dollar.

Weights as established by Act of Parliament, dated 24th May 1828.—[B. B. 1836.] The British imperial troy pound of 5,760 grains, to be the only standard of weight; 24 of such grains to be a "calco;" 20 "Caldie," an ounce; and 12 ounces a "Libbra sottile," or pound light weight for precious metals and drugs; and 7,000 of such grains a "Libbra Grossa" or "Pound great weight," equal to the English pound avoirdupois, with the parts and multiple of 16 drams an ounce, 16 ounces a pound, and 100 lbs. a Talanto.

Measures, as established by Act of Parliament, dated 24th May, 1828.—The British imperial standard yard to be the only standard measure of extension; one-

third of the said yard, a foot; one-twelfth of the said foot, an inch; five and a half such yards, a carnaço; 220 such yards, a stadio; and 1,760 such yards, a mile.

The British imperial gallon to be the only standard measure of capacity; the Chilo measure for grain to contain 8 of such gallons, or 64 dicotoli; and the Ionian barrel to contain 16 gallons, or 128 dicotoli.

In the islands of Corfu and Zante, soap to the value of about 12,000*l.* sterling is made and exported annually; also considerable quantities of common earthenware. The other manufactures of the states are silk shawls, coarse linens, coarse woollen blankets, and goat-hair carpets and sackings.

Agriculture is yet extremely rude, and the instruments of tillage as primitive probably as in the time of Ulysses. The olive is the principal product.

The vine is generally planted in the plains and valleys, and corn on the declivities of the hills. The export duties are on oil and currants 18 per cent. *ad*

val.; and 1½ per cent. *ad val.* for repair of roads, &c.; on wine, 6 do.; on soap, 8 do.; all other articles are free.

[There is a Regent at each island with 300 to 400*l.* per an. each, and styled "Most Excellent," and 4 or 5 municipal magistrates with salaries of about 100*l.* per an. each. The president is styled "His Highness," and has a salary of 1500*l.* and a house: there are 5 senators styled "Most Excellent," with 765*l.* per an. each; the Legislative Assembly of 37 members have each 108*l.* per an., and the President of the Assembly 600*l.* per an.]

CHAPTER IV.—HELGOLAND.

SECTION I.—The island of Heligoland, in the North Sea, is situated in 54. 11. N. latitude and 7. 51. E. longitude of Greenwich, and is from 24 to 26 English miles distant from the mouths of the Elbe, the Eyder, the Weser and the Jahde. It is of considerable importance to vessels bound to these rivers, not only because its church and lighthouse are an admirable beacon, but also because ships may here be supplied with experienced and licensed pilots.

II. In August 1714, the island was conquered from the Duke of Sleswick by the crown of Denmark, which retained possession of it till the 5th September, 1807, when it was occupied by the English, and in 1814 was formally ceded to Great Britain, under whose government it still continues.

III. The island, which is in the form of an acute angled triangle, is now only about one English mile in length from N. to S., one-third in breadth from E. to W., and two miles and one-third in circumference. It is certain that it was anciently of much greater extent, but there are no authentic records to determine how far it may have stretched into the sea and approached the continent.

The island consists of the upper part, called the Oberland, and the lower, or Unterland, which lies in a south-easterly direction. The height of the Oberland, at its most elevated point on the western side, is 200 feet above the level of the sea, the eastern side being lower. The island is visible at a distance of 16 and 20 miles; its first appearance is very striking,

and it increases in interest on a nearer approach. [For Geology, &c., see "*Colonial Library*," Vol. V.]

IV. The climate is mild, and resembles that of the midland counties of England, the heat and cold being tempered by the sea breezes; the air is pure and very salubrious, whence Heligoland has been much frequented by visitors from all parts of Germany, Prussia, Poland and Russia, since the erection of the baths in 1826; they are considered by physicians as the most efficacious in the North sea.

V. The number of inhabitants is 2,200; namely, 1,000 males, 1,200 females. In 1836—births, 52; marriages, 23; and deaths, 32. The population, which is increasing, is considerable for so small a spot, especially as many families have emigrated within the last 20 years from the want of employment at home. They are chiefly engaged in the fishery or navigation, and many also are brought up as pilots. There is a brewery and a distillery, and the number of mechanics and shopkeepers is commensurate to the wants of this small colony. The number of houses is 470. The Heligolanders are of Frisian origin, and speak a dialect of that language, but at church and in the school the High German alone is used. They are a tall and strong people, with handsome features and florid complexions; their habits are very simple, and their inactivity and fearfulness on shore as remarkable as their industry and daring courage at sea.

VI. There is one church, St. Nicholas, built in 1685, situated in the Upper Town, capable of containing from 700 to 800 persons; about 250 generally attend. The clergyman receives 74*l.* per annum, and has likewise a house found him, together with two pieces of ground, one 48 fathoms long and 27 broad, and the other 140 fathoms long and 13 feet broad. There is no chapel.

The junior clergyman instructs the upper class in the school; the other two classes being taught by two schoolmasters. The total number of children in the schools is about 350.

VII. There is one school, which is public, situated in the Upper Town, and contains 158 male and 162 female children. It is conducted by three masters; the head master receiving 74*l.* per annum; the second master, 30*l.* per annum; and the third master, 20*l.* per annum. The school is supported by voluntary contributions, and a fixed sum of 5*s.* 4*d.* per annum for each child, which meets the expenses.

VIII. There is a building used as a prison, situated near the top of the steps in the Upper Town, which contains four cells, but there have been no prisoners of any description this year. [B. B. 1836.]

IX. By virtue of the capitulation concluded with Admiral Russel, in 1807, the inhabitants were permitted to retain their ancient constitutions and the Danish laws, an agreement which has been strictly adhered to. The affairs of the island are administered by a governor (at present Colonel Sir Henry King, Knight of the Guelphic Order), and under him is a court composed of six municipal councillors, who are chosen from among the inhabitants. The finances and police are superintended by 16 elders, and 8 adjuncts, who with the municipal councillors constitute the government.

X. The local revenues of this island, taking one year with another, are about 160*l.* per annum. The

amount so raised is principally by granting licenses to shopkeepers, pilots, and other persons following any trade or business to enable them to carry on their respective occupations; rating each person in proportion to the extent of his business.

The expenditure of the island is about 160*l.* per annum. Its disbursements are principally for the payment of the interest of the island debt, for the erection and repairs of bulwarks, and for keeping in repair other buildings the property of the island.

Estimate of the sum which will be required to defray the expense of the Civil Establishment of Heligoland, for the period from the 1st day of April, 1838, to the 31st day of March, 1839:—

Lieut.-Governor, 500*l.*; Clerk to Lieut.-Governor, 136*l.*; two Clergymen, at 50*l.*, 100*l.*; Town Clerk, 60*l.*; Signal Man, 60*l.*; Buoy Keeper, 33*l.*; Mail Carrier, 69*l.*; Keeper of Blockhouse, 3*l.*; total, 963*l.* This estimate is for the same amount as that for the preceding year.

XI. There are eight or nine vessels of 50 or 60 tons each, which perform voyages to England, France, Norway, and the Baltic Sea; and about 60 open fishing boats of three or four tons, and small boats for the lobster fishing.

XII. Prices of produce in 1836; Beef, 3*d.* per lb.; mutton, 3*d.* per lb.; Potatoes, 1*s.* per bushel; coal, from 6*d.* to 1*s.* per lb.; tea, from 1*s.* to 5*s.* per lb.; lump sugar, from 5*d.* to 8*d.* per lb.; moist sugar, from 3*d.* to 4*d.* per lb.; coals, 1*s.* 6*d.* per bushel.

There are no manufactories, mills or works, &c. of any kind. There has been one ship built in the colony of 50 tons burthen. There are about 60 boats employed fishing for haddocks and lobsters; between 70,000 and 80,000 of the former and about 27,000 of the latter are caught annually, the whole of which are sent to Hamburg and Bremen, with the exception of 7000 or 8000 lobsters annually sent to England; value of haddocks, 3,333*l.*; value of lobsters, 675*l.*; total, 4,008*l.* There are no horses and only 6 horned cattle, 150 sheep, and 4 goats in the island.

During the system of the continental exclusion from 1807 to 1814, the possession of Heligoland was of the utmost importance to the English Government, as it enabled them to watch all the motions of the enemy in the countries lying on the coast; and gave them the command of the mouths of the rivers which permitted them to protect the commerce of British subjects with the neighbouring states, while the island at the same time served as a depot for their goods, which were offered for sale, or sent to different parts of the Continent. At present Heligoland is of great service to navigation from its conspicuous lighthouse, from the able pilots who may always be obtained there, and from the anchorage it affords to shipping. This anchorage might be converted into an excellent harbour, which would afford shelter to merchantmen and the government steam-boats which touch at this island during the winter season to deliver the mails, which at the breaking up of the ice, are always forwarded by vessels of small draught.

[A tract of about 5000 square miles on the North coast of the island of Borneo, the island of Fernando Po, Aden in the Red Sea, and Socotra island off Cape Gardafui, have not been included in the Work.]

Difference understated in Medical Returns ..																					266

This omission, added to the ratio of deaths in the preceding table, increases it to 81½ per thousand, to which must be added invalids who died at sea, or on their passage homeward; these have averaged about 14 annually, or 3½ per thousand, thus making the mortality from all causes 85 per thousand of the mean strength.

This would be a fair estimate of the ratio of mortality among this class of troops during the last 20 years, provided the strength in the medical returns had been accurately stated. But as this has, in most instances, been taken at the highest rate to which it attained in the course of the year, and not on the mean of each month, as it ought to have been, we find, by a comparison with the War Office returns, that the strength has in this way been rated, by the medical authorities, about a tenth part higher than it ought to have been; consequently the above ratio of mortality must have increased in a corresponding

in the course of the year, so that on the average every man must have been under medical treatment, for some cause or other, about once every six months and a half.

If reference be made to the proportion of admissions among troops in the United Kingdom, it will be found that there every man is under treatment about once every 13 months; consequently the cases of sickness or admissions into hospital among white troops in this command are about twice as numerous as when serving in their native country. There is, however, this marked distinction, that they are of so severe a character, that 1 in 24 proves fatal, whereas in this country only 1 death occurs out of every 67 cases treated.

The rations of the troops in the windward and leeward command during the period embraced in this report have consisted weekly of 7 lbs. of bread, 2 lbs. of fresh meat, 2 lbs. of salt beef, 27 ounces of salt pork, 9 ounces of sugar, 10 ounces of rice, 5 ounces of cocoa, and 2½ pints of peas, for which the soldier pays 5d. Prior to 1830 he was allowed a gill of rum, for which he was charged 1d. In most of the corps the soldier has but two meals; breakfast, consisting of a pint of cocoa and his ration bread, and dinner, consisting either of the fresh meat made into broth, with vegetables, or the salt meat boiled into soup, with the peas, and eaten with yams or potatoes. In some instances there is also a supper meal, but this is not common in the command.

It may be necessary to remark, that the deaths stated in the preceding table are only those which have occurred under medical treatment, or after being admitted into the hospital, leaving still to be accounted for a considerable proportion who die suddenly, or from accidental causes. The only means we have of ascertaining the number of these is by a comparison of the deaths in the preceding table with those reported annually to the War Office by the general officers in this command, and which includes the deaths from all causes.

proportion, which will make it 93½ per thousand of the strength, or, in other words, about an eleventh of the force have died annually.

From this statement, however, no definite idea can be conveyed of the insalubrity of the climate, till we compare it with the mortality which has taken place among the same class of troops in the United Kingdom. This has amounted, during a long series of years, to about 15 per thousand annually; but, during the last seven years, it has, owing to the prevalence of influenza and cholera, been about 2 per thousand higher. Thus the mortality among troops in the windward and leeward command has been six times as high as in the United Kingdom, though the extent of sickness, as shown by the number of admissions into hospital, has only been twice as great. Even this rate of mortality, high as it appears, is considerably less than during the previous 14 years, from 1803 to 1816, when it was as follows:

* This abstract is derived from a valuable report by Capt. R. M. Tulloch, 45th regt., and Dr. Marshall, made to Government in 1837.

Thus, during this period, 138 per thousand of the white troops in this command died annually, which is about one half more than on the average of the last 20 years; so that fatal as the climate still is to European troops, it appears of late years to have materially improved, particularly in Barbadoes, Trinidad, and Antigua. In this estimate we have carefully excluded the strength and deaths of the troops serving in the settlements of Surinam, Martinique, Guadaloupe, St. Eustatia, St. Martin's, Santa Cruz, and St. Thomas, which were given up by the British in 1814 and 1815, as a greater mortality occurred in these settlements, than in the others which now constitute the Windward and Leeward Command.

The extent of sickness and mortality during the last 20 years being determined, the next question is, by what diseases was it produced? With regard to those deaths not included in the medical returns, we can supply no specific details.

The proportion corporally punished in the Windward and Leeward Command has amounted, on the average of the last 20 years, to 50 per 1,000 annually. This is six times as high as in this kingdom; but the latter ratio has been taken on the average of the last seven years, during which corporal punishment has

been very much restricted; while the former extends over 20 years, during the first part of which it was very common. The following table will show that it has gradually decreased in that command, till the ratio is now as low as in this kingdom:

	1817	1818	1819	1820	1821	1822	1823	1824	1825	1826	1827	1828	1829	1830	1831	1832	1833	1834	1835	1836	Total	Avg

Black Troops and Pioneers.—In this portion of our investigation we labour under the difficulty of possessing no information regarding the mortality to which this class of men are subject in their native country, which is the only correct standard whereby we can estimate with any degree of accuracy the influence of other climates on their constitutions. So far as statistical inquiries have extended, however, there is no country, either temperate or tropical, in which the mortality among the indigenous civil inhabitants between the ages of 20 and 40 seems materially to exceed 15 per 1,000 annually; and probably there is no country where troops composed of the indigenous inhabitants are subject to a higher rate. As an instance we may mention, that among the Malta Fencibles, composed of the natives of that island, the average mortality does not exceed 9 per 1,000 annually; and among the Cape Corps, composed of the aboriginal inhabitants of Southern Africa,

it does not exceed 11 per 1,000: while among the Madras native troops it does not exceed 13, nor among those of Bengal is it more than 11 per 1,000 annually.

Now, were the climate of the West Indies as congenial to the health of the negro troops as that of their native country, it may be inferred that the mortality would not exceed that of the Indian army, which is composed of men about the same age, employed in the same description of military duty, and also in a tropical climate. In so far, then, as it exceeds that rate, it may fairly be attributed to the insalubrious influence of that climate on their constitutions.

It is by no means extraordinary that African troops should suffer as well as the whites from the climate of the West Indies, seeing that they are for the most part natives of the interior of Africa, of which the climate is probably very different: and it is well

From this table it appears that the proportion of admissions into hospital in the course of the year is rather less than in the windward and leeward command, being 1812 per thousand of the strength annually; that is, every soldier has an attack of some disease or other, twice in the course of thirteen months.

Though the extent of sickness is less than in the windward and leeward command, the mortality is much greater. The preceding table shows it to be 1213 per thousand of the strength annually, but this includes only those who died in regimental and detachment hospitals.

Black troops and Pioneers—it is to be regretted that the materials for estimating the influence of the climate of this island on the constitution of black troops are by no means so ample as in the windward and leeward command. We have already stated that in Jamaica they consist entirely of military labourers, with the exception of a small detachment of one of the West India regiments. These labourers being less under medical superintendence than regular corps, it is only when their disease begins to assume a serious, or perhaps fatal aspect, that they come into hospital; at least we are led to suppose so from the extremely low ratio of admissions, as compared with the deaths in the following table:

Thus it appears that the mortality among this class of troops in Jamaica is but 30 per thousand of the strength annually; so that the climate must be much more favourable to their health than that of the windward and leeward command, where the mortality among the negro troops was ascertained to have been 40 per thousand on the average of the same series of years.

The superior salubrity of this climate for the negro race is corroborated by the mortality of the slave population being only 25 per 1,000 of all ages, while throughout the windward and leeward command it is 31 per 1,000 of all ages. Thus, both in regard to black troops and the slave population, the mortality is about one-third less in Jamaica.

By an estimate which has been made of the mortality among this class of troops, from 1803 to 1817, it appears during that period to have averaged 49 per thousand annually; but as the garrison at Honduras was then generally included in the returns of Jamaica, this affords no accurate standard of comparison with the mortality in the above table, which refers to Jamaica alone.

From the high ratio which the deaths, in almost every instance, bear to the admissions, there can be little doubt that all the slight cases of sickness have been omitted; we therefore decline drawing any conclusions as to the relative prevalence of each class of diseases.

The following table will serve to illustrate the variable character of the climate, and the relative influence of mortality in each year, at the principal stations throughout the island of Jamaica.

Comparative view of the ratio of Mortality among the troops in each year at these subordinate stations.

The influence of the seasons on the health of the troops in this island will be best established by the totals of the admissions and deaths in each month during the whole period included in this Report, with the exception of 1828 and 1829, which, from being stated in quarterly instead of monthly periods, could not be included.

Table showing the Influence of the Seasons in producing Sickness and Mortality among the Troops in Jamaica.

Thus it appears, that the most sickly as well as most fatal period of the year extends from August to December, and that the only months comparatively healthy are March, April and May, which possess the same character throughout the West Indies, and we might add, most parts of the northern hemisphere, at least so far as the health of troops is concerned.

Prior to 1825, the number of invalids who arrived at Chatham from all the West India stations were blended together, and are thus stated:—

Years.	Total
1817	5
1818	
1819	
1820	
1821	
1822	
1823	
1824	
Total	5

As, in this those sent home, bilities contr merely require their health, a corps, it is imp conclusions. Since 1825, these two Com distinction has sent home and recovered and we are enabled that subject.

Table showing fit for Active Windward and

Total	51290	1140	22

As, in this table, no distinction is made between those sent home on account of advanced age, or disabilities contracted in the climate, and those who merely required change of air for the recovery of their health, and were afterwards sent back to their corps, it is impossible to draw from it any accurate conclusions.

Since 1825, however, the Returns of invalids from these two Commands have been kept separate, and a distinction has been made between those who were sent home and ultimately discharged, and those who recovered and rejoined their corps; by which means we are enabled to supply the following details on that subject.

Table showing the Ratio Discharged annually, as Unfit for Active Service, of White Troops in the Windward and Leeward Command.

Years.	Mean Strength of White Troops employed in Windward and Leeward Command.	Discharged totally unfit for further service.	Found fit for Garrison Duty only.	Total of both Classes.	Ratio per 1000 of Strength in both Classes.

1836	4983	55	1	56	11
Total	55530	1221	115	1336	24

The following Table shows that out of every thousand white troops there are 87 constantly ineffective from sickness in the Windward and Leeward Command, and 63 in Jamaica, though the latter is by far the most unhealthy. This peculiarity arises from four-fifths of the mortality in Jamaica being caused by fevers which rapidly terminate either in death or recovery, and only one-fifth from lingering diseases, such as those of the lungs and of the bowels; whereas in the Windward and Leeward Command, scarcely half of the deaths are caused by fever, and almost all

the others are by diseases which detain the patient long in hospital.

The deaths in the Windward and Leeward Command are exclusive of about 30 which took place among officers and clerks belonging to the Commissariat and Ordnance Staff, and have been kept dis-

gulate the modes and places in, and at which the several instalments upon such shares shall be paid, and the nature and form of the notices to be given or sent to the subscribers requiring payment thereof, and in what manner and at what time such notices shall be sent or delivered: And we do further will and declare, that it shall not be lawful for the said Corporation to commence or carry on the said business of banking under and by virtue of these presents until the sum of £1,500,000, shall have been subscribed for, and the sum of £500,000, shall have been actually paid up: And we do further declare and ordain, that all and every person and bodies politic or corporate, by and from whom any subscription shall be made and accepted, and any payment on account thereof made pursuant to the provisions herein contained for that purpose, for or towards the raising of the said capital sum of two millions of pounds sterling as aforesaid, his, her, or their successors, executors, administrators, and assigns respectively (no such subscription being for less than £100, sterling) shall have and be entitled to a share of and in the said capital or joint stock of the said corporation, in proportion to the monies which he, she, or they shall have so subscribed towards making up the same, and shall have and be entitled to a proportionable share of the profits and advantages attending the capital stock of the said corporation, and shall be admitted to be a proprietor or proprietors of and in the same: And we do further declare and ordain, that the said corporation shall cause the names and designations of the several persons who shall subscribe for or become entitled to any share of the capital stock of the said corporation, with the amount of such share, to be fairly and distinctly entered in a book or books to be kept by their clerk or secretary, and that the several persons, bodies politic or corporate, who shall subscribe for, or have or hold any share or shares of the said capital stock, shall, and they are hereby required, to pay the sum or sums of money by them respectively subscribed, at such times and places, to such persons and in such manner as shall be ordered and directed by any court of directors for the time being of the said corporation, pursuant to the provisions herein contained: And we do further declare and ordain, that whenever two or more persons shall be jointly possessed of or entitled to any share of the capital stock of the said corporation, the person whose name shall for the time being stand first in the books of the said corporation as proprietor of such share shall, for all the purposes of the said corporation, and of this our charter, be deemed and taken to be the sole owner or proprietor of such share; and that it shall be lawful for the several proprietors of the said corporation, their executors, administrators, successors, and assigns, to sell and transfer any share of the capital stock of the said corporation of which they shall respectively be possessed, or any part thereof (not being less than £100, of such stock, and being either the sum of £100, or some multiple of £100, of such stock), and that every such transfer shall be in such form and to such effect as shall be devised by the court of directors for the time being of the said corporation; and every such transfer shall be under the hand or hands of the proprietor or proprietors so transferring such stock, or of some person or persons lawfully authorized for that purpose by some writing under the hand or hands of such proprietor or proprietors underneath, which transfer the person or persons, bodies politic or corporate, to whom such transfer shall be expressed to be made, or some person by him, her, or them, lawfully authorized by writing, shall sign his, her or their name or names, signifying the acceptance of such transfer, which said transfer shall be made and entered or registered in a book to be kept by the said corporation for that purpose, and for which entry or registry a fee, to be from time to time fixed by the said court of directors, not exceeding the sum of 10s. for each such transfer, shall be paid to and for the use of the said corporation, in addition to any stamp duty which shall be payable in respect of such transfer; and that such transfer, so to be executed as aforesaid, shall effect the transfer of such stock, and shall convey the whole estate and interest therein of the person or persons so transferring, or authorizing the same to be transferred, to the person or persons, body politic or corporate, so taking or accepting the same, which person or persons, body politic or corporate, shall thereby forthwith become in all respects proprietors of the said corporation, in respect of such stock, in the place of such person so transferring the same, and that until such transfer shall be made and entered into such book in manner aforesaid, no person or persons claiming an interest in any such stock, by purchase, or otherwise, shall be deemed the proprietor thereof; and that a copy of such transfer, to be extracted from the same book wherein the same is entered, and signed by the clerk, secretary or other officer of the said corporation, duly authorized thereto, shall be sufficient evidence of every such transfer, and be admitted and received as such: Provided always, and we do further order, declare, and ordain, that after any call for money shall have been made, and become due and payable, by virtue of this our charter, no person or persons, body politic or corporate, shall sell or transfer any share in the capital stock of the said corporation until the monies called for in respect of such share shall have been paid: And whereas, in cases where the original proprietor of any share of the capital stock of the said corporation shall marry, die, become insolvent or bankrupt, it may be difficult to ascertain who is the owner or proprietor of such stock, in order to give notice of calls made on such stock in manner hereby required, or to maintain any action or actions against him or her for the recovery of the same, or for the purpose of safely paying to him or her the interest or dividend to which he or she may be entitled by virtue thereof; Now, therefore, we declare and ordain, that before any person who shall claim any part or share of the capital stock of the said corporation, or of the profits arising therefrom, in right of marriage, shall be entitled thereto, a solemn declaration in writing (in the form prescribed by the last Act, passed in the present year of our reign, for the Abolition of Oaths, in certain cases), containing a copy of the register of such marriage, may be required to be made and subscribed by a credible person, before a master extraordinary in chancery, or justice of the peace, or a judge of some court of record; and such declaration shall be transmitted to the clerk or secretary to the said corporation for the time being, who shall file the same, and make an entry thereof in the book or books which shall be kept by the said clerk or secretary for the entry of transfers of shares in the capital of the said corporation; and that before any person or persons who shall claim any part or share of the said capital stock, or of the profits arising therefrom, by virtue of any bequest or will, or in a course of administration, shall be entitled thereto, the said will, or the probate thereof, shall be produced, and shown to the said clerk or secretary, or such solemn declaration in writing as aforesaid, containing a copy of so much of such will as shall relate to the appointment of the executor or executors thereof, and the probate thereof, or of the letters of administration in case the proprietor shall have died intestate, shall be made and subscribed by the executor or executors of such will, or by the administrator or administrators of the estate and effects of such intestate (as the case may happen to be), before a master extraordinary in chancery, or a justice of the peace, or a judge of some court of record; and such declaration, when so made and subscribed, shall also be transmitted to the said clerk or secretary, who shall file and enter the same in the manner hereinbefore mentioned; provided that no bequest, clause, matter, or thing, in any such will contained, shall bind or affect the said corporation with notice of any trust or disposition of any share of the said capital stock, but the registry of every such share shall be in the name or names of the executor or executors who shall prove such will, or of the administrator or administrators of such intestate; and in all cases (other than those hereinbefore mentioned) where the right and property in any share of the said capital or joint stock shall pass from the original or other proprietor thereof to any other person or persons, body politic or corporate, by other legal means than by such a transfer or conveyance thereof as herein directed, such solemn declaration in writing as aforesaid shall be made and subscribed to by two credible persons, before a master extraordinary in chancery, or a justice of the peace, or a judge of some court of record, stating the manner in which the right and share in such property hath passed to such other person or persons, and such declaration shall be sent to the clerk or secretary of the said company, to the intent that he may, and he is hereby required to enter and register the name or names of any such proprietor or proprietors in the register book or list of proprietors of the said corporation: And we do further will and ordain, that general meetings of the proprietors of the said corporation shall from time to time be assembled, and that the first general meeting of the said proprietors shall be held on such day in the month of July 1837, and at such hour and place, in London or Middlesex, as the court of directors shall direct; and that a half-yearly general meeting of the proprietors of the said corporation shall be held on the first Monday in the month of January, and the first Monday in the month of July in every year after the year 1837, or on such other days in those two months respectively, and at such hours respectively, and at such place or places in London or Middlesex, as the said court of directors for the time being may direct; and notice of the said first general and of every other subsequent general meeting shall be given by public advertisement in two daily morning newspapers printed and circulated in London, at least 21 days before the time to be appointed for holding the same respectively, or in such other manner as the said corporation at any general meeting shall from time to time direct; provided that the failure or omission to hold any such general meeting, at the several times and in the manner prescribed by this our charter, shall not affect the validity of this our charter, nor cause the corporation hereby created to be dissolved, but that all proceedings at any general meeting which may be held in lieu or instead of the meeting so omitted to be held shall be as valid and effectual as if such last-mentioned meeting had been duly holden, and such proceedings had taken place thereat:

George Roberts, Patrick Maxwell Stewart, and Alexander Stewart, the first 13 other directors of the said corporation, in addition to the said Chairman and deputy-chairman; and that the said Samuel Gurney, Charles Marryat, and Thomas Moody, shall be the first auditors of the said corporation; and that the said chairman, deputy-chairman, and 13 other directors and auditors shall continue in their respective offices until the half-yearly general meeting to be held in the month of January 1838, and afterwards until others shall be duly elected in their stead in manner hereafter in that behalf provided, unless they or any of them shall sooner die, resign, or become disqualified as herein mentioned; and that if before the said half-yearly general meeting to be held in the said month of January 1838, there shall happen to be any vacancy or vacancies in the office of directors or auditors then the court of directors shall from time to time fill up such vacancy or vacancies so as to continue the number of directors at 15, and the number of auditors at three: And we do further order and ordain, that no proprietor shall be eligible or qualified to act as a director or auditor of the said corporation, unless he shall at the time of his election be the holder of at least £2,000, of the capital stock of the said corporation; and if any director or auditor shall at any time after his election cease to be the holder of at least £2,000, stock, such person shall thereupon immediately cease to be a director or auditor, as the case may be: And we do further order and ordain, that the remuneration to be received by the chairman, deputy-chairman, directors, and auditors for the time being for their services, shall be fixed by the proprietors assembled at the general meeting to be held in the month of July 1837, or at some subsequent half-yearly general meeting, and that any half-yearly general meeting shall from time to time have power to vary the same; and further, that with the exception of the directors and auditors hereinbefore named, and of any directors or auditors to be appointed by the court of directors previously to the half-yearly general meeting to be held in the month of January 1838, as hereinbefore is provided, all directors and auditors shall be elected at a general meeting; and further, that at each of the half-yearly general meetings to be held in the month of January, in the years 1838 and 1839 respectively, five of the directors and one of the auditors, to be respectively nominated and selected for that purpose by the court of directors, or (in default of the making such nomination and selection) by the majority of the qualified proprietors present at such half-yearly general meetings respectively, and not declining to vote, shall go out of office, and five directors and one auditor shall be elected or re-elected; provided nevertheless, that in case the five directors, or any of them, or the auditor, nominated and selected to go out of office at the meeting to be held in the month of January 1838, shall be re-elected at that meeting, such directors or auditor so re-elected as aforesaid shall not, nor shall any director or auditor elected in the place of any of such last-mentioned directors or auditors, upon any occasional vacancy as hereinbefore mentioned, be nominated or selected to go out of office at the half-yearly general meeting to be held in the month of January 1839; and further, that at the half-yearly general meeting to be held in the month of January 1840, the remaining five directors, and the remaining auditor hereinbefore appointed, or the directors or auditor (if any) elected in the place of them, or any of them, on any occasional vacancies as hereinbefore mentioned, shall go out of office, and five directors or one auditor shall be elected or re-elected; and further, that at the half-yearly general meeting to be held in the month of January 1841, and at every half-yearly general meeting to be held in the month of January in every subsequent year, the five directors and one of the auditors who, for the time being, shall have been the longest in office (reckoning from the time of the last election of each director or auditor) shall go out of office by rotation, and five directors and one auditor shall be elected or re-elected; and further, that any director or auditor for the time being going out of office shall, if in other respects duly qualified, be considered immediately, or at any time afterwards, re-eligible to supply the place vacant by the going out of office of himself or of any other director or auditor; and further, that upon any vacancy in the office of director or auditor after the half-yearly general meeting to be held in the month of January 1838, from any cause whatsoever (except that of going out by selection or rotation, as aforesaid), the same shall be filled up either at the first half-yearly general meeting which shall be held after such vacancy shall have occurred, or at a special general meeting to be called and holden for that purpose, or for that and other purposes; and further, that any person who shall, in consequence of an accidental or occasional vacancy, be appointed a director or auditor, shall be a substitute only for the person whose place he may supply, and shall be considered as having been elected at the same time, and shall continue in office only for the same period as the person whose place he may supply would have continued if he had not vacated his office before the time at which he must necessarily have gone out of office by rotation, or by such selection by the court of directors as aforesaid; and that at every general annual meeting the directors and auditors going out of office on that day shall, for all the purposes of such meeting, be considered as continuing in such their respective offices until such meeting shall break up or adjourn; and further, that no person shall, after the half-yearly general meeting to be held in the month of January 1838, be capable of being elected a director or auditor of the said corporation, unless the name of such person shall have been included in the list which the court of directors are required to cause to be posted up as hereinafter mentioned; and that not more than one candidate shall be proposed by any one proprietor: And we do further declare and ordain, that upon any vacancy which, after the general annual meeting to be held in the month of January 1838, shall happen in the office of director or auditor, from any cause whatsoever (except that of going out by selection or rotation as aforesaid), the court of directors shall, at least 30 days before the meeting at which such vacancy is to be filled up, give notice of the vacancy, by advertising the same in some daily morning newspaper, printed and circulated in London; and shall state in such advertisement, that every proprietor intending to become a candidate, or to propose some other proprietor as a candidate for the vacant office of director or auditor (as the case may be), must, within 10 days from the time when such advertisement shall be inserted, signify, by some writing under his or her hand, to be left within the same 10 days at the office of the said corporation in London or Middlesex, either his own intention to become a candidate, or the name and place of abode of the candidate intended to be proposed by him or her; and that thereupon the court of directors shall, at least 14 days before the day on which the election of such director or auditor (as the case may be) is to take place, cause the name of every candidate for the office of director or auditor, (and in every case where any such candidate shall be proposed by any other proprietor, coupled with the name of the candidate proposed by him or her), to be fairly written out or printed in one list, which shall be posted up in some conspicuous part of the office of the said corporation in London or Middlesex, and be there kept posted up until the time of the election: And we do further will and ordain, that the chairman and deputy-chairman of the corporation respectively, shall from time to time be elected from amongst themselves, by the court of Directors for the time being, and for such period as to them shall seem meet: And we do further will and ordain, that any member of the said court of directors, or any auditor, may at any time vacate his office, by sending his resignation in writing to the office of the said corporation; and in case any member of the said court, or any auditor, shall, during the continuance of his respective office, by transfer, forfeiture, bankruptcy, or otherwise, reduce the amount of stock held by him in the said company below £2,000, or otherwise shall become disqualified to be a member of the said court, or shall be removed by any general meeting as aforesaid, then, and in every such case, the office of such member of the said court, or of such auditor (as the case may be) shall instantly become vacant: And we do further will and ordain, that the court of directors of the said corporation shall meet one day in every month at the least, and at such other times as they shall think fit and proper; and any one of the said directors may at any time call a meeting of the said court, by notice in writing sent to the residence, counting-house, or office of every member of the said court, but no business shall be transacted at any meeting of the said court, unless five members shall be present; and that all questions at any court shall be decided by the votes of the majority in number of members present; and that at every court the chairman, or in his absence the deputy-chairman of the corporation, shall be chairman of such court, and in the absence of both those officers some other member of the said court shall be chosen chairman of such court, by the members present; and in case of an equal division of votes, such chairman of the court for the time being shall have the casting vote, besides his own vote; and that the proceedings of every court shall be entered in a book, to be kept for that purpose, and be signed by the member in the chair; and further, that the said court of directors shall have full power to direct, manage, superintend, regulate, and control all the affairs and concerns of the said corporation, and to appoint all the agents, officers, and servants thereof, as well in the United Kingdom of Great Britain and Ireland as abroad, and to fix their respective salaries or wages; and from time to time to remove or discharge any such agents, officers or servants, and to appoint others in their stead; and to make such rules, orders, and bye-laws for the good government of the said corporation, and of their said agents, officers, and servants, and generally for the superintendence and management of the said corporation, and from time to time to alter and repeal the said rules, orders, and regulations, or any of them, in such manner as the said court shall from time to time think expedient or proper; provided always, that all such rules, orders, and bye-laws as shall from time to time be in force shall be fairly entered and written in a book or books, to be kept for that purpose at the office of the said corporation in London or Middlesex, and open to the inspection of the said directors and other proprietors at all seasonable times: And we do further

ordain and declare, that in all cases where the provisions and regulations contained in these presents shall not be applicable to the local situation or circumstances of such subscribers or proprietors, or other holders of any share or shares in the capital of the said corporation, as are or shall be resident in or at any of the several islands and colonies hereinbefore mentioned, or elsewhere than in the United Kingdom of Great Britain and Ireland, it shall and may be lawful for the court of directors, from time to time, when and as often as occasion shall require, or they shall think fit, to make all such rules or bye-laws, regulations, and provisions relative to any such subscribers, proprietors, or holders as last aforesaid, and with regard to their respective shares and interests in the capital of the corporation, as the circumstances of the case or cases for the time being to be provided for shall, in the judgment and at the sole discretion of the court of directors, appear to demand or require; and from time to time to alter, vary, and repeal all or any of such rules, bye-laws, regulations, and provisions, and to make others in their stead: And we further will and ordain, that the court of directors shall appoint the place and hour of holding every half-yearly general meeting, and shall cause at least 21 days' notice of every half-yearly general meeting, and 14 days' notice of every adjourned general meeting which shall adjourn for a longer time than two days, to be given by advertisements in manner aforesaid; and further, that (subject at all times to the rules, orders, and directions of the general meetings of the said corporation) the said court of directors shall have full power to order and dispose of the custody of their common seal, and the use and application thereof, and execute all the powers hereby given to the said corporation; And we do further will and ordain, that the said court of directors shall have power, from time to time, to call for the amount subscribed by the several subscribers and proprietors for the time being, which amount shall be paid by the said subscribers and proprietors at such times and places, and in such sum or sums, as shall be appointed by the said court, so that no such call shall exceed the sum of £20, for every £100, subscribed; and 14 days' notice, at least, shall be given of every such call as aforesaid, by advertisements in two or more of the daily morning newspapers printed and circulated in London: And we do further will and ordain, that the respective bodies and persons who shall be proprietor or proprietors of any stock in the said corporation shall pay the sum or sums by them respectively subscribed, or such parts and proportions thereof as shall from time to time be called for by the court of directors of the said corporation, by virtue of and agreeably to the powers and directions of this charter at such times and places, and in such manner, as shall be directed by the said court; and in case any body or bodies, person or persons, being a subscriber or subscribers, or proprietor or proprietors, of any share or shares of the capital stock of the said corporation, shall neglect or refuse to pay his, her, or their rateable or proportionable part of the money called for as aforesaid, at the time and place appointed by such court, or within 30 days next ensuing, he, she, or they so neglecting or refusing shall forfeit and pay the sum of five pounds for every £1000, he, she, or they shall have subscribed or held, or be entitled to, in the capital of the said corporation. And in case such person or persons shall continue to neglect or refuse to pay his, her, or their rateable call or calls as aforesaid, for the space of two calendar months next after the time so appointed for payment thereof, then and in every such case it shall be lawful for the said court of directors (whether they shall or shall not previously have sued for the same as hereinafter mentioned, if they shall think proper) to declare that the respective shares of the capital stock of the said corporation held by the body or bodies, person or persons, so refusing or neglecting, shall be forfeited, and thereupon the said share or shares, and all the profits and benefits thereof, shall be forfeited to and become vested in the said corporation: And we do further will and ordain, that when any share of the said capital stock shall by virtue of this charter have become forfeited to or vested in the said corporation as aforesaid, then and in every such case it shall be lawful for the said corporation, or the court of directors for the time being, and they are hereby authorized and empowered, at any time thereafter to sell or cause to be sold by public auction or private contract, and by writing under the common seal of the said corporation to assign and transfer such share unto any person willing to become the purchaser thereof, his or her executors, administrators, or assigns, and such assignment and transfer shall be good, valid, and effectual against the owner of every such share, and all persons claiming under him, her, or them; provided always, that in case the money produced by the sale of any such share shall be more than sufficient to pay any such arrears, as aforesaid, and legal interest thereon, together with the penalties incurred by nonpayment and the expenses attending the sale thereof, then and in such case it shall be lawful for the court of directors for the time being, if they shall think fit so to do, but not otherwise, to pay the surplus arising from such sale to the person or persons to whom such share shall have belonged: provided also, that the said corporation shall not by virtue of this charter at any time or times sell or transfer, or direct to be sold or transferred, any more of the stock of such defaulter or defaulters than shall be sufficient, as near as may be, at the time of such sale, to pay the arrears due from such defaulter or defaulters, for or on account of such call or calls, and the interest, penalties, and expenses attending the same; and from and after the payment of every call or calls to be made by virtue of this charter, and the interest, penalties, and expenses as aforesaid, any stock vested in the said corporation as aforesaid which shall remain in their hands unsold, shall revert to and again become the property of the person or persons, body or bodies politic or corporate, to whom such stock shall have before belonged, in such manner as if such calls had been duly and regularly paid; so, nevertheless, that nothing in this proviso contained shall be deemed or construed to compel the said corporation to sell any fractional part of the said stock: Provided always, and we do further will and ordain, that in case any person or persons, body politic or corporate, who shall have subscribed for or be entitled to any share or shares in the capital of the said corporation, shall neglect or refuse to pay his, her, or their rateable or proportionable part of any sum of money to be called for at the time and place and in the manner to be directed for that purpose by the said court of directors as aforesaid, the said corporation are hereby empowered to sue for and recover the same in any of our courts of law or equity whatsoever: And we do further will and ordain, that if any deceased subscriber or subscribers, proprietor or proprietors, shall not have left assets sufficient, or in case the executor or executors, administrator or administrators, trustee or trustees, committee or committees, guardian or guardians, shall refuse or neglect to answer such call for the space of three calendar months next after notice thereof, by advertisement as aforesaid, shall have been given of such call, the said corporation shall be, and they are hereby authorized and required to admit any other person or persons to be a proprietor or proprietors of the stock of such deceased proprietor or proprietors, on condition that he, she, or they so admitted do and shall, on or before such admission, pay to the executor or executors, administrator or administrators of such deceased proprietor or proprietors, or to the trustee or trustees, committee or committees, guardian or guardians of the infant or infants, or other person or persons who may be entitled to his, her, or their effects, the full sum or sums of money which shall have been paid by such proprietor or proprietors, in his, her, or their lifetime, by virtue of any call or calls or otherwise, upon such stock, or such other sum or sums of money as the same can be sold for; and in case no person or persons shall be found who is or are willing to be admitted upon such condition as aforesaid, then and in every such case such share or shares shall be forfeited to and become vested in the said corporation: And we do further, for us, our heirs, and successors, grant unto the said Colonial Bank and their successors, and we do will and direct and appoint, that it shall and may be lawful for the said corporation, for the period of 20 years, commencing from the 1st day of May 1836, to carry on the business of bankers, by dealing in bullion, money, and bills of exchange, and lending money on commercial paper and Government securities, and in such other lawful ways and means as are usually practised among bankers; but it shall not be lawful for the said corporation to lend or advance money on the security of lands, houses, or tenements, or upon ships; nor to deal in goods, wares, or merchandize of any nature or kind whatsoever: And we do further will and ordain, that it shall and may be lawful to and for the said corporation, during the same period, to establish one or more principal bank or banks in the islands of Jamaica and Barbadoes, and in such other islands or places in the West Indies and British Guiana, as by them shall be considered expedient, with such branches or agencies as from time to time may be found convenient; and at and from such principal bank or banks, branches, and agencies, or any of them, to make, issue, and circulate notes, payable in dollars to bearer on demand, or otherwise, provided that no such note shall be issued for less than the sum of five dollars; and provided that all such notes be made payable in dollars of acknowledged weight and fineness to bearer, on demand, as well at such principal bank or banks, and every of them (if more than one of such principal banks shall be established), as at the branch or agency from which the same shall have issued; and provided also, that the said corporation shall not discount any bills of exchange, promissory notes, or other negotiable paper, on which the name of any director or officer of the said corporation shall appear as drawer, acceptor, or indorser to an amount exceeding one-third of the whole amount of the sum for the time being under discount by the said corporation: And we do further ordain and declare, that it shall be lawful for the said corporation, notwithstanding the Statutes of Mortmain, or any other statutes or laws, or anything herein contained to the contrary thereof, to purchase, take, hold, and enjoy, to them and their successors, as well in the United Kingdom of Great Britain and Ireland as in any of the said islands

and colonies hereinbefore mentioned or referred to, such houses, offices, buildings, lands, and other hereditaments, and also such ships and vessels as shall or may from time to time be actually and *bona fide* necessary and proper for the purpose of managing, conducting, and carrying on the affairs, concerns, and business of the said corporation, but not for any other purposes, nor so as to be in any manner made instrumental for the purposes of speculation; and to sell, convey, and dispose of the same respectively when not wanted for the purpose of their said business: And we do hereby grant unto all and every person and persons, and bodies politic or corporate, who are or shall be otherwise competent, our especial licence and authority to grant, sell, alien, and convey in mortmain unto and to the use of the said corporation and their successors, any such houses, offices, buildings, lands, and other hereditaments, and any such ships or vessels whatsoever as aforesaid accordingly: And we do further will and declare, that these presents are upon this express condition, that if the said corporation shall become insolvent, all and every the proprietors for the time being of any interest or share in the capital thereof, shall be liable to be called on to contribute to the payment of the debts and liabilities of the said corporation, to the full amount of all the stock held by them in the said corporation, although the same shall not have been theretofore called for and paid up; and that all the powers, privileges, and authorities hereby given shall utterly cease and be void, in the event of the said corporation suspending cash payments, in manner hereinbefore provided, for the space of 60 days, whether such suspension shall take place at any principal or branch bank; and further, that the said corporation shall be bound to make up and publish, in some newspaper or newspapers circulating in each of the colonies in which a bank shall be established, and also in the London Gazette, once in every year, an account or statement showing the whole amount of its debts and assets at the close of the past year, and showing also, the amount of its notes, payable on demand, which had been in circulation during every month of such year, together with the amount of specie, distinguishing each kind, and other assets immediately available in every such month for the discharge of such notes; and that the said corporation shall furnish copies of such yearly account or statement to the respective Governors of each island or colony in which a principal bank or branch shall be established; and further, that the said corporation shall not become purchasers of any of the capital stock of the said corporation: And we do further will and ordain, that on the determination of the said term of 20 years, the business so to be carried on by the said corporation shall cease, and the debts and engagements thereof shall be liquidated and discharged, and the assets and property thereof, sold, disposed of, and converted into money, and the surplus divided amongst the proprietors, according to their shares and interests in the capital thereof. And we do, for us, our heirs and successors, grant and declare, that these our letters patent, or the inrolment thereof, shall be in and by all things valid and effectual in the law, according to the true intent and meaning of the same, and shall be recognised as valid and effectual by all our courts and Judges in our United Kingdom of Great Britain and Ireland, and by the respective Governors and courts of judicature of and in our said islands and colonies, and all other officers, persons, and bodies politic or corporate, whom it doth, shall, or may concern; and that the same shall be taken, construed, and adjudged in the most favourable and beneficial sense, and for the best advantage of the said corporation, as well in our several courts of record in our United Kingdom of Great Britain and Ireland, and in our several islands and colonies aforesaid, as elsewhere, notwithstanding any non-recital, misrecital, uncertainty, or imperfection in these our letters patent. And we do hereby require and enjoin the respective Governors of our said several islands and colonies, for the time being, to give full force and effect to these our letters, patent, and to be in all things aiding and assisting to the said corporation and their successors. In witness, &c. Witness, &c. the 1st day of June.

By Writ of Privy Seal.

A A.—VALUE OF DOUBLOON AND SPANISH DOLLAR. (BY THE QUEEN, A PROCLAMATION.)

WHEREAS the coin current in our West India Colonies, including our Province of British Guiana, consisting partly of the current coin of the United Kingdom, and partly of Spanish, Mexican, and Columbian gold coin, called Doubloons, and of Spanish, Mexican, and Columbian silver coin, called Dollars; and it is expedient that the rate at which the said Doubloons and Dollars shall circulate in our said Colonies should be ascertained and fixed. Now therefore, we, by the advice of our Privy Council, have thought fit to declare and ordain, and, by the advice aforesaid, we do hereby declare and ordain, that throughout the whole of our said Colonies the said Doubloon shall circulate and be received in payment as being of the full value of Sixty-four Shillings sterling, current money of the United Kingdom, and the said Dollar shall circulate and be received in payment as being of the full value of Four Shillings and Two Pence sterling, like current money of the United Kingdom. And in all payments to be made in any of our said Colonies, tender of payment in Doubloons and Dollars, or either of them, at the rate aforesaid, shall be deemed and taken to be a lawful tender, in the same manner as if such tender had been made in the current coin of the United Kingdom.

Given at our Court at Windsor, this Fourteenth Day of September, One Thousand Eight Hundred and Thirty-eight, and in the Second Year of our reign. God save the Queen.

[By an Order in Council of the 7th Sept. 1838, the authorized circulation of the Spanish dollar at 4s. 4d. was disannulled.]

A.—BANK OF BRITISH GUIANA.

Ordinance by His Excellency Major-General Sir James Carmichael Smyth, C. B. &c. Governor of British Guiana, &c. &c. by and with the advice and consent of the Honourable Court of Policy of the said Colony.

To all to whom these Presents do, may, or shall come, Greeting! be it known:

WHEREAS the several persons hereinafter named, presented to His Excellency the Lieutenant-Governor and the Honourable the Court of Policy, their humble petition setting forth that a numerous and respectable portion of this community having taken into consideration the great advantage likely to result to the colony at large, from the establishment of a local bank in British Guiana, had subscribed the deed of settlement of articles of co-partnership, and a meeting of the subscribers held on the 5th October of the present year (1836), had elected the said petitioners directors for the Government of the Company, and for the purpose of petitioning for the enactment of an Act of Incorporation founded on the said deed of settlement; and praying that an ordinance may be enacted, sanctioning the establishment of the British Guiana Bank, and conferring on the same the rights and privileges necessary to carry into effect the provisions in the said deed of settlement: And whereas the establishment of such a body corporate, has been represented by the said petitioners as likely to be highly advantageous to the community at large:—

1. Be it therefore enacted, by His Excellency the Lieutenant-Governor, by and with the advice and consent of the Court of Policy of British Guiana. That John Croal, John Grosfort Reed, Charles Benjamin, William Johnston, Alexander Glen, John Lane, Ellis John Troughton, Junr., Abraham Garnett, and James Archibald Holmes, Esquires, or such of them as shall become subscribers of not less than fourteen thousand guilders each, towards the capital, or joint stock, hereinafter mentioned, in the manner hereinafter provided, together with such and so many other persons, bodies politic or corporate, as shall become subscribers of or towards the capital, or joint stock, hereinafter mentioned, in manner hereinafter provided; and such other persons bodies politic, or corporate, as shall from time to time in the manner hereafter provided, become proprietors of any part of such capital, or joint stock, (not being a fractional part of seven hundred guilders of such stock,) shall be one body politic and corporate, in deed and in name, by the name of "The British Guiana Bank," and by that name shall and may sue and be sued, impleaded and be impleaded in all courts, whether of law or Equity, and shall have perpetual succession with a common seal which may be by them changed or varied at their pleasure: and service of process upon the chairman, or any of the directors of the said bank, shall be deemed and adjudged to be good and sufficient service.

2. And be it further enacted by the authority aforesaid, that the said corporation shall be established for the purpose of carrying on the business of a banker in British Guiana, subject nevertheless, to such restrictions and provisions as are hereinafter contained.

3. And be it further enacted as aforesaid, that the capital, or joint stock of this corporation, shall consist in the first instance of the sum of four million two hundred thousand guilders, to be subscribed in six thousand shares of seven hundred guilders each; and that so soon as the said sum of four millions two hundred thousand guilders shall have been paid up, and not before, the said capital or joint stock, shall or may be increased and raised to the sum of seven million guilders, by adding to the original sum the further sum of two million eight hundred thousand guilders, to be subscribed in four thousand shares of seven hundred guilders each, provided such increase be deemed advisable by the corporation, and be sanctioned by the votes of two-thirds at least of the proprietors of the original capital, or joint stock, present either in person or by proxy, at a general meeting convened expressly for the purpose of deliberating on such increase. The votes on this question either in person or by proxy, to be given as in all other cases in the manner hereinafter provided.

4. And be it further enacted as aforesaid, that books shall be opened for taking subscriptions to the said capital or joint stock, and that of the said original capital or joint stock of four million two hundred thousand guilders, the sum of two million eight hundred thousand guilders shall be apportioned to subscribers resident in British Guiana; and the sum of fourteen hundred thousand guilders to persons connected with the said colony, or with the said corporation, as agents, resident elsewhere. But if the said sum of fourteen hundred thousand guilders be not subscribed for by persons connected with the colony or with the said corporation as agents, resident elsewhere, within four months from this date, the remaining shares of the original capital shall be apportioned and distributed as may hereafter be agreed on at a general meeting of the shareholders. And should it be decided to increase the capital or joint stock of this corporation as herein-before mentioned, the new shares shall be apportioned and distributed as may be decided upon in like manner: Provided, however, that no individual or company, or body corporate, shall hold at any time more than two hundred shares of the capital or joint stock of the said corporation.

5. And be it further enacted, that the modes and times in and at which the several instalments upon the shares shall be paid, and the nature and form of the notices to be given requiring payment thereof; and also the form of receipts for payments, and the nature and form of notices for meetings shall be regulated and determined by the directors appointed, or to be appointed as hereinafter mentioned.

6. And be it further enacted, that it shall not be lawful for the said corporation to commence or carry on the said business of banking under and by virtue of these presents, until the sum of two million one hundred thousand guilders shall have been subscribed for, and four hundred and twenty thousand guilders actually paid up. Provided always, that by the 31st December, 1837, three fourths of the capital of the company shall be subscribed for, and not less than one million two hundred and sixty thousand guilders be paid up.

7. And be it further enacted, that no person who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

8. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

9. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

10. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

11. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

12. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

13. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

14. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

15. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

16. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

17. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

18. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

19. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

20. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

21. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

22. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

23. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

24. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

25. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

26. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

27. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

28. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

29. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

30. And be it further enacted, that no persons who shall hereinafter contain should the said millions of guilders of and in the said subscribed advantages attain in the same.

7. And be it further enacted as aforesaid, that all and every person and persons, bodies politic or corporate, by and from whom any subscription shall be made and accepted, and any payment on account thereof made pursuant to the provisions herein contained for that purpose, for, or towards raising the said capital sum of four million two hundred thousand guilders; or, should the said capital or joint stock be increased as before mentioned, then for, or towards raising the said capital sum of seven millions of guilders, no such subscription being for less than seven hundred guilders, shall have and be entitled to a share of and in the said capital or joint stock of the said corporation, in proportion to the monies which he, she or they shall have so subscribed towards making up the same, and shall have and be entitled to a proportionable share of the profits and advantages attending the capital stock of the said corporation, and shall be admitted to be a proprietor or proprietors of and in the same.

8. And be it further enacted as aforesaid, that the said corporation shall cause the names and designations of the several persons who shall subscribe for, or become entitled to any share of the capital stock of the said corporation, with the amount of such share to be fairly and distinctly entered in a book, kept by their clerk or secretary; and that the several persons, bodies politic or corporate, who shall subscribe for, or have, or hold any share or shares of the said capital stock shall, and they are hereby required to pay the sum or sums of money by them respectively subscribed, at such times and places, to such persons, and in such manner as shall be ordered and directed by any court of directors for the time being of said corporation, pursuant to the provisions herein contained.

9. And be it further enacted, that when two or more persons are jointly entitled to any share or shares of the capital stock of the said corporation, the party whose name stands first in the book of the said corporation shall be considered to be the proprietor of the whole of such share or shares, for all the purposes of the corporation—save only as regards his eligibility to fill the office of director.

10. And be it further enacted as aforesaid, that it shall be lawful for the several proprietors of the capital or joint stock of the said corporation, to sell and transfer any shares of the said capital stock, of which they shall respectively be possessed, or any part thereof, not being less than seven hundred guilders of such stock—and being either the sum of seven hundred guilders, or some multiple of seven hundred guilders of such stock; provided such transfer be in the form hereafter to be settled by the Directors, and be signed by the party transferring, and accepted by the transferee, and registered in the Books of this Company; for which registration a fee to be fixed by the Directors, not exceeding, however, Three Guilders on each Share, shall be paid for the benefit of the Corporation: and that such transfer, when duly executed, shall convey the whole estate and interest in the Stock therein mentioned of the person or persons transferring the same, to the person or persons so taking or accepting the same, which person or persons shall thereby forthwith become, in all respects, Proprietors of the said Corporation in respect of such Stock, in the place of such persons so transferring the same; and an extract from the Register or Book of the said Corporation, signed by a Director and the Manager of the Bank for the time being shall be sufficient evidence of transfer, and be received as such: Provided always, and be it hereby further enacted, that no share of the said Capital Stock shall be transferred until Two Hundred and Eighty Guilders at least shall have been paid thereon; and that no transfer of any Share or Shares shall be permitted after a call for money is made by the Directors under this Act, until the money called for is paid thereon; and lastly, that if the party transferring be indebted to the Corporation, the Directors may refuse to register the transfer, until their debt be paid.

11. And be it further enacted as aforesaid, the General Meetings of the Proprietors of the said Corporation shall from time to time be assembled in Georgetown, and shall be there held in January and July of each year, at such time and place as the Directors may appoint; provided that advertisements thereof be inserted in the Colony newspapers Twenty one days at least previous to such Meeting; but should the Proprietors not assemble at these times, the Charter of the Company shall not thereby be affected; and it shall be lawful for the Meetings to be held at other times to be appointed by the Directors, in lieu of those here fixed: provided that due notice as above be first given of such Meeting.

12. And be it further enacted as aforesaid, that at any time it shall be lawful for the Court of Directors to call Special General Meetings, to be held in Georgetown, giving notice thereof at least Fourteen Days previously in the public papers.

13. And be it further enacted, as aforesaid, that it shall be lawful at any time for any Thirty Proprietors, holding, in the aggregate, Three Hundred Shares, or upwards, by writing under their hands left at the Bank, to require the Directors for the time being to call a Special General Meeting of the Proprietors, provided their requisition expresses the object or objects for which the Special General Meeting is required to be called; and in case the Directors shall refuse or neglect to comply with such requisition for Seven Days after the same shall have been left as aforesaid, that then a Special General Meeting may be called by such Proprietors on giving Fourteen Days' notice thereof in any one or more of the newspapers; and every such advertisement shall express the day and hour, and place in Georgetown for holding the same, as also the delivery of the requisition at the Bank, and the refusal of the Directors to call such special meeting; and shall contain the names and residence of the Proprietors signing the said requisition, and may also, if such Proprietors shall deem it expedient, express the object of such meeting; and all acts of the Proprietors at such a special general meeting shall be as valid as if the same had been done at any half-yearly general meeting of the said Corporation; provided, nevertheless, that at such special general meeting the discussion shall be strictly limited to the objects mentioned in the requisition.

14. And be it further enacted, that any General Meeting may be adjourned from time to time, but no other business shall be transacted at any adjourned Meeting than that left unfinished at the previous meeting, and if such adjournment be for more than two days, then seven days notice must be given previous to such adjourned Meeting being held.

15. And be it further enacted as aforesaid, that no business shall be transacted at any General Meeting, unless Twenty-five Proprietors, holding in the aggregate, at least, Two Hundred and Fifty Shares in the Stock of this Corporation, shall assemble and proceed to business within one hour after the time appointed for holding such Meeting.

16. And be it further enacted, that at every General Meeting of the Proprietors of the said Corporation, a Proprietor of Two Shares shall have One Vote; of Ten Shares, Two Votes; of Twenty Shares, Three Votes; of Fifty Shares, Four Votes; of Ninety Shares, Five Votes; and of One Hundred and Fifty Shares and upwards, Six Votes; and that no person holding less than Two Shares shall be entitled to any Vote, at any General Meeting of the Proprietors of the said Corporation, and further, that in the case of Proprietors, of the said Corporation, residing in the Colony ten or more miles from Georgetown, and all resident female Proprietors, such Votes may be given by proxy, provided such proxy be in the form to be hereafter prescribed by the Board of Directors, and signed by the Proprietor, and provided it be entrusted to a Shareholder in the Corporation; but no Shareholder shall by proxy represent more than Six Votes.

17. Provided always, and it is hereby further enacted, that at all future Meetings after the General Meeting in January next, no Shareholder shall be admitted to vote, either in person or by proxy, unless he shall have registered as Proprietor four months at least before the Meeting, and shall have paid up all calls for instalments, and unless he shall at the time declare that he is *bona fide* Proprietor of the Shares in virtue of which he claims to vote.

18. And be it further enacted, that at every General Meeting, all questions submitted shall be decided by a majority of votes taken by ballot; and that the Minutes of the several transactions at such Meetings shall be prepared during the progress of the business, and be signed by the Chairman of the Meeting. And further that the Chairman of the Board of Directors shall be Chairman of Meetings, or in case of his absence, then one of the Directors, or no Director being present, then any Proprietor holding Twenty Shares may be called to the Chair; and if, at any Meeting, the votes on any question be balanced, the Chairman of such Meeting shall have a casting vote, in addition to his individual votes, and votes by proxy.

19. And be it further enacted as aforesaid, that at each half-yearly Meeting, the Chairman and Directors, for the time being, shall lay over, for the inspection and consideration of the Shareholders, a full statement of the affairs of the said Corporation, signed by the proper officers, which statement the Proprietors may, if so they decide by votes of two-thirds of the number present, refer to any two of their Body as Auditors, for examination and report at an adjourned Meeting, with all necessary powers to the said Auditors to call in the Officers and Servants of the Corporation, and to employ necessary assistants to enable them to make such audit and report. And that at every such half-yearly Meeting or some adjournment thereof, a dividend or dividends shall, if recommended by the Court of Directors, be paid out of the profits of the said Corporation, unless such Meeting shall declare otherwise, but in no case shall such dividend exceed three-fourths of the apparent profit, and the remaining one-fourth shall be allowed to accumulate as a surplus fund to be disposed of as may hereafter be agreed on at a General Meeting of the Proprietors of said Corporation.

20. And for the better ordering and governing the affairs of the said Corporation, and for making and establishing a continual succession of persons to be Directors of the said Corporation; he it hereby further enacted, that there shall be from time to time constituted, in manner hereinafter mentioned, out of the Members of the said Corporation, a Chairman who shall also be a Director, and Eight other Directors, which Nine Directors or any three of them shall constitute and be called a Court of Directors, for the ordering, managing, and directing in the manner and under the provisions herein contained, the affairs of the said Corporation; and that the said JOHN CROAL shall be the first Chairman, and the said JOHN GROSCOTT REED, CHARLES BENJAMIN, WILLIAM JOHNSTON, ALEXANDER GLEN, JOHN LANE, ELLIS JOHN THROUGHTON, JUNIOR, ABRAHAM GARNETT, and JAMES ARCHIBALD HOLMES, the first Eight Directors of the said Corporation in addition to the said Chairman.

21. And be it further enacted as aforesaid, that any Member of the said Court of Directors may at any time vacate his office by sending in his resignation, in writing, to the office of the said Corporation, and that in the event of any Member of the said Court ceasing at any time to hold Twenty Shares of the Capital Stock of the said Corporation, his appointment shall instantly cease, and that in either of these cases, as also in case of the death or departure from the Colony of any of the Directors, the Court of Directors shall fill up the vacancy, and elect a person to serve for the unexpired term of service of the party who has resigned office, died, or ceased to hold the necessary amount of Stock.

22. And be it further enacted as aforesaid, that in case the conduct of any one Director shall at any time be such that his continuance in office shall appear to his Co-directors for the time being prejudicial or injurious to the interest of the Corporation, it shall be lawful for the Co-directors at a special Court to be convened for that purpose, by a majority of votes, to suspend such Director from his office, until a special General Meeting can be held, which Meeting must be forthwith summoned. And further that it shall be lawful for the Proprietors at any half-yearly or special Meeting to remove any Director or Directors, and elect in his or their room and stead any other duly qualified Proprietor, and such Director or Directors so elected, shall serve only for such period as the party in whose room he was elected would have had to serve by rotation.

23. And be it further enacted, that the remuneration to be received by the Court of Directors for the time being for their services, shall be fixed by the Shareholders from time to time, at any General Meeting, payable out of the profits of the Corporation, and such remuneration shall be apportioned among them, the said Directors, as they shall decide.

24. And be it further enacted, that the Directors above appointed shall hold office until the first General Meeting in 1838, when Six of them shall go out in rotation; and further that at the first yearly General Meeting to be held each succeeding year, the six Directors whose names stand first on the list shall go out by rotation; and further that the vacancies caused by the Directors going out in rotation shall be filled up by the Proprietors at the first General Meeting in each year from such of their Body as may own at least Twenty Shares of the Capital Stock of the said Corporation. But the Directors, whose period of service has expired, shall always be eligible to be re-elected.

25. And be it further enacted, that the Court of Directors shall choose their own Chairman, and shall meet one day at least in every week, and any one of the said Directors may at any time call a Meeting of the said Court by notice in writing, sent to the residence or office of every member of the said Court; but no business shall be transacted at any Meeting of the said Court, unless three Members shall be present, and that all questions at any Court shall be decided by the votes of the Majority in number of the Members present; and in case of an equal division of votes, the Chairman, or in his absence the Member chosen to act in his stead, shall have the casting vote; and that the proceedings of every Court shall be entered in a Book kept for that purpose, and be signed by the Member in the Chair; and further that the said Court of Directors shall have full power to Direct, Manage, Superintend, Regulate, and Controul, all the affairs and concerns of the said Corporation, and to appoint all the Agents, Officers, and Servants of the said Corporation, as well in British Guiana, or elsewhere, and at their discretion to remove them and appoint others in their stead, and from time to time to fix the remuneration to be paid to their Manager, Agent, Officers and Servants; to use and dispose of the Seal of the Corporation as they see fit, and to sign, seal and execute all necessary deeds, contracts, and agreements on behalf of the said Corporation, and to make all such rules regulations, and bye-laws, as may be necessary for the good Government of the Corporation, and the same from time to time to alter and repeal, provided always that such rules, regulations, and bye-laws, as shall from time to time be in force, be fairly entered in a Book kept for that purpose and open to the inspection of the Proprietors, and provided they be not contrary to law or repugnant to the Rules and Regulations herein set forth, and provided the same be not disallowed by the Proprietors at a subsequent General Meeting.

26. And be it further enacted, that no Director shall be permitted to vote on the propriety of refusing or authorising the advance of any money to himself or partner, or in which he is interested as principal or security; but the propriety of granting such accommodation shall be decided apart by his Co-Directors.

27. And be it further enacted, that the Court of Directors shall have power, to call for instalments on shares in such sums and at such times as they think fit; but no such call shall at any one time be for more than One Hundred and Forty Guilders, for each share of Seven Hundred Guilders, nor shall the money called for be payable until one month's previous notice thereof shall have been given in the public papers, nor shall any such subsequent call be made until two months at least after the date at which the previous call was payable.

28. And be it further enacted, that all Proprietors who neglect to pay the instalment on their shares as called for by the Directors, shall pay interest on the same from the date fixed for payment, and in addition thereto, if the same be not paid within one month thereafter, they shall be fined forty-two guilders for each share, and still, not paying within a further period of one month, the share shall be forfeited to and vested in the Corporation, but the Directors shall, nevertheless, have power to waive the forfeiture, and accept in lieu thereof a further fine of not less than Forty-Two Guilders per share.

29. And be it further enacted, that the Shares forfeited may be sold by order of the Directors, either by public or private sale, and that transfer of the same under the Seal of the Corporation, shall be good and valid: Provided always, that if there be a surplus from this sale it may be given, should the Directors see fit, to the former holder; and provided also, that no greater amount of Stock shall be forfeited and sold than what is necessary to pay the amount of arrears on the whole shares held by the party with the penalties, interest, and cost thereon due: so nevertheless, that nothing in this proviso contained, shall be construed to compel the said Corporation to sell any fractional part of Seven Hundred Guilders of the said Stock.

30. And be it further enacted, that in case any person or persons who shall have subscribed for, or be entitled to any share or shares in the Capital of the said Corporation, shall neglect or refuse to pay the instalment on his, her, or their share or shares, as called for by the Directors, the Corporation shall be entitled, if they see fit, to sue for and recover the amount called for, with the interest and penalties.

31. And be it further enacted, that in case of the death of any Shareholder, three months shall be allowed for the payment of the amount called for in respect of his Shares, and should the amount not then be paid, any other party shall be admitted to take over the Shares and make the payment, on showing that he has paid the Executor or other person properly qualified the amount already advanced on such Share.

32. And be it further enacted, that it shall and may be lawful for the said Corporation, for the period of twenty-one years, to carry on the business of Bankers, by lending money on real and personal securities, on Bonds, Bills of Exchange, Promissory Notes, Acceptances, Open Accounts, Government Security, and all other Securities whatever connected with Banking, discounting Bills of Exchange, Promissory Notes, or other Commercial Paper, buying and selling Bills of Exchange, receiving Deposits at such rate of interest as may from time to time be fixed by the Directors, not exceeding the legal rate, borrowing or taking up Money on Receipts, Bills, Promissory Notes, or other Obligations; also by Investments, Purchases, Sales or any dealings in Bullion, or Government or Public Funds of Great Britain, Navy or Exchequer Bills, or the Stock of any Chartered Company; and to enter into and carry on all other business and transactions usual in Banking Establishments; but it shall not be lawful for the Corporation to carry on any other Business or Trade whatever, nor shall anything herein contained authorize, or be construed to authorize the said Corporation to make and issue any notes payable to bearer on demand, or otherwise, for any less sum than Fifteen Guilders; provided that all such notes payable to bearer on demand, or otherwise, be made payable in legal currency at the Banking-house or Branch Banks of the said Corporation. And be it further enacted, that the amount of notes payable on demand, made and issued by the said Corporation under and in virtue of this Act, shall never, at any one period of the actual circulation of such notes, exceed the amount of Bullion in the Chest of the Corporation, and the sum belonging to the said Corporation vested, or on its way to be vested in the Public Funds of Great Britain at the same period; and further, that every six months a statement, showing the amount of notes

payable to bear of Great Britain Bank before on the Lieutenant.

33. And be it further enacted, that Branches thereof time shall be for

34. And be it further enacted, that any other property, their stead, and tion, are brought and if it need be period not exceed

payable to bearer on demand issued by the said Corporation, and the amount of money in the Chest and in the Public Funds of Great Britain belonging to the Corporation, shall be made up and sworn to by one or more of the principal Officers of the Bank before one of the Judges or the High Sheriff, and be signed by the Court of Directors, and laid before His Excellency the Lieutenant-Governor and the Court of Policy.

33. And be it further enacted, that the Principal Establishment of the said Bank shall be in Georgetown, and that Branches thereof, and Agencies may be established in New-Amsterdam and such other parts of the Colony as from time to time shall be found necessary.

34. And be it further enacted, that it shall be lawful for the said Corporation to purchase and hold lands, buildings, and any other property necessary for their affairs, and from time to time to sell and dispose of the same, and purchase others in their stead, and also, when plantations, lands, buildings, and other property belonging to persons indebted to the Corporation, are brought to Judicial Sale, it shall be lawful for the Directors, if the interest of the Corporation so require, to bid up, and if it need be, purchase in such plantations, lands, buildings, and other property, but the same shall be resold within a period not exceeding two years from the date of the purchase.

35. And be it further enacted, that if the said Corporation shall become insolvent, all and every the Proprietors, for the time being, of any interest or share in the capital thereof, shall be liable to be called on to contribute to the payment of the debts and liabilities of the said Corporation, to the full amount of all the Stock held by them in the said Corporation, and no more, although the same shall not have been theretofore called for and paid up; and that all the powers, privileges, and authorities hereby given, shall utterly cease and be void, in the event of the said Corporation suspending Cash payments, for the space of sixty days, whether such suspension shall take place at any principal or branch Bank.

36. And be it further enacted, that if, at any time, the Votes of two-thirds of the Shareholders, convened at any General Meeting, should be in favor of an application for an amendment of this Ordinance, or for an Ordinance dissolving the Company, a special general meeting shall be convened, and a day be fixed for submitting the question, whether such amendment, or such Ordinance shall, or shall not, be applied for; and in case it be then determined by two-thirds of the Votes at such meeting to make such application to the Legislature, the same shall be done with all possible expedition; and such amendment or Ordinance being sanctioned and enacted by the Legislature, the same shall be binding on the Shareholders generally.

37. And be it further enacted, that on the termination of the said term of twenty-one years the business so to be carried on by the said Corporation shall cease, and the debts and engagements thereof shall be liquidated and discharged, and the assets and property sold, disposed of, and converted into money, and the surplus divided among the proprietors according to their respective share and interest in the Capital thereof.

38. And be it further enacted and declared, that this Act of Incorporation shall be taken, construed, and adjudged in the most favourable and beneficial sense, and for the best advantage of the said Corporation, in all Courts, and by all Judges, Justices, and others; nor shall this Act of Incorporation be prejudiced or injured by any non-recital, misrecital, uncertainty, or imperfection therein.

39. Provided, however, that this Ordinance, in as far as it authorizes the circulation of Promissory Notes or other Paper payable by the said Corporation, shall not come into operation until His Majesty's sanction be obtained thereon.

Thus done and Enacted at Our Ordinary Assembly, held at the Guiana Public Buildings, George Town, Demerary, this Eleventh Day of November, One Thousand Eight Hundred and Thirty Six, and published on the Twelfth following.

By Command of the Court.

H. E. F. YOUNG, Secretary.

J. CARMICHAEL SMITH.

[The preceding document was submitted for approval to the Secretary of State for the Colonies; and the following amended ordinance was issued in conformity with instructions from England.]

AN ORDINANCE TO AMEND AN ORDINANCE ENTITLED AN ORDINANCE TO INCORPORATE A BANK TO BE CALLED THE BRITISH GUIANA BANK.

By His Excellency Colonel Thomas Bunbury, K. H., Acting Governor, &c., of British Guiana, by and with the advice and consent of the Honourable Court of Policy of said Colony.

To all to whom these presents do, may, or shall come greeting! be it known:

WHEREAS an Ordinance to incorporate a Bank to be called the British Guiana Bank was, on the 11th November, 1836, made and passed by His Excellency the Lieutenant Governor, by and with the advice and consent of the Court of Policy of British Guiana:

And whereas it has been deemed expedient by Her Majesty's Government that certain other provisions should be made therein for the better regulation and government of the said bank;

And whereas such further provisions have been communicated to the proprietors of the Capital Stock of the said Corporation at a Public Meeting of the said Proprietors, held in George-town on the Nineteenth day of February instant, and have been duly assented to by the said proprietors;

And whereas it appears from a statement furnished by the Chairman of said Corporation, and countersigned by the proper officers, that of the said Capital Stock of the said Corporation, there had been paid into the Bank the sum of One Million Five hundred and seventy-five thousand Guilders, being one half the Capital subscribed up to the 31st December, 1837; and that since that period there hath been paid in the further sum of £291,200, being one half of the capital subscribed since the 31st December, 1837;

1. Be it therefore enacted by His Excellency the Governor, and with the advice and consent of the Court of Policy of the Colony of British Guiana, that the following words, that is to say:

"And be it further enacted as aforesaid, that one half at the least of the Capital subscribed, be paid up immediately" shall be, and shall form part and parcel of the 6th Clause of the said Ordinance.

And be it further enacted, that the proviso contained in the conclusion of the 10th clause of said Act of Incorporation shall be, and the same is hereby declared to be repealed, and in lieu thereof shall be substituted, the proviso following, that is to say:—

"Provided always, and be it further enacted, that no share of the said Capital Stock shall be transferred from the day of the date of the publication of this Ordinance, until three hundred and fifty guilders at least shall have been paid thereon, and that no transfer of any share or shares be permitted after a call for money is made by the Directors under this Act, until the money called for is paid thereon;

"And lastly, notwithstanding such transfer, the party transferring shall for the period of one year from the date of registering such transfer, remain liable for the amount unpaid to the Corporation on the shares transferred."

3. And be it further enacted, that the following words shall form and be part and parcel of the 20th clause of the said Act of Incorporation, that is to say:—

That the said Corporation shall not discount any Bills of Exchange, Promissory Notes, or other negotiable paper on which the name of any Director or Officer of the said Corporation shall appear as Drawer, Acceptor, or Endorser, to an amount exceeding one third of the whole amount of the sum for the time being under discount of the said Corporation.

4. And be it further enacted, that the 32nd clause of the said Act of Incorporation shall be, as the same is hereby of the said Ordinance, viz:—

"And be it further enacted that it shall and may be lawful for the said Corporation, or for the period of Twenty-one years from the Eleventh of November, One Thousand Eight hundred and thirty-six, to carry on the business of Bankers by lending money on Bonds, Bills of Exchange, Promissory Notes, Acceptances, Open Accounts, Government Security, and all other Securities whatever connected with Banking; discounting Bills of Exchange, Promissory Notes, or other Commercial paper, buying and selling Bills of Exchange, receiving deposits at such rate of interest as may from time to time be fixed by the Directors, not exceeding the legal rate; borrowing or taking up money on Receipts, Bills, Promissory Notes, or other obligations; also by investments, purchases, sales, or any dealings in Bullion or Government, or

public funds of Great Britain, Navy or Exchequer Bills, or the stock of any Chartered Company, save only the stock of this Corporation; and to enter into and carry on all other business and transactions usual in Banking Establishments, and to make issue, and circulate Notes payable to Bearer on demand, or otherwise, provided that no such note be issued for less than the sum of Five Dollars, and that all such notes shall be payable in Dollars of the acknowledged weight and fineness of Spanish Dollars at the Banking House of the said Corporation; but it shall not be lawful for the said Corporation to carry on any other business or trade whatever than that of Banking, and they are hereby strictly forbidden to lend money or to make advances on real security, whether the same be lands, houses or plantations: And further, that the Directors of the said Bank for the time being shall, as they are hereby required to, publish, for the information of the Proprietors, in the *Royal Gazette* of this Colony, in the months of February and August, general Half yearly Accounts ending on the 31st December and 30th June last, respectively showing the whole amount of its Debts and Assets at the close of each half year, and showing also the total amount of its Notes payable on demand, which had been in circulation in each week of such half year, together with the amount of the Specie, distinguishing each kind and other Assets immediately available in each week for the discharge of such Notes; and that copies of such Half-yearly Accounts shall be laid before the Governor and Court of Policy by the Directors aforesaid, and that similar accounts shall be furnished at any time by such Directors as aforesaid to His Excellency the Governor whenever required."

And lastly, be it further enacted, that Clause 39 of the said Act of Incorporation shall be, as it is hereby declared to be, repealed.

And that no ignorance shall be pretended of this our Ordinance, these presents shall be printed and published in the customary manner.

Thus done and Enacted at our Extraordinary Assembly, held at the Guiana Public Buildings, George Town, Demerary, this 6th April 1838, and published on the 7th following.

By Command of the Court.

Thomas Bunbury.

H. E. F. Young, Secretary.

The ordinance and the amended ordinance constitutes the charter of the *Bank of British Guiana*, which was confirmed by the Queen in Council on the 6th October, 1838, without any alteration, except that the issues of the bank shall not exceed three times that of the paid up capital of the bank. The bank receives the benefit of the orders in council of the 14th September, 1838. The following shows the state of the bank at its half-yearly meeting in June, 1838:—

The whole capital of the bank is now subscribed for in 6,000 shares, which have all been taken up by parties within the colony, and 50 per cent has been paid thereon, amounting to the sum of £ 2,100,000.

The progressive increase of deposits from £ 1,153,163 10 cents—to their present amount £ 1,612,208 96 cents is also a strong manifestation of public confidence in the bank as well as in colonial property in general.

The Directors submit the following Abstract Summary, exhibiting a General Statement of the Affairs of the British Guiana Bank on the 30th of June 1838.

Dr.		Cr.	
Stock Account	£ 2,100,000 0	Due to the Bank on account of Securities in	
Due to the Public on Account of Lodgments		Bonds and Bills discounted, Cash in hand	
Interest upon Deposit Receipts	1,612,208 96	and in the hands of Agents	£ 3,966,005 59
Notes in Circulation	190,500 0	Bank Premises, Fixtures, Furniture, &c. &c.	58,179 64
Dividend Account, No. 1 unpaid	3,439 90		
Balance in favour of the Bank	118,036 37		£ 4,024,185 23
	£ 4,024,185 23		

From the foregoing statement, it appears that the balance in favour of the Bank at that period was £ 118,036 etc., for which amount the sum of £ 24,858 93 etc. is the portion of surplus fund reserved at the former dividend of profits, leaving therefore an amount of £ 93,177 44 cents as the apparent net profits derived by the Bank, during the preceding six months.

The Directors can consequently recommend a dividend to be declared at the rate of 6 per cent. per annum, being 3 per cent. for the half year ending 30 June, and for this purpose a sum of £ 63,000 will be required, after the payment of which there will be left an accumulated surplus fund of £ 55,036 37 cents.

B.—FORMATION OF THE GOVERNMENT OF BRITISH GUIANA.

The following is the authority by which the three colonies of Demerara, Essequibo, and Berbice were united under one government:

Copy of the Commission of Major-General Sir Benjamin D'Urban, K. C. B., as Governor and Commander-in-Chief of British Guiana; dated 4th March, 1831.

WILLIAM R.

WILLIAM THE FOURTH, by the Grace of God, of the United Kingdom of Great Britain and Ireland King, Defender of the Faith, To our trusty and well beloved Sir Benjamin D'Urban, Knight, Commander of the Most Honourable Military Order of the Bath, Major-General of our Forces: Whereas, for divers good causes to us appearing, we have deemed it right that our settlements and factories on the northern coast of the continent of South America, comprising the united colony of Demerara and Essequibo and the colony of Berbice, should henceforth be united together, and should constitute one colony, in the manner hereinafter provided: Now know you, that we, reposing especial trust and confidence in the prudence, courage, and loyalty of you, the said Sir Benjamin D'Urban, of our special grace, certain knowledge, and mere motion, have thought fit to constitute and appoint, and by these presents do constitute and appoint you, the said Sir Benjamin D'Urban, to be, during our will and pleasure, our Governor and Commander-in-Chief in and over all our settlements on the northern coast of the continent of South America, comprising all such territories and jurisdictions as have hitherto been comprised in the said united colony of Demerara and Essequibo and the said colony of Berbice respectively, with their respective dependencies, and all forts and garrisons erected and established, or which shall be erected and established within the same, and which settlements shall henceforth collectively constitute and be one colony, and shall be called "The Colony of British Guiana." And we do hereby require and command you, our said Governor, to do and execute all things in due manner as shall belong to your said command, and the trust we have reposed in you, according to the several powers and directions granted to or appointed you by this present commission and the instructions herewith given to you, or according to such further powers, instructions, and authorities as shall at any future time be granted to or appointed for you under our signet and sign manual, or by our order in our Privy Council, or by us through one of our principal Secretaries of State: And we do further grant, direct, and appoint that the form of civil government heretofore by law established in the said united colony of Demerara and Essequibo, shall be and the same is hereby established in and throughout the said colony of British Guiana, and that all such bodies politic and corporate as have heretofore lawfully existed

enjoy all such powers and authorities as have heretofore been lawfully had, exercised, and enjoyed by them respectively in the united colony of Demerara and Essequibo: Provided nevertheless, and we do hereby declare our will to be, that the number of the members of certain of the said bodies politic and corporate heretofore existing in the said united colony of Demerara and Essequibo, shall in the said colony of British Guiana be augmented and enlarged in such manner as by your said instructions is directed in that behalf: Provided also, and we do further declare our pleasure to be, that nothing herein contained shall extend, revoke, or abrogate any law or lawful usage, or custom now in force in the said united colony of Demerara and Essequibo, or in the said colony of Berbice respectively, save only in so far as relates to the separate constitution and form of civil government heretofore established and in use in the said colony of Berbice, which said constitution or form of civil government we do hereby abrogate and dissolve, and do declare that the same hath become and shall henceforth be extinct and merged in the government of the said colony of British Guiana: Provided also, and we do further declare our will and pleasure to be, that nothing herein contained extends or shall be construed to extend in anywise to alter or interfere with the provisions of a certain Act of Parliament passed in the fifth year of the reign of our late Royal Brother and predecessor King George the Fourth, intituled, "An Act to consolidate and amend the Laws for the Abolition of the Slave Trade," or to render legal any transfer or removal of any slave which would have been illegal if these presents had not been made, it being our pleasure that for the purposes and within the meaning of the said Act of Parliament, the said united colony of Demerara and Essequibo, and the said colony of Berbice, shall still continue and be distinct and separate colonies: And we do hereby give and grant to you, the said Sir Benjamin D'Urban, full power and authority, with the advice and consent of the Court of Policy of our said colony of British Guiana, to make, enact, ordain, and establish laws for the order, peace, and good government of our said colony, subject, nevertheless, to all such rules and regulations as by your said general instructions we have thought fit to prescribe in that behalf: Provided, nevertheless, and we do hereby reserve to ourselves, our heirs and successors, our and their undoubted right and authority to disallow any such laws, and to make and establish from time to time, with the advice and consent of Parliament, or with the advice of our or their Privy Council, all such laws as may to us or them appear necessary for the order, peace, and good government of the said colony, as fully as if these presents had not been made: And we do hereby grant to you, the said Sir Benjamin D'Urban, the custody of the public seal appointed for the sealing of all things whatsoever that shall pass the seal of our said colony: And we do here give and grant to you, the said Sir Benjamin D'Urban, full power and authority, in our name and in our behalf, but subject nevertheless to such provisions as are in that respect contained in your said general instructions, to make and execute in our name and under the public seal of our said colony, grants of waste land to us belonging within the said colony to private persons for their own use and benefit, or to any persons, bodies politic or corporate, in trust, for the public uses of our subjects there resident, or any of them: And we do hereby give and grant unto you full power and authority, as you shall see occasion, in our name and in our behalf, to remit any fines, penalties, or forfeitures which may accrue or become payable to us, so as the same do not exceed the sum of 50*l.* sterling in any one case, and to respite and suspend the payment of any such fine, penalty, or forfeiture exceeding the said sum of 50*l.* until our pleasure therein shall be known and signified to you: And we do hereby give and grant unto you full power and authority, as you shall see occasion, in our name and in our behalf, to grant to any offender convicted of any crime in any court, or before any judge, justice, or magistrate within our said colony, a free and unconditional pardon, or a pardon subject to such conditions as by any law in force in the said colony may be thereunto annexed, or any respite of the execution of the sentence of any such offender, for such period as to you may seem fit: Provided always, that in cases of treason or murder, no pardon, either absolute or conditional, be granted until the case shall have been first reported to us by you for our information, and you shall have received the signification of our pleasure therein: And we do hereby give and grant unto you, the said Sir Benjamin D'Urban, as such Governor as aforesaid, full power and authority, upon sufficient cause to you appearing, to suspend from the exercise of his office within our said colony any person exercising any such office under or by virtue of any commission or warrant granted or to be granted by us, or in our name or under our authority, which suspension shall continue and have effect only until our pleasure therein shall be signified to you: And we do hereby strictly require and enjoin you, in proceeding to any such suspension, to observe the directions in that behalf given to you in and by our said general instructions accompanying this your commission: And in case of your death or absence from the said colony, our will and pleasure is, that this our commission, and the several powers hereby vested in you, shall be exercised by such person as may by us be appointed to be our Lieutenant-Governor of our said colony, or by such person as may be appointed by us under our signet or sign manual, to administer the said government; but if at the time of such your death or absence, there shall be no person within our said colony commissioned to be such Lieutenant-Governor, or administrator of the government as aforesaid, then our pleasure is, and we do hereby direct that the senior officer for the time being in the command of our land forces within our said colony, shall take upon himself the administration of the government thereof, and shall execute this our commission, and the several powers herein, and in the aforesaid instructions contained; and if any such officer shall, during such his administration of the government, be suspended in the command of our said forces by any senior officer, then our pleasure is, that such senior officer shall assume the administration of the said government, and the execution of this our commission, and of the several powers aforesaid, and so from time to time as often as any such case shall arise: And we do hereby require and command all officers, civil and military, and all other our subjects, and persons inhabiting our said colony of British Guiana, to be obedient, aiding and assisting unto you, or to the officer administering the said government for the time being, in the execution of this our commission, and of the powers and authorities herein contained: And we do further declare our pleasure to be, that the changes established in the constitution and form of civil

government in the said colonies of Demerara and Essequibo, and of Berbice respectively, by this our commission, shall not take effect until this our commission shall actually have been by you received in our said colonies or one of them: And we do hereby declare, ordain, and appoint that you, the said Sir Benjamin D'Urban, shall and may hold, execute, and enjoy the office and place of our Governor and Commander-in-Chief, in and over our colony of British Guiana, together with all and singular the powers and authorities hereby granted unto you for and during our will and pleasure. In witness, &c. &c. Given at our Court at Brighton, the 4th day of March, 1831, in the first year of our reign.

By His Majesty's Command.

(Countersigned) GODERICH.

Shortly after the colonies of Demerara, Essequibo, and Berbice had been united under one government the following Orders in Council were issued, abolishing the ancient courts, and appointing perfectly new judicial establishments, not only for the colony of British Guiana, but for those of St. Lucia and Trinidad. At the end of these orders will be found a summary of the alterations they have effected in the courts for the administration of justice in British Guiana, and this will be accompanied by the regulations established by the Governor and Court of Policy as to the appointment of Assessors and the jurisdiction of inferior Courts.

C.—CHARTER OF JUSTICE FOR BRITISH GUIANA, TRINIDAD, AND ST. LUCIA.

Copies of the Orders in Council of the 23rd April and 20th June, 1831, for the Administration of Justice in British Guiana, Trinidad, and St. Lucia.

At the Court of St. James's, the 23rd day of April, 1831 ;
Present, The King's Most Excellent Majesty in Council.

1. WHEREAS His Majesty's Court of Criminal and Civil Justice in Demerara and Essequibo, and His Majesty's Courts of Civil Justice and of Criminal Justice respectively in Berbice, and His Majesty's Courts of Criminal Trial, and of First Instance of Civil Jurisdiction respectively in Trinidad, and His Majesty's Royal Court in the island of St. Lucia, are respectively holden by Judges the majority of whom in each of such courts are persons unlearned in the law: And whereas it is fit that the said courts respectively should henceforth be holden by persons of competent legal education; it is therefore ordered by the King's Most Excellent Majesty, by and with the advice of his Privy Council, that henceforth the Court of Criminal and Civil Justice of Demerara and Essequibo, and the Court of Civil Justice and the Court of Criminal Justice of Berbice, and the Court of Criminal Trial, and the Court of First Instance of Civil Jurisdiction in the island of Trinidad, and the Royal Court of St. Lucia, shall be respectively holden by and before three judges and no more; that is to say, each of the said courts shall be holden by and before the President for the time being of the Court of Criminal and Civil Justice of Demerara and Essequibo, and the Chief Judge for the time being of Trinidad, and the First President for the time being of the Royal Court of St. Lucia, or by and before the persons who, during the vacancy of any such offices, or during the absence or incapacity of any of the said judges, may have received a provisional or temporary appointment to act as and in the place and stead of any such judges or judge.

2. And it is hereby further ordered that no Judge in any of the several courts aforesaid, and no Vice-President thereof, shall be the owner of any slave, or shall have any share or interest in, or any mortgage or security upon any slave, or shall be proprietor of, or have any share or interest or mortgage or security upon, any land cultivated by the labour of slaves, or shall be or act as the manager, overseer, agent, or attorney of, for, or upon any plantation or estate cultivated wholly or in part by the labour of slaves.

3. And it is further ordered, that for the purpose of holding the respective courts aforesaid, the said three judges shall from time to time repair to the said respective colonies of Demerara, Berbice, Trinidad, and St. Lucia.

4. And it is further ordered, that two sessions at the least shall be holden in each year and in each of the said courts, and that the times of holding such sessions in such respective colonies, and the duration thereof in each, shall be determined by proclamations to be from time to time for that purpose issued in the said respective colonies by the respective Governors thereof.

5. And it is further ordered, that the Governors of the said respective colonies shall, and they are hereby authorized to arrange with each other the times of holding such sessions as aforesaid in such manner as may best promote the administration of justice therein, and the common convenience of the said respective colonies; and in case of any difference of opinion between such Governors as to the time of holding any such sessions, or as to the duration thereof, the judgment of the Governor of British Guiana shall prevail and be observed until His Majesty's pleasure therein shall have been signified through one of his principal Secretaries of State.

6. And it is further ordered, that in each of the said courts the President for the time being of the Court of Criminal and Civil Justice of Demerara and Essequibo shall preside and take precedence over such other two judges as aforesaid; and the said Chief Judge of Trinidad shall in like manner, in each of the said courts, take precedence over the First President of St. Lucia.

7. And it is further ordered, that in each of the said courts the said three judges shall in all civil cases have, possess, exercise, and enjoy such and the same jurisdiction, powers, and authority in every respect as the present judges of the said courts now have or lawfully possess, exercise or enjoy, and that the decision of the majority of such three judges shall in all civil cases at any time depending in either of the said courts, be taken and adjudged to be, and shall be recorded as, the judgment of the whole court.

8. Provided nevertheless, and it is further ordered, that upon the trial of any persons or person in any of the said courts for any crime or offence with which they, he, or she may be charged, three assessors shall be associated to the said three judges, in the manner hereinafter provided for, which assessors shall be entitled to deliberate and vote with such judges upon the final judgment to be pronounced in every such

criminal case; and no person shall be convicted of any crime or offence, or adjudged to suffer any punishment by any judgment or sentence of any of the said courts, unless a majority of the total number of such judges and assessors shall in open court vote in favour of such judgment or sentence.

9. And it is further ordered, that in each of the said courts the said three judges and assessors shall in all criminal cases have, possess, exercise, and enjoy such and the same jurisdiction, powers, and authority in every respect as the present judges of the said courts now have or lawfully possess, exercise, or enjoy, and that the decision of the majority of the total number of such judges and assessors shall in all criminal cases at any time depending in any of the said courts, be taken and adjudged to be, and shall be recorded as, the judgment of the whole court.

10. And it is further ordered, that the Governor of each of the said colonies shall by proclamations to be by him from time to time for that purpose issued within the same, make and prescribe such rules and regulations as may be necessary to determine the qualifications of such assessors, the mode of convening them, the penalties to be inflicted on persons refusing to act as such assessors when thereunto lawfully required, and the mode of challenging such assessors, and what shall be lawful ground of challenge, and how the validity of any such challenge shall be determined, together with every other matter and thing which may be necessary to the effective discharge by such assessors of the duty thereby committed to them; and every such proclamation shall forthwith be transmitted by such Governor for His Majesty's approbation, and shall in the meantime, and unless disallowed by His Majesty, and until such disallowance shall be made known to such Governor, be of the same force and effect as if the same had been contained in this present order.

11. And it is further ordered, that none of the judges nor any Vice-President of either of the said courts respectively, shall be liable to challenge or recusation in or upon any action, suit, or proceeding, civil or criminal.

12. And it is further ordered, that during the absence of any of the said judges from the colony to which he may belong, for the purpose of holding such sessions as aforesaid, the Supreme Court of such colony shall be holden by a single judge, to be called the Vice-President of such court, and it shall be the duty of such Vice-President to hear and determine all such interlocutory matters arising in or upon any civil or criminal suit, action, or proceeding depending in the said court, as may be brought before him, and also to inquire into and report to the said judges in any such sessions as aforesaid upon any questions which may by such judges at their sessions have been specially referred to any such Vice-President; and in the exercise of such jurisdiction, such Vice-President shall and he is hereby required to conform himself to and observe any such general rules or orders of court as may be made for his guidance in the manner hereinafter mentioned.

13. And it is further ordered and declared, that it shall be lawful for the said Supreme Courts respectively to review, reverse, correct, or confirm, as occasion may require, any judgment, sentence, rule or order which may be made, given, or pronounced by any such Vice-President as aforesaid, in the exercise of the jurisdiction hereby vested in him, and that in the exercise of such jurisdiction, such Vice-President shall act alone and without any colleague or assessor, and shall have all such and the same powers and authority in that behalf as now are or is vested in the said courts respectively for the said respective purposes.

14. And it is further ordered, that it shall and may be lawful for the judges of the said courts respectively, and they are hereby authorized and required to make and establish such rules, orders, and regulations as to them shall seem meet concerning the forms and manner of proceeding to be observed in the said courts respectively, and the practice and pleadings in all actions, suits, and other matters, both civil and criminal, to be therein brought, and concerning the duties and jurisdiction of the said respective Vice-Presidents, and concerning the proceedings of the executive and ministerial offices of the said courts respectively, and concerning the process of the said courts, and the mode of executing the same, and concerning the admission of advocates, barristers, attorneys, solicitors, notaries, and proctors in the said courts respectively, and concerning all other matters and things which relate to the conduct and dispatch of business in the said respective courts; and all such rules, orders, and regulations, from time to time, to revoke, alter, amend or renew, as occasion may require. Provided always, that no such rules, orders, or regulations shall be repugnant to this present order, and that the same shall be so framed as to promote, as far as may be, economy and expedition in the dispatch of the business of the said courts respectively, and that the same be drawn up in plain, succinct, and compendious terms, avoiding all unnecessary repetitions and obscurity, and be promulgated in the most public and authentic manner in the colonies to which the same may respectively refer, for 14 days at least before the same shall be binding and take effect therein; and provided also that all such rules, orders, and regulations shall forthwith be transmitted to His Majesty, under the seal of the court, by the Governor for the time being of such colony, for his approbation or disallowance.

15. And whereas it may be expedient to establish within the said colonies courts having jurisdiction in civil cases of small amount and in cases of breaches of the peace, assaults, and other petty offences; it is therefore further ordered, that it shall be lawful for the Governor of each of the said colonies respectively, with the advice of the Court of Policy in the said colony in British Guiana, and with the advice of the Council of Government in the said colonies of Trinidad and St. Lucia, by any laws and ordinances to be from time to time made for that purpose, to erect, constitute, and establish courts having jurisdiction in civil and criminal cases within the said respective colonies, provided that the jurisdiction of such Civil Courts shall not be extended to any case wherein the sum or matter in dispute shall exceed the amount or value of 20*l*. sterling money, or wherein the title to any lands or tenements, or the title of any person to his or her freedom, or any fee, duty, or office may be in question, or whereby rights in future may be bound; and provided also that the jurisdiction of such courts in criminal cases shall not be extended to any case wherein any person may be accused of any crime punishable by death, transportation, or banishment; and that it shall not be lawful for any such Criminal Court to inflict any greater or other punishment than imprisonment, with or without hard labour, for a term not exceeding three months, or fine not exceeding 20*l*., or whipping not exceeding 39 stripes, or any two or more such punishments within the limits aforesaid.

16. And it is further ordered, that the Judges of the said Supreme Courts of the said colonies respectively shall be and they are hereby authorized to make, ordain, and establish all necessary rules, orders, or regulations respecting the manner and form of proceeding to be observed in the said Petty Courts, and respecting the manner and form of carrying the judgments and orders of such courts into execution, with all such other rules, orders, and regulations as may be necessary for giving full and perfect effect to the jurisdiction of such courts respectively, and such rules, orders, and regulations from time to time to revoke, alter, and renew, as occasion may require.

17. And it is hereby further ordered, that it shall and may be lawful for any person or persons, being a party or parties to any civil suit or action depending in any of the said Supreme Courts of any of the said colonies, to appeal to His Majesty, his heirs, and successors, in his or their Privy Council, against any final judgment, decree, or sentence of any of the said courts, or against any rule or order made in any such civil suit or action having the effect of a final or definitive sentence, and which appeals shall be made subject to the rules and limitations following; that is to say, in case any such judgment, decree, order, or sentence shall be given or pronounced for or in respect of any sum or matter at issue above the amount or value of 500*l.* sterling; or in case such judgment, decree, order, or sentence shall involve, directly or indirectly, any claim or demand to or question respecting property, or any civil right amounting to or of the value of 500*l.* sterling; or in case such judgment, decree, order, or sentence shall determine or affect the right of any person to his or her freedom, the person or persons feeling aggrieved by any such judgment, decree, order, or sentence may, within fourteen days next after the same shall have been pronounced, made, or given, apply to such court by petition for leave to appeal therefrom to His Majesty, his heirs, and successors, in his or their Privy Council; and in case such leave to appeal shall be prayed by the party or parties who is or are directed to pay any sum of money or perform any duty, such Supreme Court shall and is hereby empowered either to direct that the judgment, decree, order, or sentence appealed from shall be carried into execution, or that the execution thereof shall be suspended pending the said appeal, as to the said court may in each case appear to be most consistent with real and substantial justice; and in case such Supreme Court shall direct such judgment, decree, order, or sentence to be carried into execution, the person or persons in whose favour the same shall be given, shall, before the execution thereof, enter into good and sufficient security, to be approved by the said Supreme Court, for the due performance of such judgment or order as His Majesty, his heirs and successors, shall think fit to make thereupon; or in case the said Supreme Court shall direct the execution of any judgment, decree, order, or sentence to be suspended pending the said appeal, the person or persons against whom the same shall have been given shall, in like manner, upon any order for the suspension of any such execution being made, enter into good and sufficient security, to be approved by the said Supreme Court, for the due performance of such judgment or order as His Majesty, his heirs, and successors shall think fit to make thereupon; and in all cases security shall also be given by the party or parties appellant, to the satisfaction of such court, for the prosecution of the appeal and for the payment of all such costs as may be awarded by His Majesty, his heirs and successors, to the party or parties respondent; and if such last-mentioned security shall be entered into within three months from the date of such petition for leave to appeal, then, and not otherwise, the said Supreme Court shall allow the appeal, and the party or parties appellant shall be at liberty to prefer and prosecute his, her, or their appeal to His Majesty, his heirs and successors, in his or their Privy Council, in such manner and under such rules as are observed in appeals made to His Majesty in Council from his plantations or colonies.

18. Provided always, and it is hereby declared and ordered, that nothing herein contained doth or shall extend, or be construed to extend, to take away or abridge the undoubted right or authority of His Majesty, his heirs and successors, to admit and receive any appeal from any judgment, decree, sentence, or order of any of the said Supreme Courts, on the humble petition of any person or persons aggrieved thereby, in any case in which and subject to any conditions or restrictions upon and under which it may seem meet to His Majesty, his heirs and successors, so to admit and receive any such appeal.

19. And it is further ordered, that in all cases of appeal allowed by any of the said Supreme Courts, or by His Majesty, his heirs and successors, such court shall, on the application and at the costs of the party or parties appellant, certify and transmit to His Majesty, his heirs and successors, in his or their Privy Council, a true and exact copy of all proceedings, evidence, judgments, decrees, and orders, had or made in such causes so appealed, as far as the same have relation to the matter of appeal, such copies to be certified under the seal of the said court.

20. And it is further ordered, that the said Supreme Courts respectively shall, in all cases of appeal to His Majesty, his heirs and successors, conform to, execute, and carry into immediate effect such judgments and orders as His Majesty, his heirs and successors, shall make thereupon, in such manner as any original judgment or decree of the said Supreme Court can or may be executed.

21. And whereas there are in the said courts, or some of them, divers unnecessary officers, being or claiming to be entitled to fees of large amount for services by them rendered to suitors and others concerned in the proceedings of the said courts, to the great charge of His Majesty's subjects, and to the obstruction of the due administration of justice; it is therefore hereby ordered, that the office of Sworn-Accountant, as at present existing in Demerara and Essequibo, and in Berbice respectively, shall be the same and is hereby abolished, and that the duties heretofore performed by such sworn-accountants shall henceforward, but subject to the rules of court to be made as hereinbefore mentioned, be performed by the Vice-President of the Court of Criminal and Civil Justice of Demerara and Essequibo, and by the Vice-President of the Court of Civil Justice and of the Court of Criminal Justice of Berbice; and it is hereby further ordered, that the office of Father-General of Minors, and the office of Defender of the Absent, and the office of Depositario-General, and the office of Taxador, and the office of Judicial Referee, Liquidator, and Partidor, as at present existing in the said Island of Trinidad, shall be and the same are hereby respectively abolished; and that the duties of the offices of the said Judicial Referee, Liquidator, and Partidor and Taxador, shall henceforward, but subject to the rules of court to be made as hereinbefore mentioned, be performed by the Vice-President

of the Court of First Instance of Civil Jurisdiction of Trinidad: and it is further ordered, that the office of Curateur aux Successions Vacantes, and Regisseur des Biens des Absens, as at present existing in St. Lucia, shall be and the same is hereby abolished; and that the duties heretofore performed by that officer shall henceforward, but subject to the rules of court to be made as hereinbefore mentioned, be performed by the Vice President of the Royal Court of the Island of St. Lucia.

22. And whereas various jurisdictions have heretofore been exercised by certain courts in the island of Trinidad, which by reason of the changes introduced into the administration of justice therein, it is no longer necessary to retain; it is therefore hereby ordered, that the several courts or tribunals following, that is to say, the Court of Criminal Inquiry, the Court of Audiencia, the Complaint Court, the Court of the Alcades in Ordinary, and the Court of the Alcaldes de Berrio, and all offices in and connected with the said courts respectively, shall be and the same are hereby respectively abolished.

23. And it is hereby further ordered, that all orders heretofore made by His Majesty, or by any of his royal predecessors in his or their Privy Council, and all laws, customs, and usages now or at any time heretofore established or in force in any of the said colonies, so far as such orders, laws, or usages are in anywise repugnant to or at variance with this present order, shall be and the same are hereby revoked, abrogated, rescinded, and annulled.

24. And it is further ordered, that for the purpose and within the meaning of the present order, any person lawfully administering for the time being the government of the said colonies shall be deemed and taken to be the Governor thereof.

(Signed) C. C. GREVILLE.

At the Court of St. James, the 20th day of June, 1831;
Present, The King's Most Excellent Majesty in Council.

1. WHEREAS, on the 23d day of April, 1831, an order was made by His Majesty, with the advice of his Privy Council, for improving the administration of justice in His Majesty's colonies of British Guiana, Trinidad, and St. Lucia; and for that purpose it was thereby ordered, that the Chief Judges of the said three colonies should from time to time repair to the said colonies, for the purpose of holding in succession therein the Supreme Courts of such colonies respectively: And whereas unforeseen difficulties may arise to delay the execution of the said order, and it may be necessary to make provision for the administration of justice therein; in the meantime it is hereby ordered by the King's Most Excellent Majesty, by and with the advice of his Privy Council, that it shall and may be lawful for the Governors for the time being of the said colonies of British Guiana, Trinidad, and St. Lucia, or for any two of them, by a proclamation to be by them issued in His Majesty's name in the said respective colonies, to suspend the execution of the said order of the 23d day of April, 1831, and the same shall thereupon be and remain suspended, until His Majesty's further pleasure shall be signified to the said respective Governors.

2. And it is further ordered, that during any such suspension of the said order of the 23d day of April, 1831, and no longer, the rules, orders and regulations hereinafter made and contained shall be observed in the administration of justice in the said respective colonies; that is to say, in the first place, it is ordered, that henceforth the Court of Criminal and Civil Justice of Demerara and Essequibo, and the Court of Civil Justice, and the Court of Criminal Justice of Berbice, shall henceforth be holden by and before three judges and no more, and that the first or presiding judge of the said court shall be called and bear the style and title of Chief Justice of British Guiana, and that the second and third of such judges shall be called and bear the respective styles and titles of First Puisne Judge and Second Puisne Judge of British Guiana.

3. And it is further ordered, that the court for the trial of criminal prosecutions, and the Court of First Instance of Civil Jurisdiction in the island of Trinidad, shall henceforth be holden by and before three judges and no more; and that the first or presiding judge of the said court shall be called and bear the style and title of Chief Justice of Trinidad, and that the second and third of such judges shall be called and bear the respective styles and titles of First Puisne Judge and Second Puisne Judge of Trinidad.

4. And it is further ordered, that the Royal Court of St. Lucia shall henceforth be holden by and before three judges and no more; and that the first or presiding judge of the said court shall be called and bear the style and title of Chief Justice of St. Lucia, and that the second and third of such judges shall be called and bear the respective styles and titles of First Puisne Judge and Second Puisne Judge of St. Lucia.

5. And it is further ordered, that whenever and so often as the office of any chief justice or puisne judge of any of the said colonies shall become vacant by the death, absence, incapacity, resignation, suspension, or removal of any such chief justice or judge, the Governor of such colony for the time being shall be and is hereby authorized to supply and fill up such vacancy by the appointment of some proper person, by a commission under the public seal of such colony, which commission shall be made to continue in force only until His Majesty's pleasure shall be known.

6. And it is hereby further ordered, that none of the said judges of any of the colonies aforesaid shall be the owner of any slave, or shall have any share or interest in, or any mortgage or security upon any slave, or shall be proprietor of, or have any share or interest in, or mortgage or security upon any land cultivated by the labour of slaves, or shall be or act as the manager, overseer, agent, or attorney of, for, or upon any plantation or estate cultivated wholly or in part by the labour of slaves.

7. Provided nevertheless, that nothing herein contained shall prevent any such judge from acquiring any such property or interest as aforesaid under any legal process, for the recovery of any debt or demand, or by testamentary or other succession, inheritance, donation, or other involuntary title, but all such property or interest as aforesaid which any such judge may so acquire, shall, within one calendar month next after the acquisition thereof, be by him communicated to the Governor of the colony, and shall be alienated and disposed of within six calendar months, unless His Majesty shall in any case be pleased to grant to any such judge a longer period for effecting any such alienation or disposal thereof.

8. And it is further ordered, that in each of the said courts respectively, the said three judges of the said respective colonies shall in all civil cases have, possess, exercise, and enjoy such and the same jurisdiction, powers, and authority, in every respect, as the judges of the said courts have heretofore lawfully possessed, exercised, or enjoyed; and that the decision of the majority of such three judges shall in all civil cases at any time depending in the said respective courts, be taken and adjudged to be, and shall be recorded as the judgment of the whole of such court.

9. And it is further ordered, that upon the trial of any person or persons in any of the said courts respectively for any crime or offence, three assessors shall be associated to the said three judges, in the manner hereinafter provided for, which assessors shall be entitled to deliberate and vote with such judges upon the final judgment to be pronounced in every such criminal case, or no person shall be convicted of any crime or offence, or adjudged to suffer any punishment by any judgment or sentence of any of the said courts, unless a majority of the total number of such judges and assessors shall in open court vote in favour of such judgment or sentence.

10. And it is further ordered, that in each of the said courts the said three judges and assessors shall in all criminal cases have, possess, exercise, and enjoy such and the same jurisdiction, powers, and authority in every respect as the judges of the said courts respectively have heretofore lawfully possessed, exercised, and enjoyed, and that the decision of the majority of the total number of such judges and assessors shall in all criminal cases at any time depending in any of the said courts, be taken and adjudged to be and shall be recorded as the judgment of the whole court.

11. And it is further ordered, that it shall be lawful for the judges of any of the said courts respectively to reserve the consideration of any question of law arising upon any such criminal trial as aforesaid, and to make order for the suspension or arrest of the judgment or sentence of the court, until the decision of such question of law, which shall be adjudged and decided by such judges alone, or without the concurrence or interference of such assessors therein.

12. And it is hereby further ordered, that the assessors of the said courts in Demerara and Berbice shall be chosen and appointed in such and the same manner as the members of the Court of Civil and Criminal Justice of Demerara have heretofore been chosen and appointed; and that the assessors of the said court for the trial of criminal prosecutions in Trinidad shall be chosen and appointed from and out of the members of the Cabildo of the town of Port of Spain in the said island; and that the assessors of the said Royal Court of St. Lucia shall be chosen and appointed in such and the same manner as the members of that court, other than the First President, have heretofore been chosen and appointed.

13. And it is hereby further ordered, that none of the judges of either of the said courts shall be liable to challenge or recusal in or upon any action, suit, or proceeding, civil or criminal, but that such assessors shall be liable to be challenged on such and the like grounds as may be alleged as lawful ground of challenge against any petit juror empanelled for the trial of any indictment in England, and the validity of every such challenge shall be decided by the judges presiding at any such trial, without the concurrence or interference of the assessors or any of them.

14. And it is further ordered, that it shall and may be lawful for the judges of the said courts respectively, and they are hereby authorized and required to make, ordain, and establish a tariff or table of fees, to be had, taken, allowed, and paid by the suitors in the said respective courts, for and in respect of every sentence, judgment, order and proceeding which may be pronounced, made, or had in any suit or action depending therein, or which may or shall be paid or payable to any of the officers of the said court respectively, or to any advocate, barrister, solicitor, attorney, proctor or notary, or other practitioner of the law therein, and which tariff or table of fees shall, by the Chief Justice of each of the said courts respectively, be transmitted to the Governor for the time being of the colony to which such court may belong; and any such tariff or table being ratified and confirmed by any ordinance to be for that purpose made by the Governor and Court of Policy of British Guiana, or by the Governor, with the advice and consent of the Council of Government in the said colonies of Trinidad or St. Lucia, shall be binding upon all persons interested therein; and all persons receiving any greater or higher or other fee or reward than shall by any such tariff or table be allowed, shall be liable to refund the same by such summary process or proceeding as shall seem good to the said courts respectively in that behalf.

15. And it is further ordered, that it shall and may be lawful for the said Governor and Court of Policy of British Guiana, and for the Governors of Trinidad and St. Lucia respectively, with the advice and consent of the respective Councils of Government thereof, by any ordinances to be by them for that purpose made, to prescribe the form and manner of proceeding to be observed in the said respective courts for the prosecution and trial therein of all persons charged with the commission of any crimes and offences cognizable within the said courts respectively: provided nevertheless, that every such ordinance shall be transmitted for His Majesty's approbation in the manner required by law in reference to all ordinances passed and enacted in the said respective colonies.

16. And it is further ordered, that it shall and may be lawful for the judges of the said courts respectively, and they are hereby authorized and required to make and establish such rules, orders, and regulations as to them shall seem meet, touching the distribution of the business of the said courts between the respective judges thereof, and concerning the forms and manner of proceeding to be observed in the said courts respectively, and the practice and pleadings in all civil actions and other civil matters to be therein brought, and concerning the process of the said courts and the mode of executing the same, and concerning the admission of advocates, barristers, attorneys, solicitors, notaries, and proctors in the said courts respectively; all which rules, orders, and regulations shall be framed in such a manner as to promote, as far as may be, economy, method, and expedition in the despatch of the business of the said courts respectively; and the same shall be drawn up in plain, succinct, and compendious terms, avoiding all unnecessary repetitions and obscurity, and shall be promulgated in the most public and authentic manner in the colonies to which the same may respectively refer, for fourteen days at the least before the same shall be binding and take effect therein.

17. Provided always, and it is further ordered, that no such rules, orders, or regulations as aforesaid be repugnant to this present order, and that the same be forthwith transmitted under the seals of such respective courts to the respective Governors of the said colonies respectively, to be by them transmitted to His Majesty for his approbation or disallowance.

18. And whereas there are established within the said colonies, or some of them, courts having jurisdiction in civil cases of small amount, and in cases of breaches of the peace and other petty offences, and it is expedient that provision be made for the better administration of justice in such courts; it is therefore hereby ordered, that no court within any of the said colonies other than the supreme courts hereinbefore mentioned, shall be competent to hold jurisdiction in any civil case in which the sum or matter in dispute shall exceed the amount or value of 20*l.* sterling money, or in which the right of any alleged slave to his or her freedom, or the title to any lands or tenements, or any fee, duty, or office, or His Majesty's Royal Prerogative may be in question, or whereby rights in future may be bound; and that no court within any of the said colonies, other than the Supreme Courts aforesaid, shall be competent to hold jurisdiction in any criminal case wherein any person shall be accused of any crime punishable by death, transportation, or banishment; and that it shall not be lawful for any court in any of the said colonies, other than the Supreme Courts aforesaid, to inflict any greater or other punishment than imprisonment, with or without hard labour, for a term not exceeding three months, or fine not exceeding 20*l.*, or whipping not exceeding 39 stripes, or any two or more of such kind of punishments together, within the limits aforesaid.

19. And it is further ordered, that it shall be lawful for the Governor of British Guiana, with the advice and consent of the Court of Policy thereof, and for the Governors of Trinidad and St. Lucia, with the advice and consent of the respective Councils of Government thereof, to establish, constitute, and erect within the said respective colonies, inferior courts having jurisdiction in civil and criminal cases within the limits aforesaid, and for that purpose may abolish any such inferior courts as may be now existing therein, or modify the constitution of such courts as may be found expedient.

20. And it is further ordered, that the judges of the said Supreme Courts of the said colonies respectively shall be and they are hereby authorized to make, ordain, and establish all necessary rules, orders, and regulations respecting the manner and form of proceeding to be observed in the said inferior courts, and respecting the manner and form of carrying the judgments and orders of such courts into execution, with all such other rules, orders, and regulations as may be necessary for giving full and perfect effect to the jurisdiction of such courts respectively, and such rules, orders, and regulations from time to time to revoke, alter, and renew as occasion may require; provided always, that all such rules, orders, and regulations as aforesaid shall be promulgated, and shall be transmitted to His Majesty for his approbation or disallowance, in the manner hereinbefore directed and required with respect to the rules, orders, and regulations of the said Supreme Courts.

21. And it is further ordered, that the office of Father-General of Minors, and the office of Defender of the Absent, and the office of Depositario-General, as at present existing in the island of Trinidad, shall be and the same are hereby respectively abolished; and that the office of Taxador, and the office of Judicial Referee, Liquidator, and Partidor, as at present existing in the said island, shall be and the same are hereby consolidated, and shall constitute one office.

22. And it is further ordered, that the offices of Curateurs aux Successions Vacantes, and Regisseur des Biens des Absens, as at present existing in St. Lucia, shall be and the same are hereby abolished.

23. And whereas various jurisdictions have heretofore been exercised by certain courts in the island of Trinidad, which, by reason of the changes hereby introduced into the administration of justice there, it is no longer necessary to retain; it is therefore hereby ordered, that the several courts or tribunals following, that is to say, the "Court of Criminal Inquiry," the "Tribunal of Appeal, in all cases of condemnation to death," the "Superior Tribunal of Appeal of Civil Jurisdiction," the "Tribunal of the Royal Audiencia," and all offices in and connected with the said courts respectively, shall be and the same are hereby respectively abolished.

24. And it is further ordered, that the Court of Sénéchaussée, in the island of St. Lucia, and all offices in and connected with that court, shall be and the same are hereby abolished; and that the Royal Court of the said island shall henceforth have an original jurisdiction in all causes arising within the said island, in such and the same manner and to such and the same extent as such original jurisdiction was heretofore vested in the said Court of Sénéchaussée.

25. And it is hereby further ordered, that it shall and may be lawful for any person or persons, being a party or parties to any civil suit or action depending in the said Court of Civil and Criminal Justice of Demerara and Essequibo, or in the said Court of Civil Justice of Berbice, or in the said Court of First Instance of Civil Jurisdiction of Trinidad, or in the said Royal Court of St. Lucia, to appeal to His Majesty, his heirs, and successors, in his or their Privy Council, against any final judgment, decree, or sentence, or against any rule or order made in any such civil suit or action, and having the effect of a final or definitive sentence, and which appeals shall be made subject to the rules and limitations following: that is to say,

First, Such judgment, decree, order, or sentence shall be given or pronounced for or in respect of a sum or matter at issue above the amount or value of 500*l.* sterling, or shall involve directly or indirectly the title to property, or to some civil right, amounting to or of the value of 500*l.* sterling, or shall determine or affect the right of some alleged slave to his or her freedom:

Secondly, The person or persons feeling aggrieved by such judgment, decree, order, or sentence, shall, within fourteen days next after the same shall have been pronounced, made, or given, apply to the court by petition for leave to appeal therefrom to His Majesty, his heirs, and successors, in his or their Privy Council:

Majesty, his heirs and successors, execute and carry into immediate effect such judgments and orders as His Majesty, his heirs and successors, shall make thereupon, in such manner as any original judgment or decree of the said Supreme Court can or may be executed.

28. And it is hereby further ordered, that all orders heretofore made by His Majesty, or by any of his royal predecessors, in his or their Privy Council, and all laws, customs, and usages now or at any time heretofore established or in force in any of the said colonies, so far as such orders, laws or usages are in anywise repugnant to or at variance with this present order, shall be and the same are hereby revoked, abrogated, rescinded and annulled.

29. And it is further ordered, that for the purpose and within the meaning of the present order, any person lawfully administering for the time being the government of any of the said colonies, shall be deemed and taken to be the Governor thereof.

And the Right Honourable Viscount Goderich, one of His Majesty's principal Secretaries of State, is to give the necessary directions herein accordingly.

(signed) C. C. Greville.

INFERIOR COURTS OF CIVIL JUSTICE.

(This summary is derived from Mr. Clarke's excellent Work on Colonial Law.)

Under the authority of the 19th section of the preceding order, an ordinance was passed by the Governor and Court of Policy on the 13th day of September 1832, to repeal the ordinance passed on the 23d of May 1832, entitled "An Ordinance to establish and constitute Inferior Courts of Civil Justice in British Guiana," and to make other provisions for such inferior courts. It recites and repeals the former ordinance, and then proceeds as follows:—

Whereas by an order of His Majesty in Council, bearing date 20th June 1831, His Majesty has been graciously pleased to authorize the establishing of Inferior Courts of Civil Justice within this colony, having jurisdiction to a certain extent as therein described.

2. Be it therefore further Enacted, that there shall be one Inferior Court of Civil Justice for the district of Demerara and Essequibo, and another Inferior Court of Civil Justice for the district of Berbice.

3. And be it further enacted, that the said Inferior Courts shall be held by and before the Chief Justice or one of the Puisne Judges, at such times as the Judges of the Supreme Court shall direct and appoint.

4. And be it further enacted, that the said Inferior Civil Court shall have jurisdiction in cases to the amount or value of twenty pounds sterling, all claims in currency not exceeding 300 guilders being comprehended in this limitation.

5. And be it further enacted, that the Registrar or Sworn Clerk and Marshal of the respective Supreme Courts of Civil Justice shall attend the sitting of the said respective Inferior Civil Courts, and shall be entitled to receive certain fees for services respectively performed by them.

6. And be it further enacted, that when the Judges of the Supreme Court shall have made, ordained, and established all necessary rules, orders, and regulations respecting the manner and form of proceeding to be observed in the said Inferior Civil Courts, and respecting the manner and form of carrying the judgments and orders of the said Inferior Civil Courts into execution, with all such other rules, orders, and regulations as may be necessary for giving full and perfect effect to the jurisdiction of the said courts respectively, and as soon as the said rules, orders, and regulations shall have been duly promulgated this court shall thereupon frame the tariff fixing the amount of fees to which the respective officers of the said court shall be entitled for services performed by them in their respective offices; and on promulgation thereof by this court, the said tariff shall have force of law, and become binding on all parties concerned.

7. And be it further enacted, that this ordinance shall come into full operation on the first day of November next coming. And that no ignorance may be pretended of the several orders contained in this ordinance, the same shall be printed and published as customary.

Practice of the Courts.

In consequence of the Orders in Council remodelling the Supreme Court, and the subsequent establishment of Inferior Courts, local regulations were made directing the mode of proceeding in the Supreme Court and in the Inferior Courts of British Guiana. Many of these regulations can be of use only to the practitioners of law in the colony itself; but there are some which, as they may affect contracts made in this country, deserve to be extracted. The first three will give some idea of the jurisdiction of the courts now established in the colony.

Manner of Proceeding to be observed in the Supreme Courts of Civil Justice in British Guiana, made and established by the Justices of the said Courts, in pursuance of His Majesty's Order in Council, bearing date 20th June 1831.

Sec. 1. A Court of Civil Justice shall be held in George-town four times in each year, for the district of Demerara and Essequibo, and twice or three times, if necessary, in each year, in New Amsterdam, for the district of Berbice.

2. A Roll Court shall be held in each district before a puisne judge, on such days as shall from time to time be appointed by the Judges of the Supreme Courts, and shall be continued from day to day until the business brought before it shall be disposed of. Provided however, that no Roll Court shall be appointed to be held in the months of August, September, and October.

3. Before the first Roll Court of every month, in which there shall be one or more Roll Court, shall be returnable all and every citation in civil causes over which the Supreme Court has jurisdiction, except in cases of re-audition from the Roll to the Supreme Court.

27. It shall and may be lawful for the judge of the Roll, and he is hereby required to make, if need be, a

special report to the court, touching the examination, and the conduct or absence of any witness or witnesses, or other persons therein, or relating thereto; a copy of which report, in the event of any appeal to His Majesty in Council being granted, and the papers taken out shall be delivered with the same; and it shall and may be lawful for the court, after the case shall have been closed on both sides and pleaded, to call up and examine any witness who shall have been examined in the cause.

43. No plantation under execution shall be sold until one year after levy, and the particular description thereof and notice of the sale shall, at least six months previously to the day of sale, have been three times advertised in the London Gazette and Amsterdam Courant.

44. At the expiration of the year after due notice, as in s. 43, the court or chief justice, during non-session, upon petition of the marshal, shall fix a precise day of sale of such plantation, and after advertisement of such precise day for four successive Saturdays in the government newspaper of the colony, such plantation shall be sold at a credit of three, six, nine, and twelve months from the day of sale, payable in manner hereinafter stated; and in the event of the property to be sold consisting of several lots of land, with or without slaves or appurtenances, or of several lots of slaves, with or without buildings, and upon which lots respectively there shall be separate or distinct mortgages, liens or claims, the holders of such distinct mortgages, liens or claims, shall be at liberty to petition the court or chief justice during non-session for an order to sell, as it shall seem most advantageous to all parties under the circumstances of each particular case, and to enable the court to ascertain the rights of the respective parties on the decision of preference and concurrence.

55. If the purchaser of a plantation or other immoveable property sold at execution sale, be a holder of a first or second mortgage on the same, he shall not be bound to furnish security, or pay, save and except to the extent of such claims as shall appear to the court to be preferent to such first or second mortgage, and of the amount for which the purchase-money shall exceed the amount of the sum due on such first or second mortgage, provided such first or second mortgage, in virtue of which exemption from security or any part thereof shall be claimed, shall be deposited with the registrar.

72. Every barrister, advocate, attorney, and solicitor, upon his admission to practise, shall have administered to him, and shall take the following oath:—

"You shall swear that well and truly you shall serve the King's subjects, according to the best of your learning and knowledge in the law, and you shall truly counsel and advise them that shall retain you according to the best of your skill, and you shall not defer, protract, nor delay their cause willingly, for lucre or hope of reward. So help you God."

And no practitioner at the bar shall be allowed to appear for a plaintiff, without filing at the time of his appearance, a power, *ad lites*, unless by leave of the court, nor for any defendant without filing, at the time of his appearance, a copy of the citation served upon the defendant, or some other authentic voucher, as evidence of his being employed for and on behalf of such defendant.

73. Whenever the secretary shall be called upon to pass or execute a power *ad lites*, in favour of any practitioner, care shall be taken to insert therein authority to receive monies and to grant receipts, and unless such authority be inserted in the powers *ad lites*, the same shall be considered to have been intentionally withheld.

76. Edictal citations at the instance of an executor, administrator, curator, guardian, or trustee, shall be confined to two, that is to say, the first edictal citation shall be issued in the colony within one month after date of the order obtained from the chief justice, and the second, or last, so soon as the marshal shall have made his return of the edictal citation having been published three times in Europe, as in section 43, or in one month after the first shall have been called at the roll, if the publication in Europe be not required.

Manner of proceeding in the Inferior Courts of British Guiana, as established by the Judges of the Supreme Courts in pursuance of His Majesty's Order in Council of 20th June, 1831.

Section 19. There shall be no appeal from any sentence of these courts, and eight clear days after sentence shall have been pronounced, the party in whose favour the sentence is shall be at liberty to proceed in execution thereof.

28. Every one shall be at liberty to appear personally in the Inferior Courts, to conduct his own cause, or to employ by power *ad lites* a duly admitted barrister, advocate, or attorney, and no other person to appear for him; it being however understood that whenever such barrister, advocate, or attorney is employed, he shall be remunerated by his own client, and no fee or remuneration paid to any barrister, advocate, or attorney, for appearing in the Inferior Courts, shall form any part or parcel of the bill of costs to be taxed against the party condemned.

Qualifications of Assessors.

The order in Council of the 20th June, 1831, having directed that in certain cases therein mentioned, assessors should sit with the Judges of the Supreme Court, another order in Council of the date of the 15th August, 1832, was issued declaring the qualifications of such assessors. The second order was published in the colony by the proclamation of the Governor, dated on the 25th October in the same year, and was in the following terms:—

"Whereas on the 20th day of June, 1831, an order was made by His Majesty with the advice of his Privy Council, for improving the administration of justice in His Majesty's Colonies of British Guiana, Trinidad, and St. Lucia, whereby it was, amongst other things, ordered, that the assessors of the courts therein mentioned in Demerara and Berbice should be chosen and appointed in such and the same manner as the members of the Court of Civil and Criminal Justice of Demerara have heretofore been chosen and appointed, and that the assessors of the said court for the trial of criminal prosecutions in Trinidad should be chosen and appointed from and out of the members of the Cabildo of the town of Port of Spain, in the said island; and that the assessors of the said Royal Court of St. Lucia should be chosen and appointed in such and the

same manner appointed. respectively mentioned so much of And it is 21 years and his own full above repris or who shall for him as an absolute term or who being relief of the house of the for the purpose reside, and for be considered legislative body clergymen in Scotland, and who shall to occupation exercising all et exercising the in the custody diploma, licent army on full actually employed be and are he it is further o he shall have should be made respective colonies proper lists of assessors, and on every crime It is further respectively, orders, and reasons within the ascertained, an respective colonies tively to the respecting the or object to the opposition or correcting, or and reformed, names shall be there to serve be served; and by ballot or other respecting the respectively shall alter, revoke, or alterations as aforesaid such rules, order the same when said respective of His Majesty for of the 20th June mentioned.

And it is further who, by any such duty, or to do refuse or neglect for every such o Court of such co

same manner as the members of that court, other than the First President have heretofore been chosen and appointed. And whereas it is expedient to admit to the discharge of the duties of assessors in the said courts respectively, all free adult male inhabitants of the said colonies possessing such qualification as hereinafter is mentioned: it is therefore hereby ordered by His Majesty, by and with the advice of his Privy Council, that so much of the said order as is herein before recited shall be, and the same is hereby revoked and repealed. And it is hereby further ordered, that every free man, except as hereinafter exempted, between the ages of 21 years and 60 years, residing in any of the said colonies, who shall have or be beneficially entitled to, for his own use and benefit, either in his own name or in trust for him, within the same colony, 10*l*. by the year above reprises in any immoveable property either in perpetuity or for the life of himself or some other person; or who shall have within the same colony for his own use and benefit, either in his own name or in trust for him as aforesaid, 20*l*. by the year above reprises in any immoveable property held by lease or leases for the absolute term of 21 years, or some longer term, or for any term of years determinable on any life or lives; or who being a householder should be rated or assessed to any direct tax or impost, or to any rate for the relief of the poor, or other local object, on a value of not less than 20*l*. per annum; or who shall occupy a house of the annual value of 20*l*., shall be qualified and liable to serve as an assessor, within the meaning and for the purposes of the said recited order, in the colony in which every man so qualified respectively shall reside, and for the purpose, and within the meaning of that order, all slaves whether prædial or personal shall be considered as immoveable property. Provided always, and it is further ordered, that all members of the legislative bodies of the said respective colonies, all jurors of the Supreme Courts of Justice therein, all clergymen in holy orders of the Established Church of England and Ireland, all ministers of the Kirk of Scotland, and of the Lutheran and reformed churches, all priests of the Roman Catholic faith, all persons who shall teach or preach in any congregation of Protestant dissenters, and who shall follow no secular occupation except that of schoolmaster, all doctors of law, advocates, counsel, and barristers actually practising, all attorneys at law, solicitors, and proctors actually practising, all officers of the said courts actually exercising the duties of their respective offices; all jailors and persons actually employed by and under them in the custody of prisoners; all physicians, surgeons, and apothecaries actually practising by virtue of any diploma, license, or certificate granted by any competent authority; all officers in His Majesty's navy or army on full pay, all pilots duly licensed by any competent authority; all officers of customs, and all officers actually employed as deputies or assistants to the marshals, or other executive officers of the said courts, shall be and are hereby absolutely freed and exempted from serving as such assessors as aforesaid. Provided also, and it is further ordered, that no man who hath been, or shall be convicted of any crime that is infamous, unless he shall have obtained a free pardon, shall serve as such assessor. And whereas it is necessary that provision should be made for ascertaining the names, places of abode, and descriptions, of all persons within the said respective colonies qualified and liable to serve as such assessors, for making and revising from time to time, proper lists of such persons, and for the due summoning of them in some settled rotation to serve as such assessors, and for the impartial selection of a sufficient number of persons from those so summoned to serve on every criminal prosecution.

It is further ordered, that the chief justices and other judges of the Supreme Court of the said colonies respectively, shall be, and they are hereby authorized, to make, ordain, and establish all necessary rules, orders, and regulations, respecting the manner in which the names, places of abode, and descriptions of persons within the said respective colonies, qualified and liable to serve as such assessors as aforesaid, shall be ascertained, and respecting the making and preserving in the different districts and quarters of the said respective colonies lists of all such persons, and respecting the public and other notices to be given preparatively to the compiling of any such lists, and the publication of any such lists when so compiled; and respecting the manner in which all persons whom it may concern shall be called upon or permitted to oppose or object to the insertion or omission of any such list; and respecting the manner in which every such opposition or objection shall be heard, tried, and determined; and respecting the manner of reforming, correcting, or allowing any such list; and respecting the manner and form of all such lists, when corrected and reformed, shall be recorded; and also respecting the manner, order, and form in which all persons, whose names shall be comprised in any such record, shall be summoned to attend at any sessions of any such court, there to serve as assessors, and respecting the times at which, and the manner in which such summons shall be served; and also respecting the mode in which a competent number of assessors shall be chosen, either by ballot or otherwise, from among the number so summoned to serve as assessors in the said courts; and also respecting the proper method of proceeding to preserve a due rotation amongst such assessors; and also respecting the several officers by whom, and the times and places at which the before-mentioned duties respectively shall be done and performed; and all such rules, orders, and regulations from time to time to alter, revoke, and renew, as occasion may require. Provided always, that no such rules, orders, and regulations as aforesaid be repugnant to this present order, and that the same be forthwith transmitted under the seals of such respective courts to the respective Governors, to confirm or disallow the whole or any part of such rules, orders, and regulations, as to such respective Governors may in their discretion seem fit; and the same when so confirmed by such respective Governors shall take effect and be in full force within the said respective colonies until His Majesty's pleasure shall be known; and the same shall be transmitted to His Majesty for his approbation or disallowance, in the manner directed and required by the said recited order of the 20th June, 1831, with respect to the rules, orders, and regulations of the said Supreme Court therein mentioned.

And it is further ordered, that if any public officer or other person within the said colonies respectively, who, by any such rules, orders, and regulations as aforesaid shall be required or directed to perform any duty, or to do any act in or about or connected with the several matters aforesaid or any of them, shall refuse or neglect to perform any such duty, or to do any such act, every such officer or other person shall, for every such offence, forfeit a sum not exceeding 10*l*. nor less than 40*s*., as to the judges of the Supreme Court of such colony wherein the same shall occur shall seem reasonable.

And it is further ordered, that every person who, under the provision of this present order, or of any such rules, orders, and regulations as aforesaid, shall be duly summoned to serve as an assessor for the trial of any criminal prosecution in any of the said colonies, who shall not appear and serve as such assessor after being openly called three times, and on proof being made on oath of his having been duly summoned, shall forfeit and pay for every such his default, such fine, not exceeding 10*l.* nor less than 1*l.*, as the court shall deem reasonable to impose, unless some just and sufficient cause for such defaulter's absence shall be made to appear, by oath or affidavit, to the satisfaction of the court. And it is further ordered, that every fine which shall be imposed by virtue of this present order shall be imposed by a summary proceeding before the said courts respectively, on the motion of the public prosecutor of and for any such colony, and shall, when so imposed, be levied and recovered in such and the same manner and by all such ways and means as any other fine or penalty imposed by a judgment of any such court; and shall, when so recovered, be paid over to the treasurer or other receiver of His Majesty's revenue within such colony, in aid of the expenses of the civil government thereof and the administration of justice therein.

And it is further ordered, that in all criminal prosecutions before the said courts respectively, it shall be a good cause of challenge of any person summoned to serve as an assessor, that he is not qualified according to the provisions of this present order, or that he is an illiterate person and unable to read or write, and that any other cause which according to the law of England would be a good cause of challenge of any man summoned and returned to serve as a common juror on the trial of any issue joined between the King and the prisoner on any indictment for felony or misdemeanor, shall also be good cause of challenge to any assessor summoned to serve on the trial of any criminal prosecution in any of the said colonies, in so far as that part of the law of England is capable of being applied in the said colonies; and if any such cause of challenge shall be alleged, either by the public prosecutor or by any such person or persons against whom any such prosecution may be brought, the judges of the court shall forthwith proceed to enquire of, and consider the grounds of any such challenge, and shall either allow or overrule the same, as may be just; and upon such challenge being so allowed, another person shall be chosen to serve as assessor in the place and stead of the person so challenged, and so on, until a sufficient number of assessors shall appear against whom no cause, or no just cause, of challenge shall be alleged.

And it is further ordered, that after deducting six from the whole number of the persons summoned and actually appearing to act as assessors on any criminal prosecution, the public prosecutor and the person or persons against whom the prosecution may be brought, shall each have as many peremptory challenges as shall be equal to one half of the remaining number, or should the remaining number not be an even number, then the person or persons against whom the prosecution may be brought shall have one peremptory challenge more than the public prosecutor.

And it is further ordered, that before proceeding to the trial of any such criminal prosecution, each assessor shall, in open court, audibly pronounce and take the oath appointed by the law of England to be taken by petit jurors impanelled for the trial of any issue joined between the King and any person or persons arraigned upon any indictment in His Majesty's Court of King's Bench at Westminster.

And it is further ordered, that the assessors so to be summoned and chosen as aforesaid, shall have, exercise, and enjoy all such and the same rights, powers, and privileges, and shall perform all such and the same duties as according to the provisions of the said recited Order in Council might be exercised, enjoyed, and performed by the assessors therein mentioned.

And it is further ordered, that this present order shall take effect and come into operation in the said respective colonies so soon as the same shall have been promulgated within any such colony by the Governor thereof, and not before; and that for the purposes and within the meaning of this present order, the officer administering the government of any such colony shall be esteemed and taken to be the Governor thereof.

And the Right Honourable Lord Viscount Goderich, one of His Majesty's principal Secretaries of State, is to give the necessary directions herein accordingly.

C. Greville.

ASSESSORS.

An Ordinance to provide a sufficient number of Assessors to be associated with the Judges of the Supreme Courts of Criminal Justice of British Guiana, as enacted by the Governor and Court of Policy on the 5th December, 1831.

Whereas, by an order made and passed by His Majesty in Council, bearing date the 20th June, 1831, it was amongst other matters provided that three assessors shall be associated with three judges upon the trial of any person or persons in either of the Supreme Courts of the colony for any crime or offence, such assessors being entitled to deliberate and vote with such judges upon the final judgment to be pronounced in every such criminal case.

And whereas it was further provided that assessors shall be liable to be challenged on such and like grounds as may be alleged as lawful grounds of challenge against any petit juror impanelled for the trial of any indictment in England:

And whereas the number of persons to be elected, chosen, and appointed to serve as assessors must be sufficient to provide for cases of challenges held to be valid:

Cl. 1. Be it therefore enacted, that there shall be for the Supreme Criminal Court of Demerara and Essequibo a number of twelve assessors, and for the Supreme Criminal Court of Berbice a like number of twelve assessors.

2. And be it further enacted, that the right to elect assessors is and shall be vested in the College of Kiezers of British Guiana, and in the exercise of this right the college shall be bound to make a double nomination of persons for the office of assessor, to be transmitted through the hands of His Excellency the Governor to the judges of the Supreme Court, and that it shall be lawful for the said judges to select one of

the persons nominated to serve as an assessor, and the like form shall be observed on each and every occasion of a vacancy occurring in the complement of the said assessors for the said courts respectively.

3. And be it further enacted, that notification shall be sent by the secretary of the Court of Justice to each person who shall be selected in manner aforesaid, and in case of any person who shall have been selected for an assessor refusing to accept the office, or neglecting to signify his acceptance by written communication delivered to the secretary aforesaid, within fourteen days from the date of notification, such person shall be liable to a fine of 1,500 guilders in behalf of the colony, and the judges of the Supreme Court shall certify to the Governor and Court of Policy that such a fine has been incurred, whereupon, unless good and valid reason for such non-acceptance or neglect be shewn to the satisfaction of the Governor and Court of Policy, the said court shall order and direct the Colonial Receiver to proceed for the fine according to law.

4. And be it further enacted, that each and every person who shall be selected in manner aforesaid to serve as an assessor, shall, within the period of one week from the expiration of the term of fourteen days allowed to signify his acceptance of office, and whose acceptance shall have been notified to the secretary, or within such period of fourteen days if he shall have accepted the office and desires to be sworn, appear before His Excellency the Governor, the Chief Justice or one of the Puisne Judges of the Supreme Court, and take and subscribe the following oath :

"You shall faithfully and truly discharge the duties of an assessor in the Supreme Court of Criminal Justice for Demerara and Essequeibo (or for Berbice, as the case may be), and shall deliberate and vote on the final judgment to be passed on all criminal trials on which you may sit, without partiality, favour, or affection. So help you God."

After which his appointment shall be publicly notified in the Royal Gazette of the colony; His Excellency the Governor or one of the judges being, nevertheless, empowered to extend the time for taking such oath, if sufficient reasons be alleged to either of them to grant such extension of time.

5. And be it further enacted, that the Puisne Judges of the Supreme Court shall have the same power to administer oaths in all cases, civil and criminal, as the Presiding Judge of the Court of Justice, styled under the said Order in Council the Chief Justice, now has, and heretofore had.

6. And be it further enacted, that it shall be the duty of each and every assessor to attend the sittings at each session of the Supreme Criminal Court; those assessors who are appointed for the Supreme Court of Demerara and Essequeibo to attend the sittings to be held in George Town, and those assessors who are appointed for the Supreme Court at Berbice to attend the sittings in New Amsterdam respectively; and the proclamations of His Excellency the Governor for the time being in the Royal Gazette of British Guiana, appointing the time of holding such sessions respectively, shall be due and sufficient notice to all such assessors.

7. And be it further enacted, that previous to the bringing up of any person for trial, the names of all the assessors who may be in office for the time being, in the aforesaid jurisdictions respectively, written on similar pieces of paper, shall be placed in a box by the secretary of the Supreme Courts respectively, to be drawn therefrom in succession by the second puisne judge, and after three assessors are found to whom there is no legal ground of challenge or objection, the trial shall proceed.

And that no ignorance may be pretended of the several orders contained in this ordinance, these presents shall be published, affixed, and sent round for general information.

There were two other clauses in this ordinance, but they have been repealed by the following ordinance :—

An Ordinance passed by the Governor and Court of Policy on the 23d day of August, 1832, to amend an Ordinance entitled "An Ordinance to provide a sufficient number of Assessors to be associated with the Judges of the Supreme Court of Criminal Justice of British Guiana."

Whereas we have deemed it expedient to amend an ordinance enacted on the 21st December, 1831, and published on the 22d following, intituled "An Ordinance to provide a sufficient number of Assessors to be associated with the Judges of the Supreme Court of Criminal Justice of British Guiana :"

Be it therefore enacted that the 8th and 9th clauses of the said ordinance are hereby amended to the effect—that instead of the said clauses, the following shall be and are hereby substituted in lieu thereof respectively :—

Cl. 8. And be it further enacted, that if any person, who having been appointed an assessor and whose name having been drawn as already prescribed in clause 7, shall not be present to answer thereto, or shall decline to sit as an assessor on any such trial, he shall be liable to a fine of 100 guilders, unless good and sufficient cause be shewn to the satisfaction of the judges that such assessor is absent from unavoidable cause, or has good reason for declining to sit on such trial; and the judges shall, when they see fit, certify to His Excellency the Governor, that such fine or fines has or have been incurred; and His Excellency may thereupon, if he see fit, either grant authority to the colonial receiver to proceed by summary execution for the recovery of the said fine or fines, or submit the consideration of this proceeding to the Honourable Court of Policy.

9. And be it further enacted, that each assessor shall be liable to serve two years, and until the session is closed in which such two years may expire, should the same take place during any such session; and after having served for such period of two years, shall not be compellable to accept the office of assessor, until after the expiration of two years from the end of such service, provided nevertheless, that any person who has been elected and accepted the office of assessor may, at any time during such period of two years, be relieved from further service on payment of a fine of 1,500f., or may apply by petition to the Governor and Court of Policy to be relieved from such further service without the payment of such fine, and it shall be competent to the Governor and Court of Policy, on good and valid reasons being adduced, to relieve such person from

such further service. But any person elected an assessor, and who may have paid the fine, shall be liable to be re-elected and to serve at the expiration of two years from the period of his former election.

And that no ignorance may be pretended of the several orders contained in this ordinance, these presents shall be published, affixed, and sent round for general information.

D.—THE FALKLAND ISLANDS. [See Book II. page 142.]

In consequence of the desire now so generally evinced to settle permanently these islands, and their eligibility as penal settlements being very apparent, the following information is given in addition to that contained in Book II.—South America. (These documents and many others relating to the subject have been placed in my hands by Henry Moreing, Esq., a gentleman well qualified for carrying into effect his sound views as to the eligibility of the Falkland Islands for a penal settlement):—

The Falkland Islands, called the Malouine by the French, and the Maloina Islands by the Spaniards, from their pretended discovery by Bouchesne de Gouin, a native of St. Malo's, are situated between lat. 52. 26., and 51. 6. South, and long. from London 57. to 61. 30. west. They are very numerous; being stated by some persons to be 300 and by others 90 in number; most of them are very small; but two, called generally east and west Falkland Islands, are large; the former being about 80 miles long by 50 broad, and the latter 100 by 50.

These islands were first discovered by Captain Davis, who sailed under the command of Sir Thomas Cavendish, in 1592; but he was too much distressed at the time to make any particular observations on them, nor did he even give them a name, which was reserved for Sir Richard Hawkins to do; who having two years after, again discovered them, called them Hawkins's Maiden Land. In 1598, Sebald de Waert who commanded one of Van Nooi's squadrons, fell in with these islands, and imagining himself to be the discoverer, called them after himself, the Sebaldine Islands, and by this name they were placed in the maps. For upwards of a century no further notice of this land is to be found until in 1689, Captain Strong, whose M.S. Journal is in the British Museum (ad. M. S. Cotton, 672), in his voyage to the south sea, met with, and gave them their present name in honour of the then Lord Falkland. Dampier and various other navigators subsequently touched at them, but appear to have considered them of too little importance to merit an accurate description.

Lord Anson's "voyage" first publicly pointed out the great importance it would be of to England to have a friendly port and place of refreshment for her ships nearer to the south than the Brazils. The editor of the "voyage" enters very fully into the subject, and every argument there made use of applies as strongly to the present day, as when it was written. We find that soon after his Lordship was placed at the head of the Admiralty, preparations were made for sending out a frigate to examine with precision the state and condition of these islands; but from some cause or other the expedition never sailed. The design of an establishment on or near the coast of Patagonia was not, however, then a new scheme; Charles the 2nd was fully alive to its advantages, and had despatched Sir John Narborough at his own expense to carry it into effect. The Dutch also long before had attempted to make a settlement in this quarter, but failed for want of proper information. It was not until 1764, or 172 years after we had discovered the islands, that active measures were taken to settle them. In that year, Commodore Byron was sent out for that purpose by Lord Egmont, but after formally taking possession and surveying the harbours, January 1765, he sailed without leaving any one in them.

About the same time, or rather a little before, a spirit of adventure had arisen in France directed to the south sea, and Mons. de Bougainville was encouraged by the French government to undertake at his own expence the colonization of the Falkland, or as they called them, the Malouine Islands.

The jealous policy of the Spaniards could not see a foreign settlement so near the coast of South America without uneasiness; they accordingly set up a claim to these islands, under the pretence that they had been discovered by Americus Vespucci, and in 1766, Monsr. de Bougainville, having received a very large sum of money to compensate him for the expence incurred, the French settlers returned to France, and their places were occupied by some Spanish troops commanded by a Colonel Catani. The same year the first establishment by the British was formed at Port Egmont, on the western island, by Captain Macbride, and what is very singular, the two colonies seem to have gone on until 1770, a period of four years without either having been aware of the others vicinity; or at any rate without any communication. However in February 1770, two Spanish frigates arrived at Port Egmont, the commanding officer of which expressed much surprise at seeing the English flag flying, and protested against the occupation, at the same time stating that he would refrain from any other mode of proceeding until he had acquainted his Catholic Majesty with the disagreeable transaction.

These vessels were followed on the 4th of June by a fleet of five frigates having 1,700 troops on board and the English were ordered by the commander of the expedition, Don Ignacia Madariaga, immediately to depart from that port, and totally to evacuate all the islands known by the name of Falklands. The Favourite sloop of sixteen guns, with the crew of the Swift, which had been lost, forming our whole force on the station, were obliged after a show of resistance to capitulate to so superior an armament, and on the 10th of June, articles were signed by the respective commanders, by which the English were permitted to depart, taking with them as many stores as they could carry, and receiving receipts for the rest, for which the Spanish Governor of Port Solidad became answerable. These proceedings excited a great sensation in England, and very decided measures were taken to avenge the affront which had in a time of peace been offered to our flag. Party spirit ran high on the occasion, and the subject gave rise to some brilliant debates, in both Houses of Parliament. An address was moved for and carried in the House of Lords on the restoration of the islands to Great Britain, and a long and able protest against leaving open the question of sovereignty was drawn up and signed by Lord Chatham, the Dukes of Richmond and Devonshire, and 15 other Peers.

War, for which great preparations had been made, was however averted by the acceptance by the Ministry, of a declaration dated June 22nd 1771, and signed by the Prince de Maserano, the Spanish Ambassador, in which the violence complained of was disavowed by the Spanish government, and restoration of the islands agreed to [see next page]. We accordingly again took possession, and the Spaniards returned to Buenos Ayres; we subsequently abandoned the settlement as useless on the 20th March 1774, leaving the following inscription engraved on a piece of lead affixed to a conspicuous object:

"Be it known to all Nations that Falkland Islands with this Fort, the storehouses, wharf, harbours, bay, and creeks thereunto belonging, are the sole right and property of His Most Sacred Majesty George the Third, King of Great Britain, France, and Ireland, Defender of the Faith, &c.; in witness whereof this Plate is set up, and His Britannick Majesty's Colours left flying as a mark of possession by S. W. Clayton, commanding officer at Falkland Islands, A. D. 1774."

From this time until 1820, a period of forty-six years during which the most extraordinary changes had taken place in every part of the world but particularly in the neighbouring continent, nothing further is to be found mentioned of the Falkland Islands. Sealers and whaling vessels of various nations seem occasionally to have touched there, attracted by the immense herds of cattle (which had wonderfully increased from a few left by the Spaniards) and by the numerous marine animals on the coasts, but claim to the sovereignty of the islands was not disputed until the period above mentioned; when Captain Weddell an intelligent commander engaged in a whaling voyage, while laying at Port Egmont received a letter from the Commander of a South American Patriot National frigate named the *Heroine*, saying that the "Supreme government of the United Provinces of South America, had taken possession of these islands in the name of the country to which they naturally appertain."

This communication if made known to our government met with no attention, and in 1825 the Buenos-Ayrien government proceeded to assign to a German named Louis Vernet the whole of the eastern island with all its cattle and produce as well as the neighbouring island called Staten island in perpetuity upon condition of his discharging certain arrears of pay which had accrued to some military officers in the patriot service. Vernet who appears to have embarked considerable capital in the speculation, took possession of this grant and for five or six years carried on a profitable trade in hides, oil, salt fish, &c. He endeavoured to encourage settlers, and divided the island into eleven sections, which he offered for sale, one was purchased for a small sum by a Mr. Langdon.

Don Vernet (so called) at length rather injudiciously exercised the powers which he had conferred upon himself. In 1831 in virtue of his authority as owner, governor, and commander-in-chief of the island he took upon him to seize some American vessels, which had contravened his territorial or maritime regulations, and carried them to Buenos Ayres for adjudication. They were condemned, and a garrison placed at Port Louis, this proceeding leading to an angry remonstrance and a claim to the Falkland islands, nearly caused hostilities between the two republics. While the dispute was at its height, Jan. 1833, the English government settled the question by sending the *Clio*, Commander Onslow, to take possession of the islands on our account, and to remove any strangers who might be located there. The wrath of the Argentine rulers was turned from Washington to St. James's, and very strong language used on the subject; but as Lord Palmerston continued firm in his views on the subject, the Cabinet of Buenos Ayres did not think it prudent to withdraw its envoy or come to a rupture, and an English vessel of war has ever since continued on that station.

This short account (in addition to the statements at Chapter III. page 142) will serve to point out the high estimation in which these islands are held by all nations as a port of shelter for their ships. Our rising empire in Australia places us in the position occupied by the Spaniards previous to the revolt of their South American colonies, and every motive which could operate as an inducement to them to occupy the Falklands by violence and the risk of war, becomes of double weight in our case from the isolated position and greater distance of our colonies.

A single glance at the map will suffice to shew the advantages of their situation. In the direct track of our ships—as nearly as possible half way between New South Wales and the mother country—in a boisterous latitude—with numerous and admirable harbours—they seem placed by nature for our especial use. Weddell gives the following latitudes and longitudes:—*Ship Harbour, New Island*, lat. 51. 42. 36. long. 61. 9. *West Point Harbour*, lat. 51. 24. 15. long. 60. 36. 30. *Port Louis*, lat. 51. 32. long. 58. 3. 30.

It unfortunately happens that almost every published account which we have of this spot has been written to serve a purpose, and must be looked at with suspicion. The first detailed description of the Falklands to be met with is by Dom Pernetty, an ecclesiastic, who accompanied De Bougainville. The next is given by De Bougainville himself, in his account of his voyage round the world. Both these accounts were written after the French had given up the islands, and are evidently intended to reconcile the Spaniards to their purchase.

In the present century, the only persons who have written on the Falklands are three captains of whalers. Weddell, an Englishman, in 1825; and Murrell and Fanning, Americans, in 1832 and 1833.

Weddell, who passed two winters among the islands, says but little about the soil or climate, confining himself principally to an account of the harbours; but supposes the seasons to be much milder than they were forty years ago, which he attributes to the immense bodies of ice then found in 50. S. lat. having now almost entirely disappeared.

Morrell says "It is my opinion that something might be made of these islands; the soil is good, clear of rocks, and susceptible of easy tillage, and high cultivation. Luxuriant meadows in the interior afford excellent grazing for cattle all the year round. Though destitute of trees, there is no want of fuel, the low ground producing an abundance of excellent peat or turf, which burns well. The climate is temperate and salubrious, free from the extremes of heat or cold, though subject to frequent rains and storms of wind."

It will be apparent from these accounts that no obstacles of sufficient importance present themselves to prevent the successful formation of a penal settlement at the Falkland Isles; on the contrary, every circum-

stance seems to point out the peculiar eligibility of the Falklands for this purpose. They combine in themselves almost all the advantages, without any of the inconveniences which attach to Norfolk Island and Tasman's Peninsula, the two places recommended by the Select Committee on Transportation to be chosen as the spots on which to carry into effect their views on this important subject. Their healthiness is undoubted; while their comparative proximity to England, the total absence of inhabitants, the great abundance of cattle existing on them, and their insular position and limited extent, offer inducements to their occupation as an asylum for unfortunate criminals not to be met with in any other quarter of the globe. In fact there is no reason why these islands might not, under judicious management, become, as well as a great self-supporting penitentiary, a source of profit to the country, and an incalculable benefit to commerce. As the Eastern and Western Islands are 12 miles apart, the one island might be made a place of stricter discipline than the other; and a removal from the one station to the other be a source of punishment or reward to the prisoners. There is abundance of building stone; and wood may be obtained in any quantities, and adapted for every purpose, at Staten Island and on the shores of the Straits of Magellan. Water abounds of excellent quality, and admirably situated for the construction of mills. The coast teems with fish, of which large quantities have been exported dried; and amphibious animals and whales yield oil and whalebone to a vast extent. Every circumstance therefore combines to favour the immediate colonization of these islands.

EXTRACTS FROM STATE PAPERS.

Extract of a Letter from Captain George Farmer to Mr. Stephens, dated on board the "Favourite," September 2, 1770.

Sir,—The 4th of June, the "Industry," a Spanish frigate, anchored in Port Egmont Harbour, having been, they said, 53 days from Buenos Ayres, put in for water, and bound to Port Soledad. On the 7th, anchored here four Spanish frigates, which had been 26 days from Buenos Ayres, came out in company with the "Industry," and parted with her four days before. On the arrival of these ships, the "Industry" hoisted a broad pennant. I now ordered most of the officers and men belonging to the late "Swift" on shore to defend the settlement, and ordered Captain Maltby to get the "Favourite" nearer in to Jason's Cove. One of the frigates sent an officer on board to acquaint Captain Maltby that if weighed they would fire into him, which he took no notice of, but got under sail. The Spanish frigate fired two shots, which fell to leeward of the "Favourite." Three of them got under weigh, and kept working to the windward, as did the "Favourite." Captain Maltby sent an officer on board the Spanish commodore to know why one of the ships under his command had fired two shots at the "Favourite." His answer was, they were not fired at the "Favourite," but at signals to him.

Since the first appearance of those ships, I began to clear the stores out of the block-house. The four 12-pounders at the battery were sunk so low in water and mud, that they were entirely useless. I had them transported to the block-house, and had port-holes cut out for them, with a platform before, covered round with the cordage.

We now wrote to the Spanish commodore, desiring, as he had received the refreshments he stood in need of, that he would depart from hence. His answers, with the preparations they were making, left us no doubt of their real intention. The Spanish commodore in one of his letters desired us to send to view the troops that were ready for landing, which we did on the evening of the 9th.

Our officers reported them to be (seamen and all included) about 1,600, with a train of artillery sufficient to reduce a regular fortification, and five frigates from 20 to 32 tons. By this time the frigates had warped in shore, and moored head and stern opposite to the block-house and battery.

At night Captain Maltby, with 50 of the "Favourite's" men, came on shore, and brought with them two six-pounders, swivels, small arms, ammunition, &c. The next morning, a part of the Spanish troops and artillery landed about half a mile to the northward of us. When they had advanced about half way to us from where they had landed, the rest of their boats, with the remainder of the troops and artillery, put off from one of the frigates, and rowed right in for the cove, covered by the fire of the frigates, whose shot went over the block-house.

We fired some shot, and (not seeing the least probability of being able, against such a superior force, to defend the settlement) hoisted a flag of truce, and desired articles of capitulation, which were in part granted. Their troops then landed, and took possession of the place.

I send you by Mr. Gower (late lieutenant of the "Swift"), who goes express, copies of all the letters, articles, and capitulation, receipts, &c. that passed between the Spaniards and us.

I am, &c. &c.

Georg. Farmer.

Copy of a Letter from the Spanish Commodore, John Ignacio Madariaga, to Captain George Farmer, dated in the Bay of Cruisada, 8th June, 1770.

My dear Sir,—Finding myself with incomparable superior forces of troops, train of artillery, utensils, ammunition, and all the rest corresponding, for to reduce a regular fortification, with 1,400 men for disembarking, for which 526 are of choice regular troops, as you may see, I see myself obliged in this case to intimate to you, according to the orders of my court, that you should quit that began establishment; for, if you don't execute it amicably, I will oblige you by force, and you will be answerable for all the ill results of the action and measures I shall take. I am always at your service; pray unto God to preserve you many years.

I kiss your hand, &c. &c.

John Ignacio Madariaga.

Translation of the Declaration signed and delivered by Prince de Maserano Ambassador from His Catholic Majesty, dated 22d January 1771.

His Britannic Majesty having complained of the violence which was committed on the 10th of June 1770, at the island commonly called the great Malouine, and by the English, Falkland's Island, in obliging by force, the commander and subjects of His Britannic Majesty to evacuate the port by them called Egmont, a step offensive to the honor of his Crown; the Prince de Maserano, Ambassador Extraordinary of His Catholic Majesty, has received orders to declare that His Catholic Majesty, considering the desire with which he is animated for peace, and for the maintenance of good harmony with His Britannic Majesty, and reflecting that this event might interrupt it, has seen with displeasure this expedition tending to disturb it; and in the persuasion in which he is, of the reciprocity of sentiments of His Britannic Majesty, and of its being far from his intention to authorize any thing that might disturb the good understanding between the two courts, His Catholic Majesty does disavow the said violent enterprise; and in consequence, the Prince de Maserano declares, that His Catholic Majesty engages to give immediate orders that things shall be restored in the great Malouine, at the port called Egmont, precisely to the state in which they were before the 10th of June 1770, for which purpose His Catholic Majesty will give orders to one of his officers, to deliver up to the officer authorized by His Britannic Majesty, the port and fort called Egmont; with all the artillery, stores and effects of His Britannic Majesty and his subjects, which were at that place on the day above named, agreeable to the inventory which has been made of them.

The Prince de Maserano declares at the same time in the name of the King his master, that the engagement of his said Catholic Majesty to restore to His Britannic Majesty the possession of the port and fort called Egmont, cannot, nor ought, in anywise to affect the question of the prior right of sovereignty of the Malouine Islands, otherwise called Falkland Islands. In witness whereof, I the underwritten, Ambassador Extraordinary, have signed the present declaration with my usual signature, and caused it to be sealed with our arms.

London, the 22d day of January 1771.

(signed)

Le Prince de Maserano.

(L. S.)

APPENDIX III.—NORTH AMERICA.

47

Translation of the Earl of Rockford's Acceptance, dated January 23d, 1791, of the Prince de Maserano's Declaration of the same date.

His Catholic Majesty having authorized the Prince of Maserano, his Ambassador Extraordinary, to offer in His Majesty's name, to the King of Great Britain, a satisfaction for the injury done to His Britannic Majesty, by dispossessing him of the port and fort of Port Egmont; and the said ambassador having this day signed a declaration, which he has just delivered to me, expressing therein, that His Catholic Majesty being desirous to restore the good harmony and friendship which before subsisted between the two crowns, does disavow the expedition against Port Egmont, in which force has been used against His Britannic Majesty's possessions, commander and subjects; and does also engage that all things shall be immediately restored to the precise situation in which they stood before the 10th of June 1770; and that His Catholic Majesty shall give orders in consequence to one of his officers, to deliver up to the officer appointed by His Britannic Majesty, the port and fort of Port Egmont, as also all his Britannic Majesty's artillery, stores and effects, as well as those of his subjects, according to the inventory which has been made of them. And the said ambassador having moreover engaged in His Catholic Majesty's name, that what is contained in the said declaration shall be carried into effect by His said Catholic Majesty, and that duplicates of His Catholic Majesty's orders to his officers shall be delivered into the hands of one his Britannic Majesty's principal secretary of state within six weeks: his said Britannic Majesty, in order to show the friendly disposition on his part, has authorized me to declare, that he will look upon the said declaration of Prince de Maserano, together with the full performance of the said engagement on the part of His Catholic Majesty, as a satisfaction for the injury done to his Crown of Great Britain. In witness whereof, I the undersigned, one of His Britannic Majesty's Principal Secretaries of State, have signed these presents with my usual signature, and have caused them to be sealed with our arms. London, January 23d, 1771.

(signed) *Rockford.* (L. S.)

* For a further statement of the coins circulated in Lower Canada, their weights and value by law, see "Observations on a Metallic Currency," published at Montreal in 1837, p. 5 to 7. Mr. Chapman in his pamphlet on the Money and Exchange of Lower Canada, p. 89, after giving a statement of the coins in circulation, and their values, says, "Calling the whole currency 1,000, no less than 6/1 parts are of the sound thereof, the rest being composed of coins more or less depreciated." See tables of gold and silver coins circulated in Lower Canada, in pages 10 and 11 of Observations upon the Metallic Currency of that Province. These tables are full and elaborate. I refer also to Porter's Tables for the information contained in the Blue Books.

United States.—The gold coins of the following countries are legal tender by weight, viz., Great Britain, Portugal, and Brazil, at 94 8-10th dol. per dwt.; France at 93 1-10th, and Spain at 89 9-10ths. For the sake of comparison, the weights given in the Upper Canada Act are assumed for the British coins, and the weights in the Lower Canada Act, for the other gold coins. The American Eagle, coined before the 1st of July, 1834, although nominally of the value of ten dollars only, sells at a price equal to its excess of weight over the new coinage. Silver dollars, crowns, five franc pieces, and pistareens, are legal tender by tale.

Lower Canada.—The rates given in the table are for gold coins, weighed by the single piece; allowance to be made on every piece weighing more or less than the given standard, at 2½*d.* currency per grain, if British, Portuguese, or American, and 2 1-5th*d.* cy. per grain, if French or Spanish. In payments above 20*l.* cy., in gold coins, either party may require it to

be weighed in bulk, at 89*s.* cy., per ounce troy, for British, Portuguese, or American; and 87*s.* 8½*d.* cy. per ounce, for French and Spanish, deducting half a grain for each piece so weighed, to compensate the receiver for the loss in re-weighing separately. The currency law was passed prior to the coinage of Sovereigns and new Eagles. The silver coins are rated by tale. All the higher and lower denominations of gold and silver coin rated above are to be received in their respective proportions.

Upper Canada.—Gold and silver coins, if depreciated in weight more than one-twenty-fifth part of their full weight, not to be legal money, with this proviso, they are receivable by tale. All the higher and lower denominations of rated gold and silver coins are to be received in their respective proportions. The act is to remain in force until the 20th of April, 1840, and to the end of the then next ensuing session of the Provincial Parliament.

having expired on the 31st of December, 1835, I have inserted the rates at which coins are received and paid at the Colonial Treasury by virtue of the Acts 6 Wm. IV. cap. 32 and 41, and which are generally adopted in mercantile transactions; the banks, however, refuse to receive British silver at the excessive rates given above. About 57,000*l.* in notes (principally of 1*l.* each) issued by the Province Treasury are in circulation, and as they are not redeemable in specie, they are at a discount in the adjoining province; their credit and circulation are supported in Nova Scotia, by their being receivable in payment of provincial duties, and by an act of the legislature which prohibits the issue of any other notes of less denomination than 5*l.*

New Brunswick.—British gold and silver coins are not specifically rated by the currency law of this province, and they are inserted in the table at one-ninth more than their sterling value, being the only rate at which they are legal tender. A bill was introduced into the Provincial Legislature in the Session of 1837, fixing a rate on the sovereign, but I do not know whether it has received the royal assent. The dollar and its aliquot parts, and the French crown, are all legalized by tale, but not the half-crown.

Prince Edward Island. There is no specific regulation of the currency in the island, the British coins are consequently inserted at one-ninth more than their sterling value. The money of account has been depreciated by the issue of irredeemable treasury notes, which are in circulation to the extent of 14,500*l.*, and pass at the rate of 30*s.* to 20*s.* in British coin. These notes have been sold by auction in Halifax at 11*s.* Halifax currency per pound.

Newfoundland.—I am indebted to Thomas H. Brooking, Esquire, of London, for the following information upon the currency of this island. From his mercantile intelligence, his local knowledge, and long familiarity with the domestic trade and foreign relations of that island, I am glad to refer to his valuable authority for the following facts:—

"The currency of this island is composed chiefly, almost entirely, of Spanish dollars, which circulate at the rate of 5*s.* each; their sterling value being fixed under a treasury order at 4*s.* 4*d.* each. (To shew the unsoundness of this standard, the fictitious sterling value which the dollar has received, the following additional extract from the letter of Com.-gen. Routh is given:—

"The current value of the Spanish dollar in the colonies having been rated at the English mint price of silver, and that price being 2*d.* per ounce more than the market price, has been obviously over valued at 4 per cent,—what is really worth 4*s.* 2*d.* in England paid 4*s.* 4*d.*, in the colonies, equally as well as 4*s.* 4*d.* British money, which conventionally passes for, and in point of fact can only be had in England in exchange for a value equivalent to 4*s.* 4*d.*")

The difference between the two is 15*l.* 7*s.* 8*d.* per cent., and this is considered to be the par of exchange. To reduce the currency to sterling, two-fifteenths are deducted; to advance sterling to currency, two-thirtieths are added. Doubletons have been recently introduced to some extent, and although not generally received, their value may be stated at 76*s.* 6*d.* currency, or 66*s.* sterling. Bills of exchange are bought at a premium, which, supposing it to be quoted at 20 per cent., would require 480 dollars to pay for a bill of 100*l.* sterling, and I refer to this as the most simple method of computing the rate of exchange in Newfoundland. With reference to the money of account,

it may be said generally, that all transactions and contracts between merchants, dealers, planters, tradesmen, fishermen, servants, &c., are kept in currency—say four Spanish dollars for one pound. Small coins are extremely scarce, and change in consequence difficult to be met with in sufficient quantity to meet the demand and carry on the ordinary business of life. Fractional parts of dollars, in proportion to the value of the whole dollar, and British silver, circulate generally; the latter at the following rates:—the sixpenny piece at 7*d.*, the shilling at 1*s.* 2*d.*, sometimes 1*s.* 3*d.*, and the half-crown at 2*s.* 9*d.* or 3*s.*, according to the demand. They have no fixed rate, so far as I know. There is thus great irregularity in the currency of the island, and the mode of transacting ordinary business is fraught with serious and inconvenient anomalies. The introduction of a sound standard, and uniformity in its monetary affairs, would be productive of many benefits in this valuable dependency of the Crown."

N.—Grants and Sales to Individuals exceeding 5,000 acres, with names of township and grantee, number of acres, and date of the patent.

Tract of land to the south of Chaleur Bay and mouth of the River Caraqueet in Nova Scotia; John Martieth; 20,000 acres; 10th February, 1764. Tract of land adjoining the River des Loups; Richard Murray and Malcolm Fraser; 6,000 acres; 7th May, 1766. Potton, Lauchlan M'Lean, 6,000 acres, 31st October, 1797. Eaton, Isaac Ogden, 6,000 acres, 1st March, 1804. Westbury, Henry Caldwell, 12,000 acres, 13th March, 1804. Sherrington, Francois Baby, 7,600 acres, 22nd February, 1809. Ditto; Jacob Mountain, Lord Bishop of Quebec; 7,800 acres; 22nd February, 1809. Stanstead, Barnston, and Compton; Sir Robert Shore Milnes, Lieut.-governor; 48,062 acres; 12th March, 1810. Godmanchester; Robert Ellice, in trust for himself and the heirs of the late Alexander Ellice; 25,592 acres; 10th May, 1811. Leeds, George Hamilton, Esq., 7,900 acres, 7th December, 1812. Durham; Eleanor Bernie, widow of the late Arthur Davidson, Esq.; 11,600 acres; 3rd April, 1815. Ditto, Hon. J. Richardson, Esq., 29,800 acres, 7th December, 1815. Stukely, Hon. Thomas Dunn, 11,600 acres, 17th May, 1816. Ely, Isaac W. Clarke, Esq., 11,000 acres, 18th May, 1816. Potton and Sutton, William Osgood, Esq., 12,000 acres, 16th May, 1817. Ascot, Hon. W. B. Felton, 5,200 acres, 31st May, 1824. Brandon, Edward Antrobus, 9,700 acres, 8th January, 1827. Granby, Shefford, Stukely, Hatley, Compton, Barnston, Stanstead and Shipton; François Languedoc, 9,000 acres, 30th June, 1827. Jersey, Edward Bowen, Esq., 5,200 acres, 21st July, 1829. Ascot, Brompton, Hatley, and Orford, Hon. W. B. Felton, Esq., 5,013 acres, 20th November, 1830.

For many years subsequent to 1796 a practice obtained of granting large blocks of the waste lands of the Crown to a leader and associates, as it was termed. In many of these cases, it is believed that the names of the associates were only introduced for the purpose of augmenting the grant to the leader; they having previously arranged with him, for some trifling consideration, to relinquish their shares after the issue of the letters patent, by which means the leader became possessed of the whole grant.

It is therefore apparent that this return cannot convey a correct idea of the number of persons who have acquired grants from the Crown exceeding 5,000 acres, nor is it possible from the records of this office to give a correct statement of the grants over 5,000 acres which have been thus obtained.

P.—Memora Receiver-Lods et V Domain.

Average of tober, 1827, tober, 1822,

It is, I believe, generally known that the leaders of townships, or parts of townships, in many instances, did take a reconveyance from their associates to the extent of 1,000 acres, in consideration of the expenses incurred and borne solely by the leaders, for surveys and patent fees, upon the issue of warrants of survey in favour of such leaders and their associates, which warrants were directed by the Governor to His Majesty's surveyor-general of the province, to cause the same to be carried into execution, and contained the condition that all the expenses should be borne by the parties applying. The deputy provincial surveyors, who received the instructions from the surveyor-general's office, to carry those surveys into execution in the field, were also enjoined to transmit to the said office a faithful and exact report of their surveys, with plans and field books of their operations.

Previous, however, to the year 1795 the expenses of survey of the exterior lines of townships were borne conjointly by the Government and the leaders of townships; several of the leaders, however, did not conform to this rule. It is proper here to state, that a township of 10 miles square contains about 44,000 acres of grantable land; and a township of nine miles front by twelve miles depth (being the dimensions of a township fronting on a river) is about 48,000 acres, more or less, according to its locality (exclusive of the usual reservations for crown and clergy); according to which data the townships and parts mentioned in the foregoing list will bear a proportion or nearly so.

S.—General Statement by Districts of the Conceded and Unconceded Lands within the Seigneuries and Fiefs in the Province of Lower Canada.

Districts.	Contents in Arpents.	Quantum of Arpents Conceded.	Remaining Unconceded
Quebec	6181740	2204278	3977462
Three Rivers	1444863	505364	939499
Montreal	3380537	2425400	955137
Total	11007140	5135042	5872098

The first column of this statement is from correct data, and the second and third are calculated from the best general information that could be collected, as well as from correct data in many seigneuries. It appears there remains about the aggregate quantity of 5,872,098 superficial arpents of unconceded land in the three districts, including the whole of the island of Anticosti; but exclusive of that island, about 4,059,098 superficial arpents unconceded, one third part of which quantity, at least, may be considered as unfit for cultivation, and at least seven eighths of the island of Anticosti is considered unarable.

U.—An estimate of the quantity of waste lands in the Province Unserved, of the quantity fit for Cultivation, of the forest and quality of the timber. North of the St. Lawrence, Montreal district; in the country north and east of the Ottawa, from the rear of Grenville to a point about 100 miles above the falls of the Chaudiere, in Hull, extending back from the surveyed tract about 30 miles; about 4,500 square miles of waste lands; quantity fit for cultivation, unknown; quality of timber, principally pine of two sorts red and white; extensive lumbering transactions are carrying on in this tract. A strip of land lying

in the rear of the present townships on the margin of the above-described tract, with the average depth of three quarters of a township, or seven miles and a half, making about fifteen townships; quantity fit for cultivation, 900,000 square miles; quality of timber, mixed timber; some white pine, spruce and hard wood.

South of the St. Lawrence, Quebec district, the country on the river St. John, comprised within the disputed territory; 5,000,000 square miles of waste land; quality of timber, spruce and white pine. In the rear of the seigneuries south of the St. Lawrence,

B B.—General Statement of the Grants of Land made in Nova Scotia from the year 1749 to 1826, showing the reservation of Mines and Minerals to the Crown.

Periods of grants from 1749 to 1752, 12,000 acres of land granted; 500 acres has been escheated; 11,500 acres still held by grant. In some of these grants, mines of gold and silver, precious stones and lapis lazuli are reserved, but in most of them there is no reservation whatever. These grants include the town, suburbs, and peninsula of Halifax. Farm lots on the harbour and vicinity of Halifax.

Periods of grants from 1752 to 1782, 2,890,062 acres of land granted; 1,945,372 has been escheated; 956,690 still held by grant. Mines of gold and silver, precious stones, and lapis lazuli are reserved, and no other. These lands were escheated for the reception of the great bodies of loyalists and disbanded corps, who settled in this province in the years 1783 and 1784, and consisted chiefly of large tracts, situate in the county of Shelburne, Sidney, Pictou, County of Hants, Cumberland, and Halifax.

Periods of grants from 1783 to 1808, 1,873,941 acres of land granted; 206,790 has been escheated, 1,667,151 still held by grant. Mines of gold, silver, lead, copper, and coals are reserved, and no other.

Periods of grants from 1809 to the present time, 1,343,936 acres of land granted; 1,343,936 still held by grant. All mines and minerals of every description are reserved to the crown.

Total amount of acres granted, 6,119,939; ditto has been escheated, 2,152,662; ditto still held by grant, 3,979,277.

C C.—No. of Acres of Land Granted and Ungranted in the North American Colonies. [Estimate by Mr. Bliss.]

From Cape Ray to E. Point of Anticosti	N W 1-4 W	N N W 1-4 W	131	N N W 1-2 W	148

* Variations of the compass, established in 1829 by Captain Bayfield, R. N., in the surveying schooner *Gulnare*, those laid down in the charts being erroneous. Brandy pots 16 $\frac{1}{2}$ deg. W. Island of Bic, 17 $\frac{1}{2}$. Cap Chat, 21. Bay of the Seven Islands, 23. West end of Anticosti, 23 $\frac{1}{2}$. East end of ditto, 24 $\frac{1}{2}$.

A lighthouse has been erected on *Pointe des Monts* (or Cape Monts Pelés), on the north side of the River St. Lawrence, nearly opposite to Cap Chat, the lantern standing 100 feet above the water.

The lighthouse lays with the outermost part of Caribou Point, north 52. east, and south 52 west by compass, and it can be seen over that point and to the eastward of it. Ships approaching the light from the eastward, as they draw towards the Caribou Point, must bring it to bear west by south, they will then be in a good fair way, and if necessary they can near the land by their lead. After passing Caribou Point, and as they draw towards the lighthouse, they must come no nearer than 12 fathoms water to avoid two ledges of rocks, one of which lays E. S. E. from the light, with only 12 feet water on it; the other lays S. W. from the light, and E. S. E. from the western extremity of *Pointe des Monts*, with 16 feet water on it; but these rocks do not lay further from the shore than half a mile at low water.

The lighthouse lays with the west extremity of *Pointe des Monts*, north 64 east, and south 64 west, and distant about one mile; and when ships are to the westward of the Point; the lighthouse is in one with the outermost rocks off the Point; and in the day-time it forms a bold distinct land-mark; and on this line of bearing ships are in the best possible fair way for the general purposes of navigation, whether bound up or down. For any particular purposes of navigation, ships may safely stand to the northward, until the light bears east by north, they will then be drawing near the north land, and when it bears east half north it is time to tack, for when it bears east it will be shut in with the highland, and cannot be seen to the southward of east, and then they will be only one mile from the land, and if they are off Godbut River, *Pointe des Monts* will bear from them east by south two leagues distant. When ships are off St. Nicholas Harbour, and the light bearing east by north, they are in a good fair way from the north land.

The S. W. spitt of Manicougan Great Shoal, the ship and the lighthouse are then all in one line of bearing.

Lighthouse on S. W. Point of Anticosti.—Keeper Lt. Harvey, H. P. Royal Navy. A lighthouse having been erected on the S. W. point of the Island of Anticosti, notice is hereby given that a grand revolving light, on the Argand principle, was shewn thereon, for the first time, on the 25th of August, 1831, and that the said light will continue to be shewn every night from sun-set to sun-rise, from the 25th day of March to the last day of December in each year. When ships are to the eastward of the lighthouse, they may safely stand toward the island until it bears N. N. W. by compass, they will then be in a good fair way, and if they wish to make more free with the land, they can do so by their lead. The land trends from the lighthouse S. E. by south, or nearly so.

Lighthouse on Green Island in the River St. Lawrence, keeper, Mr. Robert Noel Lindsay.—The lantern of the lighthouse on Green Island shows a light every evening from sun-set to sun-rise the next morning, from the 15th day of April to 10th day of December, inclusive; and the following are the bearings of it by compass from the respective places.

Red Island, E. S. E. $\frac{1}{4}$ S.
White Island, E. N. E. $\frac{1}{4}$ E.
Brandy Pots, N. E. by E. $\frac{3}{4}$ E.
Apple Island, W. S. W.
Barque Island, W. S. W. $\frac{1}{4}$ W.

The shoal at the N. E. end of Green Island, S. W. $\frac{1}{4}$ S.

The shoal at the west end of Green Island, N. E. $\frac{3}{4}$ E.

Lower Canada Lighthouse fees in 1833.—For vessels going to Three Rivers or Montreal, of 100 to 150 tons inclusive, 2*l*. currency; of 151 to 201 tons inclusive, 3*l*. do.; of 201 tons to 250 inclusive, 4*l*. do.; of 251 tons and upwards, 5*l*. do.

On settling with pilots, masters or commanders of

vessels, or one shilling to be paid Naval Officer by law, unless the relief is given.

Rates of 1833.—From to the 30th of May to from 3*l*. : from 1*l*. 8*s*.

Rates of pilot, water and poundage of pilot money are payable at the Naval Office, by masters and commanders of vessels, viz:—

For every foot of water, for which masters or commanders of vessels are bound to pay their pilots from Bic to Quebec, and from Quebec to Bic, 2*s.* 6*d.* currency per foot.

II.—LIGHTHOUSES ON NOVA SCOTIA AND NEW BRUNSWICK SHORES.

Cape Sable Seal Island light.—The first light in approaching the Bay of Fundy, is on the south point of the Seal Island. This light is elevated about 80 ft. above high water-mark, and may be seen in approaching the island from any point of the compass. A very dangerous rock, under water, but upon which the sea always breaks, called the Blonde Rock, is about two miles S. S. W. by compass, from the lighthouse. Between this rock and the island there are some dangers, the ground is rocky throughout, and large vessels, therefore, ought not to attempt passing between them.

Bryer Island Light.—In advancing up the bay, the next light is situated on Bryer Island, about half a mile N. E. from the N. W. point thereof, with an improved lantern and lamp; this light, therefore, will be much more beneficial to the trade of the bay than formerly.

Annapolis Gut light.—The next light on the coast of Nova Scotia is placed at the west side of the Gut of Annapolis, from Bryer Island north-eastward; this coast is very bold, and not indented; this light is, therefore, chiefly intended as a guide into Annapolis Basin.

Gannet Rock light.—This light bears from the light on Bryer Island N. W. half west, 21 miles. It is intended to warn ships of their approach to a very dangerous range of shoals and edges, which extend from the Old Proprietor to the Seal Island, off Machins, a distance of about 20 miles. Bearings of Gannet Rock lighthouse. *To the Old Proprietor*, which dries at three-quarters ebb (very dangerous), east by north a quarter north, seven miles. *To the Black Rock* (always above water 25 feet), off White Head, N. E. a quarter E. *To the S. W. head of Grand Manan* N. W. half north. *To the northernmost of the Murr Ledges*, dry at two-thirds ebb, N. W. by west a quarter west. *To the southernmost of ditto*, called St. Mary's Ledge, always out of water, S. W. by west half west. *Machin's Seal Island lights*, distant about 13 miles north by north a quarter north.

Note.—Between the northernmost and southernmost of the Murr Ledges, there is a range of dangerous rocks and shoals, many of them always above water, and which extend westward from the lighthouse about four miles; from this range, farther westerly, about three miles, lies a dangerous breaker called the Roaring Bull: this may be avoided by keeping three remarkable headlands near the S. W. end of Grand Manan open.

The red glass having been removed from the lantern, this light is now a bright white one.

Head Harbour light.—Next in order after passing Grand Manan is Head Harbour light. This is placed on the N. E. extremity of *Campo Bello*, and is a guide to vessels entering the main channel to *West Isles*, *Moose Island*, and the *Inner Bay of Passamaquoddy*; it enables vessels also at all times to enter Head Harbour.

Point le Preau lights.—Upon this projecting headland two lights have lately been placed, one above the other, and distant eighteen feet. Both lights may be seen from every point of the compass, where they may be useful.

Partridge Island lights.—This light at the entrance of the River and Harbour of St. John, having been established upwards of forty years, require no particular notice.

Beacon light.—Within Partridge Island and upon a spit, or bar, which extends about half a mile S. S. E. from Sand Point, and which dries at two-thirds ebb, stands the Beacon Tower. Upon this tower a light is established which is eminently useful to the coasting trade of St. John, and to all other vessels having pilots on board, as it enables them to enter the harbour at all hours of the night.

West Quoddy light.—This is an American light, and is placed on the west side of the entrance into the St. Croix, by *Lubec* and *Eastport*; a new lighthouse has lately been erected here, and the light much improved.

Two fixed lights upon the Machin's Seal Island were put into operation in October last; they are elevated about 45 above high water and bear from each other E. S. E. and W. N. W., distant 200 feet, by which they will be immediately distinguished from all other lights upon the coast (British or American); the following are the bearings from them, viz:—*To the southernmost Murr Ledge* (St. Mary's) E. S. E. easterly. *To the Gannet Rock light* east by south a quarter, thirteen miles. *To the southern head of Grand Manan* east by north half north. *To the northern ditto* N. E. half east. *To the North-east Rock*, distant two miles, N. E. by north. *To the Little River Head* north by west. *To the Libby Island lighthouse* (American) N. W. by west. Vessels in standing in to the northward, between these lights and the Gannet Rock, should tack, or haul off the moment they bring these lights in one, as they will then be not more than three quarters of a mile from the Murr Ledges, if more than five miles to the eastward of the light.

The commissioners of lighthouses for Nova Scotia, under date of the 30th of October, 1832, gave notice, that the lighthouse building on Low Point, at the entrance of Sydney Harbour, Cape Breton, would be finished on the 1st of November, and lighted in or about the 15th of that month. It would be a fixed light on the east point of the entrance of the harbour. A white beacon has been erected on the east head, leading into Louisbourg Harbour, upon the site of the Old French lighthouse, which may be seen at a very considerable distance.

O O.—THE BRITISH AMERICAN LAND COMPANY.

Copy of the agreement concluded between his Majesty's Government and the British American Land Company in the year 1833, with an account of the sums paid by the company under that agreement.

Memorandum of agreement between the Right Honourable Edward Geoffrey Smith Stanley, His Majesty's principal Secretary of State for the colonial department, on behalf of his Majesty's government on the one part; and George Richard Robinson, M.P., governor, Nathaniel Gould, deputy-governor, Patrick Maxwell Stewart, M.P., William Petrie Crawford, Alexander Gillespie, junior, William Inglis, John Kirkland, Edward Wheler Mills, John Shuter, Lewis Stride and James Wilson, the Court of Directors nominated and appointed by the merchants and others who have united together to establish a company for purchasing, improving, settling and disposing of land in his Majesty's colonies and provinces in North America and their dependencies, and for other purposes connected therewith, under the name of the British American Land Company, and intended to be incorporated by royal charter, on the other part.

Whereas the said court of directors having made application to his Majesty's government to sell, grant and convey to the said company, for a valuable consideration, certain lands known by the name of crown reserves, and certain other crown lands situated in the eastern townships of the province of Lower Canada, as the commencement of their operations, and his Majesty's government having acceded to the said application, this memorandum, embodying the terms upon which such sale and grant is to be made, has been concluded between his Majesty's government and the company as follows:

1. Mr. Secretary Stanley, on behalf of his Majesty's government, has agreed to sell, grant and convey to the said company the crown lands and crown reserves hereinafter described, situated in the eastern townships of the province of Lower Canada, in consideration of the sum of money, and upon the terms and conditions hereinafter mentioned, viz.

The whole of the crown lands in the county of Sherbrooke unsurveyed, and as represented on the plan hereto annexed (exclusive of the territory claimed by the United States), supposed to amount to 596,325 acres; the crown reserves and surveyed crown lands in the counties of Sherbrooke, Shefford and Stanstead, supposed to amount in all to 251,336 acres: total, 847,661 acres.

Mr. Stanley is willing to take one entire sum of 120,000*l.* for the whole of these lands, subject to the conditions hereinafter mentioned respecting the clergy reserves; 75,992*l.* to be considered as the purchase-money of the unsurveyed lands 44,008*l.* that of the surveyed lands.

Mr. Stanley considers that he is selling the whole of the before-mentioned crown reserves and surveyed lands at 3*s.* 6*d.* per acre, and somewhat more than 500,000 acres of the unsurveyed land 3*s.* per acre, leaving to the company about 90,000 acres as an allowance for any unavailable land which on survey may be found in the block, and it is distinctly understood that no claim can be admitted hereafter on the ground of lands found unsuitable to the purposes of the company.

2. His Majesty's government, however, excepts from this sale any town lots or sites already laid out or reserved as such (not exceeding in the whole 10,000 acres), which his Majesty's government may, at any time within a period of two years from the date of the charter to be granted to the company, declare its intention to take up; and for all or any lots which may be so taken up a corresponding deduction, at the rate of 3*s.* 6*d.* per acre, shall be made from the amount of the purchase money hereby agreed to be paid by the said company.

The company shall be debarred from selling any town lots or sites already laid out or reserved, without giving intimation to his Majesty's government; and the government on their part shall be bound within a limited period to announce their decision in regard to such lots.

3. If means can be found of legally accomplishing the object, one-seventh of the unsurveyed lands sold in the county of Sherbrooke shall be deemed a sale of clergy reserves, and the purchase money be set apart, amounting to one-seventh of 75,992*l.* or 10,856*l.*, which in that case will not be subject, like the rest, to the condition that one-half be expended in public works and improvements, as hereinafter mentioned in clause 6. But this modification of the sale will be dependent on the practicability of executing this arrangement; and unless its practicability be secured within one twelvemonth from the present date, no such modification shall have effect.

4. One-tenth part of the whole purchase-money (including the portion proposed to be treated as the price of a sale of clergy reserves) shall be paid within 12 months from the date of the charter. The payments of the remaining amount to be completed within 10 years from the same date, and in the meantime to bear interest at the rate of four per cent. per annum; the company, however, having the option of anticipating the whole or any part of the payments.

5. The payments shall be made to such officer, connected with the receipt of the crown revenues in the said province of Lower Canada, as his Majesty's government shall from time to time appoint to receive the same, and a receipt under the hand and seal of such officer, attested by one witness, shall be a good and sufficient discharge to the said company for every sum of money acknowledged in any such receipt to have been received by the officer granting the same. And for obviating any doubt as to the proper officer into whose hands such money is to be paid, notice will be given by his Majesty's government, informing them of the officer who may be appointed to discharge this duty and grant the proper receipts.

And upon producing to the governor-in-chief or officer administering the government of the province a receipt, signed, sealed and attested as abovementioned, a grant will be issued to the said company for such a portion of the lands as may be equivalent to the purchase money actually paid. And every such grant shall be made to the said company gratuitously without any fee of office, demand or duty being due or payable to any public officer for preparing, expediting, sealing and issuing the same.

To prevent unnecessary trouble, the company shall not be entitled to require a grant to be made out for any portion of land less than 5,000 acres.

6. One-half of the money so to be paid by the company shall be expended, at the discretion and on the sole responsibility of His Majesty's Secretary of State, on public works and improvements in that part of the province of Lower Canada in which the land sold to the company is situate. But His Majesty's Government will always be ready to receive any suggestions of the company for expending this moiety. By the terms public works and improvements will be understood canals, bridges, high roads, market-houses, court-houses, school-houses, the erection of churches and parsonage houses, the clearing and improvement of glebe lands, and any other works undertaken and calculated for the common use and benefit of His Majesty's subjects, in contradistinction to works intended for the use and accommodation of private persons.

7. His Majesty's Government will instruct the Governor-in-Chief or officer administering the government of the province of Lower Canada to direct the proper departments of the provincial government to furnish the company with maps and diagrams, showing the situation of the lands hereby agreed to be sold, without any fee of office, demand or duty being due or payable to any public officer for the same; His Majesty's Government will also instruct the Governor-in-Chief or officer administering the government to facilitate the inquiries of the servants of the company.

Signed by Mr. Secretary Stanley, Downing-street.

(signed) *E. G. Stanley.*

Signed by Nathaniel Gould, chairman of a General Court of Proprietors, in pursuance of a resolution passed this day, 1, Freeman's-court, Cornhill, 3d December, 1833.

(signed)

Nathaniel Gould, Depy. Govr.
Chairman of the Court of Proprietors.

Supplementary Article of Agreement between the Right Honourable *Thomas Spring Rice*, His Majesty's Principal Secretary of State for the Colonial Department, on behalf of His Majesty's Government on the one part, and *George Richard Robinson*, M. P., Governor, *Nathaniel Gould* Deputy-governor, *Patrick Maxwell Stewart*, M. P., *John Peter Boileau*, junior, *William Petrie Crawford*, *Russell Ellice*, *Alexander Gillespie*, junior, *John Kirkland*, *Edward Wheeler Mills*, *John Shuter*, *Lewis Stride*, and *James Wilson*, the Court of Directors of the British American Land Company, on behalf of that Company, on the other part.

WITH reference to the sixth article of the memorandum of agreement between His Majesty's Government and the company of the third day of December last, which stipulated that one half of the purchase-money to be paid by the company shall be expended in the public works and improvements therein mentioned; it is further agreed between the parties,

That the company are to prepare, at their own expense and charges, the plans and estimates of the works to be undertaken, whether proposed by Government or the company, and submit the same to the governor or person administering the government of the province of Lower Canada.

If the governor or person administering the government approve of the contemplated undertaking, either as originally submitted or as amended upon consideration, the company will then be authorized by the governor or person administering the government, to expend such sum as may be determined upon under any instructions that may be considered necessary.

The company will thereupon proceed with the undertaking, and on its completion lay before the governor or person administering the government, a statement of the actual expense incurred in effecting it, with the vouchers, and if he is satisfied, the company will then either receive payment of the amount, if there is money in the hands of government belonging to the Improvement Fund, provided by the sixth article of the memorandum of agreement before referred to, or be allowed credit for the amount in the next ensuing payment of the purchase-money, according as it may have been previously arranged. It is understood that the company are to make no charge for or on account of their officers superintending the undertaking, or expending the money in the manner authorized by the governor or person administering the government.

In case of such protracted differences of opinion between the governor or person administering the government and the company, on the mode of laying out the amount to be expended on public works, as shall appear to the governor or person administering the government to render any further attempt to conclude a mutual agreement in the colony useless, the question shall be referred to the Secretary of State, whose decision shall be final.

Signed by Mr. Secretary Spring Rice, Downing-street, 6th August, 1834.

T. Spring Rice.

Signed by Nathaniel Gould, Chairman of a Court of Directors, in pursuance of a resolution to that effect, 4, Barge-yard, Bucklersbury, 6th August, 1834.

Nathaniel Gould, Deputy-Governor,
Chairman of the Court of Directors.

Amount paid by the British American Land Company, under the agreement with His Majesty's Government of 3d December 1833:—

20th March, 1835. First Instalment, without interest, 6,000*l.*; 20th March 1836, second instalment, with two years' interest at four per cent, 6,480*l.*; 20th March 1837, third instalment, with three years' interest at four per cent, 6,720*l.*; total, 19,200*l.*; expended by the company on public works within their land, in conformity with the supplementary article of 6th August, 1834, 15,754*l.*; grand total, 34,954*l.*

The above is presumed to be a correct statement of the sums paid by the British American Land Company. As, however, no late accounts on the subject have been received from the Earl of Gosford, His Lordship has been directed to furnish a report forthwith.

Downing-street, 1st April 1837.

The British American Land Company has its location in the Eastern Townships, or English Lower Canada, which, situated on the south side of the St. Lawrence, between 45 and 46½ N. lat., and 71 and 73 west long., and divided into eight counties or parts of counties: these again are subdivided into about one hundred thousand townships estimated to contain between five and six millions of acres.

The British American Land Company is incorporated and established by a royal charter, dated at Westminster the 20th March, 1834, and an Act of Parliament, to which the royal assent was given on the 22d May following. The capital of the company is declared in the charter to be 300,000*l.*, held in 6,000 shares of 50*l.* each, but with power to the proprietors to increase it to 600,000*l.*:—of this capital a deposit of 3*l.* per share has been paid by the proprietors, and upon payment of a call of 5*l.* per share, which has been made by the directors, and falling due on the 1st December next, the capital paid up will amount to 48,000*l.* By a clause in the charter the proprietors are to receive interest on the capital advanced by them, at the rate of 4 per cent. per annum.

The objects for which the company has been established, and the powers conferred on it, are declared by the charter; namely, for the purpose of purchasing and cultivating Waste Lands, &c. in Lower Canada, Upper Canada, Nova Scotia, New Brunswick, Prince Edward's Island, and the Island of Newfoundland, in North America, and their Dependencies, and in or upon any such land, to make, erect and build roads, drains, bridges, and other internal communications, houses, schools, chapels, mills, wharfs, and other buildings and works necessary or expedient for the occupation, planting, and profitable cultivation or improvement of any such lands &c., to open, search for, win and work in or under any of their said lands any mines, pits, beds, veins and seams of copper, tin, lead, iron, iron ore, stones, clay and all other ores, minerals, metals, metallic substances, matters and products, other than and except gold and silver, and also other than and except coal and culm, unless such coal and culm should be granted or demised to them at any time or times hereafter by His Majesty, His heirs or successors, or should be by them acquired from any person or persons who should have lawfully consented thereto, &c. &c.

In pursuance of these objects the Company have purchased from His Majesty's Government as the commencement of their undertaking, nearly a million of acres situated in the three most southerly counties of the Eastern Townships, viz. Shefford, Stanstead, and Sherbrooke, and have made arrangements for the sale of the same to settlers already in the country, and to emigrants who intend to proceed to Canada.

The lands offered for sale by the Company are of different descriptions.

1. Crown Reserves and surveyed Lands. 300,000 acres and upwards in the surveyed parts of the counties of Shefford, Stanstead and Sherbrooke.

These lands are situated for the most part in detached lots or farms of 200 acres each, scattered throughout the settled parts of the country, and from their contiguity to villages, mills, shops, schools, and churches, are exceedingly eligible for settlement. In many of the townships, several of these lots lie together, so that settlers and emigrants may purchase larger farms from 400 to upwards of 1,000 acres in extent. Besides these detached lots the Company have for sale several blocks of surveyed land, which are well suited to parties who may be desirous to possess large properties. [See *Colonial Library*, 2d Edition, vol. I., Canada, for a full account of this Company.]

FP.—THE CANADA COMPANY,

is incorporated by Royal Charter, under the provisions of an Act of Parliament passed in 1826, with a subscribed capital of 100,000*l.* sterling.

The company contracted with the government for the purchase of the fine Huron tract, comprising about 1,100,000 acres, and situate on Lake Huron; other lands such as crown reserves, and school and church lands have also been purchased by the company, amounting in the whole to 2,484,413 acres, the total amount of purchase money being 348,680*l.*, of which about 120,000*l.* have been paid up to the 31st December, 1833, and 20,000*l.* is paid annually to Government until the year 1842, when the whole sum will have been liquidated. 45,000*l.* of the purchase money for the Huron tract, is to be expended in improving the company's own lands in the Huron tract, or county.

Nearly half a million of acres of land have been sold by the company, producing 210,000*l.*, upwards of half a million acres have been paid for by the company, and not yet sold, leaving 1,400,000 acres unpaid for, and of course unsold. Not more than 18*l.* has been paid on each share, which is now, however, worth 50*l.* and may be naturally expected to be doubled in a few years, as the colony of Upper Canada advances in prosperity.

The rate at which the company have sold some fine lands in the Huron county in 1834, averaged 7*s.* 8*d.* per acre, and 50,000 acres of crown reserves brought 13*s.* per acre.

The rate at which the Canada Company first purchased land was 3*s.* 6*d.* average per acre, which was then considered high. The terms on which their lands (of which they have allotments in every township in the province) are sold, are one fifth down and the remainder in five annual instalments, bearing five per cent interest.

As witness our hands and seals this day of _____ in the year of our Lord _____.

Or such transfers shall be in some other convenient form, to be devised by the said company. And every such transfer shall be under the hand or hands of the member or members transferring such share or shares, or of some person or persons lawfully authorized by him, her, or them for that purpose, under which transfer the person or persons, bodies politic or corporate, to whom such transfer shall be expressed to be made, or some other person by him, her, or them lawfully authorized, shall sign his, her, or their name or names, signifying the acceptance of such transfer, which said transfer shall be made and entered in a book to be kept by the said Company for that purpose, for which a fee shall be paid to and for the use of the Company, not exceeding ten shillings for each share transferred, to be from time to time fixed by the said Court of Directors, in addition to the stamp duty, payable in respect of such transfer; and that such transfer, so to be executed as aforesaid, shall effect the transfer of such share or shares, and shall convey the whole estate and interest therein of the person or persons so transferring or authorizing the same to be transferred to the person or persons, bodies politic or corporate, so taking or accepting the same, which person or persons, bodies politic or corporate, shall thereby forthwith become in all respects members of the said Company, in respect of such share or shares, in the place of such person or persons so transferring the same, or authorizing the same to be transferred, and that until such transfer shall be made and entered in such book, in manner aforesaid, no person or persons claiming an interest in any such share or shares by purchase or otherwise, shall be deemed the proprietor or proprietors of such share or shares, or shall be entitled to any dividend or beneficial interest in the said capital stock in respect thereof, nor until six calendar months after such transfer shall have been made be entitled to vote at any meeting or meetings as proprietor or proprietors of the said Company in respect of such share or shares, and a copy of such transfer, extracted from the said book wherein the name is made, and entered, and signed by the said clerk, secretary, or other officer of the said Company, duly authorized thereto, shall be sufficient evidence of every such transfer, and be admitted and be received as such.

Provided always, and we do further order, declare, and ordain, that after any call for money shall have been made and become due and payable by virtue of this our charter, no person or persons, bodies politic or corporate, shall sell or transfer any share or shares which he, she, or they shall possess in the said stock of the said Company, until the money so called for in respect of his, her, or their share or shares intended to be sold shall be paid; and until such money so called for shall be paid, any such sale or transfer of any share or shares shall be void, and all and every person and persons, body politic and corporate, making default therein, shall be subject and liable to forfeit such his, her, or their share or shares in the said Company, to and for the general benefit of the said Company, unless he, she, or they shall at the time of such sale or transfer pay to the banker of the said Company, or such person or persons as the Court of Directors, for the time being, shall appoint to receive the same, the full sum of money called for upon every share so to be sold or transferred, such forfeiture nevertheless to be first notified and declared in manner directed by this charter, with respect to forfeiture of shares for not answering the calls to be made thereon as aforesaid.

And we do further declare and ordain, that when any person or persons shall claim any part or share in the said capital or joint stock of the said Company, or the profits thereof, in right of marriage, an affidavit or solemn affirmation by Quakers of such marriage, containing a verified copy of the register of such marriage, or the purport of such register, shall be made and sworn to, or affirmed, or made by some credible person, before one of our justices of the peace, or before a judge of some court of record in the United Kingdom, or in any of our colonies or settlements abroad, or before some person duly qualified to administer an oath in any other country, and shall be delivered to and left with the clerk, secretary, or other proper officer, for the time being, of the said Company, appointed for that purpose, who shall preserve the same and make an entry thereof in the book or books which shall be kept by the said clerk for the entry of transfers and sales of shares in the said Company, before such person or persons shall be entitled to sell or assign any share or shares, or to claim payment of any dividend or dividends in respect thereof, or to vote as the proprietor of such share or shares; and when any person or persons shall claim any part or share in the capital or joint stock of the said Company, or the profits thereof, under or by virtue of any will or bequest or in a course of administration, the probate copy of the will or the letters of administration, in case the proprietor shall have died intestate, shall be produced and shown to the said clerk, secretary, or other officer aforesaid, who shall make an entry of such will, or of so much thereof as shall relate to the disposition of the share or shares of the testator or of the letters of administration, in case the proprietor shall have died intestate before any person or persons shall be entitled to sell and assign such share or shares, or to claim payment of any dividend or dividends in respect thereof.

Provided nevertheless, that no bequest, clause, matter, or thing, in any such will contained, shall bind or affect the said Company with notice of any trust or disposition of any share or shares in the capital or joint stock of the said Company, or the gains and profits thereof, but the registry of every such share or shares shall be in the name or names of the executor or executors, who shall prove the will of such testator, or the administrator or administrators of his effects, whose receipt or receipts to the said Company for the gains and profits thereof, and to any purchaser or purchasers for the amount of the purchase money paid upon the sale and conveyance of such share or shares, shall be good and effectual, and shall bind the cestuique trusts and all other persons claiming in trust or otherwise under such testator.

And we do further declare and ordain, that the Directors hereinafter mentioned, or the Directors for the time being, or such of them as shall be present at and constitute a Court of Directors, or the major part of them, shall have full power to make such call or calls for money from the several subscribers and proprietors for the time being of the said Company, their respective executors, administrators, successors, and assigns, not exceeding in the whole the sum of one hundred pounds on each of the shares of and in the capital stock of the said Company held by him, her, or them respectively, as the said Court of Directors shall from time to time find wanting and necessary for the purposes of the said Company, so that no such call do exceed the sum of ten pounds sterling for or in respect of any one share of one hundred pounds, and so that no call or calls be made but at the distance of three months at least from another, and the sum or the several sums of money so to be called for shall be paid to the bankers of the said Company for the time being, or to such other person or persons and at such time and place as shall be appointed by the said Court of Directors, of which time and place twenty days previous notice at least shall be given in the London Gazette, and in such two or more of the daily London newspapers as the said Court of Directors shall direct.

And we do further declare and ordain, that if any subscriber or any proprietor or proprietors of any share or shares in the said Company, his, her, or their executors, administrators, successors, or assigns, shall neglect or refuse to pay his, her, or their part or portion of the money to be called for by the Court of Directors as aforesaid, during the space of six calendar months next after the time appointed for payment thereof, together with lawful interest from the appointed time of payment, then and in every such case such person or persons, bodies politic or corporate, so neglecting or refusing, shall absolutely forfeit all his, her, or their share or shares in the said company, and all profits and advantages thereof, and all money theretofore advanced by him, her or them on account thereof to and for the use and benefit of the said company; and all shares which shall or may be so forfeited shall or may at any time or times thereafter be sold at a public sale for the most money that can be gotten for the same, and the produce thereof shall go to and make part of the capital stock of the said company: and such share or shares forfeited and sold shall be assigned and transferred to the purchaser by an instrument under the common seal of the said company, in the manner required upon other transfers of any share or shares, but no advantage shall be taken of such forfeiture of any share or shares until the same shall be declared to be forfeited at some general or special meeting of the said proprietors, which shall be held not earlier than six calendar months next after the said forfeiture shall happen, and that every such forfeiture so to be declared shall be an absolute indemnification and discharge to and for the proprietor or proprietors, or his, her, or their executors, administrators, successors and assigns, so forfeiting against all actions, suits, and prosecutions, from all liability in respect thereof, and for any breach of contract or other agreement between such proprietor or proprietors, his, her or their executors, administrators, successors, and assigns, and the said company in respect of such share or shares with regard to the future carrying on and management of the said company.

Making a continual succession of persons to be directors and auditors of the said corporation; we do by these presents, for us, and our heirs, and successors, grant unto the said Company and their successors, and we do hereby ordain and appoint, that there shall be from time to time constituted, in manner hereinafter mentioned, out of the members of the said Company, a Governor and a Deputy-Governor, who shall also be Directors, and sixteen other Directors as hereinafter mentioned, and four Auditors of the said Company, and a Secretary, which Governor, Deputy-Governor, and other Directors, or any five of them, shall constitute and be called a Court of Directors for the ordering, managing, and directing in the manner and under the provisions hereinafter contained the affairs of the said Company; and that the said Charles Bosanquet shall be the first Governor, and the said William Williams shall be the first Deputy Governor, the said Robert Hiddup, Richard Blanshard, Robert Downie, John Easthope, Edward Ellice, John Fullerton, Charles David Gordon, William Hibbert, Junior, John Hodgson, John Hullet, Hart Logan, Simon McGillivray, James Mackillop, John Masterman, Martin Tucker Smith, and Henry Uehorne shall be the first Directors, in addition to the said Charles Bosanquet and William Williams, and that Thomas Starling Benson, Esq., Thomas Poynder, Junior, Esq., Thomas Wilson Esq., and John Woolley, Esq., shall be the first auditors; and that the said Governor, Deputy-Governor, and other directors, and auditors, shall continue in their respective offices until the first Wednesday after the twenty-fifth day of March, which will be in the year of our Lord one thousand eight hundred and twenty-nine, and until others shall be duly elected in their respective offices, unless they or any of them shall sooner die, resign, or become disqualified as hereinafter mentioned, which election shall be had and made in manner hereinafter in that behalf provided, and the persons then so elected to such offices shall be in the places of the first Governor, Deputy-Governor, other Directors, and Auditors.

And we do by these presents further ordain, constitute, and appoint, that it shall be competent to the said Company to manage and conduct the affairs of the said Company in the province of Upper Canada by a board of commissioners, to consist of two or more persons resident in Upper Canada, with such powers and authorities to contract for and bind the Company to such extent and subject to such restrictions as the Court of Directors of the said company shall from time to time determine, and such commissioners shall in all things conform themselves to such directions, regulations, and instructions as shall from time to time be communicated to them by the Court of Directors of the said company, provided always that such restrictions as shall be imposed by the said Court of Directors upon the powers and authorities of the said commissioners to contract for and bind the said company, shall be from time to time publicly made known in the said province, by transmitting a copy of such restrictions to the clerk of the peace of the said province, which the said commissioners are hereby required to do and to certify the same under their hands, which copy the clerk of the peace shall permit all persons to inspect at all reasonable times. And the said commissioners shall from time to time communicate to the said Court of Directors in London, full and particular information of all transactions, acts, deeds, matters, and things concerning the affairs of the said company, or in anywise affecting the same.

And we do further by these presents ordain, will, and appoint, that it shall and may be lawful for all and every the members and shareholders of the said company from time to time to assemble and meet together at any convenient place or places for the choice of their Governor, Deputy-Governor, other Directors, and Auditors, and for making of by-laws, rules, orders, and regulations for the government of the said company, and for other affairs or business concerning the same, twenty-one days previous notice thereof being given by advertisement in the London Gazette and in two or more of the daily London newspapers, and a notice in writing also affixed upon the Royal Exchange of London, at least fourteen days previous to the time appointed for such meeting, and all the members of the said company, or so many of them as shall be so assembled, shall be and be called a General Court of such company, which court shall assemble and meet at such times and in such manner as hereinafter mentioned; and that such meetings being so duly assembled shall, with the assent of the majority of proprietors so assembled, have power to adjourn from time to time as shall be convenient, and that on some day or days between the tenth day of January and the first Wednesday after the 25th day of March inclusive, which shall be in the year of our Lord one thousand eight hundred and twenty-nine, and in every succeeding year there shall be yearly and successively chosen all succeeding directors and auditors of the said company as hereinafter provided, out of the members of the said company, by the majority of the votes of all and every such members of the said company, in General Court assembled, as shall be personally present and of all bodies politic and corporate who may vote by deputation under their common seal at such meeting, who shall be entitled to vote in respect of their shares in the said capital stock of the said company, in the proportions following, that is to say, that every holder of five and less than ten shares in the said capital stock shall be entitled to one vote, every holder of ten and less than twenty shares to two votes, every holder of twenty and less than twenty-five shares to three votes, and every holder of twenty-five shares or upwards to four votes and no more, which succeeding directors and auditors shall severally and respectively continue in their offices to which they shall be so elected for the period and in manner hereinafter provided, and until others shall be duly chosen in their places respectively; and the election of such directors and auditors, at the annual or other elections, shall take place by ballot or in such other mode as shall be determined by any by-law of the company to be made as herein provided, it being hereby ordained and declared, that one-third of the said directors and one of the said auditors shall go out of office in rotation every year, to commence with the said election in the year one thousand eight hundred and twenty-nine, and another election of six directors and one Auditor shall thereupon take place; but nevertheless the directors and auditors so going out of office in rotation for the time being are and shall at all times hereafter be capable of being re-elected to their said offices, or elected to any other offices in the said company if otherwise properly qualified; and in regard that the said rotations cannot take place during the three years, including and commencing with the said year one thousand eight hundred and twenty-nine, the directors and the auditors hereby appointed respectively, who are to go out of office as aforesaid on the first Wednesday after the twenty-fifth day of March of the same three years, shall be ascertained and known by drawing lots for that purpose at any of the meetings of the said directors and auditors respectively, in such fair and proper manner as the said directors shall in their discretion agree to and approve of, so always that the names of the directors to go out by rotation shall be declared, and notice thereof affixed in some conspicuous place in the office of the company at least fourteen days before the day of the annual election for the choice of directors, but the governor or deputy-governor shall not be included in the ballot or list for drawing lots within the years one thousand eight hundred and twenty-nine or one thousand eight hundred and thirty, but shall vacate their offices with the directors, upon whom the lot shall fall to go out of office, in the year one thousand eight hundred and thirty-one, and shall with those directors be re-eligible if otherwise properly qualified, and the governor, deputy-governor, and other directors, or auditors, so from time to time elected and chosen, shall be elected and chosen for the term of three years, unless such governor, deputy-governor, or other director, or auditors, shall be elected in the room of some other governor, deputy-governor, or other director, or auditor dying, resigning, or becoming disqualified, in which case he or they shall be elected for such period or time as the governor, deputy-governor, or other director, or auditor, in whose room or stead he or they were elected, had to serve; provided, nevertheless, that in all cases of a vacancy of governor or deputy governor at the annual or any other election it shall be competent for the proprietors, duly qualified, to elect any of the continuing directors, or any of the directors to be chosen at such election to be governor or deputy-governor, such proprietors declaring and specifying by their vote or ballot the name or names of the person whether a continuing director or directors elected or re-elected at such election, for whom such proprietors vote to be governor and deputy-governor, and if any continuing director or directors shall be chosen governor or deputy-governor, he or they shall be governor or deputy-governor for the period he or they shall have to serve as director at the time of election as governor or deputy-governor; and if any new director or directors shall be chosen governor or deputy-governor, he or they shall be governor or deputy-governor for the period for which he or they shall be chosen at such election; provided also, that the persons who shall have served the said office of director or auditor shall, if otherwise properly qualified, be eligible to be re-chosen to the said office.

And we do further by these presents, for us, our heirs, and successors, grant unto the said company and their successors, and will and ordain, that no person shall at any time be capable of being chosen governor, deputy-governor, or other director, or auditor of the said company, unless he shall at the time of such election be a natural-born or naturalized subject of the United Kingdom, and shall also have in his own name and in his own right twenty-five shares or more of the capital stock of the said company; and that no director or auditor shall continue in his or their respective offices longer than the continuance of such their respective interest in such number of shares in their own names and

rights and to their own uses respectively: and in case any governor, deputy-governor, other director, or auditor shall be in any manner divested of or part with such of his shares as to reduce the same to any lesser number than aforesaid; then the Court of Directors for the time being at their next meeting, when such fact shall be made to appear to them, shall proceed to declare the said respective offices or places of such governor, deputy-governor, other directors, or auditors, so divested of or parting with their said shares as aforesaid, to be vacant, and the said vacancy or vacancies so declared shall be filled up in the same manner as in the case of other vacancies at the general court of the said company, which shall be duly held next after such declaration, and that in every case where any governor, deputy-governor, other director, or auditor shall happen to die or resign his office before the annual election of such officers, the major part of the members of the said company, qualified as aforesaid to be assembled in a general court, shall and may elect and choose any other member or members of the said company qualified as aforesaid, into the office of such governor, deputy-governor, other director, or auditor, that shall so die or resign, which person or persons so to be elected shall continue in his or their said office for such and the like period as the governor, deputy-governor, director, or auditor had to serve, in whose place or stead he shall be so elected.

And we do further ordain and direct, that the want of or failure to elect all or any of the directors to compose a competent Court of Directors, shall not in any manner tend to work the dissolution of the said corporation, but that the general body of members shall and may be lawfully assembled and convened at some day to be fixed by the remaining directors, or the major part of them, for the election of the requisite number of directors in manner hereinafter provided, which directors so elected shall have and continue all powers, privileges, and authorities hereinbefore provided, for the continuance and government of the said corporation.

And we do further, by these presents, ordain, constitute, and appoint, that it shall and may be lawful to and for the said company, by any General Court, to grant such salaries and allowances to be paid to the said governor, deputy-governor, and other directors, and auditors, and secretary of the said company, as may be deemed expedient, provided that circular notices, convening such General Court, shall issue at least one month before such meeting, and which notice shall contain a distinct statement that a motion will be made at such court for the grant of such salaries and allowances.

And we do further will, direct, and appoint, that for the better insuring the good government and prosperity of the said Company, there shall be holden two General Courts of the said Company at the least in each year, sometime in the course of the months of June and December, on a day to be appointed by the Court of Directors, and with such notices as are hereinbefore provided, at which the half-yearly dividends shall be declared; and that if there shall at any time hereafter be a failure of holding a General Court in either of the said months as aforesaid, then and in every such case any three or more of the said directors shall and may (giving such notices as are hereinbefore directed) summon and call a General Court, which shall be holden in the month next ensuing the month in which such general meeting should have been holden as aforesaid, or as soon after as the period of the notice hereby directed will allow.

And we do further, will, direct, and appoint, that, fourteen days before the General Court to be held in the month of December in every year, the accounts of the said company shall be submitted to and audited by the auditors for the time being, or any two of them, and a statement of the income and outgoings of the said company, being the result of such accounts, shall be signed by the said auditors, or any two of them, and laid before the then next meeting of the said Court of Directors.

And further we do, by these presents, direct and appoint, that upon the requisition in writing of any twenty or more of the members of the said company, each having not less than ten shares in the said capital stock, the Court of Directors shall, within twenty-one days after such requisition (and of which such notices shall be given as are hereinbefore directed), summon and call a Special General Court, either for general or special purposes, to be held of the members of the said Company qualified to vote as electors as aforesaid; and, in default of the Court of Directors to summon and call such court, it shall and may be lawful for the said twenty or more members, having such shares as aforesaid, upon fourteen days previous notice by advertisement under their hand in the London Gazette, and in two or more of the daily London newspapers, and by writing affixed on the Royal Exchange in London, to summon and hold a Special General Court, and there to consider and debate upon any business relating to the government or affairs of the said Company; and, in case such Special General Court shall have been convened for any special purpose, then to proceed in such special matter and to come to any determination, or to despatch any business belonging to such special purposes, or otherwise to come to any resolution or resolutions for the further examination into the matters relating to the affairs and government of the said Company; and that it shall and may be lawful, in pursuance of any resolution by the major part of the members composing such Special General Court, to adjourn the same to a day then to be fixed upon, and so from time to time, and that such Special General or adjourned General Court, composed of members qualified as aforesaid, shall be holden finally to determine, by the majority of their voices, upon all resolutions relating to the affairs and government of the said Company. Provided always, that in every such case the requisition and summons for a General Court shall express the purpose thereof.

And we do hereby further, for us, our heirs, and successors, give full power to all and every the members of the said Company, qualified to vote as aforesaid, in a General Court duly assembled, by the majority of the votes of those there present, to make and constitute such by-laws, rules, orders, and regulations, for and relating to the affairs and government of the said Company, so that such by-laws, rules, orders, and regulations, be not repugnant to the laws and statutes of this realm, nor repugnant to any of the enactments herein contained. Provided always, that such by-laws, rules, orders, and regulations, be duly recorded in the public book of the said Company, so that the same may be at all seasonable times accessible to the members and officers of the said company.

And we do further constitute, direct, and appoint, that the governor, or in his absence the deputy-governor, shall preside and act as chairman of the said Court of Directors and General Meetings of the said company; and if it shall so happen that at any meeting of the said directors, or at any general meeting of the said Company, neither the governor nor deputy-governor shall attend, it shall be lawful for the major part of the directors then present to appoint a chairman for that occasion, and in case no director shall be present at a general meeting of the said Company, or in case the director or directors present shall not appoint a chairman for such occasion, it shall be lawful for the members of the said Company then present, or the major part of them, to appoint a person to preside at such meeting, and the governor, deputy-governor, or other person, presiding at any such meeting, shall in case of any equality of votes have a second or casting vote.

And we do hereby, for us, our heirs, and successors, ordain, declare, limit, direct, and appoint, that all sums of money paid and received in respect of the shares of the said Company, together with all acquisitions or investments whatsoever, whether real or personal, or whosoever lying, being and situated in the United Kingdom or elsewhere, whether vested in the said company in their own name or in the names of trustees, or in what manner soever the same shall be vested, shall form and constitute the joint or capital stock of the said Company and their successors for ever, and shall be liable and answerable for the debts, liabilities, and engagements of the said Company.

And we do further, by these presents, for us, our heirs, and successors, grant unto the said Company, and we do will and direct that in case the sum already subscribed shall be found insufficient, in the opinion of the Court of Directors of the said company, to carry into full effect the beneficial purposes aforesaid, then and in such case it shall be lawful for the members of the said company for the time being, in pursuance of any resolution adopted at one and confirmed at a subsequent General or Special Court, to raise and contribute amongst themselves in such shares and proportions as they shall think proper, or by the admission of new subscribers, any further or other sum of money not exceeding the sum of one million pounds sterling, and every subscriber towards raising such further sum of money shall be a proprietor of and in the capital of the said company, and shall have a like vote in respect of his or her shares in the said additional sum so to be raised, and be liable to such forfeitures, and stand interested in all the rights, profits, and advantages of the said Company, in proportion to the sum he, she, or they shall subscribe to the said capital so extended, to all intents and purposes as if such further or other sum hereby allowed to be subscribed for or raised had been originally part of the capital of the said Company, any thing hereinbefore contained to the contrary in any wise notwithstanding.

And we do hereby further, for us, our heirs, and successors, grant unto the said company and their successors, and we do will, direct, and appoint, that it shall and may be lawful for the said company, for the purposes aforesaid, not only to purchase, take, hold, sell, let, and dispose of all such lands in the provinces of Upper Canada and Lower Canada as aforesaid and more especially any such lands as shall be granted by us in virtue of our royal prerogative, or by the authority of Parliament, but also to contract for, bargain, purchase, and export all such merchandises, matters, and things as may be necessary

or convenient aforesaid, or to and to sell any payment or sum and negotiate or mitted to their lands, tenements Lower Canada in order to the c dilated as afo per annum at and Lower Canada Council may those parts of acts and things of this realm is And we fr lend money to ever, or to any said provinces from such gov rity of or upon provinces, or the interest the purposes assigns.

And we do deputy-governor at all convened the direction arment in all res by any general may direct and ticularly set forth other the traffic contracts, whet ances, and all of solicitors, attorn in the affairs and place or remove which they shall enforce, perform bind the said com which the said d sons appointed u pointed. or convenient for the cultivation, clearing, or improvement of the lands which may be purchased by the said company as aforesaid, or as hereinafter mentioned; and shall also be empowered, and they are hereby authorised, to import and receive, and to sell and dispose of all goods and merchandise which may be consigned or remitted to them from such their lands in payment or satisfaction of any rent or purchase-money arising from the occupation or sale of any such lands, and to receive and negotiate in England bills of exchange, promissory notes, or other negotiable securities for money which may be remitted to them on account of any such rent or purchase money; and also to purchase, take, hold, sell, and dispose of all lands, tenements, and hereditaments situate in Great Britain and Ireland, or in the said provinces of Upper Canada and Lower Canada, or elsewhere in our dominions, which it may be necessary or convenient for the said company to acquire in order to the carrying the purpose of this charter into more complete effect. Provided that such lands, tenements, and hereditaments as may be purchased in Great Britain and Ireland be not altogether of more than the value of five hundred pounds per annum at the time of such purchase; and also provided that any such purchases in the said provinces of Upper Canada and Lower Canada be of such annual value only as we by any order or orders to be by us issued with the advice of our Privy Council may from time to time authorise and direct, and be made in conformity with the local laws and statutes in force in those parts of our dominions in which the land so to be purchased may be situate, and the said company may do all other acts and things in relation to the premises in all respects as beneficially as any other body politic or corporate or any subject of this realm is by law entitled to do.

And we further will, declare, and appoint, that it shall and may be lawful to and for the said company to advance and lend money to the local governments in the said provinces of Upper Canada and Lower Canada for any purposes whatsoever, or to any trustees, commissioners, or other persons having the care of making or executing any public works in the said provinces or either of them, at such rate of interest as may be agreed upon in every such case, and to take and accept from such government, or from any such trustees, commissioners, or other persons, such assignment, grant, or other security of or upon any public revenues of the said provinces, or upon any rates, tolls, charges or assessments within the said provinces, or any or either of them, or such other security for the repayment of the money so to be advanced; and also for the interest thereon as to the said company shall appear satisfactory, and which shall be good, valid, and effectual for the purposes expressed therein, and shall and may be enforced for the benefit of the said company, their successors, and assigns.

And we do further, by these presents, for us, our heirs, and successors, grant, direct, and appoint, that the said governor, deputy-governor, and other directors for the time being, or any five or more of them, shall and may from time to time, and at all convenient times, and when and as often as they shall think fit, assemble and meet together at any place or places for the direction and management of the affairs of the said company, and being so assembled shall in such direction and management in all respects conform themselves to such by-laws, rules, orders, and regulations, as shall from time to time be made by any general or special court of the said company, and subject to all such by-laws, rules, orders, and regulations, shall and may direct and manage the affairs and business of the company, in all and singular the matters and things hereinbefore particularly set forth in the disposition and investment of all cash, bills, notes, and other securities to the company, and in all other the traffic, commerce, and dealings of the said company, and that they shall have power and authority to enter into all contracts, whether under seal or otherwise, on behalf of the company, and to make and execute all assignments, conveyances, and all other acts to which the corporate seal is required to be affixed, and to appoint a clerk, secretary or secretaries, solicitors, attorneys, commissioners, factors, agents, or servants, which shall from time to time be necessary to be employed in the affairs and business of the said company, and to allow and pay them reasonable salaries and allowances, and to displace or remove them or any of them as they shall see cause, and generally to do and act in all matters or things whatsoever which they shall judge necessary for the well ordering and managing of the said company, and the affairs thereof, and to do, enforce, perform, and execute all the powers, authorities, provisions, acts, and things in relation to the said company, and to bind the said company as if the same were done by the whole corporation. Provided always, that all matters and things which the said directors shall in manner aforesaid and in writing order and direct to be done by sub-committees or other persons appointed under them, shall and may, by virtue of such orders, be done by the said sub-committee or other persons appointed. Provided also, that in no case shall the corporate seal of the said company be affixed to any instrument whatsoever except by order in writing of the court of directors, and in the presence of at least two of the directors, who shall attest by their signatures such sealing, and that the same was done by order of the court of directors, which attestation shall be evidence of the fact of such order.

Provided always, and we do further declare and ordain, that all and every contract or contracts made or entered into by or on behalf of any governor, deputy-governor, director, auditor, or secretary of the said company, or in which any such governor, deputy-governor, director, auditor, or secretary shall be either directly or indirectly interested or concerned for doing or causing to be done any work for or on behalf of the said company, or for supplying any of the articles or materials or things to or for the use of the said company, shall be absolutely null and void to all intents and purposes whatsoever; and every such governor, deputy-governor, director, auditor, and secretary, who shall enter into any such contract or contracts as aforesaid, shall ipso facto cease to be such governor, deputy-governor, director, auditor, or secretary, as the case may be, and a new election of some other proprietor duly qualified shall take place in manner herein mentioned.

Provided, nevertheless, that all acts done by such governor, deputy-governor, director, auditor, or secretary, in his official character on behalf of the company before such successors be elected, shall be valid and binding.

And we do further direct and appoint, and our will is, that interest calculated to the Tenth day of July, One thousand eight hundred and twenty-six, shall within one month from the date hereof be payable to the members of the said company at and after the rate of four per centum per annum from the respective periods at which the said deposit and subsequent calls (if any) shall have been paid, to be calculated upon and in respect of such deposit and calls; and on the Tenth day of January and Tenth day of July, One thousand eight hundred and twenty-seven, and on each and every Tenth day of January and Tenth day of July, until and ending with the Tenth day of January, One thousand eight hundred and thirty-one, further interest at the like rate shall be calculated and become payable to the said members upon the said deposit, and upon the amount of the several calls which shall or may have been made upon and paid by them; and from and after the Tenth day of January, in the year One thousand eight hundred and thirty-one, it shall and may be lawful to and for the said court of proprietors twice in every year, in the said months of June and December, if the state of the affairs of the said company shall warrant the same, to declare such dividend to and amongst the members of the said company for the half year ending on the Tenth day of July and on the Tenth day of January next succeeding such respective general court, as to the said court of proprietors shall appear proper, in addition to such payment of interest as aforesaid; and in declaring such dividends respectively, due regard shall be had to all the debts and engagements of the said company, and the risks and contingencies affecting their assets and securities, and so as no dividend nor interest after the said Tenth day of January, One thousand eight hundred and thirty-one, be in any case paid out of the capital of the said company, or otherwise than as a dividend of the whole or a part of the gains and profits of the said company.

And we do further will and direct, that all conveyances which shall be made by the said company to any individual or individuals of any part of the lands to be granted to, or purchased, or held by the said company, may be made in manner and may be in the form prescribed in and by the said Act of Parliament.

And we do, for us, our heirs, and successors, grant and declare, that these our letters patent or the enrolment thereof shall be in all things valid and effectual in the law according to the true intent and meaning of the same, and shall be taken, construed, and adjudged in the most favourable and beneficial sense for the best advantage of the said corporation, as well in our courts of record as elsewhere, notwithstanding any non-recital, mis-recital, uncertainty, or imperfection in these our letters patent; and our will and pleasure is, that these presents to the company aforesaid, under the great seal of the United Kingdom of Great Britain and Ireland, shall be in due manner made and sealed without fine or fee, great or small, to us in our Hancouer or elsewhere, to our use thereof, or any ways to be rendered, paid, or made.

In witness whereof, we have caused these our letters to be made patent, witness ourself at our palace at Westminster, this Nineteenth day of August, in the Seventh Year of our Reign.

By Writ of Privy Seal,

SCOTT.

Q Q.—THE NEW BRUNSWICK AND NOVA SCOTIA LAND COMPANY

was established in London about February, 1832. From the want of information prevailing in the public mind, it may be almost said, as to the geographical position of this province, but certainly as to the value of its fertile soil, so well adapted for agricultural purposes, more time than usual was consumed in forming the company; this point being settled, a contract was concluded, under which the crown agreed to sell this company about 500,000 acres of land, lying in the centre of the province, at the price of 2s. 6d. sterling per acre, the company to pay the money by instalments in four years, in sums of about 7,000l. half yearly.

The supreme Board of Management sits in London. The affairs of the company are delegated to a chief and sub-commissioner and other agents resident in the province. The capital is 200,000l. stock, with a power to increase the capital to 400,000l. The company's powers are comprised in a charter of Incorporation from the crown, and on an act of parliament passed in 1833.

The land included in the grant is found, on examination, to be equal in fertility to the best land in New Brunswick; its position is in the centre of the province, from south-west to north-east; approaching the St. John's River, within about eight miles of Fredericton, and bounded on the N. E. by the Northumberland county line, a few miles beyond the course of the S. W. branch of the Miramichi, a considerable portion of which is included in the grant; other streams and branches of rivers running generally in a direction N. W. to S. E. intersect the grant, by which the pine and other timber cleared from the lands may be rafted to the St. John's or Miramichi rivers.

ABSTRACT OF THE CHARTER INCORPORATING THE NEW BRUNSWICK AND NOVA SCOTIA LAND COMPANY.

[There is also an Act of Parliament granting certain powers, dated 22nd May, 1834.]

The Charter, after the usual preamble, "William the Fourth, by the Grace of God," &c., and reciting that divers persons had united together for purchasing lands, and beseeching a charter of incorporation, contains (in brief) the following provisions for establishing the company.

1. Ordains, constitutes, declares and appoints, that John Labouchere, Esq., and others therein named, together with such others as may hereafter become proprietors of the company's capital stock, "shall be one body politic and corporate in deed and in name, by the name of *The New Brunswick and Nova Scotia Land Company*," and by that name shall and may sue and be sued," &c.

That the company "shall and may have and use a common seal," &c.; "and that it shall and may be lawful for the said company and their successors, the same common seal from time to time at their will and pleasure to break, change, alter or make anew, as to them shall seem expedient;" and declares, "that by the name of the New Brunswick and Nova Scotia Land Company, they shall have perpetual succession."

2. Declares and grants, "that the said corporation shall be and is established for the purpose of purchasing, holding, improving, clearing, settling, cultivating, letting, leasing, exchanging, selling and disposing of waste lands and other lands, tenements and hereditaments in our provinces of New Brunswick, Nova Scotia, including Cape Breton and Prince Edward Island, in North America, and the dependencies of the said provinces."

That the company may invest such part of their capital as may be necessary in purchasing, clearing, &c. such lands as may be granted by the crown, or otherwise acquired by them in the provinces; "and build roads, canals, drains, bridges, and other internal communications, houses, schools, chapels, mills, wharfs and other buildings and works" necessary for the improvement of the lands; "and export, sell and dispose of all such merchandise, matters and things" requisite for the same; "and to import and receive, sell and dispose of all goods and merchandise which may be consigned or remitted to them, or in payment and satisfaction of any rent or purchase-money arising from the occupation or sale of any such lands, and to purchase, hold, hire, build and charter ships and other vessels for the purpose of conveying and transporting persons willing and desirous to emigrate to our said provinces and their dependencies, and also exporting such merchandise, matters and things, and importing such goods, and merchandise and produce from or to our said provinces and their dependencies, to or from any other place or places."

3. Further declares and grants, that it shall be lawful for the said company to open, search for win and work in or under any of their said lands, any mines, pits, beds, veins and seams of copper, tin, lead, iron, iron ore, stones, clay, and all other ores, minerals, metals, metallic substances, matters and products, other than and except gold and silver, and also other than and except coal and culm, unless such coal and culm shall at any time or times hereafter be granted or demised to them by our heirs or successors, or shall be by them acquired from any person or persons to whom such coal and culm may have been so granted or demised, in which cases it shall be lawful for the said company to open, search for, win, and work any such coal or culm in the manner authorized by such grants and demises respectively; the said company paying the rent or rents, royalty or royalties, and performing and fulfilling the covenants, agreements and conditions in such grants or demises to be reserved and contained; and to do all other acts for effectually working the said mines. "And that it shall be lawful for the said company to receive monies and other deposits of emigrants, settlers or other persons, in or proceeding to or from our said provinces, for the purpose of transmitting the same from or to our said United Kingdom or to from our said provinces," or any other of the said provinces; and that it shall be lawful for the said company "to make loans and advances of money to emigrant settlers and others resident within our said provinces," upon lands or other legal security within the provinces, also to contract for and execute any public works undertaken by or on behalf of government in any of the said provinces.

4. Further grants the royal license to purchase any lands, tenements, &c. whatsoever in the provinces

5. Declares and ordains, that "the present capital or joint-stock of the said company" for carrying on the undertaking, &c. "shall be a sum not exceeding Two hundred thousand pounds sterling."

That subscribers shall be entitled to share in the capital stock in proportion to their subscriptions, ("no such subscription being less than twenty-five pounds,") and "shall be entitled to a proportionable share of the profits," &c.

That the names of proprietors be entered in a book, with the amount of their share.

That all persons subscribing, shall pay the sum or sums respectively subscribed, or such parts thereof "as shall from time to time be called," pursuant to the powers of this charter, and "at such times and places, and to such person or persons, and in such manner as shall be ordered and directed by any court of directors for the time being."

That all transfers of shares in the capital stock, shall be registered by some authorized officer of the company in a book, "and a fee shall be paid to and for the use of the said company not exceeding two shillings and sixpence for every such registry;" and that until the transfer be registered in the company's books no person shall be deemed a proprietor, "or be entitled to any dividend or beneficial interest" therein; "nor until six calendar months after such transfer shall have been made and registered," be entitled to vote at any meeting as a proprietor, &c.

That after any call for money shall be made, no person can sell or transfer their share or shares in the stock until such call has been paid, "and notwithstanding that the time appointed for the payment thereof may not have arrived."

6. Further declares and ordains, that persons claiming any shares in the capital or profits in right of marriage, a copy of the register of such marriage shall be left with the proper officer, and on entry thereof made "before such person, shall be entitled to sell or assign any such stock, or to claim payment of dividend or dividends in respect thereof, or to vote as proprietor of such stock."

That persons claiming any share in the capital, &c. "by virtue of any will or bequest, or in course of administration, the probate copy of the will or letters of administration, in case the proprietor shall have died intestate, shall be produced," and an entry made by the proper officer "of such will or so much thereof as shall relate to the disposition of the share of the testator or of and in such stock, or of the letters of administration, in case the proprietor shall have died intestate," before any persons can sell, claim dividend, or vote as a proprietor; and that "for every such entry of marriage, will or letters of administration, a fee not exceeding the sum of ten shillings" shall be paid.

7. Further declares, that the directors for the time being, or so many as shall form a court, or the major part of them "shall have full power to make such call or calls, for money from the several subscribers and proprietors for the time being," their executors, &c. for their shares, or the court of directors may find necessary, the sums so called for to be paid to the company's bankers, or as the court shall appoint "of which time and place, twenty days notice shall be given in the London Gazette, and in such four or more daily newspapers usually published in the city of London or county of Middlesex, as the said court of directors shall direct."

And further declares, that if any subscriber, their executors, &c. "shall neglect or refuse to pay" their portion of the money called for by the directors, "during the space of three calendar months, next after the time appointed for payment thereof, together with lawful interest," in such case the subscribers will be liable "absolutely to forfeit his, her, or their respective share or shares, of, and in, the capital stock of the said company, and all profits and advantages thereof, and of all monies theretofore advanced by him, her, or them, on account thereof, to and for the use and benefit of the said company," and that the court of directors may order at any time thereafter, that such forfeited shares "be sold at a public sale, for the most money that can be gotten for the same, and the produce shall go to, and make part of the capital stock of the said company, and such share or shares, so forfeited and sold, shall be assigned and transferred to the purchaser by an instrument under the common seal of the said company," but no advantage of such forfeiture shall be taken till after thirty days notice, under the hand of some duly authorised officer of the company, left at their place of abode, nor unless the same be declared forfeited at some general or special general meeting of proprietors, to be held not earlier than three calendar months after such forfeiture shall happen, whereupon such proprietor is discharged from all further liability in respect of such share, but this does not deprive the power of compelling payment of any unpaid part if the directors prefer so doing.

8. Further declares, that there shall be "out of the members of the said company, a governor and a deputy-governor, who shall also be directors, and ten other directors," also "three auditors," which "governor, deputy-governor, and other directors, or any five of them shall institute, and be called a court of directors" for managing the affairs of the company.

And further ordains, that the court of directors for the time being, may appoint "any one of their own number to be a sitting director," to attend more immediately to the business of the company, subject to regulations and removal by a court of directors, who shall be competent to appoint another if they see fit, and to make such allowances as they think right as remuneration.

9. Further ordains, that it shall be lawful for "every the members or proprietors of the said company" to assemble together at any places in the cities of London and Westminster for the choice of governor, deputy-governor, directors and auditors, and for other purposes, of which, "twenty-one days previous notice" must be given by advertisement in "the London Gazette, and in three or more daily newspapers," and that such assembly shall be called, "a general court of the said company," and that such court have power to adjourn. That on the second Thursday in March 1836, and every succeeding year on the same day shall be

yearly chosen, all succeeding directors and auditors out of and by the members personally present entitled to vote.

The qualification to vote, being holders of stock £100 to one vote, £500 two votes, £1000 three votes, £2,000 and upwards, "four votes and no more." The election to be by ballot or otherwise as may be determined. It being ordained that "one half of the directors, and one of the auditors shall go out of office every year, to commence in the year 1836, the directors and auditors going out of office, for the time being, are, and shall at all times hereafter, be capable of being re-elected." The first directors and auditor going out, to be determined by drawing lots, in such manner, as the directors shall agree, and that the names of directors and auditors going out successively, be posted in a conspicuous part of the company's office in London or Westminster, at least fourteen days before the day of election.

That the governor, deputy governor and directors, from time to time chosen, be elected for two years, and the auditor so chosen, for three years, unless they be chosen in the place of some other by death, resignation, or otherwise, in which case, they are chosen for the time such party had to serve, &c. but that no person shall be an auditor while he shall be a director, or a director while an auditor.

10. Further directs, that no person shall be chosen governor, deputy-governor, or director, "unless he shall, at the time of such election, be a natural born or naturalised subject of the United Kingdom, and shall also have in his own name, and in his own right, five hundred pounds or more, of the capital stock of the said company," and that no person can be chosen auditor except under the same restrictions, "and having in his own name, and in his own right, two hundred pounds or more of the capital stock." And that no director or auditor shall continue in their respective offices "longer than the continuance of such respective interest, and should any governor, deputy governor, director, or auditor, be divested of his stock, to reduce it to "a less amount than aforesaid," the directors may at this next meeting, after the knowledge of such fact, declare such office vacant, and the vacancy be filled up at the general court, "which shall be duly held next after such declaration."

And that in case any governor, deputy-governor, director, or auditor, die, resign, or be removed before the annual election, the members qualified to vote at a general court, shall choose any other member qualified to fill such office, who shall continue therein for the period such governor, &c. had to serve.

11. Further ordains, that every proprietor intending to propose himself for any office of governor, director, &c. "shall leave notice in writing," with the sitting director or clerk of the company, "for the information of the proprietors at least 21 days before, and exclusively of the day of election," and a list of the candidates be fixed up in the principal office in London or Westminster, "at least 14 days before the day of election," and "10 days before the day of election, make out a correct and alphabetical list of the names and residencies of all the then proprietors," with the number of votes each is entitled to give, and to which each proprietor may have access.

And ordains, that in case of death, resignation, or failure, to elect directors, an insufficient number to compose a court of directors "shall not in any manner tend to work the dissolution of the said corporation," but that the general body of members may be convened by the surviving directors to elect the requisite number of directors.

And appoints that it may be lawful "at any general court to grant such salaries and allowances to be paid" to the governors, directors, (except the sitting director) and auditors, "as may be deemed expedient," of which notice must be given in the Gazette and three papers, one month at least prior thereto, setting forth the purpose.

12. Further appoints there shall be held "one general court of the said company at least in each year on the second Thursday in March," at which dividends may be declared, and in case a general court fail to be held on such day, "any three or more of the directors for the time being" may summon the court within six weeks ensuing the day on which it should have been held, giving the proper notice.

And appoints "that upon the requisition in writing of any fifteen or more of the members of the said company, each having not less than two hundred pounds in the said capital stock," the directors shall within 30 days thereof, "call a special general court," with proper notice, "for the purposes to be mentioned in such requisition," in default of which "it shall and may be lawful for the said fifteen or more members" as aforesaid, upon fourteen days previous notice "by advertisement under their hands" in the London Gazette and four daily papers, "and by writing affixed on the Royal Exchange," to summon a special general court, and there debate upon any business mentioned in such requisition but no other, and have power to adjourn the same to a day then to be fixed upon, and so from time to time to determine finally upon the questions to be discussed, &c.

And further directs that no business shall be done at any general or special general court "unless there shall be present within one half of an hour next after the time appointed for such court, and also at the time or times of making any election or putting any question or questions to the vote of at least fifteen members of the said company qualified to vote," and in default, the court to be adjourned to the next general court or some day not earlier than fifteen days from the day of adjournment as may be then determined, of which ten days' notice shall be given in the Gazette and four daily papers.

And further, gives full powers at any general or special general court, to make, alter, and repeal any orders and regulations relative to the affairs and government of the company, to be recorded in a book which may be accessible to the members of the company.
